Subject: Transmittal of City of Marysville POTW permit and Golder letter on consistency of POTW permit volume with prior water balance
Attachments: 5015.01.28 Golder Letter on POTW Permit Volume Consistency with Water Balance Feather River Organics.pdf; 2015. FRO POTW Permit 15_05 from City of Marysville.pdf

January 28, 2015

Dear Wendy:

This letter is a follow-up letter to my letter dated January 15, 2015, regarding the City of Marysville Wastewater Discharge Permit and the updated water balance study prepared by Golder Associates.

This will confirm that, effective January 1, 2015, the City of Marysville has issued a permit to Recology Yuba Sutter, Feather River Organics facility for 200,000 gallons per day maximum and 750,000 gallons per week maximum (attached).

Also attached is a letter of this same date from Golder Associates that confirms that their water balance report dated January 14, 2015, which incorporated the above noted POTW limits, remains accurate.

Thank you,

Drew

Marysville, CA 95901

**RE: DISCHARGE PERMIT FOR THE FEATHER RIVER ORGANICS COMPOSTING OPERATION,
RECOLOGY YUBA SUTTER FACILITY, MARYSVILLE, CALIFORNIA**

Dear Mr. Graham:

Golder Associates (Golder) Inc. reviewed the City of Marysville Wastewater Discharge Permit No. 15-05 for the Feather River Organics (FRO) compost operations in Marysville, California. The maximum flow limits in the permit include a maximum daily volume of 200,000 gallons and a maximum weekly volume of 750,000 gallons per week of storm water flows from the compost area. These maximum flows are consistent with the updated water balance calculations provided by Golder on January 14, 2015 for the current storm water controls at the site. Therefore, it is our opinion that FRO has the storm water controls in place to accommodate a 25-year, 24-hour storm event.

If you have any questions, please contact us.

Sincerely,

GOLDER ASSOCIATES INC.
