NOTICE OF PUBLIC HEARING
concerning

**CONSIDERATION OF RENEWAL OF WASTE DISCHARGE REQUIREMENTS
(NPDES NO. CA0077704)
FOR
CITY OF ANDERSON
ANDERSON WATER POLLUTION CONTROL PLANT
SHASTA COUNTY**

The City of Anderson (Discharger) owns and operates a wastewater treatment facility and discharges up to an average monthly dry weather flow of 2.0 million gallons per day of treated domestic wastewater into the Sacramento River, a water of the United States. The advanced secondary wastewater treatment system consists of a mechanical bar screen, a backup manual bar screen, a backup comminutor, two activated sludge aeration basins, two secondary clarifiers, one flow equalization basin, three pressurized multi-media filtration units, one chlorine contact basin, and sulfur dioxide dechlorination. Solids handling processes include aerobic digestion, and digested solids stabilization and storage basins. Sludge is dried onsite and disposed offsite at West Central Landfill in Shasta County and/or land applied on property owned by the City of Redding. The discharge is regulated under an existing National Pollutant Discharge Elimination System (NPDES) permit. The Discharger submitted a Report of Waste Discharge and requested renewal of the existing NPDES permit. Staff recommends the Regional Water Quality Control Board adopt the tentative NPDES permit to regulate the discharge from the facility.

A public hearing concerning this matter will be held during the Central Valley Regional Water Quality Control Board meeting that is scheduled for:
