Case No. 1NHU528

Humboldt County

This Monitoring and Reporting Program (MRP) is issued pursuant to California Water Code Section (CWC) 13267(b) and requires monitoring of groundwater and submission of technical reports. Reports are required on a semiannual basis. The objective of monitoring conducted under this monitoring program is to provide the Dischargers and the Regional Water Board with information concerning groundwater quality and contaminant trends at the site.

Under the authority of CWC section 13267, the Dischargers named above are required to comply with the following:

MONITORING

1. The monitoring wells at the Eel River Sawmills, Mill A site shall be sampled semiannually. The locations of the monitoring wells are shown in the attached figure, titled Site Map, 2012 Aerial Photograph, prepared by Freshwater Environmental Services.
2. During each groundwater monitoring event, the presence of floating product shall be evaluated in each monitoring well. If detected, the thickness shall be measured to at least 0.01 foot increments.

3. During each groundwater monitoring event, the depth to groundwater in each monitoring well associated with the site shall be determined to at least 0.01 foot increments, prior to purging. The results of each elevation measurement shall be reported in tabular form indicating the surveyed elevations of each well reference point, depth to groundwater from reference point, and the actual groundwater elevation. The data generated from the elevation readings must be referenced to the same elevation datum used for the electronic GeoTracker survey values.
4. Groundwater shall be sampled semiannually in the first and third quarters, as described in the following table.

Well ID.	Constituents
MW-101	Pentachlorophenol Tetrachlorophenols Trichlorophenols
MW-102	
MW-105	
MW-106	
MW-107	
WW-2N or replacement	

5. Reporting limit for the analytes shall not be greater than shown in the following table. Detections below the reporting limit and above the method detection limit shall be reported.

Minimum Reporting Limits for Analytes	
Analyte	Minimum Reporting Limit
Pentachlorophenol	0.2 ug/L
Tetrachlorophenols	0.5 ug/L
Trichlorophenols	1.0 ug/L

6. All laboratory analyses shall be performed at a laboratory certified for that analysis by the California Department of Public Health.

REPORTING

7. Semiannual monitoring reports, including gradient data and sampling data, shall be submitted to this office in accordance with the following schedule.

Quarter	Period Covered	Report Due
First Quarter	January, February, March	April 30
Third Quarter	July, August, September	October 31

8. A groundwater elevation contour map shall be submitted for each semiannual set of measurements and include the facility, groundwater flow pattern including the direction of the groundwater gradient, and the location of the wells measured.
9. A contamination iso concentration map shall be included for each significant pollutant detected during the semiannual monitoring event and shall include the following:
- concentration of contaminant detected;
 - location of the facilities; and,
 - location of the monitoring wells.
10. Current and previous analytical results shall be reported in tables which include the following:
- sampling point;
 - date of sample collection;
 - constituents and analytical results; and
 - quantification limits employed for non-detect analytical results.
11. Each report shall contain copies of the sampling field logs and well purging logs; chain of custody documents indicating the time and date of sample collection and the person collecting the samples; and signed laboratory sheets including quality control data and explanations of analytical anomalies, if any. These supporting documents may be included as appendices to the report.
12. If one or more samples or analyses required by this program cannot be collected, the report shall state the reason for the omission and explain what corrective actions shall be employed to prevent future omissions.
13. The monitoring reports shall be submitted in hard copy form. In addition, the monitoring reports and monitoring data shall also be submitted electronically to the

Monitoring and Reporting Program
No. R1-2013-0073

State Water Resources Control Board's GeoTracker database as required by Title 23,
Division 3, Chapter 30 of the California Code of Regulations.
