

California Regional Water Quality Control Board
North Coast Region

MONITORING AND REPORTING PROGRAM NO. R1-2000-20
(REPLACES MONITORING AND REPORTING PROGRAM NO. 98-127)
FOR

MARSH COMMONS
101 South G Street
Arcata, California

Humboldt County

MONITORING

1. The presence of floating product shall be evaluated in each monitoring well semiannually. If detected, the thickness shall be measured to at least 0.01 foot increments semiannually.
2. The depth to groundwater in each monitoring well shall be determined to at least 0.01 foot increments semiannually. The results of each month's elevation shall be reported in tabular form indicating the surveyed elevations of each well reference point, depth to groundwater from reference point, and the actual groundwater elevation. The data generated from the elevation readings must be referenced to mean sea level.
3. Each monitoring well shall be sampled semiannually. The analyses shall be performed at a certified laboratory for Total Petroleum Hydrocarbons as diesel.

REPORTING

A ground water elevation contour map shall be submitted for each semiannual set of measurements and include the facility, groundwater flow pattern including the direction of the groundwater gradient, and the location of the wells measured.

Semiannual monitoring reports, including semiannual gradient data and sampling data, shall be submitted to this office in accordance with the following schedule:

<u>Reporting period</u>	<u>Due Date</u>
January, February, March, April, May, June	July 15
July, August, September, October, November, December	January 15
