Plains West Coast Terminals, LLC (hereinafter, Discharger) discharges contact storm water runoff and hydrostatic test water to Compton Creek, a water of the United States. The discharge is regulated under waste discharge requirements contained in Order No. R4-2010-0160, adopted by this Regional Board on September 2, 2010. Order No. R4-2010-0160 also serves as a permit under the National Pollutant Discharge Elimination System (NPDES No. CA0052949) Program. The Discharger filed a Report of Waste Discharge (ROWD) and applied to the Regional Board for reissuance of the waste discharge requirements (WDRs) and an NPDES permit.

The Discharger owns and operates the Dominguez Hills Tank Farm. The Dominguez Hills Tank Farm is located at 2500 E. Victoria Street, Compton, CA 90220. The Facility is a bulk storage and transportation facility for petroleum products (crud, fuel oil, and displacement oil). The Facility consists of a 70-acre site which is divided into three primary sections; a "North Tank Farm," a "South Tank Farm," and the north eastern section of the Facility where the operations buildings, main pump pads, metering pump pads, heating pad, retention basin, and on-site water treatment system are located. The on-site treatment system consists of a four chamber sand filter, a four bag (operated in parallel) mechanical filtration chamber, two 8,000-lb activated carbon vessels and two 130 cubic feet ion exchange vessels operated in series. Sampling ports are installed throughout the system piping configuration to monitor specific media performance.
