12. Facility Employee Evacuation Procedures:
Employees are instructed to evacuate due south from the only entrance/exit continuing southward behind the retaining (blast) wall.

13. Preventive Measures:
A. All inventory is kept at minimum levels in regards to the product turnover.
B. All inventory is methodically counted and stacked to minimize breakage or spillage.
1C. Do's and Don'ts in accordance with the I.M.E. recommendations off Class B Explosives storage are posted and followed completely.
2C. Security is provided everyday after non-working hours 5 p.m. - 7 a.m.
D. Magazine construction has a blast wall approximately 25 ft. from only entry way which is designed to absorb any outward explosion.
E. All employees have been trained in the safe handling of explosives.
F. All containers are properly labeled in accordance with C.F.R. and D.O.T. guidelines.

14. Facility Training Plan:
A. Local emergency response teams are warned not to enter facility without prior approval of management when an emergency does occur.
B. This facility has equipment designated for spill cleaners.
C. All employees entering this facility are capable of cleaning up spills.
D. All employees have received MSDS training on products stored in this facility. This confirmation is retained in an employee training file.

15. List of Facility Emergency Equipment:
None on site, explosives fires are not to be fought.

Note: All vehicles entering facility are equipped with First Aid kits and fire extinguishers.
