

Board Briefing Materials – April 15, 2015

1. An Interagency Coordinated Program for Wetland water Use Planning Central Valley, California: Final Task Force Report: *Chapter 5 excerpt.*

Although developed in 1998, this document provides an excellent summary of the water management and human effort needed to provide wildlife habitat using managed wetlands in the Central Valley. Some of the site-specific accounts are outdated (e.g. groundwater use at GRCD) but important water-related issues are updated in workshop presentations.

2. Save California's Last Wetlands

3. Preserve the Pacific Flyway in Drought

4. Wetland Policies and Wetland Programs

5. Major Wetland Areas in the Central Valley of California
