Subject: Fwd: San Joaquin River Diazinon/Chlorpyrifos Monitoring

Hi Parry and Joe,

In your last report to us on the TMDL monitoring (diazinon/chlorpyrifos) for the San Joaquin River, the report indicated that you could not relate the tributary monitoring to concentrations in the San Joaquin River. To determine compliance in the San Joaquin River, we will need to conduct more monitoring. We want you to monitor your San Joaquin River sites once a month from May-August, which are peak application times. You should have already conducted monitoring for the first quarter of this year (January-March) and we would not expect you to conduct monitoring in the last quarter of the year, due to relatively low application.

This arrangement would apply to this calendar year. We will prepare a letter for Pamela's signature regarding these changes. Please give me a call, if you would like to discuss this.

Joe
