Los Angeles, CA 90013

RE: Monitoring Reporting Permit Year 2016-2017/2017-2018 (January thru December)
City of La Habra Heights
Permit No. CAS004001 (Order No. R4-2012-0175)

Dear Ms. Razzak:

The City of La Habra Heights is submitting in this letter an explanation and presentation of the monitoring for January 1 through December, 12, 2017. The City has taken a proactive approach to monitoring starting in 2017 as dry and weather events were monitored and the required daily photographs were taken. It is noted that sampling is performed for both San Jose Creek and Coyote Creek. The rain event summary is included in Appendix A.

Rain event sampling has been completed for one rain event in late 2016 and two in the winter of 2017. A summary of this sampling is included in Appendix C. In summary, these three events show that, other than elevated TDS levels (the discharge points do have soft bottoms), the runoff from the City meets regional water quality standards except for bacteria. It is noted that in this jurisdiction, wildlife is a permanent contributor due to the Wildlife Corridor. Staff has obtained sampling equipment, two laboratories were contracted and a consultant has been hired to obtain samples and correctly document the storm events.

Required Monitoring

The City was required to perform the following monitoring:

- Daily photographs of key discharge points
- Four sets of dry weather monitoring
- Three sets of wet weather monitoring
- Participation in two regional monitoring programs.

Each monitoring requirement is discussed in the following paragraphs.

Daily Photographs

As presented in the 2017 ROWD and Integrated Monitoring Plan (approved December 7, 2015), the City was allowed to document flows using photographic monitoring. A city staff member has been assigned to taking daily photographs of both dry weather and wet weather flows. The photos have been 1) logged based on the photograph locations, dates and

note if flow is visible; 2) compare the data to regionally documented precipitation data which is downloaded from Los Angeles County Precipitation website. There is a Los Angeles County station located in La Habra Heights; and 3) calibrate the photographs to the rain event values so that an estimated rain event sizing can be presented for actual discharges from the City. The goal is to show and calibrate what rain event sizing actually causes discharges from the City. Rain events for 2015 to 2017 were analyzed. It has been decided that an additional year of photos should be compiled.

The City designated a staff member to obtain daily photographs at five key locations throughout the City. The purpose of the photos was to compare in-situ conditions as compared to the measured rain events. Using the County of Los Angeles rain gauge station located within the City jurisdiction it is noted that there were nine recorded rain events in the January through December 2017 calendar year (half of 2016/2017 and half 2017/2018 Permit years). All nine of the events were over 0.2 inches with discharges noted from each of the events. A summary of the rain events and the sizing for La Habra Heights is included in Attachment A.

It appears that from the photo sets, and the locally known understanding of the discharge points, the small rain events documented during this permit year unlikely discharged for dry weather and events less than 0.1 inches. The rain events over 0.2 inches triggered discharges from the two primary discharge points. Moving forward, the increased number of photos and the simultaneously monitoring of rain events should provide ongoing verification of the rain event sizing which actually discharges from the jurisdiction. The City has completed cataloging and documenting the photographs so that the rain event sizing, discharge photos and monitoring data are all correlated.

Dry and Wet Weather Monitoring

The City completed all of the required dry and wet weather sampling events. There were no dry weather flows and there were three wet weather samples obtained for the 2016 - 2017 permit year.

Using the same contract staff for both the dry and wet weather events, it was observed that no flows were found on the dry weather dates. Three wet weather monitoring events were obtained. Monitoring was completed for the December 16, 2016, January 9 and February 17, 2017 rain events. The dry weather dates were August 10, August 24, September 7 and September 21, 2017.

The original laboratory results are included in Attachment C

Using the thresholds presented in the Watershed Management Plan (WMP) and the Integrated Monitoring Plan (IMP), outfalls discharges are in compliance except for the bacteria samples. Compliance for bacteria will be difficult in these drainages as both discharge points are located within natural drainages. The San Jose Creek location is located just outside a wildlife conservation area. The Coyote Creek location is located within a heavily vegetated drainage with many types of animals (coyotes, raccoons, rodents, birds, bats) living in the drainage.

Regional Sampling

The City of La Habra Heights did participate in two regional group monitoring programs.

1) Upper San Gabriel River EWMP Group: Participation includes: USGR_SJC_C-1 which is S14.

2) Harbor Toxics TMDL Program: Participation to include: Meeting objectives of the Harbor Toxic Pollutants TMDL by installing one monitoring station in the Los Angeles River at Wardlow Road, one monitoring station in the San Gabriel River near Spring Street, and one monitoring station in the Coyote Creek, also near Spring Street and conducting monitoring at said monitoring stations (collectively "Monitoring Stations") to ensure consistency with other regional monitoring programs and usability with other TMDL related studies. Station S13 applies to the City.

A summary of regional lab results, as applicable to the City, are as follows:

Location	Date	Dry/Wet	Constituent	Results
Coyote Creek (S13)	8/24/16	Dry	Total Copper	10.6 ug/L
	11/20/16	Wet	Total Copper	43.2 and 45.4 ug/L
	11/20/16	Wet	Total Lead	20.7 and 19.2 ug/L
	11/20/16	Wet	Total Zinc	231.0 and 78.0 ug/L
	6/7/17	Dry	Total Copper	12.5 ug/L
San Jose Creek (S14)	No flows recorded	Dry		NA
	12/16/16	Wet	Total Lead	29.2 and 28.9 ug/L
	1/10/17	Wet	Total Lead	6.9 ug/l
	1/10/17	Wet	Total Lead (dissolved)	ND
	6/7/17	Dry	Total Lead	NA

Based on this regional data, which is a snapshot in time, the wet weather lead and the dry weather copper values are within TMDL parameters. There is an improvement in the Lead value for S14. The other parameters are above current TMDL thresholds. It is expected that as the WMPs and EWMPs progress, the metals values should reduce over time. One toxicity test was also completed and is included in Attachment D. We did not include copies of all of the regional data as it is expected this has been submitted to the Water Board through the regional monitoring program. If a submittal is necessary, the City will submit as an addendum to this letter. The regional SDTF data is included in Appendix B and the Toxicity results are on Appendix D.

City of La Habra Heights
1245 No. Hacienda Blvd.
La Habra Heights, CA 90631
(562) 694-6302

The City appreciates the Water Board staff's time and effort concerning this matter. If there are additional questions or if the Water Board would like to discuss the tasks that have been presented, please do contact us so a conference call or meeting can be scheduled. Please contact Cynthia Gabaldon at 909-455-8520 or Cynthia.gabaldon@cgmre.com

Sincerely,

Mr. Jarad Hildenbrand
City Manager
City of La Habra Heights

ATTACHMENT A – RAIN EVENT SUMMARY

Rain Event Summary

City of La Habra Heights

Los Angeles County Station 327 (Reference ID 1088B) - La Habra Heights

DATE	RAIN EVENT TOTAL	Notes
1/5/2017	.472	Discharge noted on photos
1/9 -1/12/17	2.36	Discharge noted on photos; samples taken
1/19-1/20/17	2.67	Discharge noted on photos
1/22-1/23/17	3.14	Discharge noted on photos
2/6-2/7/17	1.10	Discharge noted on photos

ATTACHMENT C- LA HABRA HEIGHTS OUTFALL LABORATORY REPORTS

MONITORING DATA 2016-2017

City of La Habra Heights Stormwater Sampling Summary Table

Sampling Event	Pollutants	Thresholds	Test Results	
Wet or Dry			Date	Flow information from sampling time
Daily	Flow	Daily photos		
Wet – 1			12/19/2016	
Coyote Creek	pH	6.0-8.5	7.32	Estimated flow at approx. 5 cfs. Flow was noted to be infiltrating before leaving jurisdiction
	TSS	264.1 mg/L	262	
	TDS	750 mg/L	825	
	Hardness	-	420	
	Dissolved Oxygen	>7.0 mg/L	11.23	
	Temperature	-	14.2	
	Specific Conductivity	-	11.68	
	Coliform Bacteria	235 E. coli/100m	25,600	
	Indicator Bacteria	235 E. coli/100m		
	Lead (CC)	96.99 µg/L x daily storm volume (L)	Total: 12.6 ug/L Dissolved: 0.647 ug/L	
	Copper (CC)	24.71 µg/L x daily storm vol (L)	Total: 18 ug/L Dissolved: 5.58 ug/L	
	Zinc (CC)	144.57 µg/L x daily storm vol (L)	Total: 72.9 ug/L Dissolved: 35.5 ug/L	
San Jose Creek	pH	6.0-8.5	6.95	Estimated flow approx. at 20 cfs
	TSS	264.1 mg/L	306	
	TDS	750 mg/L	70	
	Hardness	-	40	
	Dissolved Oxygen	>7.0 mg/L	10.72	
	Temperature	-	13.3	
	Specific Conductivity	-	71.0	
	Coliform Bacteria	235 E. coli/100m	24,300	
	Indicator Bacteria	235 E. coli/100m		
	Selenium (SJC)	NA	Total: 0.389 ug/L Dissolved: 0.302 ug/L	
	Lead (SGR)	81.34 µg/L x daily storm vol. (L)	Total: 36.6 ug/L Dissolved: 0.884 ug/L	
Wet -2			1/09/17	
Coyote Creek	pH	6.0-8.5	7.64	Estimated flow approx. at 2 cfs
	TSS	-	621	
	TDS	750 mg/L	690	
	Hardness	-	390	
	Dissolved Oxygen	>7.0 mg/L	10.17	
	Temperature	-	13.1	
	Specific Conductivity	-	103.3	
Wet -2 Coyote Creek cont.	Lead (CC)	96.99 µg/L x daily storm volume (L)	Total: 22.7 ug/L Dissolved: ND	
	Copper (CC)	24.71 µg/L x daily storm vol (L)	Total: 28.6 ug/L Dissolved: 5.52 ug/L	
	Zinc (CC)	144.57 µg/L x daily storm vol (L)	Total: 142 ug/L Dissolved: 11.1 ug/L	Blank tested at 42.8 ug/L
San Jose Creek	pH	6.0-8.5	8.53	Estimated flow approx. at 0.4 cfs
	TSS	-	280	
	TDS	750 mg/L	96	
	Hardness	-	37	
	Dissolved Oxygen	>7.0 mg/L	10.42	
	Temperature	-	12.9	
	Specific Conductivity	-	57.3	
	Selenium (SJC)	NA	ND	
	Lead (SGR)	81.34 µg/L x daily storm vol. (L)	Total: 13.3 ug/L Dissolved: 0.344 ug/L	
Wet -3			2/17/17	
Coyote Creek	pH	6.0-8.5	7.8	Estimated flow approx. at 4 cfs
	TSS	-	577	
	TDS	750 mg/L	830	
	Hardness	-	480	
	Dissolved Oxygen	>7.0 mg/L	9.35	
	Temperature	-	14.6	
	Specific Conductivity	-	1152	
	Lead (CC)	96.99 µg/L x daily storm volume (L)	Total: 21.6 ug/L Dissolved: 0.151 ug/L	
	Copper (CC)	24.71 µg/L x daily storm vol (L)	Total: 22.3 ug/L Dissolved: 5.96	
	Zinc (CC)	144.57 µg/L x daily storm vol (L)	Total: 116 ug/L Dissolved: 51.1 ug/L	
San Jose Creek	pH	6.0-8.5	7.75	

	TSS	-	2170	Estimated flow approx. at 3 cfs
	TDS	750 mg/L	110	
	Hardness	-	81	
	Dissolved Oxygen	>7.0 mg/L	10.16	
	Temperature	-	12.3	
	Specific Conductivity	-	57.6	
	Selenium (SJC)	NA	Total: 0.48 ug/l Dissolved:.380 ug/L	
	Lead (SGR)	81.34 µg/L x daily storm vol. (L)	Total: 65.9 ug/L Dissolved: .745 ug/L

GENERAL INFORMATION

Date: 01/09/17

Project #: 16220 Time Start: 06:35a End: 06:50a Sampling Team (Initials): GG EA

Site ID: LHH-1 CC Picture Qty: 16 Photos: Upstream 5 Downstream 4

GPS Coordinates: (lat) 33.947 (lon) -117.966 Camera # : 16

OBSERVATIONS & MEASURMENTS

Weather: dawn, light rain, low wind

Water Color: dark brown milkshake In-Stream Activity: none

Water Characteristics (flow type, odor, turbidity, floatables):

moderate flow, earthy odor, turbid, bubbles/foam, floatable leaf debris

Environmental Observations:

Trash: ☐

Wildlife: ☐

Reacreational Uses: ☐

Homeless activity: ☐

Other: none

In situ Water Quality Measurements

Time:	06:45a
Temp (°C):	13.1
pH:	7.64
D.O. (mg/L):	10.17
Turbidity (NTU):	358.8
Specific Cond. (µS/cm):	1033

Work Order Narrative

Work Order: 17-01-0535 Page 1 of 1

Condition Upon Receipt:

Samples were received under Chain-of-Custody (COC) on 01/09/17. They were assigned to Work Order 17-01-0535.

Unless otherwise noted on the Sample Receiving forms all samples were received in good condition and within the recommended EPA temperature criteria for the methods noted on the COC. The COC and Sample Receiving Documents are integral elements of the analytical report and are presented at the back of the report.

Holding Times:

All samples were analyzed within prescribed holding times (HT) and/or in accordance with the Calscience Sample Acceptance Policy unless otherwise noted in the analytical report and/or comprehensive case narrative, if required.

Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.

Quality Control:

All quality control parameters (QC) were within established control limits except where noted in the QC summary forms or described further within this report.

Subcontractor Information:

Unless otherwise noted below (or on the subcontract form), no samples were subcontracted.

Additional Comments:

Air - Sorbent-extracted air methods (EPA TO-4A, EPA TO-10, EPA TO-13A, EPA TO-17): Analytical results are converted from mass/sample basis to mass/volume basis using client-supplied air volumes.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are always reported on a wet weight basis.

Glossary of Terms and Qualifiers

Work Order: 17-01-0535 Page 1 of 1

Qualifiers	Definition
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution. Therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to suspected matrix interference. The associated LCS recovery was in control.
4	The MS/MSD RPD was out of control due to suspected matrix interference.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to suspected matrix interference.
6	Surrogate recovery below the acceptance limit.
7	Surrogate recovery above the acceptance limit.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
BV	Sample received after holding time expired.
CI	See case narrative.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
HD	The chromatographic pattern was inconsistent with the profile of the reference fuel standard.
HDH	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but heavier hydrocarbons were also present (or detected).
HDL	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but lighter hydrocarbons were also present (or detected).
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
JA	Analyte positively identified but quantitation is an estimate.
ME	LCS Recovery Percentage is within Marginal Exceedance (ME) Control Limit range (+/- 4 SD from the mean).
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
SG	The sample extract was subjected to Silica Gel treatment prior to analysis.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.
	Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are reported on a wet weight basis.
	Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.
	A calculated total result (Example: Total Pesticides) is the summation of each component concentration and/or, if "J" flags are reported, estimated concentration. Component concentrations showing not detected (ND) are summed into the calculated total result as zero concentrations.

Work Order Narrative

Work Order: 17-02-1732 Page 1 of 1

Condition Upon Receipt:

Samples were received under Chain-of-Custody (COC) on 02/17/17. They were assigned to Work Order 17-02-1732.

Unless otherwise noted on the Sample Receiving forms all samples were received in good condition and within the recommended EPA temperature criteria for the methods noted on the COC. The COC and Sample Receiving Documents are integral elements of the analytical report and are presented at the back of the report.

Holding Times:

All samples were analyzed within prescribed holding times (HT) and/or in accordance with the Calscience Sample Acceptance Policy unless otherwise noted in the analytical report and/or comprehensive case narrative, if required.

Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.

Quality Control:

All quality control parameters (QC) were within established control limits except where noted in the QC summary forms or described further within this report.

Subcontractor Information:

Unless otherwise noted below (or on the subcontract form), no samples were subcontracted.

Additional Comments:

Air - Sorbent-extracted air methods (EPA TO-4A, EPA TO-10, EPA TO-13A, EPA TO-17): Analytical results are converted from mass/sample basis to mass/volume basis using client-supplied air volumes.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are always reported on a wet weight basis.

Glossary of Terms and Qualifiers

Work Order: 17-02-1732 Page 1 of 1

Qualifiers	Definition
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution. Therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to suspected matrix interference. The associated LCS recovery was in control.
4	The MS/MSD RPD was out of control due to suspected matrix interference.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to suspected matrix interference.
6	Surrogate recovery below the acceptance limit.
7	Surrogate recovery above the acceptance limit.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
BV	Sample received after holding time expired.
CI	See case narrative.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
HD	The chromatographic pattern was inconsistent with the profile of the reference fuel standard.
HDH	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but heavier hydrocarbons were also present (or detected).
HDL	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but lighter hydrocarbons were also present (or detected).
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
JA	Analyte positively identified but quantitation is an estimate.
ME	LCS Recovery Percentage is within Marginal Exceedance (ME) Control Limit range (+/- 4 SD from the mean).
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
SG	The sample extract was subjected to Silica Gel treatment prior to analysis.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.
	Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are reported on a wet weight basis.
	Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.
	A calculated total result (Example: Total Pesticides) is the summation of each component concentration and/or, if "J" flags are reported, estimated concentration. Component concentrations showing not detected (ND) are summed into the calculated total result as zero concentrations.
