Subject: a quintessential alpine river

Hi Stacy,

I am a Northern CA boater who loves Upper Sac. We have run Sims Flat to Dog Creek several times in 2011 and 2011 during the months of March, April, and May at flows ranging from 1,750-3,000cfs on the Delta Gage. We run two to three 14' rafts in our group. The guides and the paddle teams love this river for its scenic beauty, continuous whitewater, quick shuttle time, and for it being quintessential alpine river. We have seen families of river otters, lone bald eagles, and osprey catch trout 30' from us! A truly great river experience to share with friends & family!
