IRRIGATED LANDS REGULATORY PROGRAM

RESOURCES FOR GROWERS

List of Laboratories for Individual Groundwater Monitoring

(Updated April 22, 2016)

The following is a list of **laboratories**¹ that either conducts groundwater sampling, analysis and/or electronic upload of analytical data pursuant to the Irrigated Lands Regulatory Program - Agricultural Order R3-2012-0011. The list is provided for convenience and is not comprehensive or an endorsement by the Water Board. Growers are responsible for selecting a laboratory and confirming that it has the required capabilities to ensure timely compliance with the Agricultural Order, including sampling, analytical and reporting activities. Growers must also work with the laboratory to ensure proper well access and location are provided.

Please ***note** that some laboratories only offer third-party water sampling and/or analytical data upload services, and may not conduct the groundwater analysis but partner with a State certified lab to conduct the analysis. The monitoring results and well location data must be submitted in Electronic Deliverable Format (EDF) to the State Water Resources Control Board (SWRCB) GeoTracker data management system. The SWRCB Policy Statement-Electronic Reporting Requirements is found at: http://www.waterboards.ca.gov/water_issues/programs/ust/electronic_submittal/
