<b>DISCHARGER</b>	<b>FACILITY LOCATION</b>	<b>RECEIVING WATER</b>
United States Navy (San Clemente Island Wastewater Treatment Plant)	Navy Auxiliary Landing Field, San Clemente Island, CA	Pacific Ocean

The United States Navy (hereinafter the Navy or Permittee) discharges secondary or tertiary-treated wastewater from its San Clemente Island Wastewater Treatment Plant (SCI WWTP) to the Pacific Ocean, a water of the United States, at Discharge Point 002 located 250 feet east of the SCI WWTP on the northeast end of the island approximately 1,000 feet south of Wilson Cove. The Navy owns and operates the SCI WWTP, a federally-owned treatment works located at the Navy Auxiliary Landing Field, San Clemente Island, CA. The SCI WWTP has a secondary treatment design capacity of 0.06 million gallons per day (MGD) and a tertiary treatment design capacity of 0.03 MGD. The discharge is regulated under waste discharge requirements contained in Order No. R4-2018-0156, adopted by the Los Angeles Water Quality Control Board (Los Angeles Water Board) on November 8, 2018. Order No. R4-2018-0156 serves as a permit under the National Pollutant Discharge Elimination System (NPDES No. CA0110175). The Permittee filed a Report of Waste Discharge (ROWD) and applied to the Los Angeles Water Board for reissuance of Waste Discharge Requirements (WDRs) and NPDES permit on July 27 and August 14, 2023 to discharge secondary and tertiary-treated wastewater to the Pacific Ocean. The application was deemed complete on December 13, 2023. The terms and conditions of the current NPDES permit have been automatically continued and remain in effect until new WDRs and NPDES permit are adopted pursuant to the proposed Order.

On the basis of preliminary staff review and application of lawful standards and regulations, the Los Angeles Water Board tentatively propose to issue consolidated WDRs and the NPDES permit under title 40 of the Code of Federal Regulations (40 CFR) § 124.4(c)(2).
