Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary: (See the Fiscal Year 2009 – 2010 Group Program Annual Report for a summary of activities conducted countywide and regionally on our behalf.)

Concord's Clean Water Program focused this year on implementing provisions of the new Municipal Regional Permit issued in October. In developing new permit requirements over the last six years, the City of Concord contributed extensive written comments and oral testimony from elected officials and staff at the public hearings. The biggest challenge to Concord's Clean Water Program going forward is long-term funding. Concord's program is not funded for the next ten years.

The Contra Costa Green Business Program is a partnership of environmental agencies and utilities that assists, recognizes, and promotes businesses and government agencies that voluntarily operate in an environmentally responsible way. To be certified "green", participants must be in compliance with all regulations and meet program standards for conserving resources, preventing pollution and minimizing waste. As a member and active partner in the Green Business Program, the City of Concord practices what it preaches. Concord Civic Center has been a certified Green Business since 2008, the Printing Services Division and the Fleet Maintenance Division since 2006, and the Parks Department since 2007.

City of Concord Industrial and Commercial facilities are inspected through an agreement with Contra Costa Central Sanitary Services District <www.centrsan.org> The inspection program was revised this year to meet new data tracking and reporting requirements of the Municipal Regional Permit and this annual report form.

The largest category is “food service” facilities. There are 280 of these to be inspected. The next biggest category is “Vehicle Service” facilities with 153. These two categories count for almost half (48%) of all the facilities to be inspected. In all, there are 41 categories. C.6.e.iii.1.d ▶ Construction Activities Storm Water Violations		
BMP Category	Number of Violations ¹	% of Total Violations ²
Erosion Control	0	
Run-on and Run-off Control	0	
Sediment Control	0

Total	0	100%

Notes:

¹Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category.

²Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

C.6.e.iii.1.e ▶ Construction related storm water enforcement actions			
	Enforcement Action (as listed in ERP) ¹	Number Enforcement Actions Taken	% Enforcement Actions Taken ²
Level 1		0	
Level 2		0	
Level 3		0	
Level 4		0	
Total		0	100%

Notes:

¹Agencies should list the specific enforcement actions as defined in their ERPs.

²Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.6.e.iii.1.h, i ► Violation Correction Times		
	Number	Percent
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	0	% ²
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	% ³
Total number of violations for the reporting year¹	0	100%

Notes:

¹Total number of violations equals the number of initial enforcement actions (i.e., one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

²Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

³Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

C.13.c ► Vehicle Brake Pads

(See the FY 2009 – 2010 Group Program Annual Report for a detailed reporting on our contributions towards and participation in efforts to reduce copper discharges from automobile brake pads to surface waters via urban runoff.)

C.13.d.iii ► Industrial Sources Copper Reduction Results

List below or attach annotated lists or tables from your Industrial and Commercial Site Controls portion of this report, that highlight copper reduction results among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed. For FY 09-10 describe below or highlight in the C.4 Evaluation portion (if provided) of this report the steps taken to revise your program to meet new data tracking and reporting requirements for implementation levels described in C.13.d.ii.

Summary

No specific sources of copper were identified but several potential sources remain to be investigated:

1. Vehicle service facilities are potential copper sources because of the copper in brake pads.
2. Individual manufacturing facilities could be potential copper sources: a) Siemens in Concord is in the process of removing all their

manufacturing processes; b) Systron-Donner has a large manufacturing facility in Concord but not a copper source; c) concrete batch plants could possibly be a source if copper is in the cement products used to create the mix.

3. Large swimming pool facilities with copper plumbing could be potential source of copper.
4. The City of Concord no longer uses algaecides containing copper as an active ingredient if discharges could ultimately reach watercourses or the San Francisco Bay-San Joaquin Delta.

C.13.e ► Studies to Reduce Copper Pollutant Impact Uncertainties

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities can provide descriptions below.

Summary (See *the Fiscal Year 2009 – 2010 Group Program Annual Report on planned studies on our behalf to reduce copper pollutant impact uncertainties.*)

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water

Is your agency a water purveyor?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No

If Yes , Complete the attached reporting tables or attach your own table with the same information. Describe program highlights below. For FY 09-10 only, describe steps taken to revise your program to meet new monitoring, data tracking and reporting requirements.				
Summary:				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

<p>Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:</p> <ul style="list-style-type: none"> • Promote conservation programs • Promote outreach for less toxic pest control and landscape management • Promote use of drought tolerant and native vegetation • Promote outreach messages to encourage appropriate watering/irrigation practices • Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.
<p>Summary: (See the FY 2009 – 2010 Group Program Annual Report for a detailed review of measures and policies we promote and implement that minimize runoff and pollutant loading from excess irrigation.)</p> <p>The City replaced turf grass on traffic island medians with new flowering shrubs and plants that require less water, eliminate mowing, require less pesticide, require less fertilizer, are better suited to survive future droughts and produce beautiful flowers. Several medians, including those along Clayton Road, Concord Avenue, and Diamond Boulevard, converted to improve our environment significantly for at least nine reasons:</p> <ol style="list-style-type: none"> 1. Drought-tolerant plant material was selected so the over-all water needs were greatly reduced. 2. Irrigation systems were upgraded for dramatically increased water efficiency. The upgrades included droplet irrigation heads, "smart controllers", and optimal placement of emitters to avoid water run-off. 3. Turf was eliminated reducing fertilizer requirements. Fertilizer is a typical contaminate in local waterways nationally. 4. Turf mowing was reduced along with the associated air and noise pollution from gasoline-powered mowers. This also reduced green house gas emissions from burning fossil fuels.

5. Mulched wood chips were used extensively to protect the soil, retain water and reduce weeds.
6. Sheets of fiberboard were installed in areas between plants as a barrier to weeds, reducing the future need for herbicides.
7. Flowering shrubbery was selected to produce noticeably less solid waste per acre than turf grass that must be constantly mowed.
8. Pest-resistant plant material was selected to reduce the future need for insecticide.
9. Traffic disruptions caused by deployment of turf mowing equipment were eliminated - reducing air pollution and green house gas emissions.

Concord
City of Concord
IPM Policy

It is the purpose and intent of this IPM Policy to ensure that the City of Concord departments and all those who apply pesticides to property owned or managed by the City of Concord use integrated pest management (IPM) practices, eliminate or reduce pesticide applications on public-owned or City managed property to the maximum extent feasible and, as required by State and Regional Stormwater regulations, to take all reasonable measures to ensure that pest control activities do not threaten environmental or human health.

The City of Concord, in carrying out its pest management operations, shall focus on long term prevention or suppression of pest problems with minimum impact on human health, non-target organisms, and the environment.

The City's goal is to reduce its use of pesticide use and ultimately replace all pesticides with non-toxic methods of controlling pests on City property. The City of Concord recognizes that pesticides are potentially hazardous to human health and the environment, and non-toxic pesticide alternatives will be considered over toxic pesticides. The City staff will develop an IPM program that will outline all the IPM activities that will be implemented to ensure that less toxic methods are used to control pests on City property. The City of Concord will include the following elements in their City of Concord IPM program:

1. Establish inspection procedures to monitor pest population levels, perform thorough field assessments of each pest problem, and keep records of such monitoring. Monitoring should be performed by designated personnel or contractor knowledgeable in IPM methods.
2. Establish for each pest an IPM implementation plan which evaluates the biological, aesthetic, and economic loss each site can tolerate and set pest population levels at which corrective action should be taken to ensure that pests do not exceed tolerance levels.
3. Determine corrective actions when an action threshold is reached. Review and consider all available non-chemical options for acceptability and feasibility. Consider the use of chemicals only as a last resort. Select and use chemicals only in accordance with State,

Federal and local law and in accordance to the pesticide selection method outlined in the City of Concord IPM program document.

4. Identify and evaluate conditions that encourage pest problems. Modify pest ecosystems to reduce food and living space through physical and cultural practices.
5. Determine most effective treatment time, based on pest biology and other variables identified during the above mentioned inspection and monitoring efforts during the field assessments of each pest problem.
6. Establish and maintain an accurate record-keeping system to catalog monitoring information and to document and evaluate the effectiveness of pest management procedures.
7. Evaluate the effectiveness of the IPM program and make adjustments as needed.
8. Conduct an ongoing education program for City of Concord staff and members of the public.
9. Designate an IPM Coordinator and Committee to oversee that the IPM program is implemented correctly and appropriately to uphold this document's goals and objectives for IPM practices.
10. Hire pesticide applicators that incorporate IPM implementation in their services and bid them to all City of Concord IPM polices outlined in the City of Concord IPM program document.
