Waterboard Staff: TBA

Brief Description of Project:

Project Description: The project primarily consists of street paving, construction of a drainage system associated with the road improvements, and minor associated safety improvements. The proposed improvements are public infrastructure to be completed by local public agencies.

Project Activities: The Woodcrest-Rinehart Acres Drainage Plan Project consists of a series of in street, 100-year storm drain facilities including approximately 8,000 feet of Reinforced Concrete Pipe in diameter from 18 to 66 inches, road inlets and catch basins, and an impact baffle outlet structure with access for maintenance. The project also includes approximately 10,000 feet of road improvements including regrading and paving existing dirt roads with the addition of 6-inch asphalt concrete roadside berms.
