Dear Peggy:

Thank you for sending the informative letter about the Homestake/Wilbur Springs mine clean up this summer.

I appreciate that Homestake has postponed the start of the Homestake mine clean up project in order to avoid impacting Wilbur's business during July 4th; however, that well intentioned delay negatively impacts a family event on September 17th which is significantly more important than impacting our family business.

On September 17th my daughter, Sarana, will be married in the Wilbur Springs Nature Preserve. Most unfortunately, the spot Homestake has chosen, of all the 1560 acres in the Nature Preserve, for the clean up contractor's office and related equipment, is directly in front of my daughter's home.

It is extremely important to our entire family, and friends, that the equipment be off site before the September 17th wedding.

We all know that a first wedding is a once in a life time event. Therefore, I am trusting Homestake to start the project early enough to allow the contractor to be off site before the wedding.

Given the cordial, and cooperative, relationship Wilbur Hot Springs has enjoyed with Homestake, going back over 35 years, my family and I are counting on this request being honored.

Wishing you excellent health,

Richard
