Mr. Curt Richards  
Olin Corporation  
Environmental Remediation Group  
P.O. Box 248  
Charleston, TN 37310-0248

Dear Mr. Richards:

**SITE CLEANUP PROGRAM: 425 TENNANT AVENUE, MORGAN HILL. RESPONSE TO OLIN'S PHASE TEN TERMINATION OF REPLACEMENT WATER AND REVISED MONITORING FREQUENCIES REQUEST**

This letter responds to Olin's August 13, 2007, and August 23, 2007, requests for our concurrence to terminate replacement water service (i.e., bottled water) and revise monitoring frequencies for 24 wells. Olin's requests are made pursuant to State Water Resources Control Board (State Water Board) Order WQ 2005-0007 and our letter dated October 6, 2006 "SLIC: 425 Tennant Ave, Morgan Hill; Termination of Replacement Water and Post Monitoring Requirements."

On August 13, 2007, Olin provided Central Coast Water Board staff analytical results for 10S03E02C009 that Olin determined to meet the State Water Board criteria for termination of bottled water service. On August 23, 2007, Olin provided Central Coast Water Board staff analytical results with the tenth phase of analytical results for 23 wells that Olin determined to meet the State Water Board criteria for termination of bottled water service. Based on Olin's submission, we concur that the State Water Board criteria have been met for 10S03E02C009 and all 23 wells in phase ten.

On August 13, 2007, and August 23, 2007, Olin submitted revised monitoring frequencies for 10S03E02C009 and all phase ten wells, as required by our October 6, 2006 letter. Based on our review of the proposed monitoring frequencies and the available perchlorate concentration data provided up to and including July 17, 2007, we concur that the proposed revised monitoring frequencies for all 24 wells meet the criteria outlined in our letter dated October 6, 2006.

For all future requests for changes in post-bottled water monitoring frequencies, please continue to submit your request in writing and provide an electronic version of Olin's Microsoft EXCEL tables with all relevant well information. In addition, please provide

*California Environmental Protection Agency*

the date that bottled water was terminated for each well, the result of the Mann-Kendall trend analysis, and whether the well is within 500 feet of a well that has perchlorate concentrations greater than 6.0 micrograms per liter.

We appreciate your continued cooperation on this matter. If you have any questions, please contact **Thea Tryon at (805) 542-4776**, Hector Hernandez at (805) 542-4641 or Sheila Soderberg at (805) 549-3592.

Sincerely,

Roger W. Briggs  
Executive Officer
