

Update on the salt and boron TMDL and Basin Plan Amendment

On 29 April 2004 Regional Board staff held a public workshop to provide interested parties with an opportunity to propose alternate approaches to the proposed salt and boron TMDL and Basin Plan Amendment. During the workshop Regional Board staff indicated that the salt and boron TMDL would likely be considered for adoption at the July 2004 Regional Board meeting, however, this hearing has been postponed to allow additional time to respond to comments and to consider proposals discussed at the 29 April 2004 workshop.

A Regional Board hearing for consideration of the proposed salt and boron TMDL Basin Plan Amendment is tentatively scheduled for the September 2004 Board meeting (September 9 and 10). Response to comments and a draft final staff report will be available by 23 July 2004 (45 days prior to the September 2004 Regional Board hearing).
