Dear Ms. Creedon,

The East San Joaquin Water Quality Coalition (ESJWQC) is submitting an updated Pesticide Use Report (PUR) database submitted as part of the Annual Monitoring Report (AMR) submitted on March 1, 2012. At the time of submittal, the ESJWQC had not received all PUR data for Madera, Merced or Stanislaus Counties for 2011 and therefore committed to submitting an addendum to the AMR on June 1, 2012 (Table 31, page 101 of the ESJWQC March 1, 2012 AMR).

Table 1 lists all available and outstanding PUR data associated with 2011 exceedances. This addendum includes additional PUR data associated with exceedance at Berenda Slough along Ave 18 ½ (copper), Cottonwood Creek @ Rd 20 (copper), Dry Creek @ Rd 18 (copper), Duck Slough @ Gurr Rd (*Pimephales promelas* toxicity), Howard Lateral @ Hwy 140 (copper), McCoy Lateral @ Hwy 140 (copper) and Prairie Flower Drain @ Crows landing Rd (*Selenastrum capricornutum* toxicity, Table 1). The PUR for Stanislaus County are still incomplete and therefore no additional data could be associated with the December *Selenastrum capricornutum* toxicity at Prairie Flower Drain @ Crows Landing Rd (Table 1). All other exceedances that occurred in 2011 had complete PUR data in the original Appendix IV submitted on March 1, 2012. Therefore, this addendum only includes an electronic database with updated PUR data through December 2011 for Madera and Merced Counties. Remaining 2011 PUR data for Stanislaus County will be included in the PUR Appendix and electronic database to be submitted with the AMR on March 1, 2013.

Table 1. Pesticide Use Report data available for associated 2011 exceedances.
