Hi Chris and Susan,

Attached is a word document with the updated decision tree on page 2 for the SJR TMDL compliance monitoring. The first page goes through two examples based on hypothetical ESJWQC water quality data for what actions would result due to non compliance of the chlorpyrifos/diazinon load capacity in the SJR. The updated decision tree is the result of our phone discussion in September with Regional Board staff and concerns regarding what some of the end boxes actually meant. We ended up "splitting" out the left side of the decision tree and have used the examples on page 1 to walk through how non compliance in the SJR may result in Coalition actions including potential updates to the Coalition's management plan.

Please email or call with any questions.

Melissa

Thank you for the update Melissa. A little delay won't be a problem.

Hi Chris,

I have been working on some decision tree options that I want to pass out to Joe M/Chris L and Parry. We discussed a few ways (lumping vs splitting) to move forward with the decision tree and I'm trying to work through the options to come up with a decision tree that will move us forward in the process. I apologize for the delay but we had a few unexpected things come up. I will send out drafts to Westside and Parry this afternoon and then get you an updated decision tree as soon as I get a response from everyone.

Melissa

Hi everybody,

a couple weeks ago we held a teleconference meeting discussing the chlorpyrifos and diazinon TMDL decision tree. There were a few modifications for the Coalitions to make. Susan proposed that the decision tree would be revised and submitted to staff by 9/29/11. Please let me know when it can be submitted. thank you
