Subject: change in allowable limits in water from SSFL
Date: Thursday, January 08, 2015 9:20:33 PM

To the LA Water Board –

It is important that the water levels not be changed for allowable limits of contamination that are currently still coming out of the SSFL site.

As a previously elected member of our community, I served on the Oak Park Municipal Advisory Council for 8 years with my biggest concern being Public Safety. Our community is deeply affected by SSFL decisions and any changes such as contamination levels to the water should be more publically announced so our community has the right to have an opinion on this and members have an opportunity to attend a meeting or write a letter.

I have seen no public announcement in any of our local papers or on our public sign boards notifying community members of this decision that you will be making! If you have publically announced this, I would like to know where and when it has been published?
