

**Date:**

July 28, 2009

**Applicant:**

Southern California Gas Company (SCG)

Contact: Ted Roney, (213) 244-5672

**Applicant's Representative:**

Insignia Environmental

Contact: Armen Keochejian, (760) 635-1587

**Project Name:**

Southern California Gas Company - North-South Interconnect

WDID No. 7A363010001

**Receiving Water:**

The project will temporarily impact two named - Carson Wash and Whitewater River. Additionally, 40 unnamed drainages. These washes eventually drain into Watson Wash, Bristol Lake, or Dale Lake. With the exception of Whitewater River which drains into Salton Sea.

**Location:**

Desert Hot Springs, California and Twentynine Palms to Essex, California

San Bernardino and Riverside counties

**Project Description:**

The project involves conversion of 76 total miles of existing Southern Trails Pipeline to natural gas and includes the replacement or removal of existing valves and installation of additional valves, replacement of cathodic protection units, installation of pressure-limiting stations, and repair of approximately 49 points where pipeline defects have been detected. The project will also involve the construction of two interconnections from SCG's existing Northern and Southern transmission systems

**Action:**

Pending
