THE GEORGE J. RYNECKI TRUST

FOR THE SITE AT

701 FIRST STREET
EUREKA, CALIFORNIA

Case Nos. 1NHU318 and 1NHU117

Humboldt County

This Monitoring and Reporting Program is issued pursuant to California Water Code (CWC) Section 13267(b) and requires monitoring of storm water and submission of technical reports. Reports are required on an annual basis. The objective of monitoring conducted under this monitoring program is to provide the Dischargers and the Regional Water Quality Control Board with information concerning water quality.

Under the authority of CWC section 13267, the Dischargers named above are required to comply with the following:

SURFACE WATER MONITORING

1. Each surface water monitoring station (as shown on the attached figure, excerpted from the February 5, 2010 ARCADIS U.S., Inc. document *Quarterly Monitoring report, Waterfront Lease Site (Former G&R Metals)*) shall be sampled once during the period from December to January each year. Analyses shall be performed at a laboratory certified by the California Department of Health Services for Total Petroleum Hydrocarbons as diesel, Total Petroleum Hydrocarbons as motor oil, pesticides, polychlorinated biphenyls, copper, lead, manganese, nickel, and zinc. Surface water samples shall not be filtered prior to analyses.
2. The presence of floating product or sheen shall be evaluated at each monitoring station during the sampling events.

3. Surface water monitoring events shall be targeted during periods of intense rainfall.
4. The flow at each monitoring station shall be calculated in gallons per minute during each sampling event.

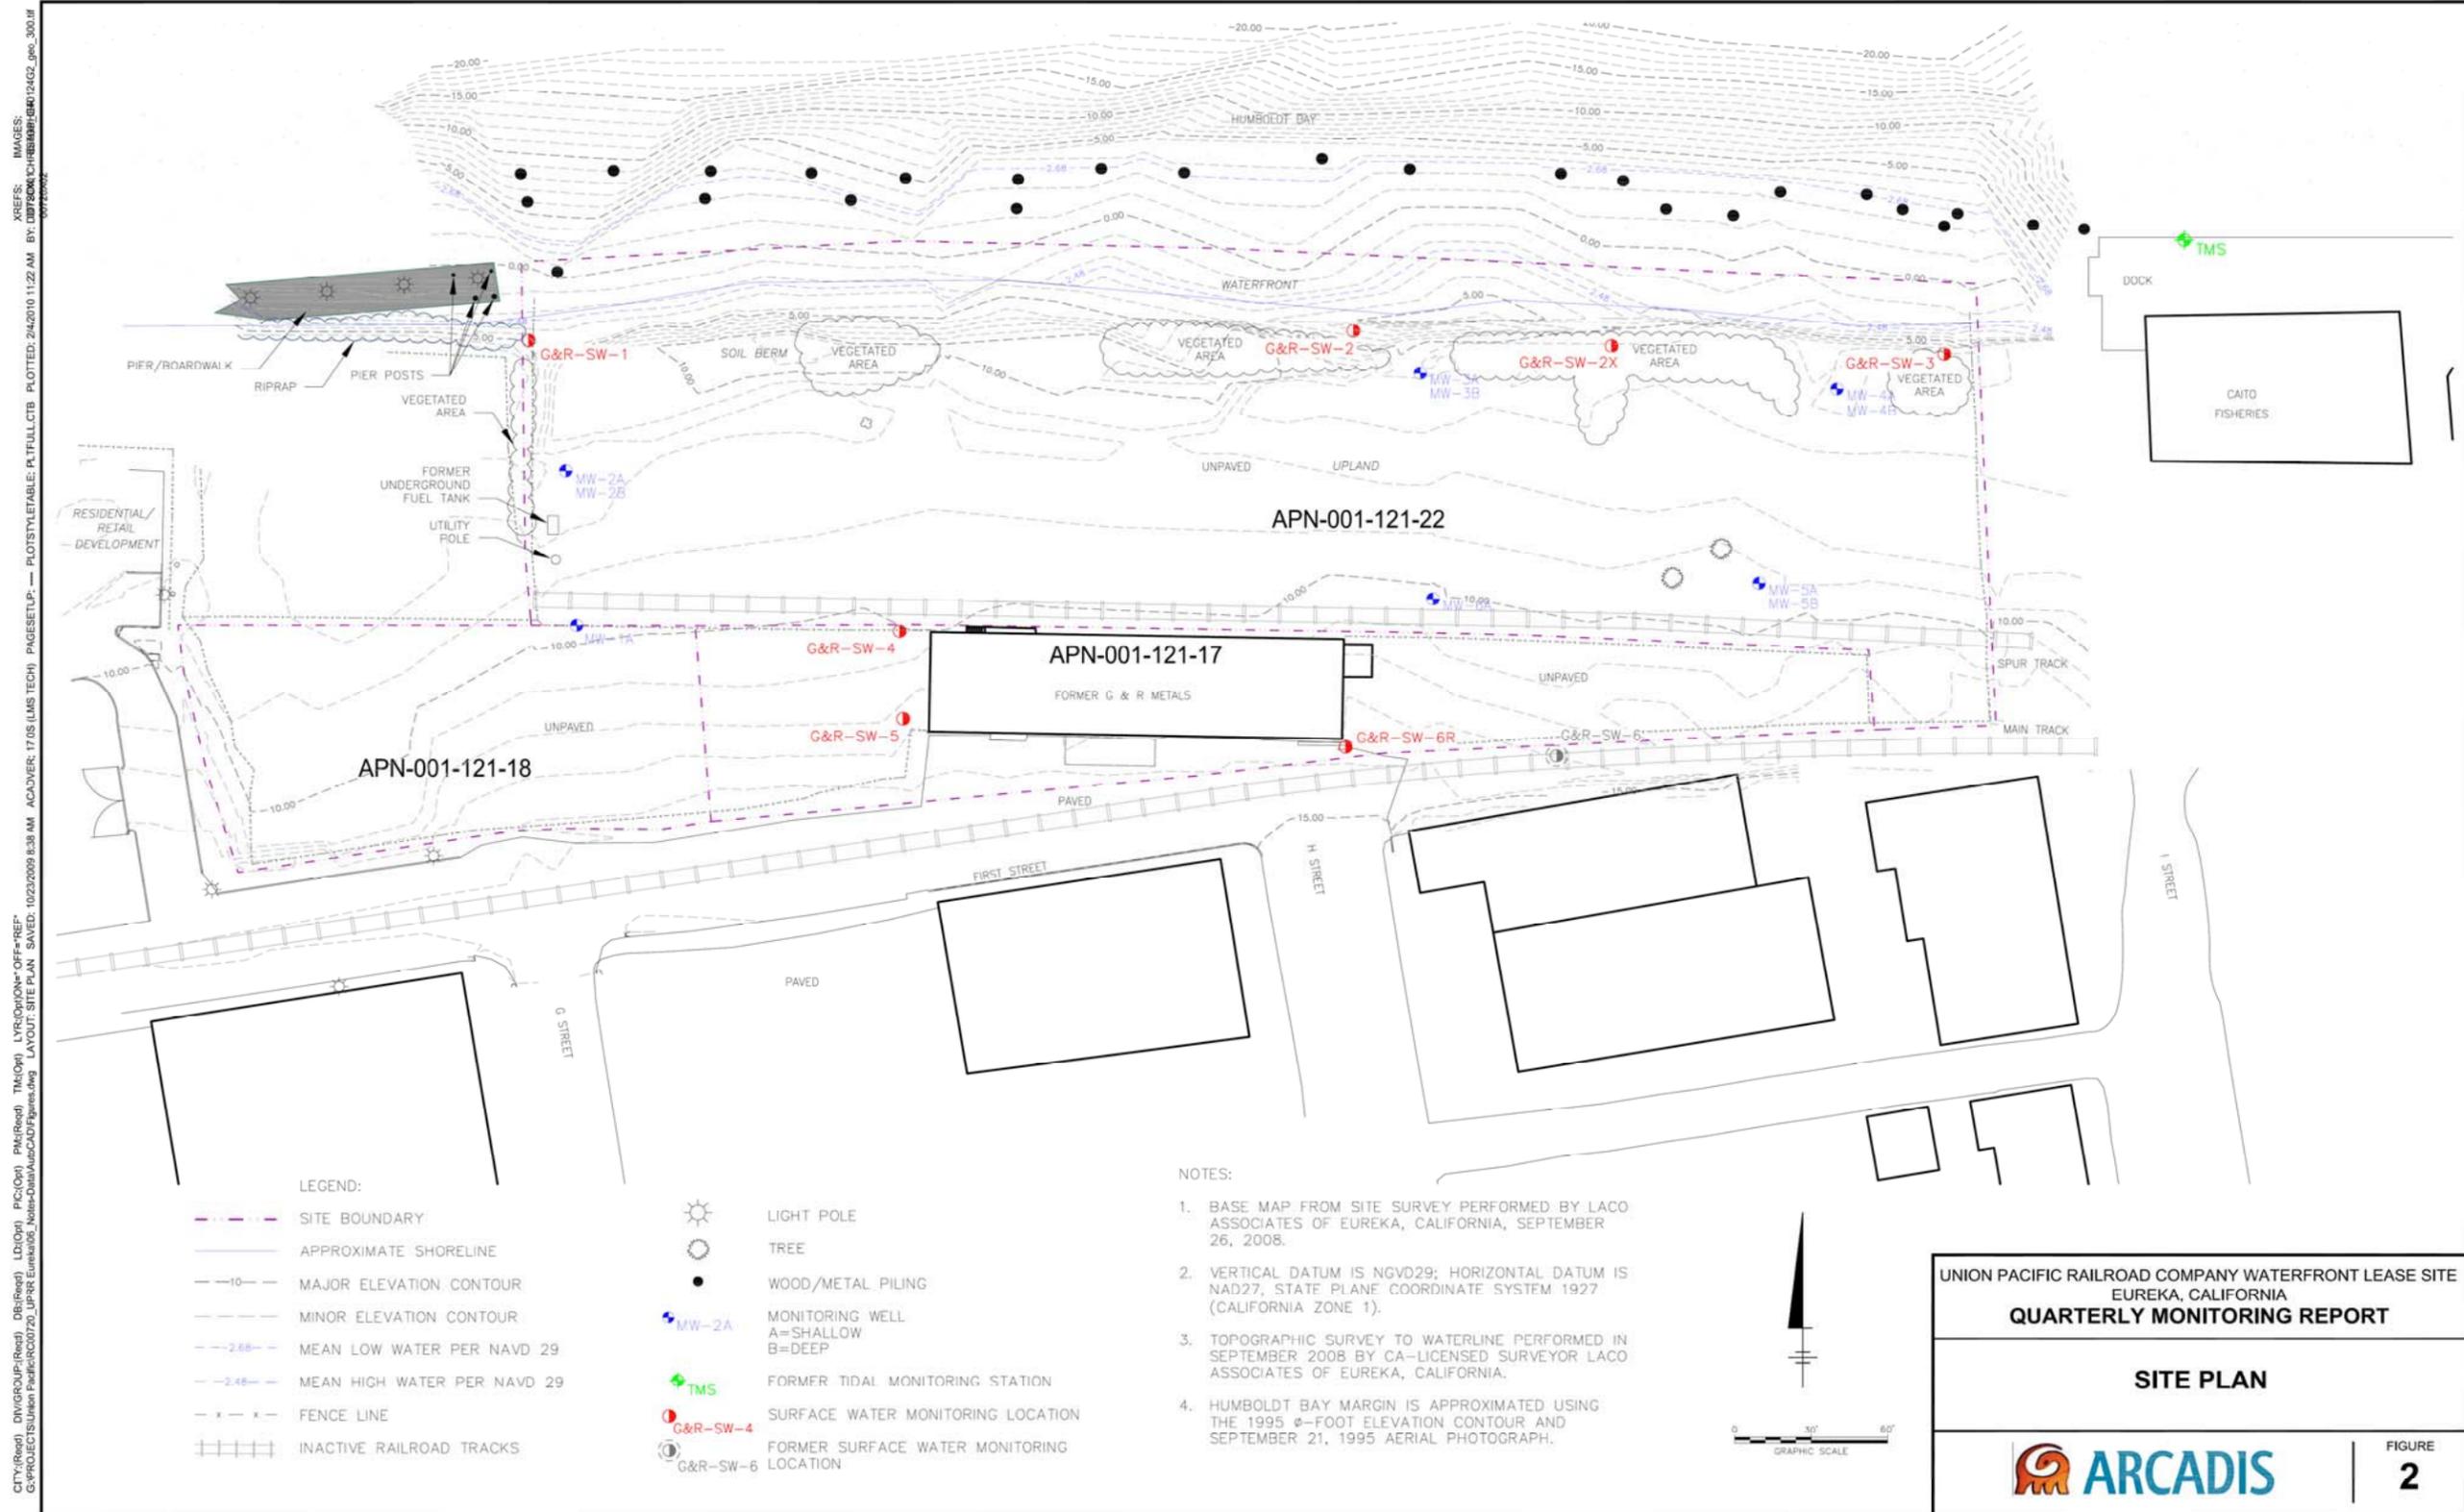

REPORTING

1. Annual monitoring reports shall be submitted to this office by March 1 of each year.
2. Current and previous surface water analytical results shall be reported in tables which include the following:
 - a. sampling point;
 - b. date of sample collection;
 - c. constituents and analytical results; and
 - d. quantification limits employed for non-detect analytical results.
3. Each report shall contain copies of the sampling field logs; chain of custody documents indicating the time and date of sample collection and the person collecting the samples; and signed laboratory sheets including quality control data and explanations of analytical anomalies, if any. These supporting documents may be included as appendices to the report.
4. The monitoring report shall contain a report of the maintenance of and any modifications to the storm water best management practices used at the site.
5. The monitoring reports shall be submitted in hard copy form. In addition, the monitoring reports and monitoring data shall also be submitted electronically to the State Water Resources Control Board's GeoTracker database as required by Title 23, Division 3, Chapter 30 of the California Code of Regulations.
