CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
LOS ANGELES REGION**

**ORDER NO. R4-2019-XXXX**

**TERMINATING WASTE DISCHARGE REQUIREMENTS AND  
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT  
FOR DISCHARGE IN THE LOS ANGELES REGION**

The California Regional Water Quality Control Board, Los Angeles Region (Regional Water Board), finds:

1. This Regional Water Board adopted waste discharge requirements for discharge to surface waters which also served as the National Pollutant Discharge Elimination System (NPDES) permit for the Discharger listed below.
2. The Discharger has eliminated their wastewater discharges to surface waters. The remaining storm water discharges are covered by the statewide General Permit for Storm Water Discharges Associated with Industrial Activities (State Water Resources Control Board Order No. 2014-0057-DWQ; NPDES Permit No. CAS000001). The facility enrolled in the General Permit on December 10, 2014.
3. Therefore, the following waste discharge requirements and NPDES permit are no longer necessary and should be terminated.
4. The following Order is hereby terminated, except for enforcement purposes.
5. The termination of waste discharge requirements is exempt from the provisions of Chapter 3 (commencing with Section 21100), Division 13, Public Resources Code, in accordance with Water Code Section 13389.

The Regional Water Board has notified the Discharger, interested agencies, and persons of its intent to consider termination of the following waste discharge requirements and has provided them with an opportunity to submit their written views and recommendations.

The Regional Water Board, in a public hearing, heard and considered all comments and testimony pertinent to this matter.
