Checklist Completed B

For: MBC  7/23/2014

Reviewed By:

 07/28/14

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013014-012A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.022269 * 1 \\ &= 0.022269\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

 8/5/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013014-004A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 11.8095 * 2 \\ &= 23.619\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 24$$

Nancy 8/5/2014

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Orthophosphate concentration, in mg/L, in the original sample as follows:

$$\text{Orthophosphate, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013014-007C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Orthophosphate, mg/L} &= 0.288 * 1 \\ &= 0.288 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Orthophosphate, mg/L} = \mathbf{0.29}$$

 8/5/2014

Sample Calculation

METHOD: SM5310C

TEST NAME: TOTAL ORGANIC CARBON

MATRIX: WATER

FORMULA:

Calculate the TOC concentration, in mg/L, in the original sample as follows:

$$\text{TOC} = [A] [\text{DF}] - B$$

where:

A = mg/L, instrument calculated concentration

DF = dilution factor

B = mg/L, TOC concentration in the calibration blank

For: **N013014-014D**

The concentration in mg/L is calculated as follows:

$$\text{TOC} = [0.50980] [1] - 0.04820$$

$$\text{TOC} = 0.46160$$

Reporting results in two significant figures,

$$\text{TOC} = 0.46 \text{ mg/L}$$

$$\text{TOC} = \text{ND}$$

PS 8/4/2014

Sample Calculation

METHOD: EPA 6010

TEST NAME: Heavy Metals by ICP

MATRIX: Groundwater

FORMULA:

Calculate the Iron concentration, in mg/L, in the original sample as follows:

$$\text{Iron, mg/L} = A * DF * PF$$

where:

A = mg/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Amt. of Sample mL

For Sample **N013014-005B**, the concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Iron, mg/L} &= 0.1255233658 * 1 * (25/25) \\ &= 0.1255233658 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Iron, mg/L} = 0.13$$

RE: PGE Hinkley, 492581.UR.AU.FW

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on July 22, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Subcontracted Analyses:

Gross Alpha/Beta was subcontracted to Pace Analytical- Greensburg,PA.

Analytical Comments for EPA 200.8_Dissolved:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria for Uranium since the analyte concentration in the sample is disproportionate to the spike level. The associated Laboratory Control Sample (LCS) recovery was acceptable.

SAMPLE CALCULATION

METHOD: SM 2540C

TEST NAME: Total Filterable Residue

MATRIX: Water

FORMULA:

Calculate TDS concentration in mg/L, in the original sample as follows:

$$\text{TDS, mg/L} = \frac{(A-B)*1000000}{C}$$

Where:

A = weight in g of dish + residue after drying

B = weight of dish in g

C = volume of sample used in mL

For N013015-007D, TDS concentration in mg/L is calculated as follows:

$$\text{TDS, mg/L} = \frac{(64.0044-63.9712)*1000000}{100}$$

332 mg/L

Reporting result in two significant figures,

$$\text{TDS} = 300 \text{ mg/L}$$

7/29/2014

TOTAL DISSOLVED SOLIDS, TDS

$$\text{TDS, mg/L} = (\text{A}-\text{B}) \times 1000000 / \text{C}$$

WHERE:

A = weight in grams of dish + residue after drying

B = weight of dish in grams

C = volume of sample used in mL

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Uranium Radioactivity, in pCi/L, in the original sample as follows:

$$\text{Uranium, pCi/L} = A * DF * PF * 0.67 \text{ (pCi/ug)}$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

0.67 = conversion factor

For Sample **N013015-001B**, the Uranium Radioactivity in pCi/L is calculated as follows:

$$\begin{aligned} \text{Uranium, pCi/L} &= 10.712553206 * 5 * (25/25) * 0.67 \\ &= 35.8870532401 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Uranium, pCi/L} = \mathbf{36}$$

Murray 8/5/2014

Qualifiers:

- B Analyte detected in the associated Method Blank
- ND Not Detected at the Reporting Limit
- DO Surrogate Diluted Out
- E Value above quantitation range
- R RPD outside accepted recovery limits
- Calculations are based on raw values
- H Holding times for preparation or analysis exceeded
- S Spike/Surrogate outside of limits due to matrix interference

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013015-007A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.02736 * 1 \\ &= 0.02736\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

Nancy 8/5/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013015-003A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 5.4297 * 1 \\ &= 5.4297\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 5.4$$

Nancy 8/5/2014

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Nitrate concentration, in mg/L, in the original sample as follows:

$$\text{Nitrate, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013015-001C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Nitrate, mg/L} &= 0.711 * 20 \\ &= 14.22 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Nitrate, mg/L} = 14$$

Nancy 8/5/2014

Sample Calculation

METHOD: SM5310C

TEST NAME: TOTAL ORGANIC CARBON

MATRIX: WATER

FORMULA:

Calculate the TOC concentration, in mg/L, in the original sample as follows:

$$\text{TOC} = [A] [\text{DF}] - B$$

where:

A = mg/L, instrument calculated concentration

DF = dilution factor

B = mg/L, TOC concentration in the calibration blank

For: **N013015-001E**

The concentration in mg/L is calculated as follows:

$$\text{TOC} = [0.83870] [1] - 0.04820$$

$$\text{TOC} = 0.79050$$

Reporting results in two significant figures,

$$\text{TOC} = 0.79 \text{ mg/L}$$

$$\text{TOC} = \text{ND}$$

PS 8/4/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013015-001B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 3.8929737290464 * 1 * (25/25) \\ &= 3.8929737290464 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 3.9$$

RE: Project: N013015
Pace Project No.: 30126275

Dear Mr. Cartin:

Enclosed are the analytical results for sample(s) received by the laboratory between July 29, 2014 and July 31, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Jacquelyn Collins

PROJECT NARRATIVE

Project: N013015
Pace Project No.: 30126275

Method: EPA 900.0
Description: 900.0 Gross Alpha/Beta
Client: ASSET Laboratories
Date: August 14, 2014

General Information:

11 samples were analyzed for EPA 900.0. All samples were received in acceptable condition with any exceptions noted below.

Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

RE: PGE Hinkley, 492581.UR.SW.FW

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on July 22, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020_Dissolved:

Because the results for total dissolved chromium (2.127 ug/L) and hexavalent chromium (1.381 ug/L) for sample N013016-019 (DW-03-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 2.138 and 1.211 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On: 7/22/2014 Workorder: N013016
 Rep sample Temp (Deg C): 4.1/1.8/2.0 IR Gun ID: 2
 Temp Blank: Yes No
 Carrier name: ATL
 Last 4 digits of Tracking No.: NA Packing Material Used: None
 Cooling process: Ice Ice Pack Dry Ice Other None

Sample Receipt Checklist

- | | | | |
|---|---|-----------------------------|---|
| 1. Shipping container/cooler in good condition? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | Not Present <input type="checkbox"/> |
| 2. Custody seals intact, signed, dated on shipping container/cooler? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 3. Custody seals intact on sample bottles? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 4. Chain of custody present? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 5. Sampler's name present in COC? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 6. Chain of custody signed when relinquished and received? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 7. Chain of custody agrees with sample labels? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 8. Samples in proper container/bottle? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 9. Sample containers intact? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 10. Sufficient sample volume for indicated test? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 11. All samples received within holding time? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 12. Temperature of rep sample or Temp Blank within acceptable limit? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 13. Water - VOA vials have zero headspace? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| 14. Water - pH acceptable upon receipt?
Example: pH > 12 for (CN,S); pH<2 for Metals | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 15. Did the bottle labels indicate correct preservatives used? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 16. Were there Non-Conformance issues at login? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| Was Client notified? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |

SAMPLE CALCULATION

METHOD: SM 2540C

TEST NAME: Total Filterable Residue

MATRIX: Water

FORMULA:

Calculate TDS concentration in mg/L, in the original sample as follows:

$$\text{TDS, mg/L} = \frac{(A-B)*1000000}{C}$$

Where:

A = weight in g of dish + residue after drying

B = weight of dish in g

C = volume of sample used in mL

For N013016-020D, TDS concentration in mg/L is calculated as follows:

$$\text{TDS, mg/L} = \frac{(61.4410-61.3575)*1000000}{100}$$

835 mg/L

Reporting result in two significant figures,

$$\text{TDS} = 840 \text{ mg/L}$$

7/29/2014

TOTAL DISSOLVED SOLIDS, TDS

$$\text{TDS, mg/L} = (\text{A}-\text{B}) \times 1000000 / \text{C}$$

WHERE:

A = weight in grams of dish + residue after drying

B = weight of dish in grams

C = volume of sample used in mL

JML
7/29/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013016-005A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.018146 * 1 \\ &= 0.018146\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

Nancy 8/5/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013016-025A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 8.1889 * 5 \\ &= 40.9445\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 41$$

 8/6/2014

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Nitrate concentration, in mg/L, in the original sample as follows:

$$\text{Nitrate, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013016-023C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Nitrate, mg/L} &= 0.764 * 5 \\ &= 3.82 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Nitrate, mg/L} = 3.8$$

Murray 8/5/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013016-001B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 2.88842382145906 * 1 * (25/25) \\ &= 2.88842382145906 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 2.9$$

RE: PGE Hinkley, 492581.UR.SW.FW

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on July 23, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

This is an amended report. Please disregard all previous documentation that corresponds to the page(s) enclosed.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020_Dissolved:

Because the results for total dissolved chromium (5.929 ug/L) and hexavalent chromium (4.465 ug/L) for sample N013028-046 (MW-97S-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 6.163 and 5.564 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On: 7/23/2014 Workorder: N013028
 Rep sample Temp (Deg C): 2.9/3.6/3.8 IR Gun ID: 2
 Temp Blank: Yes No
 Carrier name: ATL
 Last 4 digits of Tracking No.: NA Packing Material Used: None
 Cooling process: Ice Ice Pack Dry Ice Other None

Sample Receipt Checklist

- | | | | |
|---|---|--|---|
| 1. Shipping container/cooler in good condition? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | Not Present <input type="checkbox"/> |
| 2. Custody seals intact, signed, dated on shipping container/cooler? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 3. Custody seals intact on sample bottles? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 4. Chain of custody present? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 5. Sampler's name present in COC? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 6. Chain of custody signed when relinquished and received? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 7. Chain of custody agrees with sample labels? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 8. Samples in proper container/bottle? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 9. Sample containers intact? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 10. Sufficient sample volume for indicated test? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 11. All samples received within holding time? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 12. Temperature of rep sample or Temp Blank within acceptable limit? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 13. Water - VOA vials have zero headspace? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| 14. Water - pH acceptable upon receipt?
Example: pH > 12 for (CN,S); pH<2 for Metals | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> | NA <input type="checkbox"/> |
| 15. Did the bottle labels indicate correct preservatives used? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 16. Were there Non-Conformance issues at login?
Was Client notified? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |

Comments Sample ID MW-34-059-Q3 was received at pH 7. Acid added to pH <2.

Checklist Completed B AC  7/24/2014

Reviewed By:  07/28/14

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013028-021A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.158358 * 1 \\ &= 0.158358\end{aligned}$$

Reporting results in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 0.16$$

 8/7/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{6+}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{6+} calculated concentration
DF = dilution factor

For **N013028-006A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{6+}, \mu\text{g/L} &= 7.0359 * 5 \\ &= 35.1795\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{6+}, \mu\text{g/L} = 35$$

 8/6/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013028-003B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 8.3261482233 * 1 * (25/25) \\ &= 8.3261482233 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 8.3$$

RE: PGE Hinkley, 492581.UR.AU.FW

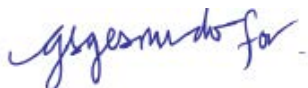

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on July 23, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and Advanced Technology Laboratories - Las Vegas.

Lab Order: N013029

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Subcontracted Analyses:

Gross Alpha/Beta was subcontracted to Pace Analytical- Greensburg,PA.

Analytical Comments for EPA 200.8_Dissolved:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria for Uranium possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

SAMPLE CALCULATION

METHOD: SM 2540C

TEST NAME: Total Filterable Residue

MATRIX: Water

FORMULA:

Calculate TDS concentration in mg/L, in the original sample as follows:

$$\text{TDS, mg/L} = \frac{(A-B)*1000000}{C}$$

Where:

A = weight in g of dish + residue after drying

B = weight of dish in g

C = volume of sample used in mL

For N013029-001D, TDS concentration in mg/L is calculated as follows:

$$\text{TDS, mg/L} = \frac{(63.9129-63.7955)*1000000}{100}$$

1174 mg/L

Reporting result in two significant figures,

$$\text{TDS} = 1200 \text{ mg/L}$$

TOTAL DISSOLVED SOLIDS, TDS

$$\text{TDS, mg/L} = (\text{A}-\text{B}) \times 1000000 / \text{C}$$

WHERE:

A = weight in grams of dish + residue after drying

B = weight of dish in grams

C = volume of sample used in mL

JML
7/31/2014

Sample Calculation

METHOD: EPA 200.8

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Uranium Radioactivity, in pCi/L, in the original sample as follows:

$$\text{Uranium, pCi/L} = A * DF * PF * 0.67 \text{ (pCi/ug)}$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

0.67 = conversion factor

For Sample **N013029-001B**, the Uranium Radioactivity in pCi/L is calculated as follows:

$$\begin{aligned} \text{Uranium, pCi/L} &= 47.4876118699287 * 1 * (25/25) * 0.67 \\ &= 31.8166999528522 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Uranium, pCi/L} = \mathbf{32}$$

- H Holding times for preparation or analysis exceeded
- S Spike/Surrogate outside of limits due to matrix interference

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013029-006A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.020725 * 1 \\ &= 0.020725\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

 8/6/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{6+}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{6+} calculated concentration
DF = dilution factor

For **N013029-001A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{6+}, \mu\text{g/L} &= 12.4843 * 1 \\ &= 12.4843\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{6+}, \mu\text{g/L} = 12$$

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Nitrate concentration, in mg/L, in the original sample as follows:

$$\text{Nitrate, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013029-003C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Nitrate, mg/L} &= 0.935 * 10 \\ &= 9.35 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Nitrate, mg/L} = 9.4$$

 8/6/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013029-001B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 11.233227659 * 1 * (25/25) \\ &= 11.233227659 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 11$$

RE: Project: N013029
Pace Project No.: 30126323

Dear Mr. Cartin:

Enclosed are the analytical results for sample(s) received by the laboratory on August 01, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Jacquelyn Collins

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, Inc..

PROJECT NARRATIVE

Project: N013029

Pace Project No.: 30126323

Method: EPA 900.0

Description: 900.0 Gross Alpha/Beta

Client: ASSET Laboratories

Date: August 15, 2014

General Information:

7 samples were analyzed for EPA 900.0. All samples were received in acceptable condition with any exceptions noted below.

Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

RE: PGE Hinkley, 492581.UR.SW.FW

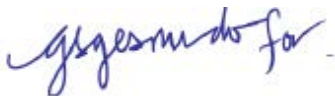

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on July 24, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE**SAMPLE RECEIVING/GENERAL COMMENTS:**

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020_Dissolved:

Because the results for total dissolved chromium (3.751 ug/L) and hexavalent chromium (2.664 ug/L) for sample N013039-014 (MW-112D-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 3.632 and 3.308 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Because the results for total dissolved chromium (6.095 ug/L) and hexavalent chromium (3.96 ug/L) for sample N013039-023 (MW-184S3-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 6.231 and 5.219 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Because the results for total dissolved chromium (4.895 ug/L) and hexavalent chromium (3.131 ug/L) for sample N013039-025 (MW-186S2-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 5.044 and 4.777 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Because the results for total dissolved chromium (4.742 ug/L) and hexavalent chromium (3.366 ug/L) for sample N013039-026 (MW-186S3-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 4.392 and 3.666 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Because the results for total dissolved chromium (3.714 ug/L) and hexavalent chromium (2.92 ug/L) for

Lab Order: N013039

CASE NARRATIVE

sample N013039-041 (MW-152S-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 3.691 and 3.046 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Checklist Completed B

AC  7/25/2014

Reviewed By:  07/28/14

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013039-016A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.070005 * 1 \\ &= 0.070005\end{aligned}$$

Reporting results in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = \mathbf{0.070}$$

8/7/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013039-003A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 3.4254 * 1 \\ &= 3.4254\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 3.4$$

 8/7/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013039-003B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 4.02469141399711 * 1 * (25/25) \\ &= 4.02469141399711 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 4.0$$

RE: PGE Hinkley, 492581.UR.AU.FW

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on July 24, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

Lab Order: N013040

CASE NARRATIVE**SAMPLE RECEIVING/GENERAL COMMENTS:**

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Subcontracted Analyses:

Gross Alpha/Beta was subcontracted to Pace Analytical- Greensburg,PA.

Analytical Comments for EPA 200.8_Dissolved:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria for Uranium possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical Comments for EPA 6020_Dissolved:

Because the results for total dissolved chromium (4.005 ug/L) and hexavalent chromium (2.458 ug/L) for sample N013040-002 (MW-89S-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 3.607 and 3.042 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

SAMPLE CALCULATION

METHOD: SM 2540C

TEST NAME: Total Filterable Residue

MATRIX: Water

FORMULA:

Calculate TDS concentration in mg/L, in the original sample as follows:

$$\text{TDS, mg/L} = \frac{(A-B)*1000000}{C}$$

Where:

A = weight in g of dish + residue after drying

B = weight of dish in g

C = volume of sample used in mL

For N013040-001D, TDS concentration in mg/L is calculated as follows:

$$\text{TDS, mg/L} = \frac{(61.8661-61.7253)*1000000}{100}$$

1408 mg/L

Reporting result in two significant figures,

$$\text{TDS} = 1400 \text{ mg/L}$$

TOTAL DISSOLVED SOLIDS, TDS

$$\text{TDS, mg/L} = (\text{A}-\text{B}) \times 1000000 / \text{C}$$

WHERE:

A = weight in grams of dish + residue after drying

B = weight of dish in grams

C = volume of sample used in mL

Sample Calculation

METHOD: EPA 200.8

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Uranium Radioactivity, in pCi/L, in the original sample as follows:

$$\text{Uranium, pCi/L} = A * DF * PF * 0.67 \text{ (pCi/ug)}$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

0.67 = conversion factor

For Sample **N013040-001B**, the Uranium Radioactivity in pCi/L is calculated as follows:

$$\begin{aligned} \text{Uranium, pCi/L} &= 18.7941822767655 * 1 * (25/25) * 0.67 \\ &= 12.5921021254329 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Uranium, pCi/L} = 13$$

- H Holding times for preparation or analysis exceeded
- S Spike/Surrogate outside of limits due to matrix interference

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013040-006A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.019937 * 1 \\ &= 0.019937\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

 8/7/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013040-007A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 1.7458 * 1 \\ &= 1.7458\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 1.7$$

8/7/2014

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Nitrate concentration, in mg/L, in the original sample as follows:

$$\text{Nitrate, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013040-004C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Nitrate, mg/L} &= 1.147 * 50 \\ &= 57.35 \end{aligned}$$

Reporting result in two significant figures,

$$\text{Nitrate, mg/L} = 57$$

 8/7/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013040-002B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 4.00484348636647 * 1 * (25/25) \\ &= 4.00484348636647 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 4.0$$

RE: Project: N013040
Pace Project No.: 30126324

Dear Mr. Cartin:

Enclosed are the analytical results for sample(s) received by the laboratory on August 01, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Jacquelyn Collins

PROJECT NARRATIVE

Project: N013040
Pace Project No.: 30126324

Method: EPA 900.0
Description: 900.0 Gross Alpha/Beta
Client: ASSET Laboratories
Date: August 15, 2014

General Information:

9 samples were analyzed for EPA 900.0. All samples were received in acceptable condition with any exceptions noted below.

Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

RE: PGE Hinkley, 492581.UR.AU.FW

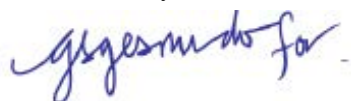

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on July 25, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Subcontracted Analyses:

Gross Alpha/Beta was subcontracted to Pace Analytical- Greensburg,PA.

SAMPLE CALCULATION

METHOD: SM 2540C

TEST NAME: Total Filterable Residue

MATRIX: Water

FORMULA:

Calculate TDS concentration in mg/L, in the original sample as follows:

$$\text{TDS, mg/L} = \frac{(A-B)*1000000}{C}$$

Where:

A = weight in g of dish + residue after drying

B = weight of dish in g

C = volume of sample used in mL

For N013055-003D, TDS concentration in mg/L is calculated as follows:

$$\text{TDS, mg/L} = \frac{(61.2384-61.1315)*1000000}{100}$$

1069 mg/L

Reporting result in two significant figures,

$$\text{TDS} = 1100 \text{ mg/L}$$

7/29/2014

TOTAL DISSOLVED SOLIDS, TDS

$$\text{TDS, mg/L} = (\text{A}-\text{B}) \times 1000000 / \text{C}$$

WHERE:

A = weight in grams of dish + residue after drying

B = weight of dish in grams

C = volume of sample used in mL

Jmer
7/29/2014

Sample Calculation

METHOD: EPA 200.8

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Uranium Radioactivity, in pCi/L, in the original sample as follows:

$$\text{Uranium, pCi/L} = A * DF * PF * 0.67 \text{ (pCi/ug)}$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

0.67 = conversion factor

For Sample **N013055-002B**, the Uranium Radioactivity in pCi/L is calculated as follows:

$$\begin{aligned} \text{Uranium, pCi/L} &= 6.6300616992 * 1 * (25/25) * 0.67 \\ &= 4.442141338464 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Uranium, pCi/L} = \mathbf{4.4}$$

Sample ID: N013055-002B-PS	SampType: PS	TestCode: 200.8DIS_U_	Units: pCi/L	Prep Date:	RunNo: 94407						
Client ID: ZZZZZ	Batch ID: 46211	TestNo: EPA 200.8	Analysis Date: 8/4/2014	SeqNo: 1818860							
Analyte	Result	PQL	SPK value	SPK Ref Val	%REC	LowLimit	HighLimit	RPD Ref Val	%RPD	RPDLimit	Qual
Uranium	19.766	1.3	13.40	4.442	114	80	120				

Qualifiers:

- B Analyte detected in the associated Method Blank
- ND Not Detected at the Reporting Limit
- DO Surrogate Diluted Out
- E Value above quantitation range
- R RPD outside accepted recovery limits
- Calculations are based on raw values
- H Holding times for preparation or analysis exceeded
- S Spike/Surrogate outside of limits due to matrix interference

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013055-006A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.016501 * 1 \\ &= 0.016501\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

 8/8/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For ~~N013055-003A~~ concentration in $\mu\text{g/L}$ is calculated as follows:

N013055-007A

$$\begin{aligned} \text{Cr}^{+6}, \mu\text{g/L} &= 14.3775 * 1 \\ &= 14.3775 \end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 14$$

REB 8/8/2014

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Nitrate concentration, in mg/L, in the original sample as follows:

$$\text{Nitrate, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013055-004C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Nitrate, mg/L} &= 0.678 * 20 \\ &= 13.56 \end{aligned}$$

Reporting result in two significant figures,

$$\text{Nitrate, mg/L} = 14$$

 8/7/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013055-004B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 33.4415786390268 * 1 * (25/25) \\ &= 33.4415786390268 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 33$$

Las Vegas, NV 89118

RE: Project: N013055
Pace Project No.: 30126325

Dear Mr. Cartin:

Enclosed are the analytical results for sample(s) received by the laboratory on August 01, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

Report reissued 8/15/14 to reflect correction of Sample ID for Sample 005.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Jacquelyn Collins
jacquelyn.collins@pacelabs.com
Project Manager

PROJECT NARRATIVE

Project: N013055
Pace Project No.: 30126325

Method: EPA 900.0
Description: 900.0 Gross Alpha/Beta
Client: ASSET Laboratories
Date: August 15, 2014

General Information:

5 samples were analyzed for EPA 900.0. All samples were received in acceptable condition with any exceptions noted below.

Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

RE: PGE Hinkley, 492581.UR.SW.FW

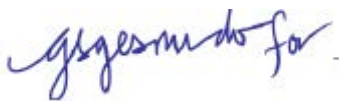

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on July 25, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE**SAMPLE RECEIVING/GENERAL COMMENTS:**

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020_Dissolved:

Because the results for total dissolved chromium (3.563 ug/L) and hexavalent chromium (2.555 ug/L) for sample N013056-001 (MW-28C-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 3.263 and 2.857 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Because the results for total dissolved chromium (3.960 ug/L) and hexavalent chromium (2.784 ug/L) for sample N013056-010 (MW-24A2-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 3.577 and 2.879 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Because the results for total dissolved chromium (3.860 ug/L) and hexavalent chromium (2.839 ug/L) for sample N013056-011 (MW-971-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 3.712 and 2.601 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Comments

Checklist Completed B AC  7/28/2014

Reviewed By:  07/29/14

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * DF$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013056-007A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.022268 * 1 \\ &= 0.022268\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

 8/8/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013056-009A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned} \text{Cr}^{+6}, \mu\text{g/L} &= 16.4278 * 1 \\ &= 16.4278 \end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 16$$

Nancy 8/8/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013056-001B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 3.5631177772 * 1 * (25/25) \\ &= 3.5631177772 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 3.6$$

RE: PGE Hinkley, 492581.UR.IR.FW

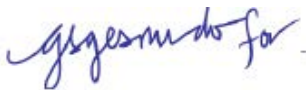

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on August 04, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CLIENT: CH2M HILL
Project: PGE Hinkley, 492581.UR.IR.FW
Lab Order: N013108

CASE NARRATIVE**SAMPLE RECEIVING/GENERAL COMMENTS:**

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Analytical Comments for EPA 300.0:

Dilution was necessary for Orthophosphate, Dissolved (as P) on samples N013108-011, N013108-027 due to precipitation upon the addition of eluent.

Matrix Spike Duplicate (MSD) on QC sample N013108-015C-MSD is outside recovery criteria for Orthophosphate, Dissolved (as P) possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical Comments for EPA 6010B_Dissolved:

RPD for Matrix Spike(MS) and Matrix Spike Duplicate(MSD) on QC samples N013108-002B-MS and N013108-002B-MSD is outside criteria for Iron ; however, the analytical batch was validated by the Laboratory Control Sample (LCS).

Analytical Comments for EPA 6020_Dissolved:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) on QC samples N013108-025B-MS and N013108-025B-MSD are outside recovery criteria for Chromium since the analyte concentration in the sample is disproportionate to the spike level. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Because the results for total dissolved chromium (4.674 ug/L) and hexavalent chromium (1.566 ug/L) for sample N013108-010 (SA-MW-30S-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved

CLIENT: CH2M HILL
Project: PGE Hinkley, 492581.UR.IR.FW
Lab Order: N013108

CASE NARRATIVE

chromium. The results from the redigested samples were 4.199 and 4.2 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Collection Date: 8/4/2014 12:17:00 PM
Matrix: WATER

Analyses	Result	MDL	PQL	Qual	Units	DF	Date Analyzed
----------	--------	-----	-----	------	-------	----	---------------

HEXAVALENT CHROMIUM BY IC

EPA 218.6

RunID: IC6_140805A	QC Batch: R94461				PrepDate		Analyst: RB
Hexavalent Chromium	7.2	0.016	0.20		µg/L	1	8/5/2014 02:09 PM

DISSOLVED METALS BY ICP-MS

EPA 3010A

EPA 6020

RunID: ICP7_140806A	QC Batch: 46253				PrepDate	8/6/2014	Analyst: CEI
Chromium	7.4	0.030	1.0		µg/L	1	8/6/2014 02:56 PM

Qualifiers: B Analyte detected in the associated Method Blank
 H Holding times for preparation or analysis exceeded
 S Spike/Surrogate outside of limits due to matrix interference
 DO Surrogate Diluted Out
 E Value above quantitation range
 ND Not Detected at the Reporting Limit
 Results are wet unless otherwise specified

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On: 8/4/2014 Workorder: N013108
 Rep sample Temp (Deg C): 3.9/2.9/3.3/3.6/3.1 IR Gun ID: 2
 Temp Blank: Yes No
 Carrier name: ATL
 Last 4 digits of Tracking No.: NA Packing Material Used: None
 Cooling process: Ice Ice Pack Dry Ice Other None

Sample Receipt Checklist

- | | | | |
|---|---|-----------------------------|---|
| 1. Shipping container/cooler in good condition? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | Not Present <input type="checkbox"/> |
| 2. Custody seals intact, signed, dated on shipping container/cooler? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 3. Custody seals intact on sample bottles? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 4. Chain of custody present? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 5. Sampler's name present in COC? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 6. Chain of custody signed when relinquished and received? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 7. Chain of custody agrees with sample labels? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 8. Samples in proper container/bottle? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 9. Sample containers intact? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 10. Sufficient sample volume for indicated test? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 11. All samples received within holding time? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 12. Temperature of rep sample or Temp Blank within acceptable limit? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 13. Water - VOA vials have zero headspace? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| 14. Water - pH acceptable upon receipt?
Example: pH > 12 for (CN,S); pH<2 for Metals | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 15. Did the bottle labels indicate correct preservatives used? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 16. Were there Non-Conformance issues at login? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| Was Client notified? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |

Comments

Checklist Completed B AC  8/5/2014

Reviewed By:  08/08/14

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013108-034A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.01468 * 1 \\ &= 0.01468\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

 8/18/2014

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013108-001A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 7.1993 * 1 \\ &= 7.1993\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 7.2$$

 8/18/2014

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Nitrate concentration, in mg/L, in the original sample as follows:

$$\text{Nitrate, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013108-019C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Nitrate, mg/L} &= 1.47 * 2 \\ &= 2.94 \end{aligned}$$

Reporting result in two significant figures,

$$\text{Nitrate, mg/L} = 2.9$$

 8/18/2014

Sample Calculation

METHOD: SM5310C

TEST NAME: TOTAL ORGANIC CARBON

MATRIX: WATER

FORMULA:

Calculate the TOC concentration, in mg/L, in the original sample as follows:

$$\text{TOC} = [A] [\text{DF}] - B$$

where:

A = mg/L, instrument calculated concentration

DF = dilution factor

B = mg/L, TOC concentration in the calibration blank

For: **N013108-012D**

The concentration in mg/L is calculated as follows:

$$\text{TOC} = [0.7223] [1] - 0.0732$$

$$\text{TOC} = 0.6491$$

Reporting results in two significant figures,

$$\text{TOC} = \mathbf{0.65} \text{ mg/L}$$

$$\text{TOC} = \mathbf{ND}$$

Sample Calculation

METHOD: EPA 6010

TEST NAME: Heavy Metals by ICP

MATRIX: Groundwater

FORMULA:

Calculate the Iron concentration, in mg/L, in the original sample as follows:

$$\text{Iron, mg/L} = A * DF * PF$$

where:

A = mg/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Amt. of Sample mL

For Sample **N013108-007B**, the concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Iron, mg/L} &= 0.5494149937 * 1 * (25/25) \\ &= 0.5494149937 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Iron, mg/L} = 0.55$$

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013108-001B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 7.414996325239 * 1 * (25/25) \\ &= 7.414996325239 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 7.4$$

8/18/2014

RE: PGE Hinkley, 492581.UR.IR.FW

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on August 06, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

Lab Order: N013132

CASE NARRATIVE**SAMPLE RECEIVING/GENERAL COMMENTS:**

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Subcontracted Analyses:

Gross Alpha/Beta was subcontracted to Pace Analytical- Greensburg,PA.

Analytical Comments for EPA 200.8:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria for Uranium possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical Comments for EPA 300.0:

Dilution was necessary for Orthophosphate, Dissolved (as P) and/or Nitrate on samples N013132-001, N013132-002, N013132-003, N013132-004, N013132-007, N013132-023 and N013132-024 due to precipitation upon the addition of eluent.

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) on QC sample N013132-039C-MS and N013132-039C-MSD are outside recovery criteria for Orthophosphate, Dissolved (as P) possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical Comments for EPA 6020_Dissolved:

Because the results for total dissolved chromium (7.353 ug/L) and hexavalent chromium (1.356 ug/L) for sample N013132-018 (EX-22-059-Q3) are discrepant, sample from both the total dissolved

CLIENT: CH2M HILL

Lab Order: N013132

CASE NARRATIVE

chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 7.248 and 6.035 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Because the results for total dissolved chromium (1.150 ug/L) and hexavalent chromium (0 ug/L) for sample N013132-032 (SA-MW-02D-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 1.110 and 0.942 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria for some analytes possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Matrix Spike (MS) on QC sample N013132-035B-MS is outside recovery criteria for Manganese since the analyte concentration in the sample is disproportionate to the spike level. The associated Laboratory Control Sample (LCS) recovery was acceptable.

ASSET Laboratories

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On: 8/6/2014 Workorder: N013132
 Rep sample Temp (Deg C): 3.7/4.1/3.6/3.9/3.1/4.3 IR Gun ID: 2
 Temp Blank: Yes No
 Carrier name: ATL
 Last 4 digits of Tracking No.: NA Packing Material Used: None
 Cooling process: Ice Ice Pack Dry Ice Other None

Sample Receipt Checklist

- | | | | |
|---|---|--|---|
| 1. Shipping container/cooler in good condition? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | Not Present <input type="checkbox"/> |
| 2. Custody seals intact, signed, dated on shipping container/cooler? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 3. Custody seals intact on sample bottles? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 4. Chain of custody present? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 5. Sampler's name present in COC? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 6. Chain of custody signed when relinquished and received? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 7. Chain of custody agrees with sample labels? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 8. Samples in proper container/bottle? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 9. Sample containers intact? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 10. Sufficient sample volume for indicated test? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 11. All samples received within holding time? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 12. Temperature of rep sample or Temp Blank within acceptable limit? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 13. Water - VOA vials have zero headspace? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| 14. Water - pH acceptable upon receipt?
Example: pH > 12 for (CN,S); pH<2 for Metals | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> | NA <input type="checkbox"/> |
| 15. Did the bottle labels indicate correct preservatives used? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 16. Were there Non-Conformance issues at login? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| Was Client notified? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |

Comments Samples SA-MW-06D and SA-MW-04D were received at pH 3. Samples SA-MW-02D and SA-MW-03D were received at pH 4 and sample SA-MW-14A was received at pH 8. Acid added to all containers to pH<2.

SAMPLE CALCULATION

METHOD: SM 2540C

TEST NAME: Total Filterable Residue

MATRIX: Water

FORMULA:

Calculate TDS concentration in mg/L, in the original sample as follows:

$$\text{TDS, mg/L} = \frac{(A-B)*1000000}{C}$$

Where:

A = weight in g of dish + residue after drying

B = weight of dish in g

C = volume of sample used in mL

For ^{017D} ~~N013132-001D~~, TDS concentration in mg/L is calculated as follows:

$$\text{TDS, mg/L} = \frac{(64.0327-63.9901)*1000000}{100}$$

426 mg/L

Reporting result in two significant figures,

$$\text{TDS} = 430 \text{ mg/L}$$

8/8/2014

TOTAL DISSOLVED SOLIDS, TDS

$$\text{TDS, mg/L} = (A-B) \times 1000000 / C$$

WHERE:

A = weight in grams of dish + residue after drying

B = weight of dish in grams

C = volume of sample used in mL

Sample Calculation

METHOD: EPA 200.8

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Uranium Radioactivity, in pCi/L, in the original sample as follows:

$$\text{Uranium, pCi/L} = A * DF * PF * 0.67 \text{ (pCi/ug)}$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

0.67 = conversion factor

For Sample **N013132-027B**, the Uranium Radioactivity in pCi/L is calculated as follows:

$$\begin{aligned} \text{Uranium, pCi/L} &= 59.1690044320 * 1 * (25/25) * 0.67 \\ &= 39.6432329694 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Uranium, pCi/L} = 40$$

- Calculations are based on raw values

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013132-029A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.016547 * 1 \\ &= 0.016547\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013132-002A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 7.4612 * 1 \\ &= 7.4612\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 7.5$$

 8/20/2014

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Chloride concentration, in mg/L, in the original sample as follows:

$$\text{Chloride, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013132-039C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Chloride, mg/L} &= 2.354 * 50 \\ &= 117.7 \end{aligned}$$

Reporting result in two significant figures,

$$\text{Chloride, mg/L} = 120$$

 8/20/2014

Sample Calculation

METHOD: SM5310C

TEST NAME: TOTAL ORGANIC CARBON

MATRIX: WATER

FORMULA:

Calculate the TOC concentration, in mg/L, in the original sample as follows:

$$\text{TOC} = [A] [\text{DF}] - B$$

where:

A = mg/L, instrument calculated concentration

DF = dilution factor

B = mg/L, TOC concentration in the calibration blank

For: ^{001D}
N013132-015D

The concentration in mg/L is calculated as follows:

$$\text{TOC} = [\begin{matrix} 0.66 \\ \cancel{0.79260} \end{matrix}] [1] - 0.09650$$

$$\text{TOC} = \begin{matrix} 0.5635 \\ \cancel{0.69610} \end{matrix}$$

Reporting results in two significant figures,

$$\text{TOC} = \begin{matrix} 0.5635 \\ \cancel{0.69} \end{matrix} \text{ mg/L}$$

TOC = ND

PS 8/19/2014

 8/20/2014

Sample Calculation

METHOD: EPA 6010

TEST NAME: Heavy Metals by ICP

MATRIX: Groundwater

FORMULA:

Calculate the Iron concentration, in mg/L, in the original sample as follows:

$$\text{Iron, mg/L} = A * DF * PF$$

where:

A = mg/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Amt. of Sample mL

For Sample **N013132-001B**, the concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Iron, mg/L} &= 0.2365616159 * 1 * (25/25) \\ &= 0.2365616159 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Iron, mg/L} = \mathbf{0.24}$$

RE: Project: N013132
Pace Project No.: 30127137

Dear Mr. Cartin:

Enclosed are the analytical results for sample(s) received by the laboratory on August 13, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Jacquelyn Collins
jacquelyn.collins@pacelabs.com

PROJECT NARRATIVE

Project: N013132

Pace Project No.: 30127137

Method: EPA 900.0

Description: 900.0 Gross Alpha/Beta

Client: ASSET Laboratories

Date: August 26, 2014

General Information:

1 sample was analyzed for EPA 900.0. All samples were received in acceptable condition with any exceptions noted below.

Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

RE: PGE Hinkley, 492581.UR.SW.FW

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on August 07, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

Sample was received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Reviewed By:

fyg 08/08/14

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013138-001A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 1.6307 * 1 \\ &= 1.6307\end{aligned}$$

Reporting results in two significant figures,

$$\text{Cr}^{+6}, \text{mg/L} = 1.6$$

 8/11/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013138-001B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 1.87315533063853 * 1 * (25/25) \\ &= 1.87315533063853 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 1.9$$

RE: PGE Hinkley, 492581.UR.IR.FW

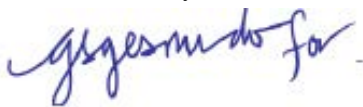

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on August 07, 2014 by ASSET Laboratories . The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE**SAMPLE RECEIVING/GENERAL COMMENTS:**

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Analytical Comments for EPA 300.0:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) on QC samples N013139-005C-MS, N013139-025C-MS, N013139-022C-MS and N013139-022C-MSD are outside recovery criteria for Orthophosphate, Dissolved (as P) possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical Comments for EPA 6020_Dissolved:

Because the results for total dissolved chromium (1.3 ug/L) and hexavalent chromium (0.0 ug/L) for sample N013139-004 (MW-911-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 1.457 and 1.302 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Because the results for total dissolved chromium (1.312 ug/L) and hexavalent chromium (0.0 ug/L) for sample N013139-005 (SA-MW-22D-059-Q3) are discrepant, sample from both the total dissolved chromium and hexavalent chromium containers were redigested and analyzed for total dissolved chromium. The results from the redigested samples were 1.42 and 1.210 ug/L, respectively. Since these data confirmed the original result for total dissolved chromium, the original result is reported.

Matrix Spike Duplicate (MSD) on QC sample N013139-024B-MSD is outside recovery criteria for Chromium possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

ANALYTICAL RESULTS

Print Date: 21-Aug-14

CLIENT: CH2M HILL
Lab Order: N013139
Project: PGE Hinkley, 492581.UR.IR.FW
Lab ID: N013139-001

Client Sample ID: MW-715-059-Q3
Collection Date: 8/7/2014 3:15:00 PM
Matrix: WATER

Analyses	Result	MDL	PQL	Qual	Units	DF	Date Analyzed
----------	--------	-----	-----	------	-------	----	---------------

HEXAVALENT CHROMIUM BY IC (LOW LEVEL)

EPA 218.6

RunID: IC1_140812A	QC Batch: R94527				PrepDate		Analyst: RB
Hexavalent Chromium	ND	0.012	0.060		µg/L	1	8/12/2014 04:15 PM

HEXAVALENT CHROMIUM BY IC

EPA 218.6

RunID: IC6_140808B	QC Batch: R94493				PrepDate		Analyst: RB
Hexavalent Chromium	ND	0.016	0.20		µg/L	1	8/8/2014 07:25 PM

Qualifiers: B Analyte detected in the associated Method Blank
 H Holding times for preparation or analysis exceeded
 S Spike/Surrogate outside of limits due to matrix interference
 DO Surrogate Diluted Out
 E Value above quantitation range
 ND Not Detected at the Reporting Limit
 Results are wet unless otherwise specified

Nitrate as N 0.955 0.050 1.000 0.04000 91.5 80 120

Qualifiers:

- B Analyte detected in the associated Method Blank
- ND Not Detected at the Reporting Limit
- DO Surrogate Diluted Out
- E Value above quantitation range
- R RPD outside accepted recovery limits
- Calculations are based on raw values
- H Holding times for preparation or analysis exceeded
- S Spike/Surrogate outside of limits due to matrix interference

ASSET Laboratories

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On: 8/7/2014 Workorder: N013139
 Rep sample Temp (Deg C): 2.9/3.1/3.2/3.6/2.8/3.5 IR Gun ID: 1
 Temp Blank: Yes No
 Carrier name: ATL
 Last 4 digits of Tracking No.: NA Packing Material Used: None
 Cooling process: Ice Ice Pack Dry Ice Other None

Sample Receipt Checklist

- | | | | |
|---|---|-----------------------------|---|
| 1. Shipping container/cooler in good condition? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | Not Present <input type="checkbox"/> |
| 2. Custody seals intact, signed, dated on shipping container/cooler? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 3. Custody seals intact on sample bottles? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 4. Chain of custody present? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 5. Sampler's name present in COC? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 6. Chain of custody signed when relinquished and received? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 7. Chain of custody agrees with sample labels? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 8. Samples in proper container/bottle? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 9. Sample containers intact? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 10. Sufficient sample volume for indicated test? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 11. All samples received within holding time? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 12. Temperature of rep sample or Temp Blank within acceptable limit? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 13. Water - VOA vials have zero headspace? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| 14. Water - pH acceptable upon receipt?
Example: pH > 12 for (CN,S); pH<2 for Metals | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 15. Did the bottle labels indicate correct preservatives used? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | NA <input type="checkbox"/> |
| 16. Were there Non-Conformance issues at login? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |
| Was Client notified? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | NA <input checked="" type="checkbox"/> |

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC, LOW LEVEL
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013139-031A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 0.026132 * 1 \\ &= 0.026132\end{aligned}$$

Since PQL is $0.06 \mu\text{g/L}$,

$$\text{Cr}^{+6}, \mu\text{g/L} = \text{ND}$$

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013139-003A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 10.5939 * 1 \\ &= 10.5939\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 11$$

8/21/2014

Sample Calculation

METHOD: EPA 300.0
TEST NAME: INORGANIC ANIONS BY IC
MATRIX: Water

FORMULA:

Calculate the Chloride concentration, in mg/L, in the original sample as follows:

$$\text{Chloride, mg/L} = A * DF$$

where:

$$\begin{aligned} A &= \text{mg/L, IC calculated concentration} \\ DF &= \text{dilution factor} \end{aligned}$$

For **N013139-035C** concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Chloride, mg/L} &= 3.018 * 20 \\ &= 60.36 \end{aligned}$$

Reporting result in two significant figures,

$$\text{Chloride, mg/L} = 60$$

 8/21/2014

Sample Calculation

METHOD: SM5310C

TEST NAME: TOTAL ORGANIC CARBON

MATRIX: WATER

FORMULA:

Calculate the TOC concentration, in mg/L, in the original sample as follows:

$$\text{TOC} = [A] [\text{DF}] - B$$

where:

A = mg/L, instrument calculated concentration

DF = dilution factor

B = mg/L, TOC concentration in the calibration blank

For: **N013139-015D**

The concentration in mg/L is calculated as follows:

$$\text{TOC} = [1.02660] [1] - 0.11750$$

$$\text{TOC} = 0.90910$$

Reporting results in two significant figures,

$$\text{TOC} = 0.91 \text{ mg/L}$$

$$\text{TOC} = \text{ND}$$

PS 8/19/2014

Sample Calculation

METHOD: EPA 6010

TEST NAME: Heavy Metals by ICP

MATRIX: Groundwater

FORMULA:

Calculate the Iron concentration, in mg/L, in the original sample as follows:

$$\text{Iron, mg/L} = A * DF * PF$$

where:

A = mg/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Amt. of Sample mL

For Sample **N013139-002B**, the concentration in mg/L is calculated as follows:

$$\begin{aligned} \text{Iron, mg/L} &= 0.04766053729 * 1 * (25/25) \\ &= 0.04766053729 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Iron, mg/L} = \mathbf{0.048}$$

RE: PGE Hinkley, 492581.UR.AU.FW

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on September 04, 2014 by ASSET Laboratories .
The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in
accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Samples were analyzed within method holding time.

Checklist Completed B AC ACortes 09/05/2014

Reviewed By: fg 09/09/14

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: GROUNDWATER

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013336-002A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 2.3556 * 1 \\ &= 2.3556\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 2.4$$

 9/15/2014

Sample Calculation

METHOD: EPA 6020

TEST NAME: Heavy Metals by ICP-MS

MATRIX: Aqueous

FORMULA:

Calculate the Chromium concentration, in ug/L, in the original sample as follows:

$$\text{Chromium, ug/L} = A * DF * PF$$

where:

A = ug/L, calculated concentration

DF = dilution factor

PF = Final Vol. of Digestate in mL / Vol. of Sample used in mL

For Sample **N013336-001B**, the concentration in ug/L is calculated as follows:

$$\begin{aligned} \text{Chromium, ug/L} &= 3.0684704248 * 1 * (25/25) \\ &= 3.0684704248 \end{aligned}$$

Reporting results in two significant figures,

$$\text{Chromium, ug/L} = 3.1$$

RE: PGE Hinkley, 492581.UR.SW.FW

Attention: Shawn P. Duffy

Enclosed are the results for sample(s) received on September 17, 2014 by ASSET Laboratories .
The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in
accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Jose Tenorio Jr.
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

Samples were received intact with proper chain of custody documentation.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Sample was analyzed within method holding time.

Subcontracted Analyses:

Dissolved Chromium by EPA 6020 was subcontracted to Truesdail-Tustin,CA.

Hello Shawn,

Attached is the SRCs and the COCs of the samples for 2014-GMP-062-M09. The temperature of the samples upon receipt is at 6.3°C. Please advise if you like us to proceed.

Thank you.

John

Marlon,

Attached are the COCs for samples N013399 and N013400.

Do you have a CH2M Hill project name and/or number you would like to appear on the report or just use ATL info?

Thank you,
Sean Condon

Sample Calculation

METHOD: EPA 218.6
TEST NAME: HEXAVALENT CHROMIUM BY IC
MATRIX: Water

FORMULA:

Calculate the Hexavalent Chromium concentration, in $\mu\text{g/L}$, in the original sample as follows:

$$\text{Cr}^{+6}, \mu\text{g/L} = A * \text{DF}$$

where:

A = $\mu\text{g/L}$, IC Cr^{+6} calculated concentration
DF = dilution factor

For **N013400-001A** concentration in $\mu\text{g/L}$ is calculated as follows:

$$\begin{aligned}\text{Cr}^{+6}, \mu\text{g/L} &= 1.571 * 1 \\ &= 1.571\end{aligned}$$

Reporting result in two significant figures,

$$\text{Cr}^{+6}, \mu\text{g/L} = 1.6$$

Mr. Marlon Cartin
3151 W Post Road
Las Vegas, NV 89118

Dear Mr. Cartin:

SUBJECT: CASE NARRATIVE;
TLI NO.: 815044

Truesdail Laboratories, Inc. is pleased to submit this report summarizing the Total Dissolved Chromium results. A summary table for this sample delivery group is included in Section 2. Complete laboratory reports, wet chemistry raw data, quality control data and chain of custody forms are included in Sections 3 and 4.

The samples were received and delivered with the chain of custody on September 18, 2014, intact and in chilled condition. The samples will be kept in a locked refrigerator for 30 days; thereafter they will either be disposed or kept in warm storage for an additional 2 months.

The sample was analyzed and recorded in the raw data as SDG 14I0280 but is reported as SDG 815044 in all final report pages.

No violations or nonconformance actions occurred for this data package. If you have any questions or require additional information, please contact me at (714) 730-6239 ext. 200.

Respectfully Submitted,
TRUESDAIL LABORATORIES, INC.

Project No.: 492581.JR.SW.FW
P.O. No.: N13400A

Analytical Results Summary

Lab Sample ID	Field ID	Analysis Method	Extraction Method	Sample Date	Sample Time	Parameter	Result	Units	RL
815044-001	EX-36-062-M09	SW6020	FLDFLT	9/15/2014	11:00	Chromium	2.1	ug/L	1.0

ND: Non Detected (below reporting limit)

mg/L: Milligrams per liter.

Note: The following "Significant Figures" rule has been applied to all results:

Results below 0.01 ppm will have two (2) significant figures.

Result above or equal to 0.01 ppm will have three (3) significant figures.

Quality Control data will always have three (3) significant figures.

Notes:

1. Samples should be analyzed after 24 hrs of pH adjustment to pH2 for Dissolved Analytes.
2. All Total Recoverable Analytes must be pH adjusted and digested.
3. Do not use disposable pipette to measure pH; pour a little amount of sample from the bottle.

Table D-1

**Historical Groundwater Analytical Results for Extraction Wells and Irrigation Water
Third Quarter 2014 Agricultural Treatment Units Monitoring Report
Pacific Gas and Electric Company, Hinkley Compressor Station, Hinkley, California**

Notes:

During the Second Quarter 2014 monitoring event, laboratory analysis of gross alpha was performed using two USEPA-certified methods: USEPA Method 900.0 and USEPA Method 7110C. Upon review of the results, it was determined that the gross alpha results reported using USEPA Method 900.0 were more accurate and representative of site conditions. Both sets of results are presented in this document; however, only the USEPA Method 900.0 gross alpha results will be used for future evaluations. Second Quarter 2014 USEPA Method 7110C gross alpha data is indicated by the S qualifier code.

* Ranch ATU is physically located in both OU1 and OU2. However, irrigation water for the Ranch ATU is located in OU2.

Therefore, the Ranch ATU is considered to be in OU2.

-- = not analyzed

µg/L = micrograms per liter

FD = field duplicate

J = concentration is estimated based on review of quality control criteria and data validation

OU = Operable Unit

mg/L = milligrams per liter

ND (x.x) = not detected at or above the reporting limit shown

S = screening

Notes:

During the Second Quarter 2014 monitoring event, laboratory analysis of gross alpha was performed using two USEPA-certified methods: USEPA Method 900.0 and USEPA Method 7110C. Upon review of the results, it was determined that the gross alpha results reported using USEPA Method 900.0 were more accurate and representative of site conditions. Both sets of results are presented in this document; however, only the USEPA Method 900.0 gross alpha results will be used for future evaluations. Second Quarter 2014 USEPA Method 7110C gross alpha data is indicated by the S qualifier code.

- a Ranch ATU is physically located in both OU1 and OU2. However, irrigation water for the Ranch ATU is located in OU2. Therefore, the Ranch ATU is considered to be in OU2.

-- = not analyzed

µg/L = micrograms per liter

FD = field duplicate

J = concentration is estimated based on review of quality control criteria and data validation

OU = Operable Unit

mg/L = milligrams per liter

ND (x.x) = not detected at or above the reporting limit shown

TABLE F-1

Survey Findings for Private Supply Wells Not Sampled During the Third Quarter of 2014
Third Quarter 2014 Agricultural Treatment Units Monitoring Report
Pacific Gas and Electric Company, Hinkley Compressor Station, Hinkley, California

Well ID	Well Type	Well Status	Well Survey Findings
EIR Mitigation Measure WTR-MM-2a			
01-02	DOM	INACT	Unoccupied in Third Quarter 2014.
01-17	DOM	ACT	Property observed to be unoccupied on July 1, 2014.
14-07	DOM	INACT	Owner refused future sampling in December 2013.
14-15	DOM	ACT	Owner refused future sampling in December 2013.
15-04	DOM	INACT	Unoccupied in Third Quarter 2014.
15-07	DOM	INACT	Inactive, based on Third Quarter 2014 observations.
22-04	DOM	INACT	Unoccupied in Third Quarter 2014.
22-09	DOM	ACT	Owner requested contact through legal counsel.
22-105	DOM	INACT	Well is broken, based on conversation with tenant on July 9, 2014.
22-106	DOM	INACT	Unoccupied in Third Quarter 2014.
22-15	DOM	ACT	Owner requested contact through legal counsel.
22-26	DOM	ACT	Owner refused retrofit in January 2011.
22-44	DOM	INACT	Unoccupied in Third Quarter 2014.
22-59	DOM	ACT	Owner requested contact through legal counsel.
22-60	DOM	ACT	Owner requested contact through legal counsel.
22-67	DOM	INACT	Unable to coordinate with owner.
22-68	DOM	ACT	Unoccupied in Third Quarter 2014.
22-70	DOM	ACT	Owner requested contact through legal counsel.
22-72	DOM	INACT	Owner refused retrofit in April 2014.
22-74	DOM	ACT	Owner requested contact through legal counsel.
22-78	DOM	ACT	Owner requested contact through legal counsel.
22-79	DOM	ACT	Owner requested contact through legal counsel.
23-27	DOM	ACT	Owner requested contact through legal counsel.
24-03	DOM	ACT	Well verified inactive on July 10, 2014.
24-05	DOM	INACT	Unoccupied in Third Quarter 2014.
24-06	DOM	INACT	Unoccupied in Third Quarter 2014.
25-18	DOM	ACT	Unable to coordinate with owner.
27-08	DOM	INACT	Pump is broken, per April 2013 discussion
27-38	DOM	ACT	Unable to coordinate with point of contact.
27-39	DOM	ACT	Unable to coordinate with point of contact.
27-40	DOM	ACT	Unable to coordinate with point of contact.
27-41	DOM	ACT	Owner refused retrofit in January 2011.
28-05	DOM	INACT	Unoccupied in Third Quarter 2014.
28-06	DOM	ACT	Owner requested contact through legal counsel.
28-08	DOM	ACT	Owner requested contact through legal counsel.
28-19	DOM	ACT	Owner refused future sampling in July 2014.
28-22	DOM	ACT	Owner requested contact through legal counsel.
28-28	DOM	ACT	Owner granted permission but unable to coordinate with tenant to gain access to property.
28-31	DOM	INACT	Unoccupied in Third Quarter 2014.
28-42	DOM	ACT	Refused future sampling in April 2013.
28-62	DOM	ACT	Unable to coordinate with owner.
28-69	DOM	INACT	Unoccupied in Third Quarter 2014.
28-75	DOM	INACT	Unable to coordinate with owner.
28-76	DOM	ACT	Owner requested contact through legal counsel.
28-81	DOM	ACT	Owner requested contact through legal counsel.
28-82	DOM	ACT	Owner requested contact through legal counsel.
30E-11	DOM	INACT	Unoccupied in Third Quarter 2014.
34-48	DOM	INACT	Unoccupied in Third Quarter 2014.
34-53	DOM	INACT	Inactive, based on Third Quarter 2014 observations.
36-42	DOM	ACT	Unable to retrofit due to poor condition of piping.
BGS-05	DOM	INACT	Inactive, based on Third Quarter 2014 observations.
EIR Mitigation Measure WTR-MM-2b			
14-07	DOM	INACT	Owner approval to sample for EIR analytes was not received.
14-15	DOM	ACT	Owner approval to sample for EIR analytes was not received.
15-04	DOM	INACT	Owner approval to sample for EIR analytes was not received.
15-05	DOM	ACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed.
15-06	DOM	ACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed.
15-07	DOM	INACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed. Inactive well, based on 3Q14 observations.
15-08	DOM	ACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed.
15-09	DOM	INACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed. Inactive well, based on 3Q14 observations.
15-12	DOM	INACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed. Inactive well, based on 3Q14 observations.
15-14	DOM	INACT	Owner approval to sample for EIR analytes was not received.
15-17	AGR	ACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed. Agricultural well that cannot be retrofitted at wellhead for sampling.
22-04	DOM	INACT	Owner approval to sample for EIR analytes was not received.
22-09	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-105	DOM	INACT	Owner approval to sample for EIR analytes was not received.
22-106	DOM	INACT	Unoccupied property and inactive well, based on 3Q14 observations.
22-15	DOM	ACT	Owner approval to sample for EIR analytes was not received.

Third Quarter 2014 Agricultural Treatment Units Monitoring Report
Pacific Gas and Electric Company, Hinkley Compressor Station, Hinkley, California

Well ID	Well Type	Well Status	Well Survey Findings
22-22	DOM	INACT	Owner approval to sample for EIR analytes was not received.
22-23	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-26	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-44	DOM	INACT	Unoccupied and inactive well in 3Q14.
22-48	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-59	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-60	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-63	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-67	DOM	INACT	Owner approval to sample for EIR analytes was not received.
22-68	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-70	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-72	DOM	INACT	Owner approval to sample for EIR analytes was not received.
22-74	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-78	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-79	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-83	DOM	INACT	Owner approval to sample for EIR analytes was not received.
22-88	DOM	INACT	Owner approval to sample for EIR analytes was not received.
22-90	DOM	ACT	Owner approval to sample for EIR analytes was not received.
22-95	DOM	INACT	Owner approval to sample for EIR analytes was not received.
22-96	DOM	INACT	Owner approval to sample for EIR analytes was not received.
23-07	DOM	ACT	Owner approval to sample for EIR analytes was not received.
23-27	DOM	ACT	Owner approval to sample for EIR analytes was not received.
24-03	DOM	ACT	Owner approval to sample for EIR analytes was not received.
24-05	DOM	INACT	Owner approval to sample for EIR analytes was not received.
24-06	DOM	INACT	Unoccupied property and inactive well, based on 3Q14 observations.
25-16	DOM	INACT	Owner approval to sample for EIR analytes was not received.
25-18	DOM	ACT	Owner approval to sample for EIR analytes was not received.
27-08	DOM	INACT	Inactive well (pump is broken).
27-17	AGR	INACT	Owner approval to sample for EIR analytes was not received.
27-38	DOM	ACT	Unable to coordinate with point of contact.
27-39	DOM	ACT	Unable to coordinate with point of contact.
27-40	DOM	ACT	Unable to coordinate with point of contact.
27-41	DOM	ACT	Owner approval to sample for EIR analytes was not received.
27-48	DOM	ACT	Owner approval to sample for EIR analytes was not received.
27-49	DOM	ACT	Owner approval to sample for EIR analytes was not received.
34-53	DOM	INACT	Owner approval to sample for EIR analytes was not received.
34-63	DOM	INACT	Owner approval to sample for EIR analytes was not received.
36-17	DOM	ACT	Owner approval to sample for EIR analytes was not received.
36-26	DOM	ACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed.
36-42	DOM	ACT	Unable to retrofit due to poor condition of piping.
36-43	DOM	ACT	Owner approval to sample for EIR analytes was not received.
BGS-05	DOM	INACT	Owner approval to sample for EIR analytes was not received.
BGS-46	DOM	ACT	Received approval from owner to sample for EIR analytes after the quarterly event at this well was completed.

LOCATION TYPE CODE:

AGR: agricultural well

DOM: domestic well

STATUS CODE:

ACT: Active well

INACT: Inactive well. Well is not currently in use but could be made operational after minor testing/work.

TABLE F-2

Domestic and Agricultural Wells On Properties Purchased by PG&E During Reporting Period
Third Quarter 2014 Agricultural Treatment Units Monitoring Report
Pacific Gas and Electric Company, Hinkley Compressor Station, Hinkley, California

Well Location*	Purchase Date
22-53	August 8, 2014
22-55	September 26, 2014
22-65	September 10, 2014
28-58	July 9, 2014
28-65	August 15, 2014
28-74	August 14, 2014
28-87	July 9, 2014
34-62	August 22, 2014
36-25	September 18, 2014

NOTES:

*Monitoring required by mitigation measures WTR-MM2a, WTR-MM2b, and WTR-MM2c in the *Final Environmental Impact Report* (ICF 2013) is no longer required for these wells.

During the Second Quarter 2014 monitoring event, laboratory analysis of gross alpha was performed using two USEPA-certified methods: USEPA Method 900.0 and USEPA Method 7110C. Upon review of the results, it was determined that the gross alpha results reported using USEPA Method 900.0 were more accurate and representative of site conditions. Both sets of results are presented in this document; however, only the USEPA Method 900.0 gross alpha results will be used for future evaluations. Second Quarter 2014 USEPA Method 7110C gross alpha data is indicated by the S qualifier code.

-- = not analyzed

µg/L = micrograms per liter

FD = field duplicate

J = concentration is estimated based on review of quality control criteria and data validation

mg/L = milligrams per liter

ND (x.x) = not detected at or above the reporting limit shown

pCi/L = picocuries per liter

S = screening

Subject: Results of Water Well Sampling - July 2014

Well(s) #28-20 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 15, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-20. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-20** sampled on 07/15/2014:

- Total chromium was detected at a concentration of: 1.0 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 0.74 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-20 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #BGS-46 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 9, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #BGS-46. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #BGS-46** sampled on 07/09/2014:

- Total chromium was detected at a concentration of: 1.2 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.2 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #BGS-46 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #25-16 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 7, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #25-16. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #25-16** sampled on 07/07/2014:

- Total chromium was detected at a concentration of: 2.5 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 2.2 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #25-16 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Gross Alpha
- Nitrate as Nitrogen
- Total Dissolved Solids
- Uranium, Dissolved

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #22-39, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Groundwater Sampling Results

Well(s) #22-39

			CA Drinking Water Standards: (1)				
			15	50	10	500/1000/1500 ‡,§	20
			Federal Drinking Water Standards: (2)				
			15	50	10	500 ‡	20
Well ID	Sample Date	Sample Type	Gross Alpha (pCi/L)	Gross Beta (pCi/L)	Nitrate as Nitrogen (mg/L)	Total Dissolved Solids (mg/L)	Uranium, Dissolved (pCi/L)
22-39	Jul-01-2014		19.9	4.0	11.0	2,400	30.0

Notes:

(1) CA Drinking Water Standards are the California Maximum Contaminant Levels (CA MCLs)

(2) Federal Drinking Water Standards are the US Environmental Protection Agency Maximum Contaminant Levels (EPA MCLs). The EPA has granted the California Department of Public Health primacy over drinking water systems.

Bold text indicates detected results that exceed CA MCLs. Bold text for total dissolved solids, chloride, and sulfate (if sampled) indicate that detected results exceed the "upper-level" secondary CA MCL.

-- not applicable

ND Not detected at the reporting limit shown

mg/L milligrams per liter

pCi/L picocuries per liter

§ The California Secondary MCL for this compound is given as a range: recommended – 500 mg/L, upper level - 1,000 mg/L, and short term - 1,500 mg/L.

‡ A secondary drinking water standard is shown because a primary standard has not been established. A secondary standard is one that may adversely affect the odor or appearance of drinking water.

The gross beta particle activity MCL is 4 millirem/year annual dose equivalent to the total body or any internal organ. The screening level is 50 pCi/L. The California Department of Public Health Detection Limit for Reporting is 4 pCi/L.

The Federal MCL for uranium is 30 micrograms per liter. This is equivalent to the California MCL of 20 pCi/L.

Subject: Results of Water Well Sampling - July 2014
Well(s) #28-21 

Dear 

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 10, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-21. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-21** sampled on 07/10/2014:

- Total chromium was detected at a concentration of: 2.9 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 3.1 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-21 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

[REDACTED]

Drinking Water Standard: The federal drinking water standard for total chromium is 100 parts per billion (ppb) and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb, which became effective July 1, 2014.

Key to Groundwater Sampling Results

Total Chromium results are for Total Chromium in a dissolved form. Samples are filtered before being analyzed.

-- Not Sampled

ND Not Detected

NE Not Established

J A "J" shown next to a concentration indicates that the concentration is estimated based on data validation and quality control criteria

< The less than (<) symbol, if shown, in front of a result indicates that the compound was not detected (ND) in the groundwater sample. Analytical equipment is limited by its capability to detect a compound below a specific level, and this limit is expressed on the table with a less than (<) symbol in front of the number representing the concentration below which the instrument cannot measure.

September 16, 2014

Subject: Results of Water Well Sampling – July 2014
Well(s) #15-05 and #15-06
Well(s) #15-08

Dear

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 8, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #15-05, #15-06, and #15-08. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #15-05** sampled on 07/08/2014:

- Total chromium was detected at a concentration of: 1.5 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.4 ppb

For **Well #15-06** sampled on 07/08/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.87 ppb

For **Well #15-08** sampled on 07/08/2014:

- Total chromium was detected at a concentration of: 1.3 ppb
- Hexavalent chromium was detected at a concentration of: 1.4 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #15-05, #15-06, and #15-08 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

Subject: Results of Water Well Sampling - July 2014
Well(s) #23-25 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 21, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #23-25. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #23-25** sampled on 07/21/2014:

- Total chromium was detected at a concentration of: 2.9 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 2.7 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

October 14, 2014

Page 2

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Gross Alpha
- Nitrate as Nitrogen
- Total Dissolved Solids
- Uranium, Dissolved

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #23-25, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Subject: Results of Water Well Sampling - July 2014
Well(s) #28-36 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 15, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-36. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-36** sampled on 07/15/2014:

- Total chromium was detected at a concentration of: 2.7 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.2 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-36 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

September 16, 2014

Subject: Results of Water Well Sampling - July 2014
Well(s) #22-75 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 16, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-75. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #22-75** sampled on 07/16/2014:

- Total chromium was detected at a concentration of: 1.8 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.8 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property is within the primary and secondary standards for drinking water established by the CDPH and the EPA for the constituents shown in the attached tables

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #22-75, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Subject: Results of Water Well Sampling - July 2014

Well(s) #23-07

Dear

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 11, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #23-07. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #23-07** sampled on 07/11/2014:

- Total chromium was detected at a concentration of: 2.4 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 2.0 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #23-07 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #34-77 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 8, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #34-77. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #34-77** sampled on 07/08/2014:

- Total chromium was detected at a concentration of: 1.1 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.1 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #34-77 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Drinking Water Standard: The federal drinking water standard for total chromium is 100 parts per billion (ppb) and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb, which became effective July 1, 2014.

Key to Groundwater Sampling Results

Total Chromium results are for Total Chromium in a dissolved form. Samples are filtered before being analyzed.

-- Not Sampled

ND Not Detected

NE Not Established

J A "J" shown next to a concentration indicates that the concentration is estimated based on data validation and quality control criteria

< The less than (<) symbol, if shown, in front of a result indicates that the compound was not detected (ND) in the groundwater sample. Analytical equipment is limited by its capability to detect a compound below a specific level, and this limit is expressed on the table with a less than (<) symbol in front of the number representing the concentration below which the instrument cannot measure.

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Arsenic, Dissolved

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #34-38, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

Notes:

(1) CA Drinking Water Standards are the California Maximum Contaminant Levels (CA MCLs)

(2) Federal Drinking Water Standards are the US Environmental Protection Agency Maximum Contaminant Levels (EPA MCLs). The EPA has granted the California Department of Public Health primacy over drinking water systems.

Bold text indicates detected results that exceed CA MCLs. Bold text for total dissolved solids, chloride, and sulfate (if sampled) indicate that detected results exceed the "upper-level" secondary CA MCL.

-- not applicable

ND Not detected at the reporting limit shown

NE Not established

mg/L milligrams per liter

pCi/L picocuries per liter

µg/L micrograms per liter

§ The California Secondary MCL for this compound is given as a range: recommended – 500 mg/L, upper level - 1,000 mg/L, and short term - 1,500 mg/L.

‡ A secondary drinking water standard is shown because a primary standard has not been established. A secondary standard is one that may adversely affect the odor or appearance of drinking water.

The gross beta particle activity MCL is 4 millirem/year annual dose equivalent to the total body or any internal organ. The screening level is 50 pCi/L. The California Department of Public Health Detection Limit for Reporting is 4 pCi/L.

The Federal MCL for uranium is 30 micrograms per liter. This is equivalent to the California MCL of 20 pCi/L.

Subject: Results of Water Well Sampling - July 2014
Well(s) #BGS-25 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 10, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #BGS-25. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #BGS-25** sampled on 07/10/2014:

- Total chromium was detected at a concentration of: 1.9 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 2.0 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #BGS-25 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

[REDACTED]

Subject: Results of Water Well Sampling – July 2014
Well #36-17 [REDACTED]
Well #36-43 [REDACTED]
Well #BGS-27 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 2, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #36-17, #36-43, and #BGS-27. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #36-17** sampled on 07/02/2014:

- Total chromium was detected at a concentration of: 1.1 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.1 ppb

For **Well #36-43** sampled on 07/02/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.53 ppb

For **Well #BGS-27** sampled on 07/02/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.92 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

[REDACTED]

Based on the results, the water from the domestic well(s) on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #36-17, #36-43, and #BGS-27 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

Subject: Results of Water Well Sampling – July 2014
Well(s) #22-62 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well(s) for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 15, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-62. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #22-62** sampled on 07/15/2014:

- Total chromium was detected at a concentration of: 1.3 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.2 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from state agencies like the California Department of Public Health (CDPH) and Office of Environmental Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those to residents who

[REDACTED]

have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property is within the primary and secondary standards for drinking water established by the CDPH and the EPA for the constituents shown in the attached tables.

Previously Reported Results

Based on a review of the data, it was determined that the May 21, 2014 letter mailed to you with the results of the sampling that occurred in April incorrectly reported the Uranium results. That error has been corrected and the correct Uranium results for the April 2014 sampling are shown on the table attached as the last page of this letter.

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #22-62, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for the well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

	Jul-15-2014	1.3	1.2	100	50	10

Drinking Water Standard: The federal drinking water standard for total chromium is 100 parts per billion (ppb) and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb, which became effective July 1, 2014.

Key to Groundwater Sampling Results

Total Chromium results are for Total Chromium in a dissolved form. Samples are filtered before being analyzed.

- Not Sampled
- ND** Not Detected
- NE** Not Established
- J** A "J" shown next to a concentration indicates that the concentration is estimated based on data validation and quality control criteria
- <** The less than (<) symbol, if shown, in front of a result indicates that the compound was not detected (ND) in the groundwater sample. Analytical equipment is limited by its capability to detect a compound below a specific level, and this limit is expressed on the table with a less than (<) symbol in front of the number representing the concentration below which the instrument cannot measure.

Groundwater Sampling Results

Well(s) #22-62

CA Drinking Water Standards: ⁽¹⁾			15	50 Φ	10	500/1000/1500 ‡,§	20
Federal Drinking Water Standards: ⁽²⁾			15	50 Φ	10	500 ‡	20 Ω
Well ID	Sample Date	Sample Type	Gross Alpha (pCi/L)	Gross Beta (pCi/L)	Nitrate as Nitrogen (mg/L)	Total Dissolved Solids (mg/L)	Uranium, Dissolved (pCi/L)
22-62	Apr-07-2014		9.0	4.3	1.4	740	5.4J
	Jul-15-2014		7.5J	ND (4)	2.4	730	6.0

Notes:

(1) CA Drinking Water Standards are the California Maximum Contaminant Levels (CA MCLs)

(2) Federal Drinking Water Standards are the US Environmental Protection Agency Maximum Contaminant Levels (EPA MCLs). The EPA has granted the California Department of Public Health primacy over drinking water systems.

Bold text indicates detected results that exceed CA MCLs. Bold text for total dissolved solids, chloride, and sulfate (if sampled) indicate that detected results exceed the "upper-level" secondary CA MCL.

-- not applicable

J Indicates result is estimated - Analyte was present but reported value may not be accurate or precise

ND Not detected at the reporting limit shown

mg/L milligrams per liter

pCi/L picocuries per liter

§ The California Secondary MCL for this compound is given as a range: recommended – 500 mg/L, upper level - 1,000 mg/L, and short term - 1,500 mg/L.

‡ A secondary drinking water standard is shown because a primary standard has not been established. A secondary standard is one that may adversely affect the odor or appearance of drinking water.

Φ The gross beta particle activity MCL is 4 millirem/year annual dose equivalent to the total body or any internal organ. The screening level is 50 pCi/L. The California Department of Public Health Detection Limit for Reporting is 4 pCi/L.

Ω The Federal MCL for uranium is 30 micrograms per liter. This is equivalent to the California MCL of 20 pCi/L.

Subject: Results of Water Well Sampling - July 2014
Well(s) #27-42 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 2, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #27-42. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #27-42** sampled on 07/02/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.24 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #27-42 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

[REDACTED]

Subject: Results of Water Well Sampling - July 2014
Well(s) #27-43 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 15, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #27-43. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #27-43** sampled on 07/15/2014:

- Total chromium was detected at a concentration of: 1.4 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.4 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Gross Alpha

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #27-43, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

Subject: Results of Water Well Sampling - July 2014
Well(s) #28-40 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 1, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-40. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-40** sampled on 07/01/2014:

- Total chromium was detected at a concentration of: 1.2 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.1 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-40 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #28-25 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 1, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-25. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-25** sampled on 07/01/2014:

- Total chromium was detected at a concentration of: 1.9 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.8 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-25 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

[REDACTED]

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

Groundwater Sampling Results

Well(s) #22-81

CA Drinking Water Standards: ⁽¹⁾			15	50	10	500/1000/1500 ‡,§	20
Federal Drinking Water Standards: ⁽²⁾			15	50	10	500 ‡	20
Well ID	Sample Date	Sample Type	Gross Alpha (pCi/L)	Gross Beta (pCi/L)	Nitrate as Nitrogen (mg/L)	Total Dissolved Solids (mg/L)	Uranium, Dissolved (pCi/L)
22-81	Apr-02-2014		13.2	ND (4)	3.3	460	7.9
	Jul-14-2014		7.3 J	ND (4)	3.9	430	7.6

Notes:

(1) CA Drinking Water Standards are the California Maximum Contaminant Levels (CA MCLs)

(2) Federal Drinking Water Standards are the US Environmental Protection Agency Maximum Contaminant Levels (EPA MCLs). The EPA has granted the California Department of Public Health primacy over drinking water systems.

Bold text indicates detected results that exceed CA MCLs. Bold text for total dissolved solids, chloride, and sulfate (if sampled) indicate that detected results exceed the "upper-level" secondary CA MCL.

-- not applicable

J Indicates result is estimated - Analyte was present but reported value may not be accurate or precise

ND Not detected at the reporting limit shown

mg/L milligrams per liter

pCi/L picocuries per liter

§ The California Secondary MCL for this compound is given as a range: recommended – 500 mg/L, upper level - 1,000 mg/L, and short term - 1,500 mg/L.

‡ A secondary drinking water standard is shown because a primary standard has not been established. A secondary standard is one that may adversely affect the odor or appearance of drinking water.

The gross beta particle activity MCL is 4 millirem/year annual dose equivalent to the total body or any internal organ. The screening level is 50 pCi/L. The California Department of Public Health Detection Limit for Reporting is 4 pCi/L.

The Federal MCL for uranium is 30 micrograms per liter. This is equivalent to the California MCL of 20 pCi/L.

Subject: Results of Water Well Sampling - July 2014
Well(s) #23-24 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 7, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #23-24. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #23-24** sampled on 07/07/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.34 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

████████████████████
████████████████████
October 14, 2014

Page 2

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property is within the primary and secondary standards for drinking water established by the CDPH and the EPA for the constituents shown in the attached tables

Next Steps

The sampling results from September 2014 for the domestic well(s) on your property, well ID(s) # 23-24, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

Subject: Results of Water Well Sampling - July 2014
Well(s) #27-16 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 9, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #27-16. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #27-16** sampled on 07/09/2014:

- Total chromium was detected at a concentration of: 1.2 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.2 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #27-16 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #22-48 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 14, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-48. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #22-48** sampled on 07/14/2014:

- Total chromium was detected at a concentration of: 1.5 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.5 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #22-48 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

[REDACTED]

Subject: Results of Water Well Sampling - July 2014
Well(s) #36-26 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 2, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #36-26. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #36-26** sampled on 07/02/2014:

- Total chromium was detected at a concentration of: 1.9 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.9 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #36-26 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jeff H. Bails".

Subject: Results of Water Well Sampling - July 2014
Well(s) #27-48 and #27-49

Dear

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 2, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #27-48 and #27-49. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #27-48** sampled on 07/02/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.52 parts per billion (ppb)

For **Well #27-49** sampled on 07/02/2014:

- Total chromium was detected at a concentration of: 1.7 ppb
- Hexavalent chromium was detected at a concentration of: 1.6 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #27-48 and #27-49 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #28-51 

Dear 

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 10, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-51. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-51** sampled on 07/10/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.098 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-51 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

September 16, 2014

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property is within the primary and secondary standards for drinking water established by the CDPH and the EPA for the constituents shown in the attached tables

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #34-50, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

Subject: Results of Water Well Sampling – July 2014
Well(s) #22-108 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well(s) for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 7, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-108. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #22-108** sampled on 07/07/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.15 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from state agencies like the California Department of Public Health (CDPH) and Office of Environmental Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

[REDACTED]

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached tables, the results of the well testing are greater than one or more standards established for:

- Gross Alpha
- Total Dissolved Solids
- Uranium, Dissolved

Previously Reported Results

A May 21, 2014 letter mailed to you included the results for Gross Alpha analyzed using United States Environmental Protection Agency (USEPA) Method 7110C for samples collected on April 2, 2014. During the Second Quarter 2014 monitoring event, laboratory analysis of Gross Alpha was performed using two USEPA-certified methods: USEPA Method 900.0 and USEPA Method 7110C. Upon subsequent review of the results, it was determined that the Gross Alpha results reported using USEPA Method 900.0 were more accurate and representative of site conditions. Both sets of results are presented in the table attached (as the last page of this letter). Only the USEPA Method 900.0 gross alpha results will be used for future evaluations.

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #22-108, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for the well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

	Jul-07-2014	ND <1.0 (not detected)	0.15	100	50	10

Drinking Water Standard: The federal drinking water standard for total chromium is 100 parts per billion (ppb) and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb, which became effective July 1, 2014.

Key to Groundwater Sampling Results

Total Chromium results are for Total Chromium in a dissolved form. Samples are filtered before being analyzed.

- Not Sampled
- ND** Not Detected
- NE** Not Established
- J** A "J" shown next to a concentration indicates that the concentration is estimated based on data validation and quality control criteria
- < The less than (<) symbol, if shown, in front of a result indicates that the compound was not detected (ND) in the groundwater sample. Analytical equipment is limited by its capability to detect a compound below a specific level, and this limit is expressed on the table with a less than (<) symbol in front of the number representing the concentration below which the instrument cannot measure.

Groundwater Sampling Results

Well(s) #22-108

CA Drinking Water Standards: ⁽¹⁾			15	50	10	500/1000/1500 ‡,§	20
Federal Drinking Water Standards: ⁽²⁾			15	50	10	500 ‡	20
Well ID	Sample Date	Sample Type	Gross Alpha (pCi/L)	Gross Beta (pCi/L)	Nitrate as Nitrogen (mg/L)	Total Dissolved Solids (mg/L)	Uranium, Dissolved (pCi/L)
22-108	Apr-02-2014		38.0 (21.1J S)	5.6J	8.4	2,000	26.0
	Jul-07-2014		26.3J	4.2	9.7	2,300	29.0

Notes:

(1) CA Drinking Water Standards are the California Maximum Contaminant Levels (CA MCLs)

(2) Federal Drinking Water Standards are the US Environmental Protection Agency Maximum Contaminant Levels (EPA MCLs). The EPA has granted the California Department of Public Health primacy over drinking water systems.

Bold text indicates detected results that exceed CA MCLs. Bold text for total dissolved solids, chloride, and sulfate (if sampled) indicate that detected results exceed the "upper-level" secondary CA MCL.

-- not applicable

J Indicates result is estimated - Analyte was present but reported value may not be accurate or precise

ND Not detected at the reporting limit shown

S Screening level results (in parenthesis)

mg/L milligrams per liter

pCi/L picocuries per liter

§ The California Secondary MCL for this compound is given as a range: recommended – 500 mg/L, upper level - 1,000 mg/L, and short term - 1,500 mg/L.

‡ A secondary drinking water standard is shown because a primary standard has not been established. A secondary standard is one that may adversely affect the odor or appearance of drinking water.

The gross beta particle activity MCL is 4 millirem/year annual dose equivalent to the total body or any internal organ. The screening level is 50 pCi/L. The California Department of Public Health Detection Limit for Reporting is 4 pCi/L.

The Federal MCL for uranium is 30 micrograms per liter. This is equivalent to the California MCL of 20 pCi/L.

Subject: Results of Water Well Sampling - July 2014
Well(s) #25-14 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 1, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #25-14. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #25-14** sampled on 07/01/2014:

- Total chromium was detected at a concentration of: 1.0 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 0.39 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property is within the primary and secondary standards for drinking water established by the CDPH and the EPA for the constituents shown in the attached tables

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #25-14, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

Subject: Results of Water Well Sampling - July 2014
Well(s) #34-63 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 8, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #34-63. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #34-63** sampled on 07/08/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.36 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #34-63 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #28-78 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 10, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-78. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-78** sampled on 07/10/2014:

- Total chromium was detected at a concentration of: 1.4 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.5 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-78 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

[REDACTED]

Subject: Results of Water Well Sampling - July 2014
Well(s) #22-69 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 2, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-69. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #22-69** sampled on 07/02/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.16 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property is within the primary and secondary standards for drinking water established by the CDPH and the EPA for the constituents shown in the attached tables

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #22-69, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Subject: Results of Water Well Sampling - July 2014
Well(s) #28-17 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 2, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-17. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-17** sampled on 07/02/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.44 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-17 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

September 16, 2014

Subject: Results of Water Well Sampling - July 2014
Well(s) #22-82 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 14, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-82. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #22-82** sampled on 07/14/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.51 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

[REDACTED]
October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Gross Alpha
- Nitrate as Nitrogen

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #22-82, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Subject: Results of Water Well Sampling - July 2014
Well(s) #22-30 ██████████

Dear ██████████

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 16, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-30. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #22-30** sampled on 07/16/2014:

- Total chromium was detected at a concentration of: 2.1 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 2.2 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property is within the primary and secondary standards for drinking water established by the CDPH and the EPA for the constituents shown in the attached tables

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #22-30, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. Subject: Results of Water Well Sampling - July 2014
Well(s) #27-26 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 2, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #27-26. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #27-26** sampled on 07/02/2014:

- Total chromium was detected at a concentration of: 1.6 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.6 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Gross Alpha

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #27-26, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

27-26	Jul-02-2014		26.7	4.1	6.6	480	5.9
	Jul-02-2014	(dup)	26.8	4.5	6.7	500	5.9

Notes:

(1) CA Drinking Water Standards are the California Maximum Contaminant Levels (CA MCLs)

(2) Federal Drinking Water Standards are the US Environmental Protection Agency Maximum Contaminant Levels (EPA MCLs). The EPA has granted the California Department of Public Health primacy over drinking water systems.

Bold text indicates detected results that exceed CA MCLs. Bold text for total dissolved solids, chloride, and sulfate (if sampled) indicate that detected results exceed the "upper-level" secondary CA MCL.

-- not applicable

ND Not detected at the reporting limit shown

mg/L milligrams per liter

pCi/L picocuries per liter

§ The California Secondary MCL for this compound is given as a range: recommended – 500 mg/L, upper level - 1,000 mg/L, and short term - 1,500 mg/L.

‡ A secondary drinking water standard is shown because a primary standard has not been established. A secondary standard is one that may adversely affect the odor or appearance of drinking water.

The gross beta particle activity MCL is 4 millirem/year annual dose equivalent to the total body or any internal organ. The screening level is 50 pCi/L. The California Department of Public Health Detection Limit for Reporting is 4 pCi/L.

The Federal MCL for uranium is 30 micrograms per liter. This is equivalent to the California MCL of 20 pCi/L.

Subject: Results of Water Well Sampling - July 2014
Well(s) #36-31 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 10, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #36-31. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #36-31** sampled on 07/10/2014:

- Total chromium was detected at a concentration of: 1.4 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.3 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Gross Alpha
- Nitrate as Nitrogen

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #36-31, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

Subject: Results of Water Well Sampling - July 2014
Well(s) #34-58 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 9, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #34-58. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #34-58** sampled on 07/09/2014:

- Total chromium was not detected
- Hexavalent chromium was detected at a concentration of: 0.22 parts per billion (ppb)

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

██████████
October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Manganese, Dissolved

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #34-58, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. Subject: Results of Water Well Sampling - July 2014
Well(s) #28-16 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 2, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-16. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-16** sampled on 07/02/2014:

- Total chromium was detected at a concentration of: 1.2 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 0.80 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-16 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #22-23 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 9, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-23. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #22-23** sampled on 07/09/2014:

- Total chromium was detected at a concentration of: 1.5 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.4 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #22-23 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling - July 2014
Well(s) #28-09 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 14, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #28-09. The samples were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #28-09** sampled on 07/14/2014:

- Total chromium was detected at a concentration of: 2.0 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 2.1 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from your well(s) is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #28-09 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Subject: Results of Water Well Sampling – July 2014
Well #BGS-48 [REDACTED]
Well #30E-01 [REDACTED]

Dear [REDACTED]

Thank you for participating in Pacific Gas and Electric Company's (PG&E) domestic well sampling program. The purpose of this letter is to provide you with the results of the July 2014 sampling effort. In addition, the attached table summarizes historical and current results.

Background

On July 8, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #BGS-48 and #30E-01. The samples were sent to Advanced Technology Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent sampling:

For **Well #BGS-48** (37825 Dixie) sampled on 07/08/2014:

- Total chromium was not detected
- Hexavalent chromium was not detected

For **Well #30E-01** (37885 Dixie) sampled on 07/08/2014:

- Total chromium was detected at a concentration of: 1.8 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 1.8 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

Next Steps

The sampling results from July 2014 for your well ID(s) #BGS-48 and #30E-01 will be included in our *Third Quarter 2014 Groundwater Monitoring Report*, to be submitted to the Water Board at the end of October 2014.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. You may also contact us by e-mail at HinkleyInfo@pge.com.

Thank you very much for your participation in our program.

Sincerely,

cc: Jessica Bails

[REDACTED]

Subject: Results of Water Well Sampling - July 2014
Well(s) #34-06 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 17, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #34-06. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #34-06** sampled on 07/17/2014:

- Total chromium was not detected
- Hexavalent chromium was not detected

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Arsenic, Dissolved
- Manganese, Dissolved

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #34-06, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. Subject: Results of Water Well Sampling - July 2014
Well(s) #22-103 [REDACTED]

Dear [REDACTED]

Thank you for allowing Pacific Gas and Electric Company (PG&E) to sample your domestic well for chromium and other constituents as outlined in the Final Environmental Impact Report (EIR) for the cleanup of the chromium plume in Hinkley. The results of the July 2014 sampling effort are provided below along with tables summarizing past sampling results from your well.

Background

On July 7, 2014, samples were collected from the domestic well(s) on your property, well ID(s) #22-103. The samples were analyzed for chromium and other water quality parameters. The samples analyzed for chromium were sent to ASSET Laboratories, Inc., a California-certified laboratory, and analyzed for total chromium using U.S. Environmental Protection Agency (EPA) Method 6020A. The laboratory also analyzed the samples for hexavalent chromium using EPA Method 218.6.

The following are the results of the recent chromium sampling:

For **Well #22-103** sampled on 07/07/2014:

- Total chromium was detected at a concentration of: 1.9 parts per billion (ppb)
- Hexavalent chromium was detected at a concentration of: 2.0 ppb

State and Federal Drinking Water Standards

The federal drinking water standard for total chromium is 100 parts per billion (ppb), and the California drinking water standard for total chromium is 50 ppb. The California drinking water standard for hexavalent chromium is 10 ppb.

Based on the results, the water from the domestic well(s) on your property on your property is within the total chromium standard of 50 ppb and the hexavalent chromium standard of 10 ppb established by the California Department of Public Health for drinking water.

There are a number of possible constituents in Hinkley groundwater which are both naturally occurring, as well as occurring as a result of historical agricultural operations or past industrial practices. Some of these constituents may occur in levels above the drinking water standard in area wells.

PG&E has requested information from the state agencies like the California Department of Public Health (CDPH) and Office of Environment Health Hazard Assessment (OEHHA) about other constituents that might typically be found in the Hinkley area. We would be happy to provide those

October 14, 2014

Page 2

to residents who have questions. While we inform you about the results of this sampling, it should be clear that PG&E is not responsible for constituents in well water that are not a result of PG&E operations.

Based on the results, the water from the domestic well(s) on your property was not within the primary and/or secondary standards for drinking water established by the CDPH and the EPA **for the parameters listed below**. As shown on the attached table, the results of the well testing are greater than one or more standards established for:

- Gross Alpha

Next Steps

The sampling results from July 2014 for the domestic well(s) on your property, well ID(s) #22-103, will be included in our Third Quarter 2014 Groundwater Monitoring Report, to be submitted to the Water Board at the end of October 2014, and in our Third Quarter 2014 Agricultural Treatment Unit Monitoring Report, to be submitted to the Water Board after the end of Third Quarter 2014. We will contact you in the future to arrange the next well sampling.

Please Contact Us With Your Questions

Our local, bilingual (English/Spanish) staff is available to answer any questions about the sampling results for your well(s). Please contact Jessica Bails at (760) 253-7896 or visit our Hinkley Community Resource Office located at 22999 Community Boulevard. We are open Monday through Friday from 9 a.m. to 5 p.m. If you are unable to visit us during these hours we'd be happy to schedule a time that is convenient for you. pCi/L picocuries per liter

§ The California Secondary MCL for this compound is given as a range: recommended – 500 mg/L, upper level - 1,000 mg/L, and short term - 1,500 mg/L.

‡ A secondary drinking water standard is shown because a primary standard has not been established. A secondary standard is one that may adversely affect the odor or appearance of drinking water.

The gross beta particle activity MCL is 4 millirem/year annual dose equivalent to the total body or any internal organ. The screening level is 50 pCi/L. The California Department of Public Health Detection Limit for Reporting is 4 pCi/L.

The Federal MCL for uranium is 30 micrograms per liter. This is equivalent to the California MCL of 20 pCi/L.
