Page 3 (14-009 in the Board package)	Board Resolution	Modify	<p>Make the following modification for Finding 18:</p> <p>18. <u>In developing this reconsideration, Regional Board staff reviewed the numeric targets, loading capacity, and final wasteload allocations (WLAs) and load allocations (LAs) based on studies regarding the threshold levels needed for protecting beneficial uses and other information on local conditions. Based on this review, Regional Board staff did not recommend any changes to the numeric targets, loading capacity, or final WLAs or LAs as part of this reconsideration because these elements remain appropriate given current information on the impacts of trash on waterbodies and their beneficial uses. The Regional Board concurs with staff's recommendation that no changes to the zero trash numeric target or final WLAs and LAs are warranted at this time based on current information.</u></p> <p><u>Therefore, Tthis reconsideration is does not a general reconsideration of modify each and every element of these TMDLs; the fundamental technical elements including the Numeric Targets, Loading Capacity, WLAs and Load Allocations, Margin of Safety, and Critical Condition and Seasonal Variation have not been significantly fundamentally changed. Neither are there significant changes proposed to the overarching compliance options identified in the TMDLs – full capture systems, partial capture devices, and institutional controls. The changes in the revision of these TMDLs ensure consistency between the two TMDLs where appropriate, provide clarity regarding compliance demonstration as</u></p>	To clarify the Resolution in response to stakeholder comments.

			responsible entities approach final deadlines, and improve compliance monitoring and ensure receiving water monitoring.	
Page 5 (14-048 in the Board package)	Staff Report	Modify	<p>The State Water Board has proposed<u>adopted</u> an amendment to incorporate provisions to control discharges of trash to the Water Quality Control Plan for Ocean Waters of California (Ocean Plan) and a similar amendment to the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, and Estuaries (ISWEBE Plan) Part 1 Trash Provision (State Trash Amendments). The purpose of the State Trash Amendments is to provide a statewide regulatory approach to protect aquatic life and public health beneficial uses from impacts due to trash in waterbodies statewide.</p> <p>On June 10, 2014, the State Water Board released draft documents on the State Trash Amendments to the public for comment. On December 31, 2014, the State Water Board released proposed final documents for public review (SWRCB, 2014). On March 26, 2015, the State Water Board released revised proposed final documents (SWRCB, 2015). The State Board Adoption adopted is anticipated in the amendments on April 7, 2015.</p>	To modify the staff report based updated information.
Page 15 (14-058 in the Board package)	Staff Report	Modify	This reconsideration is <u>does</u> not a general reconsideration of <u>modify</u> each and every element of these TMDLs. No significant <u>fundamental</u> changes are proposed to the existing fundamental technical TMDL elements that were established in the original TMDLs, including the Numeric Targets, Loading Capacity, WLAs and LAs, Margins of Safety, and Critical Condition and Seasonal Variations in either the Los Angeles River or Ballona Creek Trash TMDLs. Neither are there significant changes	To clarify the staff report based on stakeholder comments.

			<p>proposed to the overarching compliance options – full capture systems, partial capture devices, and institutional controls – identified in the Los Angeles River and Ballona Creek Trash TMDLs. The proposed changes are intended to ensure consistency between the two TMDLs where appropriate; advance alternatives for demonstrating full compliance; include greater specificity regarding responsible entities assigned WLAs and LAs; and expand monitoring requirements.</p>
