NOTICE TENTATIVE WASTE DISCHARGE REQUIREMENTS FOR CALAVERAS COUNTY WATER DISTRICT COPPER COVE WASTEWATER TREATMENT PLANT CALAVERAS COUNTY

Calaveras County Water District (Discharger) owns and operates Copper Cove Wastewater Treatment Plant. The facility is currently regulated by Waste Discharge Requirements (WDRs) Order No. 5-00-136. The Discharger plans to increase the monthly average dry weather influent flow limit from 0.20 million gallons per day (mgd) to 0.35 mgd by modifying the existing secondary WWTP facilities. The Modifications include installing a mechanical headworks, reconfiguring treatment Ponds and increasing Pond 6 dam height by approximately ten feet. The secondary treated wastewater is either further treated to tertiary levels for Saddle Creek Golf Course irrigation or disposed to the onsite land application area. The golf course irrigation will be the primary means of reuse and the land application area will serve as a backup means of effluent disposal. The California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board) will consider adoption of WDRs to regulate the discharge.

A public hearing concerning this matter will be held during the Central Valley Water Board meeting, which is scheduled for:

TIME: 8:30 AM
PLACE: Regional Water Quality Control Board, Central Valley Region
11020 Sun Center Dr., Suite #200
Rancho Cordova, CA 95670
