

ENTITY	<b>DESIGNATED "HOT SPOT*" AREAS WITHIN WHICH CATCH BASINS AND INLETS WILL BE INSPECTED ANNUALLY PRIOR TO THE RAINY SEASON, AND CLEANED AS NECESSARY</b>
Carmel-by-the-Sea	The Downtown district of Carmel-by-the-Sea, as shown in the attached map from page 17-16 of the Carmel-by-the-Sea Municipal Code.

\* "Hot-Spot" areas are commercial zones where there is high pedestrian traffic which typically generates high levels of trash. Throughout the "hot-spot" areas, all catch basins will be inspected prior to the beginning of the rain year, and if trash accumulations of more than two inches exist, the catch basin will be cleaned.
