RE: Comments on Draft NPDES Permit for the Groundwater Treatment Plant,  
former McClellan Air Force Base

Dear Mr. Landau

Thank you for the opportunity to comment on the draft revision to the waste discharge requirements for the Air Force Real Property Agency former McClellan Air Force Base (AFB) Groundwater Extraction and Treatment System (GWTS). This system is part of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) remedy for volatile organic compound (VOC) contamination in groundwater, as specified in the final Basewide Groundwater VOC Record of Decision (ROD), signed in 2007. It forms the basis for the subsequent Air Force determination of substantive requirements.

Attached are comments that reflect changes in the groundwater treatment train as well as adjustments that should be made to the permit to recognize the long monitoring history and compliance record of a stable influent stream.

If you have any questions or concerns, please contact Mr. Ken Smarkel at (916) 643-0830, ext. 235.

Sincerely

A handwritten signature in black ink, appearing to read "Steven K. Mayer".

STEVEN K. MAYER, P.E.  
BRAC Environmental Coordinator
