

## Attachment A to Resolution No. 2007-XX

### **Amendment to the Water Quality Control Plan—Los Angeles Region to incorporate the Harbor Beaches of Ventura County (Kiddie Beach, Hobie Beach, and Harbor Cove Beach) Bacteria TMDL**

Proposed for adoption by the California Regional Water Quality Control Board, Los Angeles Region on XXXX, XX, 2007.

#### **Amendments:**

##### **Table of Contents**

Add:

Chapter 7. Total Maximum Daily Loads (TMDLs) Summaries  
7-28 Harbor Beaches of Ventura County (Kiddie Beach, Hobie Beach, and Harbor Cove Beach) Bacteria TMDL

##### **List of Figures, Tables and Inserts**

Add:

Chapter 7. Total Maximum Daily Loads (TMDLs)  
Tables  
7-28 Harbor Beaches of Ventura County Bacteria TMDL  
7-28.1. Harbor Beaches of Ventura County Bacteria TMDL: Elements  
7-28.2. Harbor Beaches of Ventura County Bacteria TMDL: Final Allowable Exceedance Days by Location  
7-28.3. Harbor Beaches of Ventura County Bacteria TMDL (Channel Islands Harbor Beaches): Implementation Table  
7-28.4. Harbor Beaches of Ventura County Bacteria TMDL (Harbor Cove Beach): Implementation Table

##### **Chapter 7. Total Maximum Daily Loads (TMDLs) Summaries, Section 7-28 (Harbor Beaches of Ventura County (Kiddie Beach, Hobie Beach, and Harbor Cove Beach) Bacteria TMDL)**

This TMDL was adopted by the Regional Water Quality Control Board on [Insert Date].

This TMDL was approved by:

The State Water Resources Control Board on [Insert Date].  
The Office of Administrative Law on [Insert Date].  
The U.S. Environmental Protection Agency on [Insert Date].

The following table includes the elements of this TMDL.

## Attachment A to Resolution No. 2007-XX

**Table 7-28.1. Harbor Beaches of Ventura County Bacteria TMDL: Elements**

Element	Findings and Regulatory Provisions
<b>Problem Statement</b>	Elevated bacteria indicator densities are causing impairment of the water contact recreation (REC-1) beneficial use at Hobie Beach, Kiddie Beach (also known as Channel Islands Harbor Beach and Channel Islands Beach Park), and Harbor Cove Beach (also known as Peninsula Beach). Hobie and Kiddie Beach are referenced in the Staff Report as the Channel Islands Harbor Beaches. Swimming in marine waters with elevated bacteria indicator densities has been associated with adverse health effects. Specifically, local and national epidemiological studies compel the conclusion that there is a causal relationship between adverse health effects and recreational water quality, as measured by bacteria indicator densities.
<b>Numeric Target</b> (Interpretation of the numeric water quality objective, used to calculate allocations)	<p>The TMDL has a multi-part numeric target based on the bacteriological water quality objectives for marine water to protect the water contact recreation use. These targets are the most appropriate indicators of public health risk in recreational waters.</p> <p>Bacteriological objectives are set forth in Chapter 3 of the Basin Plan. The objectives are based on four bacteria indicators and include both geometric mean limits and single sample limits. The Basin Plan objectives that serve as the numeric targets for this TMDL are:</p> <ol style="list-style-type: none"> <li>1. <u>Rolling 30-day Geometric Mean Limits</u> <ol style="list-style-type: none"> <li>a. Total coliform density shall not exceed 1,000/100 ml.</li> <li>b. Fecal coliform density shall not exceed 200/100 ml.</li> <li>c. Enterococcus density shall not exceed 35/100 ml.</li> </ol> </li> <li>2. <u>Single Sample Limits</u> <ol style="list-style-type: none"> <li>a. Total coliform density shall not exceed 10,000/100 ml.</li> <li>b. Fecal coliform density shall not exceed 400/100 ml.</li> <li>c. Enterococcus density shall not exceed 104/100 ml.</li> <li>d. Total coliform density shall not exceed 1,000/100 ml, if the ratio of fecal-to-total coliform exceeds 0.1.</li> </ol> </li> </ol> <p>These objectives are based on health risk for marine recreational waters of 19 illnesses per 1,000 exposed individuals as set by the United States Environmental Protection Agency (USEPA, 1986). For the Harbor Beaches of Ventura County, the targets will apply at existing monitoring sites, with samples taken at ankle to knee-high depths. These targets apply during both dry- and wet-weather.</p> <p>This TMDL uses a “reference system/anti-degradation approach” which means that on the basis of historical exceedance levels at existing monitoring locations, including a local reference beach</p>

## Attachment A to Resolution No. 2007-XX

Element	Findings and Regulatory Provisions
	<p>within the Los Angeles Region, a certain number of daily exceedances of the single sample bacteria objectives are permitted. The allowable number of exceedance days is set such that (1) bacteriological water quality at any site is at least as good as at a designated reference site within the watershed and (2) there is no degradation of existing bacteriological water quality. This approach recognizes that there are natural sources of bacteria that may cause or contribute to exceedances of the bacteriological objectives and that it is not the intent of the Regional Board to require treatment or diversion of natural coastal creeks or to require treatment of natural sources of bacteria from undeveloped areas.</p> <p>The geometric mean targets may not be exceeded at any time. The rolling 30-day geometric mean will be calculated on each sample day. For the single sample targets, each existing monitoring site is assigned an allowable number of exceedance days for three time periods (1) summer dry-weather (April 1 to October 31), (2) winter dry-weather (November 1 to March 31), and (3) wet-weather (defined as days with 0.1 inch of rain or greater and the three days following the rain event.)</p>
<b>Source Analysis</b>	<p>Bacteria sources in the Harbor Beaches of Ventura County include anthropogenic and non-anthropogenic sources and point and non-point sources. Each of these sources contributes to the elevated levels of bacteria indicator densities at the Harbor Beaches of Ventura County during dry- and wet-weather. As of December 2006, there are nine active, National Pollutant Discharge Elimination System (NPDES) permits or Waste Discharge Requirements (WDRs) for discharges to Channel Islands Harbor and Ventura Harbor. Of the nine active NPDES permits and WDRs, discharge associated with the Ventura Port District's individual NPDES permit is a potentially significant source of bacteria loading.</p> <p>Discharges from the Statewide MS4 Permit for the California Department of Transportation (Caltrans) are a potentially significant source of bacteria loading.</p> <p>Discharges from general NPDES permits, individual NPDES permits, WDRs, the Statewide Industrial Storm Water General Permit, and the Statewide Construction Activity Storm Water General Permit are not expected to be a significant source of bacteria.</p> <p>While a source identification study conducted at the Channel Islands Harbor indicated that local non-point sources are the majority contributor in summer dry-weather, high bacteria densities and exceedances during wet-weather may be more indicative of urban and agricultural run-off.</p>

## Attachment A to Resolution No. 2007-XX

Element	Findings and Regulatory Provisions
	<p>Potential non-point sources of bacteria contamination at the Harbor Beaches of Ventura County include: marina activities such as waste disposal from boats, boat deck and slip washing, swimmer “wash-off”, and restaurant washouts; natural sources including birds, waterfowl, and feral cat; and agricultural sources.</p>
<b>Loading Capacity</b>	<p>Loading capacity for the Harbor Beaches of Ventura County are defined in terms of bacteria indicator densities, which is the most appropriate for addressing public health risk, and is equivalent to the numeric targets, listed above. As the numeric targets shall be met at the specific sampling locations, which are representative of the corresponding beaches, no degradation or dilution allowance is provided.</p>
<b>Waste Load Allocations</b> (for point sources)	<p>Waste load allocations (WLAs) are expressed as allowable exceedance days.</p> <p>The allowable number of exceedance days for a monitoring site for each time period is based on the more stringent of two criteria (1) exceedance days in the designated reference system and (2) exceedance days based on historical bacteriological data at the monitoring site. This ensures that bacteriological water quality is at least as good as that of a largely undeveloped system and that there is no degradation of existing water quality.</p> <p>For each beach, allowable exceedance days are set on an annual basis as well as for three time periods. These three periods are:</p> <ol style="list-style-type: none"> <li>1. Summer dry-weather (April 1 to October 31)</li> <li>2. Winter dry-weather (November 1 to March 31)</li> <li>3. Wet-weather days (defined as days of 0.1 inch of rain or more plus three days following the rain event)</li> </ol> <p>For the Channel Islands Harbor Beaches, the County of Ventura, the Ventura County Watershed Protection District (VCWPD) and associated Municipal Separate Storm Sewer System (MS4) permittees, the City of Oxnard, and Caltrans are assigned WLAs. For Harbor Cove Beach, the Ventura Port District, the County of Ventura, the City of Ventura, the VCWPD and associated MS4 permittees, and Caltrans are assigned WLAs.</p> <p>All WLAs for summer dry-weather single sample bacteria densities at the Harbor Beaches of Ventura County are zero (0) days of allowable exceedances.</p> <p>The WLA for the rolling 30-day geometric mean during any time period or monitoring site at the Harbor Beaches of Ventura County is zero (0) days of allowable exceedances.</p>

Implementation	<p>The regulatory mechanisms used to implement the TMDL will include general NPDES permits, individual NPDES permits, WDRs, the Statewide Industrial Storm Water General Permit, the Statewide Construction Activity Storm Water General Permit, the Conditional Waiver for Dischargers from Irrigated Lands, the Statewide MS4 Permit for Caltrans, and the authority contained in Sections 13263 and 13267 of the Water Code. Each NPDES permit, assigned a WLA, shall be reopened or amended when the permit is reissued, in accordance with applicable laws, to incorporate the applicable WLAs as a permit requirement. LAs for non-point sources will be implemented within the context of</p>																																																												

## Attachment A to Resolution No. 2007-XX

Element	Findings and Regulatory Provisions
	<p>this TMDL.</p> <p>This TMDL will be implemented in accordance with two separate implementation schedules for the Channel Islands Harbor Beaches and Harbor Cove Beach.</p> <p>The compliance and implementation schedules are detailed in Table 7-28.3 and Table 7-28.4.</p> <p>Responsible parties are not specifically required to conduct pilot projects for Best Management Practices (BMPs), though conducting pilot projects is within their discretion. The Regional Board recognizes the long duration required to conduct a pilot project. As such, time is allocated in the implementation schedule for the option of piloting structural BMPs, which include but are not limited to enhanced circulation devices.</p> <p>Special studies are not required for implementation of the TMDL, though conducting special studies is within the discretion of the responsible parties. Time is allocated in the implementation schedule for the option of conducting species studies at Harbor Cove Beach, which include but are not limited to source identification and harbor circulation.</p> <p>The Regional Board shall reconsider this TMDL four years after the effective date of the TMDL for the Harbor Beaches of Ventura County to re-evaluate WLAs and LAs based on monitoring data; to re-evaluate the implementation schedule based on results from pilot projects and special studies for Harbor Cove Beach, if special studies indicate significant source loading is associated with the Ventura Harbor Keys, the Harbor Cove Beach implementation schedule may be revised with respect to the future bacteria TMDL for the Ventura Harbor Keys; to re-evaluate allowable exceedance levels, including whether the allowable number of exceedance days maybe adjusted based on a Ventura County rainfall record; to re-evaluate the selection of the reference beach if additional, appropriate reference beach options have been developed; to consider recommendations for delisting based on data collected during the TMDL monitoring program after BMPs are instituted by responsible parties for Harbor Cove Beach; and to assigned LAs to agricultural lands in the Chanel Islands Harbor and Ventura Harbor subwatersheds based on monitoring in the Conditional Waiver for Dischargers from Irrigated Lands.</p> <p>Five years after the effective date of the TMDL, there shall be no allowable exceedances of the single sample limits, in excess of the allowable exceedances listed in Table 7-28.2, at any monitoring location at the Harbor Beaches of Ventura County</p>

## Attachment A to Resolution No. 2007-XX

Element	Findings and Regulatory Provisions
	<p>during summer dry-weather, winter dry-weather, and the rolling 30-day geometric mean targets shall be achieved. Ten years after the effective date of the TMDL there shall be no allowable exceedances of the single sample limits, in excess of the allowable exceedances listed in Table 7-28.2, at any monitoring location during dry-weather or wet-weather at the Harbor Beaches of Ventura County, and the rolling 30-day geometric mean targets shall be achieved.</p>
<b>Margin of Safety</b>	<p>An implicit margin of safety is included through several conservative assumptions, such as the assumption that no dilution takes place between the on-shore sources and where the effluent initially mixes with the receiving water, and that bacteria degradation rates are sufficient to affect bacteria densities in the receiving water. In addition, an explicit margin of safety has been incorporated, as the load allocations will allow exceedances of the single sample targets no more than 5% of the time on an annual basis, based on the cumulative allocations for dry- and wet-weather. The Water Quality Control Policy for Developing California's Clean Water Act Section 303(d) List concludes that there are water quality impairments using a binomial distribution method which lists waterbodies when the exceedances are between approximately 8 and 10 percent.</p>
<b>Seasonal Variations and Critical Conditions</b>	<p>Seasonal variations are addressed by developing separate waste load allocations for summer dry-weather, winter dry-weather, and wet-weather based on public health concerns and observed natural background levels of exceedance of bacteria indicators.</p> <p>Historic monitoring data for the Harbor Beaches of Ventura County and the reference beach indicate that the critical condition for bacteria loading is during wet-weather due to greater exceedance probabilities of the single sample bacteria objectives then during dry-weather. To more specifically identify a critical condition within wet-weather, in order to set the allowable exceedance days shown in Table 7-28.2, the 90<sup>th</sup> percentile 'storm year'<sup>1</sup> in terms of wet days<sup>2</sup> is used as the reference year for the reference system. Selecting the 90<sup>th</sup> percentile year avoids a situation where the reference system is frequently out of compliance. Selecting the 90<sup>th</sup> percentile year is a more conservative approach that will accommodate a 'worst-case' scenario resulting in fewer exceedance days than the maximum allowed in drier years. Conversely, in the 10% of wetter years, there may be more than the allowable number of exceedance days.</p>

<sup>1</sup> For purposes of this TMDL, a 'storm year' means November 1 to October 31. The 90<sup>th</sup> percentile storm year was 1993 with 75 wet days at the LAX meteorological station.

<sup>2</sup> A wet day is defined as a day with rainfall of 0.1 inch or more plus the 3 days following the rain event.

## Attachment A to Resolution No. 2007-XX

Element	Findings and Regulatory Provisions
<b>Compliance Monitoring</b>	<p>Compliance and monitoring for Channel Islands Harbor Beaches and Harbor Cove Beach is based on existing monitoring protocols and locations.</p> <p>Monitoring shall continue at sampling locations (VCEHD 23000, VCEHD 36000, and VCEHD 37000) and at the current weekly monitoring frequency, consistent with AB411 compliance monitoring. Monitoring shall be conducted on a year-round basis at the current monitoring locations including the summer months (i.e., April to October) and winter months (i.e., November to March). Bacteria sampling shall be conducted in ankle- to knee-high water, consistent with AB411. However, if additional monitoring stations are added or if changes are made to the sampling frequencies or existing monitoring locations, then submittal of a monitoring plan is required for Executive Officer approval.</p> <p>For agricultural dischargers, the Conditional Waiver for Dischargers from Irrigated Lands shall be revised to include monitoring for enrollees in the Channel Islands Harbor and Ventura Harbor subwatersheds.</p>

\*\*A wet day is defined as a day with 0.1-inch or more of rain and the three days following the rain event.

## Attachment A to Resolution No. 2007-XX

**Table 7-28.3 Harbor Beaches of Ventura County Bacteria TMDL (Channel Islands Harbor Beaches): Implementation Table**

Implementation Action	Responsible Parties	Date
Compliance (WLAs): There shall be no exceedances of the interim WLAs (see the WLAs section in Table 7-28.1).	1. County of Ventura 2. Ventura County Watershed Protection District (VCWPD) and associated MS4 Co-permittees <sup>3</sup> 3. City of Oxnard 4. Caltrans	Effective date of the TMDL.
Compliance (LAs): There shall be no exceedances of the interim LAs (see the LAs section in Table 7-28.1).	1. County of Ventura 2. City of Oxnard	Effective date of the TMDL.
Monitoring: Continue monitoring at stations VCEHD 36000 and VCEHD 37000, at a weekly monitoring frequency, and on a year-round basis. Extend the monitoring period for Hobie Beach to include winter months.	1. County of Ventura 2. VCWPD and associated MS4 Co-permittees 3. City of Oxnard 4. Caltrans	Effective date of the TMDL.
Monitoring <sup>4</sup> : Submit a monitoring plan for the Channel Islands Harbor Beaches (CIHB) for approval by the Executive Officer.	1. County of Ventura 2. VCWPD and associated MS4 Co-permittees 3. City of Oxnard 4. Caltrans	Prior to the modification of existing monitoring locations or frequencies.
Implementation: Submit draft work plan to implement source control and BMPs, including but not limited to structural and non-structural BMPs, at the CIHB during dry-weather for Executive Officer approval.	1. County of Ventura 2. VCWPD and associated MS4 Co-permittees 3. City of Oxnard 4. Caltrans	Six months after the effective date of the TMDL.
Monitoring: Submit monitoring plan for agricultural discharges into the Channel Islands Harbor subwatershed for approval by the Executive	1. Agricultural Dischargers	One year after the effective date of the TMDL.

<sup>3</sup> Co-permittees of Municipal Separate Storm Sewer System (MS4) permit for Channel Islands Harbor subwatershed include the County of Ventura and incorporated cities therein. The incorporated cities for Channel Islands Harbor subwatershed include the City of Oxnard.

<sup>4</sup> Submittal of a monitoring plan is required if additional monitoring stations are added or if changes are made to the sampling frequencies or existing monitoring locations VCEHD 36000 and VCEHD 37000).

## Attachment A to Resolution No. 2007-XX

**Table 7-28.3 Harbor Beaches of Ventura County Bacteria TMDL (Channel Islands Harbor Beaches): Implementation Table**

Implementation Action	Responsible Parties	Date
Officer.		
Monitoring: Monitor agricultural discharges at the frequency and monitoring locations approved by the Executive Officer in the monitoring plan.	1. Agricultural Dischargers	One year and six months after the effective date of the TMDL.
Pilot Project: Submit a work plan piloting Structural BMPs, including but not limited to enhanced circulation devices, for Executive Officer approval (optional).	1. County of Ventura 2. VCWPD and associated MS4 Co-permittees 3. City of Oxnard 4. Caltrans	One year and six months after the effective date of the TMDL.
Implementation: Submit draft work plan to implement source control and BMPs, including but not limited to structural and non-structural BMPs, at the CIHB during wet-weather for Executive Officer approval.	1. County of Ventura 2. VCWPD and associated MS4 Co-permittees 3. City of Oxnard 4. Caltrans	One year and six months after the effective date of the TMDL.
Pilot Project: Completion of Structural BMP pilot projects, including but not limited to enhanced circulation devices (optional).	1. County of Ventura 2. VCWPD and associated MS4 Co-permittees 3. City of Oxnard 4. Caltrans	Two years and six months after the effective date of the TMDL.
Implementation: Submit final work plan; to implement source control and BMPs, including but not limited to structural and non-structural BMPs, at the CIHB during dry-weather for Executive Officer approval.	1. County of Ventura 2. VCWPD and associated MS4 Co-permittees 3. City of Oxnard 4. Caltrans	Three years and six months after the effective date of the TMDL.
Regional Board Reconsideration: a. Re-evaluate WLAs and LAs based on data. b. Re-evaluate the implementation schedule based on results from pilot projects. c. Re-evaluate allowable exceedance levels,	Regional Board	Four years after effective date of the TMDL.

## Attachment A to Resolution No. 2007-XX

**Table 7-28.4 Harbor Beaches of Ventura County Bacteria TMDL (Harbor Cove Beach): Implementation Table**

Implementation Action	Responsible Parties	Date
Compliance (WLAs): There shall be no exceedances of the interim WLAs (see WLAs section in Table 7-28.1).	1. Ventura Port District 2. County of Ventura 3. Ventura County Watershed Protection District (VCWPD) and associated MS4 Co-permittees <sup>5</sup> 4. City of Ventura 5. Caltrans	Effective date of the TMDL.
Compliance (LAs): There shall be no exceedances of the interim LAs (see LAs section in Table 7-28.1).	1. Ventura Port District 2. County of Ventura 3. VCWPD 4. City of Ventura	Effective date of the TMDL.
Monitoring: Continue monitoring at stations VCEHD 26000, at a weekly monitoring frequency, and on year-round basis.	1. Ventura Port District 2. County of Ventura 3. VCWPD and associated MS4 Co-permittees 4. City of Ventura 5. Caltrans	Effective date of the TMDL.
Monitoring Plan <sup>6</sup> : Submit a monitoring plan for Harbor Cove Beach (HCB) for approval by the Executive Officer.	1. Ventura Port District 2. County of Ventura 3. VCWPD and associated MS4 Co-permittees 4. City of Ventura 5. Caltrans	Prior to the modification of existing monitoring locations or frequencies.
Implementation: Submit draft work plan to implement source control and BMPs, including but not limited to structural and non-structural BMPs, at the HCB during dry-weather for Executive Officer	1. Ventura Port District 2. County of Ventura 3. VCWPD and associated	Six months after the effective date of the TMDL.

<sup>5</sup> Co-permittees of Municipal Separate Storm Sewer System (MS4) permit for Ventura Harbor subwatershed include the County of Ventura and incorporated cities therein. The incorporated cities for Ventura Harbor subwatershed include the City of Ventura.

<sup>6</sup> Submittal of a monitoring plan is required if additional monitoring stations are added or if changes are made to the sampling frequencies or existing monitoring locations VCEHD 26000).

approval.	MS4 Co-permittees 4. City of Ventura 5. Caltrans	
Monitoring: Submit monitoring plan for agricultural discharges into the Ventura Harbor subwatershed for approval by the Executive Officer.	1. Agricultural Dischargers	One year after the effective date of the TMDL.
Special Studies: Submit work plan for special studies, including but not limited to, source identification and harbor circulation, for Executive Officer approval (optional).	1. Ventura Port District 2. County of Ventura 3. VCWPD and associated MS4 Co-permittees 4. City of Ventura 5. Caltrans	One year after the effective date of the TMDL.
Monitoring: Monitor agricultural discharges at the frequency and monitoring locations approved by the Executive Officer in the monitoring plan.	1. Agricultural Dischargers	One year and six months after the effective date of the TMDL.
Pilot Project: Submit a work plan piloting Structural BMP, including but not limited to enhanced circulation devices, for Executive Officer approval (optional).	1. Ventura Port District 2. County of Ventura 3. VCWPD and associated MS4 Co-permittees 4. City of Ventura 5. Caltrans	One year and six months after the effective date of the TMDL.
Implementation: Submit draft work plan to implement source control and BMPs, including but not limited to structural and non-structural BMPs, at the HCB during wet-weather for Executive Officer approval.	1. Ventura Port District 2. County of Ventura 3. VCWPD and associated MS4 Co-permittees 4. City of Ventura 5. Caltrans	One year and six months after the effective date of the TMDL.
Special Studies: Completion of special studies, including but	1. Ventura Port District	Three year after the effective
