California Regional Water Quality Control Board  
Los Angeles Region  
ATTN: Jenny Newman  
320 W. 4th Street, Suite 200  
Los Angeles, CA 90013

**Subject: Comments on the Proposed Amendment to the  
*Water Quality Control Plan - Los Angeles Region*  
(Basin Plan) to Adopt Site-Specific Objectives for Lead  
and Copper in the Los Angeles River Watershed and to Revise  
the Total Maximum Daily Load (TMDL) for Metals in the Los  
Angeles River and Tributaries**

Dear Ms. Newman:

The City of Downey values the opportunity to provide comments on the Proposed Amendment to the *Water Quality Control Plan - Los Angeles Region* (Basin Plan) to Adopt Site-Specific Objectives for Lead and Copper in the Los Angeles River Watershed and to revise the Total Maximum Daily Load (TMDL) for Metals in the Los Angeles River and Tributaries. The City of Downey appreciates the efforts of the Los Angeles Regional Water Quality Control Board (Regional Board) staff to consistently and thoughtfully engage during study development and implementation. The City of Downey joined with over 30 other cities, the County of Los Angeles, and the California Department of Transportation (Caltrans) over seven years ago to identify special studies to improve our understanding the watershed and support implementation efforts to reduce the effects of urban runoff on water quality. As part of those efforts, the studies that form the basis of the proposed amendments were identified as an appropriate step in ensuring the latest science specific to our watershed is applied.

Based on the available data, we are concerned that we will not be able to consistently meet the interim and final TMDL limits in our MS4 Permit at this time. However, the results of the studies demonstrate that the current TMDL targets for copper and lead can be revised without adversely affecting the beneficial uses. The

revised targets will still be as protective as intended by the TMDL. The development of information to support this determination occurred through a thorough scientific review process that included Regional Board staff and an independent Technical Advisory Committee. The copper WER and lead recalculation studies followed established USEPA methods and were applied as intended when the California Toxics Rule (CTR) was promulgated.

The City of Downey appreciates the Regional Board's consideration and adoption of the proposed amendments with the incorporation of the detailed technical comments provided by the Los Angeles River Watershed Metals TMDL Steering Committee.

Sincerely,

CITY OF DOWNEY

Gilbert A. Livas
