

California Regional Water Quality Control Board
North Coast Region

Monitoring and Reporting Program No. R1-2011-0079
(Replaces Monitoring and Reporting Program No. R1-2010-0072)

For

Colvin Oil Company
284 L Street
Crescent City, CA

Del Norte County

This Monitoring and Reporting Program (MRP) is issued pursuant to California Water Code Section (CWC) 13267(b) and requires monitoring of groundwater and submission of technical reports. Reports are required on a semiannually basis. The objective of monitoring conducted under this monitoring program is to provide the Discharger and the Regional Water Board with information concerning groundwater quality and contaminant trends at the site and off-site.

Under the authority of CWC section 13267, the Discharger named above is required to comply with the following:

MONITORING

1. The presence of floating product shall be evaluated in all monitoring wells semiannually. If detected, the thickness shall be measured to at least 0.01 foot increments.
2. The depth to groundwater in all monitoring wells shall be determined to at least 0.01 foot increments semiannually. The results of each event's elevation measurement shall be reported in tabular form indicating the surveyed elevations of each well reference point, depth to groundwater from the reference point, and the actual groundwater elevation. The data generated from the elevation readings must be referenced to mean sea level.
3. Monitoring wells MW-1, MW-2, MW-3, and MW-4 will be sampled semiannually with the third quarter 2011 and first quarter 2012 being the sampling events. The third quarter 2011 sampling event will include Monitoring wells MW-1, MW-2, MW-3, and MW-4 plus the new wells (MW-5A and MW-5B) to establish a new baseline. The first quarter 2012 semiannual sampling event will exclude MW-1 and MW-3 because of their history of no detections. Collected groundwater samples will be analyzed at a State-certified laboratory for Total Petroleum Hydrocarbons as diesel, Total Petroleum Hydrocarbons as motor oil, Total Petroleum Hydrocarbons as gasoline, benzene, toluene, ethylbenzene, xylenes, and fuel oxygenates (MTBE, DIPE, TAME, ETBE, TBA).

4. All investigation-derived waste (IDW) will be controlled and disposed of in a fashion consistent with California laws and regulations. Documentation regarding IDW disposal shall accompany each quarterly monitoring report.
5. All implemented work shall be done under the direct supervision of a California-licensed Registered Civil Engineer or Professional Geologist with demonstrated experience in the implementation of monitoring and reporting programs required by the California Regional Water Board.

REPORTING

A groundwater elevation contour map shall be submitted for each semiannual set of measurements and include the facility, groundwater flow pattern including the direction of the groundwater gradient, and the location of the wells measured. Semiannual monitoring reports, including gradient data and sampling data, shall be submitted to this office in accordance with the following schedule:

<u>Reporting Period</u>	<u>Due Date</u>
January, February March	April 30
July, August, September,	October 30

All data and reports shall be electronically submitted in the proper format to the State Water Resources Control Board's GeoTracker database.
