Justification

Staff selected this location due to its close proximity to San Francisco Bay. Historically, this area is a frequent location for illegal dumping of furniture and appliances as well as hazardous materials such as motor oil and paint. The property adjoining this location to the north will be the site of future construction over the next 24-36 months and we anticipate approximately 600 workers on that site, which will create additional transportable and buoyant litter. Staff followed the site selection process outlined in the ACCWP Trash Load Reduction Work Group Hot Spot Selection Guidance document.
