Subject: RE: Proposed Prior Lawful Approval Language for the MS4 Permit

All-

Thank you for the input and suggested language on prior lawful approval. It has really helped to understand the issues the Copermittees and regulated community face during the plan development and approval process. We reviewed the proposed language, but have not included any changes to Tentative Order No. 2015-0001 that will go out this week for public comment. However, we are willing to continue the discussion and still consider suggested changes to the Regional MS4 Permit to address this issue. It would be helpful that any proposed permit language is supported by most stakeholders.

Please provide comments on this issue during the 60-day public comment period. We also encourage you to attend the October 8th Public Workshop to inform the San Diego Water Board on the importance of this issue.
