Mr. Jonathan Bishop, P.E.
Executive Officer
California Regional Water Quality Control Board, Los Angeles Region
320 W. 4th Street, Suite 200
Los Angeles, CA 90013

**RE: Suspension of Federal 316(b) Rule Requirements;
El Segundo Generating Station NPDES Permit No. CA0001147, CI-4667**

Dear Mr. Bishop,

As noticed in the Federal Register on July 9, 2007, US EPA took final action to suspend federal Phase II 316(b) requirements. Pursuant to that suspension, El Segundo Power, LLC (ESP) hereby amends its Report of Waste Discharge (ROWD) submitted on September 24, 2004, for renewal of NPDES Permit No. CA0001147, CI-4667, to remove 316(b) compliance requirements.

Since the Regional Board has not yet taken action on the ROWD, no Phase II 316(b) requirements have yet been incorporated into the NPDES permit. The ESP ROWD application included a compliance timeline for the now suspended Phase II 316(b) rule. With suspension in force, ESP amends the ROWD to remove those compliance requirements, including the requirement to submit a Phase II 316(b) Comprehensive Demonstration Study by January 7, 2008, and any other Phase II 316(b) requirement.

In response to similar requests, Phase II 316(b) requirements integrated in NPDES permits for Southern California Edison and Cabrillo Power I LLC were suspended by the San Diego Regional Water Quality Control Board (attached as reference).

If you have any questions please contact Mr. Tim Hemig at (760) 710-2144.

Sincerely,

EL SEGUNDO POWER, LLC

Keith S. Richards, President
