# **Se TMDLs for the Newport Bay Watershed**

## **Workshop #1 Overview**

**Karen Cowan, LWA  
January 30, 2014**

# Purpose

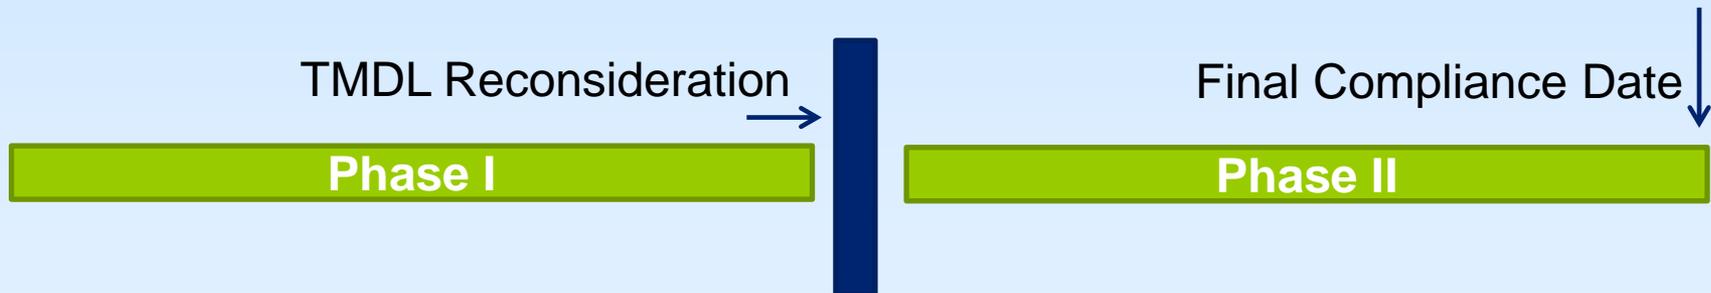

---

- Identify key decisions made in Workshop #1 that will aid discussions in Workshop #2
- Identify “retention pond issues” for Workshop #3

# Key Decisions from Workshop 1

---

- Newport Bay is not impaired; TMDL only developed for freshwater portions of the watershed
- Basin Plan Amendment will only establish TMDLs; Site-Specific Objectives will follow in a separate action
- TMDL will be phased; this issue is separate and distinct from allocations discussion

# Retention Pond Issues

---

- Issues Likely with Separate Discussions:
  - Interim WLAs
  - Revisit use of equation for WLAs/LAs
  - Framework for Offset Program
  - Schedule/Timeline for Phase I of the TMDL
- Issues Likely addressed in “Report Out”:
  - Transparency and Data Sharing
