Phase I Term 4 NPDES Boundary

Intent of Use

The intent of the revised NPDES boundary is to update the boundary to the United States Department of Agriculture's (USDA) delineation of the Mark West Creek Watershed encompassing the perimeter of the Laguna de Santa Rosa Watershed, the State of California Regional Water Quality Control Board's RB1 (North Coast Region)/RB2 (San Francisco Bay Region) interior boundary, the expanded Healdsburg and Graton General Plan 2020 Urban Service Area (USA) boundaries and based on the General Plan 2020 USAs, the four new Phase 2 to Phase I areas of Forestville, Occidental, Monte Rio, and Guerneville.

The boundary will be used to determine areas subject to special NPDES storm water requirements to improve water quality. In particular this boundary will assist in determining where low impact development post-construction best management practices (LID BMPS) are required to improve water quality.

0 0.75 1.5 3 Miles

DRAFT

Map Scale and Reproduction methods limit precision in physical features displayed. This map is for illustrative purposes only, and is not suitable for parcel-specific decision making. The parcels contained herein are not intended to represent surveyed data. Site-specific studies are required to draw parcel-specific conclusions. Assessor's parcel data are current as of July 1, 2012.

No part of this map may be copied, reproduced, or transmitted in any form or by any means without written permission from the Permit and Resource Management Department (PRMD), County of Sonoma, California. Maps contained in a planning document published by PRMD can be photocopied by members of the public for review and comment purposes.
