Subject: Semi-Annual Annual Report Monitoring Report

Dear Ms. Razzak:

TECS Environmental is submitting the Semi-Annual Monitoring Report on behalf of the **City of Gardena** – a requirement specified in Attachment E of the Los Angeles MS4 Permit. The report includes wet weather outfall and receiving water monitoring data collected from late 2016 to early 2017.

The data is contained on an Excel spreadsheet (attachment 1). Per your instructions, the format used to report the data comports with CEDEN, which is used by the State and Regional Boards Surface Water Ambient Monitoring Program (SWAMP). It also comports with the most recent update of the Southern California Monitoring Coalition's Standardized Data Transfer requirements.

Also included is a description of the City's efforts to identify and sample non-stormwater flows from its outfalls to the Dominguez Channel above Vermont Avenue (attachment #2).

It is hoped that the submittal of the requisite data is in keeping with your expectations. If not, please do not hesitate to call me.

Sincerely,

A handwritten signature in black ink, appearing to read "Ray Tahir".

Ray Tahir
President
