Subject: GIS file for Central Valley dairies
Attachments: Reg5_All_DairyParcels_2007-08.zip

Parry and Michael,

Per our November 2nd meeting, attached is a shape file developed by Water Board staff that shows Central Valley dairies covered by the Dairy WDRs. This file is somewhat dated, as it was created using Assessor's parcel data from 2008. Because of the unfortunate struggles of the dairy industry over the past few years, I don't expect many new dairies have started up in the east San Joaquin area. Several 2008 dairies may now be defunct, though.

Updating this shape file is a 'back burner' task for Water Board staff. But when it is updated, I'll forward it along to you.
