Overview

The Mendocino County Resource Conservation District (District) and Natural Resources Conservation Service (NRCS) developed the Mendocino County Permit Coordination Program (PCP) to promote the implementation of high-quality conservation and restoration projects on farms, ranches, and forestland throughout the watersheds of Mendocino County.

Projects implemented through the PCP are designed to control erosion and sediment discharges, improve instream habitat for aquatic species, stabilize eroding streambanks, promote native vegetation growth, and enhance aquatic and terrestrial habitat that may be affecting water quality and beneficial uses.

The PCP is designed to address sediment and temperature impairments, including on lands within the following watersheds: Albion River, Big River, Eel River-Upper Main, Eel River-Middle Main, Eel River-Middle Fork, Eel River-South Fork, Eel River-North Fork, Garcia

River, Gualala River-North Fork, Mattole River, Navarro River, Noyo River, Upper Russian River, and Ten Mile River.

The PCP also provides an effectiveness monitoring and reporting program to ensure successful project outcomes, address unforeseeable problems, and to verify that agency mandates are met.

On June 12, 2012, the District adopted a mitigated negative declaration (SCH No. 2012052019) for the PCP to comply with the California Environmental Quality Act (CEQA).
