

September 15, 2010

Mr. Bruce Wolf
Executive Officer
San Francisco Bay Regional Water Quality Control Board
1515 Clay St, Suite 1400
Oakland, California 94612

Re: City of Fremont Clean Water Program Annual Report Fiscal Year 2009/2010 for NPDES
Permit No. CAS612008

Dear Mr. Wolf:

As the City of Fremont's authorized representative, I am sending you the enclosed Clean Water Program Annual Report for the Fiscal Year 2009/2010.

I certify, under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or person(s) who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for known violators.

Should you have any questions regarding the contents of this report, please contact me at (510) 494-4583 or Barbara Silva at (510) 494-4575.

Sincerely,

A handwritten signature in blue ink that reads "Kathy Cote".

Kathy Cote
Environmental Services Manager

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary: In addition to complying with routine inspection and maintenance measures, the City of Fremont (City) made progress toward reducing non-stormwater discharges and polluted stormwater to storm drains and watercourses during the FY 2009/2010 reporting period by:

- Completing improvements to a bioswale landscape project at the City Maintenance Center to remove silt and pollution from surface water runoff. This bioswale element provides 13.99 acres of surface water runoff treatment. When feasible, the City plans to install similar bioswale elements during future construction and/or remodeling of City facilities.
- Planting native vegetation and drought tolerant plant materials that comply with Bay Friendly guidelines by the Trees & Landscape and Parks Maintenance Divisions. Examples include restoration of native species of trees, shrubs and grasses along one section of Sabercat Creek and citywide use of slow growing, drought –tolerant plant materials in landscaped medians and city parks.
- Including and/or updating standard BMP language for all landscape maintenance contracts.
- Developing spill prevention control plans for all City fueling sites.
- Establishing greenwaste programs at all City fire stations.
- Performing scheduled inspections and cleanout at City facilities with catch basins/sumps.

C.2.a. ► Street and Road Repair and Maintenance

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and provide explanation in the comments section below.

X	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
X	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
X	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
X	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
n/a	Control of discharges from graffiti removal activities
n/a	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
n/a	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal

Comments: The City paints over (versus pressure washing) all graffiti found on City rights of way, structures, bridges, and city-owned facilities and therefore does not generate any discharges for those activities.

FY 2009-2010 Annual Report
Permittee Name: City of Fremont

C.2 – Municipal Operations

C.2.d. ► Stormwater Pump Stations

Does your municipality own stormwater pump stations: **X** **Yes** **No**

If your answer is **No** then skip to **C.2.e.**

(For FY 10-11 Annual Report only) Complete the following table for dry weather DO monitoring and inspection data for pump stations² (add more rows for additional pump stations):

Pump Station Name and Location	First inspection		Second inspection	
	Dry Weather DO Data Date	mg/L	Dry Weather DO Data Date	mg/L
Sullivan Underpass at Niles Boulevard	37° 34' 42" N by 121° 58' 06" W			
Pickering Ave. & Mission Blvd.	37° 34' 17" N by 121° 57' 43" W			
South Grimmer Blvd. & Osgood Rd.	37° 30' 16" N by 121° 56' 28" W			
Paseo Padre Pky Grade Separation	37° 32' 30" N by 121° 57' 16" W			

No data requirement this reporting period

(For FY 10-11 Annual Report only) Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

Summary: No data requirement this reporting period

(For FY 10-11 Annual Report only) Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	Date (2x/year required)	Presence of Trash (Cubic Yards)	Presence of Odor (Yes or No)	Presence of Color (Yes or No)	Presence of Turbidity (Yes or No)	Presence of Floating Hydrocarbons (Yes or No)
Same as above	No data requirement this reporting period					

² Pump stations that pump stormwater into stormwater collection systems or infiltrate into a dry creek immediately downstream are exempt from DO monitoring.

C.2.e. ► Rural Public Works Construction and Maintenance					
Does your municipality own/maintain rural ³ roads:		<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
If your answer is No then skip to C.2.f.					
Place an X in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type NA in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:					
<input checked="" type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas				
<input checked="" type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources				
<input checked="" type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts				
<input checked="" type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality				
<input checked="" type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion				
<input checked="" type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate				
<input checked="" type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings				
Comments including listing increased maintenance in priority areas: All rural roads within the City of Fremont have an asphalt surface. All road repairs are performed with asphalt patches and comply with applicable BMPs. There are no dirt or gravel roads located in Fremont.					

³ Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation

Place an **X** in the boxes below that apply to your corporation yard(s):

<input type="checkbox"/>	We do not have a corporation yard
<input type="checkbox"/>	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
<input checked="" type="checkbox"/>	We certify that we have a current Stormwater Pollution Prevention Plan (SWPPP) for the Corporation Yard(s)

Place an **X** in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

<input checked="" type="checkbox"/>	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
<input checked="" type="checkbox"/>	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
<input checked="" type="checkbox"/>	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
<input checked="" type="checkbox"/>	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
<input checked="" type="checkbox"/>	Cover and/or berm outdoor storage areas containing waste pollutants

Comments:

If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:

Corporation Yard Name	Inspection Date (1x/year required)	Inspection Findings/Results	Follow-up Actions
Maintenance Center (MC)	09/02/2009 Regularly inspected monthly	Pre-rainy season inspection. Spill kits need replenishing at Fuel Island. Shared areas not cleaned on "blow and sweep" day. Roll-Off Area storm drains subject to debris. Some vehicles leaking.	Replenished spill kits, installed storm drain inserts in Roll-Off area to contain debris, cleaned shared-areas, leaking vehicles repaired.
Central Park Service Center	Site inspected but inspection not documented	Not enough quantity stored for hazardous materials business plan; assumed not part of SWPPP. Will begin documenting inspections effective July 1, 2010.	Established inspection schedule. Mowers transported to MC for cleaning.
Fremont PD Police Car Service Area	Inspected monthly	Discarded flares improperly stored in open containers.	Coordinated disposal; reviewed storage and housekeeping BMPs with facility manager.

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.a. ► New Development and Redevelopment Performance Standard Implementation Summary Report

(For FY 10-11 Annual Report only) Provide a brief summary of the methods of implementation of Provisions C.3.a.i.(1)-(8)

Summary:

No data requirement this reporting period

C.3.b. ► Green Streets Status Report

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard. [Note: this applies only to agencies planning to implement pilot green streets projects. If you are planning a pilot green streets project, summarize project status.]

Summary: The City of Fremont has a green street pilot project currently in the design phase.

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ⁴ , Street Address	Name of Developer	Project Phase No. ⁵	Project Type & Description ⁶	Project Watershed ⁷	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New and/or Replaced Impervious Surface Area ⁸ (ft ²)	Total Pre- Project Impervious Surface Area ⁹ (ft ²)	Total Post- Project Impervious Surface Area ¹⁰ (ft ²)

⁴ Include cross streets.

⁵ If a project is being constructed in phases, use a separate row entry for each phase.

⁶ Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.

⁷ State the watershed(s) that the Regulated Project drains to. Optional but recommended: Also state the downstream watershed(s).

⁸ State both the total new impervious surface area and the total replaced impervious surface area, as applicable.

⁹ For redevelopment projects, state the pre-project impervious surface area.

¹⁰ For redevelopment projects, state the post-project impervious surface area.

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Status of Project ¹¹	Source Control Measures ¹²	Site Design Measures ¹³	Treatment Systems Approved ¹⁴	Operation & Maintenance Responsibility Mechanism ¹⁵	Hydraulic Sizing Criteria ¹⁶	Alternative Compliance Measures ^{17/18}	Alternative Certification ¹⁹	HM Controls ^{20/21}
Private Projects									
Fremont Christian School Dwelling Group PLN2009-00259	Constructed	stenciled storm drains, street sweeping	landscaped based treatment, disconnected downspouts	bioretention facilities	O&M Agreement	0.2"/hour	N/A	N/A	Not Required; <1 acre being created/replaced
Peralta Mixed Use PLN2009-00252	Construction	stenciled storm drains, street sweeping	landscaped based treatment, disconnected downspouts	flow through planters, tree well filters	O&M Agreement	0.2"/hour	N/A	N/A	Not Required: No site net increase of impervious surface
Solyndra Page PLN2010-00135	Construction	stenciled storm drains, surface cleaning, street sweeping	landscaped based treatment, disconnected downspouts	tree well filter, bioretention facilities, media filtration	O&M Agreement	0.2"/hour	N/A	N/A	Not required; project flows to tidal area

¹¹ For private projects, state project application submittal date; application deemed complete date; and, final discretionary approval date. For public projects, state plans and specifications approval date.

¹² List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

¹³ List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

¹⁴ List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

¹⁵ List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

¹⁶ See Provision C.3.d. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3)

¹⁷ For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

¹⁸ For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

¹⁹ Note whether a third party was used to certify the project design complies with Provision C.3.d.

²⁰ If HM control is not required, state why not.

²¹ If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting
<p>(1) Fill in attached table C.3.h.iv.(1) or attach your own table including the same information – See Attachment 1</p>
<p>(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.</p>
<p>Summary:</p> <p>During the reporting period, 311 inspections were conducted for 242 treatment measures installed, which represents a 57% decrease from the prior reporting period. This is a result of a general downturn in new development due to the recession during this reporting period and higher rate of compliance found during the initial inspection. For the most part, the problems encountered were consistent with those observed during the prior reporting period. Examples include:</p> <ul style="list-style-type: none"> • Vegetation die-off • Sediment, debris and overgrown vegetation at curb cuts • Irrigation turned-off or broken • Replacement of spent media in filter canisters needed • Sediment build-up in canister, vortex and pump vaults • Standing water in vegetated measures <p>During the initial O&M inspection, at many sites, the party responsible for maintaining the treatment measures was unaware of the O&M agreement executed between the developer and the City. As a result, the responsible party did not conduct the necessary maintenance during the first year the stormwater treatment measures were in place. To address this issue, City staff now meets with responsible parties earlier in the process, when the stormwater treatment measures are inspected at final construction sign-off. Responsible parties are now required to meet with a City inspector to confirm they are aware of the O&M agreement and the maintenance obligations contained therein.</p> <p>Another observation was that homeowners sometimes installed concrete walkways over the bubble-up structures that deliver storm water from roofs and rear patios. This rendered the treatment measures ineffective. These actions have been corrected and the treatment measures are now functioning as designed.</p>
<p>(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).</p>
<p>Summary: The current O&M program is designed to determine whether the responsible parties are maintaining their stormwater treatment measures as required by their O&M agreement and to verify these measures are functioning properly. Inspections were divided up roughly proportional to the various types of treatment measures installed in the City, along with past compliance history. When violations are detected, the responsible party is notified and required to take corrective actions within the timeline determined by the O&M inspector. Violations can be addressed by verbal or written warnings or administrative fines. All treatment measures found to be out of compliance are re-inspected until</p>

deemed in compliance by the City. For FY 2009/2010 all violations were addressed by a verbal warning with the exception of four warning letters. Two of which were issued for not fulfilling the requirements of their respective O&M Agreements, resulting in the treatment measures requiring maintenance. The remaining two issued, were for alterations made to various treatment measures which resulted in various stages of ineffectiveness.

In addition all treatment measures installed during this fiscal year were inspected throughout the installation process and only accepted when they were constructed and functioning per City of Fremont and/or vendor specifications. The stormwater treatment measure construction/installation inspection program was instituted to ensure treatment measures installed throughout the City are constructed and will function as designed. This eliminates, for the most part, the need to repair treatment measures due to faulty or improper installation methods after construction is completed. The developer, construction manager and /or contractor responsible for the installation of these treatment measures is required to have the O&M inspector inspect and approve various stages of installation for all treatment measures installed. If a violation or modification is required, it must be corrected and re-inspected prior to approval being given. All treatment measures must be accepted by the O&M inspector prior to final occupancy being granted for each site.

To address the issue of the parties responsible for implementing the O&M not being aware their requirements once ties to the developer are ended, the City has implemented the following policy. For new construction the O&M inspector now meets with the responsible party for implementing the site's O&M Agreement prior to final approval being issued by the City for all the storm water treatment measures installed at that site. During this meeting the O& M inspector details the responsibilities outlined in the agreement including inspection & maintenance requirements. Compliance with these requirements is emphasized and consequences for non compliance are outlined.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

C.4.a.ii ► Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to obtain effective stormwater pollutant control on industrial sites? **Yes** **No**

If **No**, explain:

C.4.c.ii.(5) ► Enforcement Response Plan

See Attachment 2

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010? **Yes** **No**

If **No**, explain:

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

The City of Fremont's existing database meets the new MRP tracking and reporting requirements for industrial and commercial site controls. The City of Fremont participated in ACCWP I&DC Subcommittee meetings to confirm the existing inspection protocols and forms meet the new MRP requirements. Specific task changes, including 10-day violation resolution, are being adopted and will be reported in the FY 2010/2011 annual report.

C.4.b.i. ► Business Inspection Plan

(For FY 09-10 Annual Report only) Do you have a Business Inspection Plan? **Yes** **No**

If **No**, explain:

C.4.b.iii.(1) ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

See Attachment 3

C.4.b.iii.(2) ► Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

Scheduled inspections for FY 2010/2011 by facility type:*
 See Attachment 3

Facility Type	Number of Scheduled Inspections
Restaurant/Property Management	350
Automotive	80
Miscellaneous	80
USD Permitted**	62
Notice of Intent (NOI)	32
Grocery	10
Total	614

*Using Attachment 3 as the universe of potential sites in Fremont, the City is scheduled to inspect the number and types of facilities listed in the table above.

**USD Permitted includes NOI and Miscellaneous facilities.

C.4.c.iii.(1) ► Facility Inspections

Fill out the following table or attach a summary of the following information.

	Number	Percent
Number of businesses inspected (if known)	654	
Total number of inspections conducted	902	
Violations issued (excluding verbal warnings)	48	
Sites inspected in violation	38	6%
Violations ¹ resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	15	40%

¹ Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.4.c.iii.(2) ► Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. non-stormwater discharge)	12
Potential discharge (e.g. BMPs not in place or ineffective)	36

C.4.c.iii.(2) ► Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP) ¹	Number of Enforcement Actions Taken	% of Enforcement Actions Taken ²
Level 1	Verbal Warning	17	36%
Level 2	Written enforcement. (Written Warning, Notice of Violation NOV)	15	31%
Level 3	Administrative Fine	16	33%
Level 4	Legal Action	0	0
Total		48	100%

Notes:

¹Agencies to list specific enforcement actions as defined in their ERPs.

²Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.4.c.iii.(3) ► Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category ¹	Actual Discharge Violations	Potential Discharge Violations
Restaurants	4	19
Grocery	1	5
USD Permitted*	1	0
NOI	1	0
Miscellaneous	3	4

Notes: *USD Permitted includes NOI and Miscellaneous facilities.

† List your Program's standard business categories.

C.4.c.iii.(4) ▶ Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

All West Fabricators
 44875 Fremont Blvd.
 Fremont, CA 94538

Solyndra, Bldg. 2
 901 Page Rd.
 Fremont, CA 94538

C.4.d.iii ▶ Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Stormwater Conference	August 17-20, 2009	Stormwater	1	11%
CWEA NRTC Conference	September 16-18, 2009	Stormwater, Fats, oils and grease (FOG)	1	11%
CWEA Tri-State Conference	September 22-24, 2009	Stormwater, FOG	1	11%
Clean Water Program Inspector Training for Businesses and Illicit Discharges	October 15, 2009	Urban runoff pollution prevention, Inspection procedures, and Illicit Discharge Detection, Elimination and follow-up.	3	100%
CWEA P3S Conference	March 1-3, 2010	Public education/outreach, storm water issues, FOG	3	33%
CWEA Annual Training	April 20-23, 2010	Stormwater, FOG	1	11%
NACWA Conference/Workshop	May 19-21, 2010	Stormwater	2	22%

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

C.5.a.ii ► Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to prohibit and control illicit discharges and escalate stricter enforcement to achieve expedient compliance? Yes No

If No, explain:

C.5.b.ii.(4) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010? Yes No

If No, explain:

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

The City of Fremont's existing database meets the new MRP tracking and reporting requirements. Incidents are tracked from initial contact to final resolution. A new report form was implemented. See Attachment 4

C.5.c.iii ► Complaint and Spill Response Phone Number and Spill Contact List

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
Michael Dunning	Environmental Compliance Coach	510-477-7639
Joseph Mendoza	Senior Inspector	510-477-7639
Main Line Phone Number	City of Fremont Environmental Services Division	510-494-4570

C.5.d.iii ► Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description: See Alameda Countywide Clean Water Program FY 2009/10 Report. See BASMAA FY 2009/10 report on mobile surface cleaners program.

C.5.e.iii ► Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description:

The City of Fremont inspects drain inlets annually as part of its routine maintenance and abates discharges as needed. The City of Fremont has a total of 30.62 square miles of lands with an urban/suburban zoning designation and 7.45 square miles with an industrial zoning designation and has identified 31 urban/suburban-zoned screening points and 7 industrial-zoned screening points. These additional screening points will be surveyed during the FY 2010/2011 reporting period.

C.5.f.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

See Attachment 4	Number	Percentage
Discharges reported (C.5.f.iii.(1))	136	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2)	42	31%
Discharges resolved in a timely manner (C.5.f.iii.(3)	135	99%

C.5.f.iii.(4) ► Summary of major types of discharges and complaints

Provide a narrative or attach a table and/or graph.

See Attachment 4

Section 6 – Provision C.6 Construction Site Controls

C.6.a.iii ► Legal Authority

(For FY 09-10 Annual Report only) Is your agency's legal authority adequate for C.6 compliance? Yes No

If **No**, explain:

C.6.b.ii.(3) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Was your Enforcement Response Plan developed and implemented by April 1, 2010? Yes No

If **No**, explain:

C.6.e.iii.1.a, b, c ► Site/Inspection Totals

Number of sites disturbing < 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (C.6.e.iii.1.c)
7	21	272

C.6.e.iii.1.d ▶ Construction Activities Storm Water Violations		
BMP Category	Number of Violations¹	% of Total Violations²
Erosion Control	4	15
Run-on and Run-off Control	0	0
Sediment Control	5	19
Active Treatment Systems	3	12
Poor Site Management	14	54
Non Stormwater Management	0	0
Total	26	100%

¹Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category.

²Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

C.6.e.iii.1.e ▶ Construction related storm water enforcement actions			
	Enforcement Action (as listed in ERP)¹	Number Enforcement Actions Taken	% Enforcement Actions Taken²
Level 1	Verbal Warning	18	69
Level 2	Notice To Comply	6	23
Level 3	Administrative Fines – Stop Work Order	2 - Fines	8
Level 4	Legal Action	0	0
Total		26	100%

Notes:

¹Agencies should list the specific enforcement actions as defined in their ERPs.

²Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.6.e.iii.1.f, g ▶ Illicit Discharges	
	Number
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	8
Number of sites with discharges, actual and those inferred through evidence (C.6.e.iii.1.g)	6

C.6.e.iii.1.h, (1) ► Violation Correction Times

	Number	Percent
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	24	92% ²
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	2	8% ³
Total number of violations for the reporting year¹	26	100%

Notes:

¹Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

²Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

³Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

C.6.e.iii.(2) ► Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description: The City conducted 272 inspections at 28 sites (including 21 NOI sites) during this reporting period and observed 26 violations, which equates to a violation being observed 12% of the time. The vast majority of violations resulted from poor site management (e.g., improper storm drain protection and construction entrance, trash and debris on site and adjacent roadways), followed by sediment and erosion control.

The majority of violations were minor and only required a verbal warning. All violations were closed as a result of compliance being achieved and confirmed by a follow-up inspection. All violations were corrected within 10 business days with the exception of two large projects, which could not comply within that timeline due to construction phasing. In these two cases, a Notice of Violation was issued for each site resulting in temporary BMPs being implemented until final compliance was achieved.

Since this is the first year in which the City has compiled this type of data, comparisons to previous years will be discussed starting with FY 2010/2011 Annual Report.

C.6.e.iii.(2) ► Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

The City has an aggressive construction site control program, as evidenced by 272 inspections conducted at 28 sites throughout the past reporting period. All violations observed require an enforcement action that may escalate until the violation is corrected to the City's satisfaction, based on RWQCB guidelines.

While October 15th is the start of the rainy season in California, the City requires all construction site controls be either on site or installed by October 1st. The City sends a reminder notice to affected owners and developers by September 1. This proactive approach provides ample notice for developers to be in compliance by October 15th with all storm water regulations rather than having sites out of compliance and requiring enforcement actions. City inspectors confirm compliance and issue a Notice of Violation if compliance is not achieved, requiring the developer/owner to stop work on the site until all stormwater controls are on site or installed.

An opportunity for improvement concerns communication between the City Engineering Department and the Environmental Services regarding City construction sites. Specifically, two large construction projects overseen by Engineering, were not referred to Environmental Services for construction site inspections. The Environmental Services inspector discovered both sites in the field, identified issues and took immediate enforcement actions. Engineering has agreed to notify Environmental Service about construction sites in the future to prevent this situation from reoccurring.

The City has one Environmental Services inspector dedicated to construction site inspections and enforcement during the rainy season. With the large amount of development (both private & government) scheduled to be active during the FY 2010-2011 rainy season, additional manpower will likely be required. The City has made arrangements to supplement City inspectors with qualified inspectors from Union Sanitary District to perform inspections and enforcement actions as needed.

The City inspector will meet with the construction site managers/representatives during preconstruction meetings and again as soon as they are on-site to clarify the City's construction site policies and regulations. For sites that fall under the construction NOI program, City inspectors provide education and outreach describing the new permit requirements and require proof that an NOI was filed. The City inspectors will continue to provide guidance as it relates to construction site management throughout the life of the project.

C.6.f ▶ Staff Training Summary				
Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
City of Fremont Erosion Control Inspector Training	September 24, 2009	Trained City of Fremont construction & building inspectors on erosion control BMPs, inspection forms and enforcement	15	100%
SFEP Construction General Permit Training	January 26, 2010	Permit requirements and tools for obtaining a construction NOI permit and inspecting, monitoring and reporting during construction activities	3	30%
Clean Water Program Training the Trainers Session on MRP Construction Site Inspection Requirements	March 9, 2010	Permit requirements, ERP requirements, tools for construction site inspections and tracking.	7	100%
CASQA BMP Web Portal: Tools for Complying with the New Construction General Permit	June 23, 2010	Tools for Complying with the New Construction General Permit	5	100%

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.ii.1 ▶ Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary: See BASMAA FY 2009/10 report on the BASMAA Regional Advertising Campaign.

C.7.b.iii.1 ▶ Pre-Campaign Survey

(For the FY 10-11 Annual Report only) Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information:

Summary of how the survey was implemented.

- Analysis of the survey results.
- Discussion of the outreach strategies based on the survey results.
- Discussion of planned or future advertising campaigns to influence awareness and behavior changes regarding trash/litter and pesticides.

Place an **X** in the appropriate box below:

No data requirement this reporting period

<input type="checkbox"/>	Survey report attached
<input type="checkbox"/>	Reference to regional submittal:

C.7.c ▶ Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary: See BASMAA FY 2009/10 report on the Regional Media Relations effort.

C.7.d ► Stormwater Point of Contact

(For FY 09-10 Annual Report only, unless changes made) Provide details of website or phone number used as the point of contact. Report on how the point of contact is publicized and maintained. If any change occurs in this contact, report in a subsequent Annual Report.

Contact Summary: See BASMAA FY 2009/10 report on the Regional point of contact. See Clean Water Program FY 2009/10 Report for details on countywide point of contact.

The stormwater point of contact is available to the public on the City of Fremont website for the Environmental Services Division:
www.fremont.gov

The website includes contact information and links to topics related to stormwater regulations, environmental education, waste reduction and proper disposal practices for garbage and recyclable materials. The website is updated several times per year to reflect new/revised stormwater regulations and current news topics and/or community workshops. The City website won the 2010 Savvy "Silver Circle" Award that recognizes outstanding local achievements.

C.7.e ► Public Outreach Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.
 Use the following table for reporting and evaluating public outreach events

Event Details	Description (messages, audience)	Evaluation of Effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional.	Identify type of event (e.g., school fair, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscope presentation, pesticides, stormwater awareness)	Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as: <ul style="list-style-type: none"> • Estimated overall attendance at the event. • Number of people that visited the booth, comparison with previous years • Number of brochures and giveaways distributed • Results of any spot surveys conducted
Clean Water Program exhibit at the Alameda County Fair (countywide event).	See Clean Water Program FY 2009/10 Report.	

City of Fremont Public Outreach – See Attachment 5
--

C.7.f. ► Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report. Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary: See Alameda Countywide Clean Water Program FY 2009/2010 Report. In addition, the City of Fremont staff participated in Alameda Creek Watershed council meetings and signed a Letter of Understanding to indicate Fremont's commitment to time and staff participation in the Council.

C.7.g. ► Citizen Involvement Events

List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.

Event Details	Description	Evaluation of effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional	Describe activity (e.g., creek clean-up, storm drain marking etc.)	Provide general staff feedback on the event. Provide other evaluation details such as: <ul style="list-style-type: none"> • Number of participants. Any change in participation from previous years. • Distance of creek or water body cleaned • Quantity of trash/recyclables collected (weight or volume). • Number of inlets marked. • Data trends
Community Stewardship Grants	See Alameda Countywide Clean Water Program FY 2009/10 Report	
Creek Cleanups	See Attachment 6	
Contractors: thermoplastic stencils	Sold 42 "No Dumping Drains to the Bay" thermoplastic stencils to contractors	Promotes public awareness of proper use of storm drains
Eagle Scouts: thermoplastic stencils	City staff helped coordinate a 20-member Eagle Scout volunteer effort to install 196 "No Dumping Drains to the Bay" thermoplastic	Promotes public awareness of proper use of storm drains.

	stencils (289 total volunteer hours).	
Boy Scout Troop 468 Adopt-a-Creek	Removed non-native vegetation and trash/debris from Stiver's Lagoon	Improved condition of Stiver's Lagoon The estimated number of participants is 30.

C.7.h. ► School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment.
 Use the following table for reporting school-age children outreach efforts.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Provide the following information: Name Grade or level (elementary/ middle/ high)	Brief description, messages, methods of outreach used	Provide number or participants	Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.
Educational Services	See Alameda Countywide Clean Water Program FY 2009/10 Report.		
City of Fremont Staff Outreach	See Attachment 7		

Section 8 - Provision C.8 Water Quality Monitoring

C.8 ► Water Quality Monitoring

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

Summary: See BASMAA MRP Regional Supplement for POCs and Monitoring Annual Reporting for FY 2009/2010.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a ▶ Adopt an Integrated Pest Management (IPM) Policy or Ordinance	See Attachment 8		
(For FY 09-10 Annual Report only) Attach a copy of your individual IPM ordinance or policy.	<input checked="" type="checkbox"/>	Attached	<input type="checkbox"/> Not attached , explain below
If Not attached , explain:			

C.9.b ▶ Implement IPM Policy or Ordinance
Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphorous pesticides, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.
<p>Summary: See Attachments 9 and 9a showing all FY 2008/2009 and FY 2009/2010 herbicide and pesticide usage.</p> <p>FY 2008/2009 to FY 2009/2010 trend of pesticide usage by City division:</p> <ul style="list-style-type: none"> • Pesticide use in public buildings increased due to pest re-infestation. • Parks – City Staff: Pesticide application by City staff decreased due to a reduction of bee infestation. • Parks – Outside contractor: According to limited available records, the City's parks rodent-control contractor used approximately 2 pounds of Aluminum Phosphide product each month as reported over a six month period. The City will be implementing an improved data collection system for monitoring use of pesticides by outside contractors. • Right of Way (Trees) – no pesticide usage. <p>FY 2008/2009 to FY 2009/2010 trend of herbicide usage by City division:</p> <p>During the same FY 2008/2009 to FY 2009/2010 time span, City maintenance staff increased efforts to remove/reduce weeds by non-chemical methods, such as manual weed removal and increased use of wood chips in landscaped areas. During this period there was no herbicide usage by Public Buildings.</p>

C.9.c ▶ Train Municipal Employees	
Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	40
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years. * Fifteen City employees currently hold Qualified Applicator Certificates (QAC) that requires 20-hours of formal classroom instruction. Recent QAC coursework emphasized proper IPM practices. Over the past several years, all City staff involved in pesticide and/or herbicide application have received job-specific training during scheduled biweekly tailgate safety sessions. The City is considering an expansion of formal certificated IPM training	40*
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

C.9.d ▶ Require Contractors to Implement IPM			
Did your municipality contract with any pesticide service provider in the reporting year?	<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/> No
If yes, attach one of the following: See attachment 10 and 10a			
<input checked="" type="checkbox"/>	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR		
<input type="checkbox"/>	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR		
<input type="checkbox"/>	Equivalent documentation.		
If not attached, explain:			
<ul style="list-style-type: none"> Public Buildings contracts: The FY 2007/2008 to FY 2009/2010 multi-year pesticide service contract specifies a "preference" for IPM adherence; the successor contract requires adherence to IPM. Right of Way (Trees) contracts: Landscape contractors during FY 2009/2010 were required to adhere to IPM standards. Future contracts will also include "Bay-Friendly" language Parks contracts: A pesticide service contractor controls ground squirrels, moles and gophers controlled through use of a gas toxin. As an alternative, Parks staff is exploring implementation of a pilot program using hawks to control these animals in one large city park. The existing contract will be updated in FY 2010/2011 to include IPM language and performance standards. 			

C.9.e ▶ Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected **OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary: See BASMAA MRP Regional Supplement for POCs and Monitoring Annual Reporting for FY 2009/2010.

C.9.f ▶ Interface with County Agricultural Commissioners

Provide a summary of improper pesticide usage reported to County Agricultural Commissioners and follow-up actions to correct violations, if any. A separate report can be attached as your summary.

Summary: No violations received during the FY 2009/2010 reporting period. The City complied with all Alameda County Agricultural Commission DPR regulations.

C.9.h.ii ▶ Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary: See description of Our Water Our World activities in the Alameda Countywide Clean Water Program FY 2009/10 Report.
See BASMAA FY 2009/10 report on the Our Water Our World program.

In FY2009/2010 Union Sanitary District, under contract with the City of Fremont, participated in the regional "Our Water, Our World" store partnership program for the ninth consecutive year, maintaining four participating stores in Fremont. In addition, staff coordinated several public events and remained a contact for the University of California Cooperative Extension (UCCE) Master Gardener Program.

C.9.h.vi ▶ Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary: See Alameda Countywide Clean Water Program FY 2009/10 Report.

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.i ▶ Short-Term Trash Loading Reduction Plan

(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed in developing a Short-Term Trash Loading Reduction Plan (due February 1, 2012).

Description: No data requirement this reporting period

C.10.a.ii ▶ Baseline Trash Load and Trash Load Reduction Tracking Method

(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed to gather trash loading data and develop a Baseline Trash Load and Trash Load Reduction Tracking Method (due February 1, 2012).

Description: No data requirement this reporting period

C.10.a.iii ▶ Minimum Full Trash Capture

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide a description of actions/tasks initiated/conducted/completed in implementing Minimum Full Trash Capture Devices (due July 1, 2014) within individual jurisdictions. Include information on Full Trash Capture Devices installed under Bay-area Wide Trash Capture Demonstration Project administered by San Francisco Estuary Partnership.

Description: No data requirement this reporting period

C.10.b.iii ▶ Trash Hot Spot Assessment

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide volume of material removed from each Trash Hot Spot cleanup, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources to the extent possible. Provide required photo documentation.

Fill out the following table or attach a summary of the following information.

Trash Hot Spot	Cleanup Date	Volume of Material Removed	Dominant Type of Trash	Trash Sources (where possible)
Crandall Creek (Line K) – 50' east of Deep Creek Rd. and 250' west of Deep Creek Rd. from Culvert		No data requirement this reporting period		
Line B – West of Fremont Blvd. from culvert to 300'				

FY 2009-2010 Annual Report
Permittee Name: City of Fremont

C.10 – Trash Load Reduction

Laguna Creek (Line E) – Northwest of Almond Ave. and Lee St. from culvert north to 300'		No data requirement this reporting period		
Irvington Creek (Line G) – North of Blacow Rd. along Grimmer Blvd. from culvert to 300'				
Laguna Creek (Line E) – 50' south from culvert and 250 north from culvert at Delaware Dr.				
Mission Creek (Line L) – East of Paseo Padre Pky. Opposite of Grimmer Blvd. from culvert to 300' in Central Park				
Tule Ponds South – South side of Walnut Ave. across from the Fremont BART Station				

C.10.d ► Summary of Trash Load Reduction Actions

Provide summary of new trash load reduction actions or increased levels of implementation of existing actions that were implemented after adoption of the MRP (control measures and best management practices) including the types of actions and levels of implementation, and the total trash loads and dominant types of trash removed from each type of action.

Suggested trash load reduction actions to track and report may include:

- Anti-litter Campaigns
- Anti-litter/Dumping Enforcement Activities
- Curbside Recycling Programs Education and Outreach Efforts
- County HHW Program Activities
- Solid Waste Recycling Efforts
- Source Controls/Bans/Prohibitions
- Street Sweeping Activities
- Trash Removal from Receptacles
- Volunteer Creek Cleanups

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Improve motorized street sweeper reliability and efficiency*	July 1, 2009	See note below.	Data not available	Curbside litter
Polystyrene (Styrofoam) ban for all Fremont food vendors**	January 1, 2011	New litter reduction action.	Data unavailable until FY 2010/2011 report	Polystyrene food containers
Seven solar compactors at city parks	August 2008		1,500 lbs./year	Picnic and game snack litter.

*Improve motorized street sweeper reliability and efficiency: Replacement of motorized street sweeping has been adjusted to a five-year replacement cycle to improve equipment reliability and efficiency. Due to FY 2009/2010 fleet replacements, 60% of the City fleet sweeper fleet is now five years old or newer. Planned activities for future years include reaching the 75% level in FY 2010/2011 and 100% by FY 2011/2012.

**As of January 1, 2011, all Fremont food vendors selling food prepared and served in Fremont, must use compostable or recyclable food service ware. Therefore, expanded polystyrene commonly referred to as Styrofoam will no longer be acceptable for take-out food packaging Fremont.

The City of Fremont has a robust trash reduction program implemented prior to the MRP adoption, which activities include: monthly street sweeping, monthly volunteers creek clean ups (see Attachment 6), curbside recycling, and hosting a Household Hazardous Waste drop-off center. These programs continue to provide trash reduction benefits.

Section 11 - Provision C.11 Mercury Controls

C.11.a.i ► Mercury Recycling Efforts

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

The four Alameda County Household Hazards Waste (HHW) facilities recycled 34,458 pounds of mercury-containing fluorescent tube and compact lamps during FY 2008/2009. At Fremont's HHW drop-off facility, a total of 9,132 pounds of mercury-containing fluorescent/compact bulbs and 41 pounds of mercury-containing articles were collected during FY 2009/2010. However for the other three county facilities, no information was available as of the reporting deadline.

Union Sanitary District under contract with the City of Fremont, developed programs to educate the public about mercury contamination, its sources, and actions individuals can take to reduce current amounts of mercury reaching the Bay. One such program is the "Digital for Mercury" exchange program. The City uses public events such as Earth Day to promote this program and collect mercury thermometers. During this reporting period, the City of Fremont collected a total of 44 household thermometers and thermostats that contained mercury.

Mercury (Hg) Pollutant of Concern (POC): Two trainings were conducted for Union Sanitary District staff including 9 Environmental Compliance Inspectors and 4 Administrative and Support Staff. Staff was trained on how to identify mercury during industrial and commercial inspections. Inspectors disseminate Universal Waste Recycling information including a list of alternative drop-off sites for generators of mercury-containing waste items (attachment 11).

C.11.a.ii ► Mercury Collection

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

Amount collected: See above.

- C.11.b ▶ Monitor Methylmercury**
- C.11.c ▶ Pilot Projects to Investigate and Abate Mercury Sources in Drainages**
- C.11.d ▶ Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.11.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.11.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs**
- C.11.g ▶ Monitor Stormwater Mercury Pollutant Loads and Loads Reduced**
- C.11.h ▶ Fate and Transport Study of Mercury In Urban Runoff**
- C.11.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region**
- C.11.j ▶ Develop Allocation Sharing Scheme with Caltrans**

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary: See BASMAA MRP Regional Supplement for POCs and Monitoring Annual Reporting for FY 2009/2010.

Section 12 - Provision C.12 PCBs Controls

C.12.a.i.iii ► Municipal Inspectors Training

(For FY 09-10 Annual Report only) List below or attach description of results of training municipal industrial inspectors to identify, in the course of their existing inspections, PCBs or PCB-containing equipment.

Description: See Alameda Countywide Clean Water Program FY 2009/10 Report.

Polychlorinated Biphenyls (PCB), Pollutant of Concern (POC): Two trainings were conducted for Union Sanitary District staff (9 Environmental Compliance Inspectors and 4 Administrative and Support Staff) that included formal training and discussion of PCB POC identified during industrial and commercial inspections. A formal training included a PowerPoint presentation and discussion of PCBs identified during industrial and commercial inspections. A supplemental inspection form checklist has been developed and will be used for documenting and reporting PCBs identified during industrial and commercial inspections.

See Attachment 12

C.12.a.ii.iii ► Ongoing Training

(For FY 10-11 Annual Report and Each Annual Report Thereafter) List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description: No data requirement this reporting period

- C.12.b ▶ Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities**
- C.12.c ▶ Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations**
- C.12.d ▶ Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.12.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.12.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs**
- C.12.g ▶ Monitor Stormwater PCB Pollutant Loads and Loads Reduced**
- C.12.h ▶ Fate and Transport Study of PCBs In Urban Runoff**
- C.12.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region**

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary: See BASMAA MRP Regional Supplement for POCs and Monitoring Annual Reporting for FY 2009/2010.

Section 13 - Provision C.13 Copper Controls

C.13.a.i and iii ► Legal Authority: Architectural Copper

(For FY 10-11 Annual Report only) Do you have adequate legal authority to prohibit discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs to storm drains?

	Yes		No
--	-----	--	----

If **No**, explain and provide schedule for obtaining authority within 1 year:
 No data requirement this reporting period

C.13.b.i and iii ► Legal Authority: Pools, Spas, and Fountains

(For FY10-11 Annual Report only) Do you have adequate legal authority to prohibit discharges to storm drains from pools, spas, and fountains that contain copper-based chemicals?

	Yes		No
--	-----	--	----

If **No**, explain and provide schedule for obtaining authority within 1 year:
 No data requirement this reporting period

C.13.c ► Vehicle Brake Pads

See BASMAA MRP Regional Supplement for POCs and Monitoring Annual Reporting for FY 2009/2010.

C.13.d.iii ► Industrial Sources Copper Reduction Results

List below or attach annotated lists or tables from your Industrial and Commercial Site Controls portion of this report, that highlight copper reduction results among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed. For FY09-10 describe below or highlight in the C.4 Evaluation portion (if provided) of this report the steps taken to revise your program to meet new data tracking and reporting requirements for implementation levels described in C.13.d.ii.

Summary: The City of Fremont's existing database meets the new MRP tracking and reporting requirements. Inspections of automotive facilities are performed to ensure proper BMPs for brake pad cleaning. Industrial and NOI facilities are inspected annually; metal machine shops, carwashes, and automotive facilities are inspected every 2-3 years as Tier 2 facilities.

Copper (Cu), Pollutant of Concern (POC): Two trainings were conducted for Union Sanitary District staff (9 Environmental Compliance Inspectors and 4 Administrative and Support Staff) that included formal training and discussion of Cu identified during industrial and commercial inspections. Inspectors disseminate Universal Waste Recycling information including a list of alternative drop-off sites for generators of copper-containing waste items.

See Attachment 13

C.13.e ► Studies to Reduce Copper Pollutant Impact Uncertainties

Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."

Summary: See BASMAA MRP Regional Supplement for POCs and Monitoring Annual Reporting for FY 2009/2010.

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

C.14.a ► Control Programs for PBDEs, Legacy Pesticides and Selenium Controls

Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."

Summary: See BASMAA MRP Regional Supplement for POCs and Monitoring Annual Reporting for FY 2009/2010.

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water

Is your agency a water purveyor?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If No , skip to C.15.b.vi.(2):				
If Yes , Complete the attached reporting tables or attach your own table with the same information. Describe program highlights below. For FY 09-10 only, describe steps taken to revise your program to meet new monitoring, data tracking and reporting requirements.				
Summary:				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

<p>Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:</p> <ul style="list-style-type: none"> • Promote conservation programs • Promote outreach for less toxic pest control and landscape management • Promote use of drought tolerant and native vegetation • Promote outreach messages to encourage appropriate watering/irrigation practices • Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.
<p>Summary:</p> <p>City of Fremont maintenance and design staff has implemented the use of native vegetation and drought tolerant plant materials that comply with Bay Friendly guidelines. Examples include restoration of native species of trees, shrubs and grasses along a section of Sabercat Creek. Additionally the City installs slow growing, drought-tolerant plants in City landscaped medians and parks.</p> <p>The City provides pamphlets and brochures to the public and promotes the use of less toxic pest control and landscape management practices. Please refer to Sections C.7.e. and C.9.h.ii for details.</p> <p>The City of Fremont implemented its Illicit Discharge Enforcement Response Plan (ERP) in April 2010. No large volume discharge was reported during FY 2009/2010 reporting period.</p>

C.15.b.iii.(1) ► Planned Discharges of the Potable Water System											
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity ¹ (NTU)	Implemented BMPs & Corrective Actions	
		The Alameda County Water District is the water purveyor for the City of Fremont									

Notes:

¹ Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

C.15.b.iii.(2) ► Unplanned Discharges of the Potable Water System														
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Discharge Duration (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual ² (mg/L)	pH ² (standard units)	Discharge Turbidity (Visual) ² .	Implemented BMPs & Corrective Actions	Time of discharge discovery	Regulatory Agency Notification Time ⁴	Inspector arrival time	Responding crew arrival time
	The Alameda County Water District is the water purveyor for the City of Fremont													

Notes:

1. This table contains all of the unplanned discharges that occurred in this FY.
2. Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges report all of the data collected.
4. Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State Office of Emergency Services is required after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.

Enforcement Response Plan for the Municipal Stormwater Program City of Fremont April 1, 2010

Description and Purpose of Enforcement Response Plan

This enforcement response plan (ERP) provides guidance to City inspection staff in taking consistent enforcement actions needed to achieve effective and timely compliance with the City's stormwater ordinance and other enforcement authorities allowed by the local agency's municipal code. The ERP was developed to comply with the following sections of the municipal regional stormwater permit (MRP):

- Industrial and Commercial Site Controls – ERP (Provision C.4.c);
- Illicit Discharge Detection and Elimination – ERP (Provision C.5.b);
- Construction Site Control – ERP (Provision C.6.b).

As shown in Appendix A, these different MRP sections contain similar, but not identical requirements for developing and implementing an ERP. This ERP outlines the procedures to be followed by City staff when issuing initial & escalating enforcement actions with regard to stormwater violations. This ERP integrates the requirements from these three different MRP provisions into one ERP to facilitate consistent enforcement response within the City.

The selection of an appropriate enforcement action and the escalation of enforcement are based on the seriousness of the violation, the violator's response to the agency's previous attempts to achieve compliance and the past history of the violator. The ERP includes suggested amounts of time to allow for the correction of violations based on the goal stated in the MRP¹. The ERP Enforcement Actions Overview table serves as a minimum standard when selecting the level of enforcement action to be taken against the violator. The nature of a specific violation may require tailoring of the timeframes for correction and/or the use of temporary measures to promptly address a violation before a permanent solution may be implemented. However, due to the circumstances of the violation, a City inspector may initiate an enforcement action(s) at any level he or she feels is warranted and require remedial actions be implemented to the City's satisfaction in a timeframe more stringent than outlined in the Enforcement Actions Overview Table. All enforcement actions are documented in the enforcement document itself (except verbal warnings) or/and in the inspection report for the site or incident. All enforcement actions require closure by either achieving compliance or by referring the violation to the appropriate agency, such as the San Francisco Bay Regional Water Quality Control Board, the Alameda County District Attorney Environmental Crimes Unit or other relevant agencies for additional enforcement. This ERP describes when the City may refer such violations.

The City has authority to enforce municipal stormwater control requirements under the following sections of its municipal code:

Fremont Municipal Code: Title 8, Chapter 11: Storm Water Management & Discharge Control

Fremont Municipal Code: Title 8, Chapter 4: Grading, Erosion & Sediment Control

Fremont Municipal Code: Title 3, Chapter 12: Hazardous Material Management

Fremont Municipal Code: Title 4, Chapter 1: Weed & Waste Abatement

Fremont Municipal Code: Title 4, Chapter 2: Solid Waste Recyclables & Yard Waste Management

¹ The MRP states that violations must be corrected in a timely manner with a goal of correction before the next rain event, but not longer than 10 business days after discovery unless agency staff document reasons why a longer period is needed in the agency's database or equivalent

Types of Enforcement Actions and Their Use

This ERP describes a range of enforcement options available for use to encourage prompt correction of violations and the prevention of conditions that pose a threat to cause future violations. There are administrative and judicial (civil and criminal) remedies in the stormwater ordinance and other parts of the agency's code that provide a range of discretionary options for responding appropriately to a given violation depending on the magnitude of the violation, the duration and history of non-compliance, the good faith efforts of the violator to achieve compliance, and whether the violation may interfere with the agency's compliance with the MRP.

Enforcement Actions Overview

The following table lists and describes available enforcement actions, provides examples of their use, and lists suggested time schedules for compliance.

Enforcement Actions	Use	Examples			Time Schedule to Achieve Compliance
		Industrial/Commercial Business	Illicit Discharge	Construction Site	
Warning Verbal	For <u>threatened violations or minor discharges not entering the storm drain system</u> due to inadequate housekeeping, lack of appropriate BMPs to prevent pollution, or threatened non-stormwater discharges not allowed by the City.	Inappropriate storage of material out-of-doors that may contribute to pollutants in stormwater during rainfall, such as lids on dumpster being left open.	A wash area is present where washwaters may flow to the storm drain system based on the configuration, operational procedures, or evidence of a possible discharge. Overflowing drip pan where the discharge does not reach the storm drain.	Lack of an updated erosion control plan that reflects current conditions at a construction site. Minor maintenance issues with BMPs	Before the next rainfall event, but not longer than 10 business days, unless more timely compliance is feasible or other exceptions apply.

Enforcement Actions² Overview (continued)

Enforcement Actions	Use	Examples			Time Schedule to Achieve Compliance
		Industrial/Commercial Business	Illicit Discharge	Construction Site	
Warning Letter	Issue for <u>minor violations</u> or if the response to a verbal warning is inadequate. A written warning may also be issued if there are numerous minor violation that the inspector feels need to be documented. The Warning Letter shall list all violations, specify required corrective actions and provide a timeline for compliance.	Use of best management practices that are almost effective, but do not achieve the maximum extent practicable standard, for the pollutant generating activity they are intended to control.	A non-stormwater discharge that is not specifically allowed by the City, but might be if adequate documentation and procedures had been followed to verify the adequate control of pollutants and obtain necessary approvals.	Not issued for construction sites	Before the next rainfall event, but not longer than 10 business days, unless more timely compliance is feasible or other exceptions apply.
Notice of Violation	Issue for <u>major violations</u> or if the response to written warning is inadequate. The Notice of Violation shall list all violations, specify required corrective actions and provide a timeline for compliance.	Use of best management practices that are ineffective for the pollutant generating activity they are intended to control.	Discharge of non-stormwater discharges that contain soap or other pollutants.	Not issued for construction sites	Before the next rainfall event, but not longer than 10 business days, unless more timely compliance is feasible or other exceptions apply. If more time is needed than provided above an explanation of why this is need shall be documented. Illicit discharges shall be terminated immediately. However, a long-term remedies may be required

Enforcement Actions² Overview (continued)

Enforcement Actions	Use	Examples			Time Schedule to Achieve Compliance
		Industrial/Commercial Business	Illicit Discharge	Construction Site	
Notice to Comply	Issue for <u>major violations</u> or if the response to a verbal warning is inadequate. The Notice to Comply shall list all violations, specify required corrective actions and provide a timeline for compliance.	Not issued during industrial/commercial business inspections	Discharge of non-stormwater discharges that contain soil, landscape material, soap or other pollutants found on the construction site.	Lack of having a copy of the Stormwater Pollution Prevention Plan at the construction site. Inadequate use of BMPs to control sediment runoff from a construction site.	Before the next rainfall event, but not longer than 10 business days, unless more timely compliance is feasible or other exceptions apply. If more time is needed than provided above an explanation of why this is need shall be documented. All illicit discharges shall be terminated immediately. However, a long-term remedies may be required

Enforcement Actions² Overview (continued)

Enforcement Actions	Use	Examples			Time Schedule to Achieve Compliance
		Industrial/Commercial Business	Illicit Discharge	Construction Site	
Administrative Citations	Pursue for serious violations, lack of compliance to pervious enforcement actions or intentional non-compliance actions and repeated violations	Use of best management practices that are ineffective for the pollutant generating activity they are intended to control.	Illicit discharge of hazardous materials of wastes. Intentional illicit discharges	Inadequate use of BMPs to control sediment runoff from a construction site.	Before the next rainfall event, but not longer than 10 business days, unless more timely compliance is feasible or other exceptions apply. If more time is needed than provided above an explanation of why this is need shall be documented. All illicit discharges shall be terminated immediately. However, a long-term remedies may be required If compliance is not achieved, increasing dollar amounts shall be issued in the form of additional citations. A stop work order may be issued for construction sites and violations may be referred to the RWQCB, Fish & Game, DTSC or the county D.A.

Enforcement Actions² Overview (continued)

Enforcement Actions	Use	Examples			Time Schedule to Achieve Compliance
		Industrial/Commercial Business	Illicit Discharge	Construction Site	
Stop Work Order	Pursue for the most serious violations including where the response to the notice to comply is inadequate. Also issued for repeated serious violations	Not issued during industrial/commercial business inspections	Excessive sediment discharge for a construction site. Discharge of hazardous materials or wastes from the site.	No erosion control material either installed or on-site by October 1 st of each year. Lack of compliance with previous enforcement orders	The time schedule for compliance will need to be determined based on case-specific information. This information will be documented as required by the MRP.
Legal Action	Pursue for the most serious violations including where the response to previous enforcement actions is inadequate. These types of violations are referred to city attorney or County District Attorney for civil and criminal prosecution.	Lack of use of best management practices for pollutant generating activity, such as storing wastes in a way that allows pollutants to be mobilized by rainfall and stormwater runoff.	Discharge of hazardous materials of wastes to the City's storm drain system or watercourse	Violations that affect the agency's ability to comply with the MRP's requirements.	The time schedule for compliance will need to be determined based on case-specific information. This information will be documented as required by the MRP.

Escalation of Enforcement Actions

This ERP incorporates a progressive enforcement response policy that is designed to maintain a fair and equitable system for enforcement to ensure that enforcement actions are proportionate to the violations, to provide maximum flexibility and effectiveness of enforcement actions, and to provide a system of escalating enforcement actions to encourage prompt compliance. The stormwater ordinance and other municipal codes allow for a degree of enforcement flexibility and a range of enforcement options that are needed to most efficiently gain compliance. An enforcement action may be upgraded or escalated depending on the circumstances of the case. However, due to the circumstances of the violation, a City inspector may initiate an enforcement action(s) at any level he or she feels is warranted and require remedial actions be implemented to the City's satisfaction in a timeframe more stringent than outlined in the Enforcement Actions Overview Table.

Escalation enforcement action can be triggered by the following:

- Failure to correct the violation within the time frame required.
- Failure to remediate the violation to the City's satisfaction.
- Additional violations at the same site
- Seriousness of the violation. Example: An intentional discharge of non storm water to the storm drain system may result in an Administrative Citation instead of a verbal warning or notice of violation.
- Continued non-compliance.
- Past history of non compliance or responses to pervious violations.

The City may also use other city departments such as Fire, Engineering and Code Enforcement to issued additional enforcement actions based on their specific municipal codes as applied to a storm water violation.

The City may refer some storm water violations to the appropriate agency, such as the San Francisco Bay Regional Water Quality Control Board, the Alameda County District Attorney's Office of Consumer & Environmental Protection or other relevant agencies for additional or escalating enforcement pursue for the most serious violations including where the response to previous enforcement is inadequate.

Remedial/Cleanup Costs and Recovery

Remedial or clean-up actions are required by any enforcement action when applicable, such as an illicit discharge. The burden of any remedial action is that of the violator, or property owner if the violator can not be identified. As part of the enforcement action, the City can implement any of the following scenarios:

- Requiring the violator or property owner to remediate the situation themselves, if capable and if the remedial action does not pose an undo health & safety risk or have them contract with a professional company to provide the remedial service.
- The City will use city crews to provide the remedial action and recover the costs from the violator or property owner.
- The City will employ a profession company or Union Sanitary District to provide the remediation and recover the costs from the violator or property owner.

Roles and Responsibilities

The Environmental Services Department is the lead city department responsible for compliance with the MRP. Enforcement responsibilities overlap with other city departments and Union Sanitary District. The City has contracted with Union Sanitary District to provide commercial and industrial inspections, respond to illicit discharges and act as a back-up to erosion and sediment discharge violations. The following is a breakdown of the departments and personnel that can issue enforcement actions and their respective enforcement responsibilities.

Environmental Services:

- Environmental Specialist
Commercial, Industrial & Residential Illicit Discharges and Illegal Dumping – Verbal Warning, Warning Letter, Notice of Violation, Administrative Citations (which can escalate) and may refer to the appropriate agency such as the RWQCB, California Department of Fish & Game or the Alameda County District Attorney Environmental Crimes Unit.

Construction Site Controls – Verbal Warning, Notice to Comply, Administrative Citations (which can escalate), Stop Work Order and may refer to the appropriate agency such as the RWQCB, California Department of Fish & Game or the Alameda County District Attorney Environmental Crimes Unit.

Engineering:

- Construction Inspector
Construction Site Controls – Verbal Warning, Notice to Comply may refer to the Environmental Services for escalating enforcement actions.
- City Engineer
Construction Site Controls – Stop Work Order may refer to the Environmental Services for escalating enforcement actions.

Building:

- Building Inspector
Construction Site Controls – Verbal Warning, Notice to Comply may refer to the Environmental Services for escalating enforcement actions.

Code Enforcement:

- Code Enforcement Officer
Commercial, Industrial & Residential Illicit Discharges and Illegal Dumping – Verbal Warning, Notice of Violation, Administrative Citations (which can escalate) and may refer to Environmental Services.

Fire Department – HazMat Division:

Attachment 2

- HazMat Inspector & Program Manager
Commercial, Industrial & Residential Potential and Illicit Discharges – Verbal Warning, Notice of Violation, Administrative Citations (which can escalate) and may refer to Environmental Services or the appropriate agency such as the RWQCB, California Department of Fish & Game or the Alameda County District Attorney Environmental Crimes Unit.

Unions Sanitary District:

- Environmental Compliance Inspector
Commercial, Industrial & Residential Potential and Illicit Discharges – Verbal Warning, Warning Letter, Notice of Violation, Administrative Citations (which can escalate) and may refer to Environmental Services or the appropriate agency such as the RWQCB, California Department of Fish & Game or the Alameda County District Attorney Environmental Crimes Unit.

Construction Site Controls – Verbal Warning, Notice to Comply, Administrative Citations (which can escalate) and may refer to Environmental Services or the appropriate agency such as the RWQCB, California Department of Fish & Game or the Alameda County District Attorney Environmental Crimes Unit.

Joint Compliance Inspections

In some situations it is appropriate to have joint compliance inspections with other agencies because the nature of the violation or because the violations are ongoing or repeated violations and may benefit from the enforcement options provided by other environmental statutes. Using the results of a joint compliance inspection, the regulatory agencies will be able to decide how to most efficiently achieve compliance. The decision to conduct a joint inspection with other agencies is determined by the inspector or manager of Environmental Services and is based on whether this will result in accelerated compliance with all violations being achieved and/or to have the referred agency initiate escalating enforcement actions of their own based on the joint inspection. Such inspections are reserved for sites which have serious violations such as the following:

- Serious or large illicit discharges to the storm drain or water bodies which may contain, but not limited to the following: Both hazardous and non hazardous materials/wastes, sediment, cement, slurries, sewage, etc.
- Non compliance with construction or industrial NOI requirements or individual NPDES permit requirements..
- Non compliance with construction BMPs.
- Repeated illicit discharges or other violations.
- Refusal by the violator to comply with any enforcement actions taken by the City.

Referral to Other Agencies

When the City's escalating enforcement actions prove to be inadequate, the violator can be referred to other agencies such as the Regional Water Control Board, the Alameda County District Attorney Environmental Crimes Unit, California Department of Fish & Game or other relevant agencies for additional enforcement. The City may possibly refer violators to the U.S. Environmental Protection Agency, if the Regional Water Board staff is unable to provide effective assistance. Referrals to other agencies shall be originate from either Environmental Services staff or Union Sanitary District, which performs Commercial/Industrial and illicit discharge inspections and enforcement. Such referrals are reserved for sites or incidents which have serious violations such as the following:

- Serious or large illicit discharges to the storm drain or water bodies which may contain, but not limited to the following: Both hazardous and non hazardous materials/wastes, sediment, cement, slurries, sewage, etc.
- Non compliance with construction or industrial NOI requirements or individual NPDES permit requirements.
- Non compliance with construction BMPs.
- Repeated illicit discharges or other violations.
- Refusal by the violator to comply with any enforcement actions taken by the City.

The City has referred both commercial/Industrial, construction sites and illicit discharges the RWQCB, California Department of Fish & Game and the Alameda County District Attorney Environmental Crimes Unit in the past and will continue to do so if additional escalating enforcement is required to achieve compliance.

This appendix should be deleted if your agency does not want to have one combined ERP that meets all of the MRP's ERP requirements.

Appendix A

Comparison of Municipal Regional Stormwater Permit's Enforcement Response Plan Requirements

Task Description	Provision C.4 Industrial/Commercial	Provision C.5 Illicit Discharge Detection/Elimination	Provision C.6 – Construction Site Control
Overall Description	Develop and implement ERP that serves as <u>inspection staff's</u> reference document to take <u>consistent actions to achieve timely and effective</u> compliance.	Develop and implement an ERP that will serve as guidance for <u>inspection staff</u> to take <u>consistent actions to achieve timely and effective</u> abatement of illicit discharges.	Develop and implement ERP that serves as <u>inspection staff's</u> reference document to take <u>consistent actions to achieve timely and effective</u> compliance. {identical to Prov. C.4)
Required Enforcement Actions/Recommended Responses	Include <u>timeframes</u> for correction of various <u>field violation</u> scenarios and <u>provide guidance</u> on appropriate use of various <u>enforcement tools</u> , such as verbal and written notices, <u>citations</u> , <u>cleanup</u> requirements, <u>administrative</u> and <u>criminal penalties</u> .	Include <u>timeframes</u> for correction of various types and degree of <u>violations</u> . ERP will <u>provide guidelines</u> on when to employ the range of <u>regulatory responses</u> from warnings, <u>citations</u> and <u>cleanup</u> and cost recovery, to <u>administrative</u> or <u>criminal penalties</u> .	Include <u>timeframes</u> for correction of problems for various <u>field violation</u> scenarios.
Timely Correction of Violations	States <u>violations</u> as a <u>goal</u> should be <u>corrected before the next rain event</u> , but <u>no longer than 10 business days</u> after discovery <u>unless reasons are recorded in Permittee's database or equivalent</u> . Include appropriate time periods for each level of corrective action. Describe permittee's procedures for follow up inspections, enforcement actions, and referral to another agency.	<u>Goal of correcting violations before the next rain event but not longer than 10 business days</u> after discovery <u>unless rationale is recorded in database or equivalent</u> . Immediate correction can be temporary and short-term if a long-term, permanent correction will involve significant resources and construction time. An example of replumbing a wash area is described.	All violations must be corrected in a timely manner with <u>goal of correcting them before the next rain event but no longer than 10 business days</u> after the violations are <u>discovered</u> . If more than 10 business days are required for compliance, a <u>rationale</u> shall be <u>recorded in database or equivalent</u> .
Escalation of Enforcement/Referrals	Enforce stormwater ordinances as necessary to achieve compliance. Where enforcement tools are inadequate, <u>refer</u> the case to the Water Board, district attorney or <u>other relevant agencies</u> for additional enforcement.	If corrective actions are not implemented promptly or if there are repeat violations, permittees shall <u>escalate responses</u> as needed to achieve compliance, including <u>referral to other agencies</u> where	Take <u>progressively stricter responses</u> to achieve compliance. ERP shall include structures for progressively stricter responses & various violation scenarios that evoke progressively stricter responses, such as a stop work order.

Attachment 2

Task Description	Provision C.4 Industrial/Commercial	Provision C.5 Illicit Discharge Detection/Elimination	Provision C.6 – Construction Site Control
Recordkeeping	Maintain adequate records to demonstrate compliance and appropriate follow-up enforcement responses. Lists specific information that should be tracked regarding business inspections; list includes type of enforcement and problem resolution.	necessary. All incidents or discharges reported to the complaint/spill system that might pose a threat to water quality shall be logged to track follow up and response through problem resolution. Data collected shall be sufficient to demonstrate escalating responses to repeated problems, and inter/intra-agency coordination, where appropriate. Specific spill and discharge complaint tracking information requirements are listed in Provision C.5.f.ii.	Specific information required for each inspection and problems found and resolved is listed in Provision C.6.e.ii.(4).
Reporting	Lists information for inclusion in the annual report including number and percent of violations resolved within 10 working days or otherwise resolved in a longer but still timely manner. Frequency and types/categories of violations observed. Frequency and type of enforcement. Summary of types of violations by business category.	Number of discharges reported; number of discharges reaching storm drains and/or receiving waters; number and percentage of discharges resolved in a timely manner; and summary of major types of discharges and complaints.	Reporting of inspection results is required in Provision C.6.e.iii. Agencies must report the number and percentage of each type of enforcement action listed in its ERP.

	ADMINISTRATIVE REGULATIONS	NUMBER 6.7	PAGE OF 1 6
SUBJECT INTEGRATED PEST MANAGEMENT		APPROVED BY Fred Diaz, City Manager	SUPERSEDES New EFFECTIVE DATE April 28, 2006
<p>I. <u>PURPOSE</u></p> <p>This Administrative Regulation sets forth the guiding principles for development and implementation of Integrated Pest Management (IPM) practices on all City properties.</p> <p>II. <u>OBJECTIVES</u></p> <p>A. Reduce or minimize pesticide use on City properties to ensure the City maintains compliance with National Pollutant Discharge Elimination System (NPDES) permit requirements.</p> <p>B. Reduce the use of broad spectrum pesticides when feasible.</p> <p>C. Create awareness among City staff of less-toxic pest management techniques.</p> <p>D. Educate all City departments to practice the most appropriate approach to managing pests on City properties, including prevention.</p> <p>E. Reduce the adverse impacts to water quality (both in local creeks and the San Francisco Bay) due to pesticide usage, particularly from copper-based and organophosphate and pyrethroid pesticides.</p> <p>III. <u>ORGANIZATIONS AFFECTED</u></p> <p>A. Environmental Services B. Building Maintenance C. Parks and Recreation D. Purchasing</p> <p>IV. <u>POLICY</u></p> <p>It is the policy of the City of Fremont to:</p> <p>A. Comply with Federal requirements for local government to develop and implement an Integrated Pest Management policy, procedure or ordinance to address urban stream impairment by pesticides, per Section C.10.c.i of the National Pollutant Discharge Elimination System (NPDES) permit, Order No. R2-2003-0021, from the California Regional Water Quality Control Board, as updated 2/19/03.</p> <p>B. Adopt and implement a policy requiring the minimization of pesticide use and the use of Integrated Pest Management techniques in the co-permittee's operations, as required by co-permittees of the Alameda Countywide Clean Water Program.</p> <p>C. Support the City of Fremont Municipal Code, Ordinance No. 2012, by describing procedures by which the City may implement its policy regarding urban runoff.</p> <p>This Administrative Regulation shall not be construed as requiring a department, purchaser or contractor to procure products that do not perform adequately for their intended use, exclude adequate competition, risk the health or safety of workers and citizens, or are not available at a reasonable price in a reasonable period of time.</p>			

CITY OF FREMONT ADMINISTRATIVE REGULATIONS	NUMBER 6.7	PAGE OF 2 6
<p>This Administrative Regulation shall not be construed as requiring the City of Fremont, a department, purchaser or contractor to take any action that conflicts with local, state or federal requirements.</p>		
<p>V. <u>DEFINITIONS</u></p>		
5.1	<p><u>Biological control</u> - The use of biological technologies to manage unwanted pests. Examples of this type of control include, but are not limited to, the use of pheromone traps or beneficial insect release for control of certain types of weeds or invasive insects in landscapes.</p>	
5.2	<p><u>Cultural control</u> - The use of IPM control methods such as grazing, re-vegetation, disking, mulching, proper irrigation, seeding, and landscaping with competitive or tolerant species to manage unwanted weeds, rodents or plant diseases, plus good housekeeping.</p>	
5.3	<p><u>DPR</u> - Department of Pesticide Regulations for the State of California's Environmental Protection Agency. DPR, in partnership with the Federal Environmental Protection Agency (EPA) and the County Department of Agriculture, oversees all issues regarding the registration, licensing and enforcement of laws and regulations pertaining to pesticides.</p>	
5.5	<p><u>Integrated Pest Management (IPM)</u> - IPM is the strategic approach that focuses on long-term prevention of pests and their damage from reaching unacceptable levels by selecting and applying the most appropriate combination of available pest control methods. These include cultural, mechanical, biological and chemical technologies that are implemented for a given site and pest situation in ways that minimize economic, health and environmental risks.</p>	
5.6	<p><u>Mechanical controls</u> - The use of IPM control methods utilizing hand labor or equipment such as mowers, graders, weed-eaters, and chainsaws. Crack and crevice sealants and closing small entryways (i.e., around pipes and conduits) into buildings for insect and rodent management are also mechanical controls.</p>	
5.7	<p><u>PCA</u> - Pest Control Advisor is one licensed by the California Department of Pesticide Regulations according to Title 3, Article 5 of the California Code of Regulations. A licensed PCA, who is registered with the County Agricultural Commissioner, provides written pest control recommendations for agricultural pest management, including parks, cemeteries, and rights-of-way.</p>	
5.8	<p><u>Pesticides</u> - Defined in Section 12753 of the California Food and Agricultural Code as any spray adjuvant, or any substance, or mixture of substances intended to be used for defoliating plants, regulating plant growth, or for preventing, destroying, repelling, or mitigating any pest, as defined in Section 12754.5 (of the Food and Agricultural Code), which may infest or be detrimental to vegetation, man, animals or households, or be present in any agricultural or nonagricultural environment whatsoever. <u>The term pesticide applies to herbicides, insecticides, fungicides, rodenticides and other substances used to control pests.</u> Antimicrobial agents are not included in this definition of pesticides</p>	
5.9	<p><u>QAL</u> - Qualified Applicator License is a licensed applicator according to Title 3, Article 3 of the California Code of Regulations. This license allows supervision of applications that may include residential, industrial, institutional, landscape, or rights-of-way sites.</p>	
5.10	<p><u>QAC</u> - Qualified Applicator Certificate is a certified applicator of pesticides according to Title 3, Article 3 of the California Code of Regulations. This certificate allows supervision of applications that may include residential, industrial, landscape, or rights-of-way sites.</p>	
5.11	<p><u>Structural Pest Control Operator (SPCO- Branch I, II or III)</u> - A licensed applicator for controlling pests that invade buildings and homes according to the requirements of the Structural Pest Control Board of the California Department of Consumer Affairs.</p>	

CITY OF FREMONT ADMINISTRATIVE REGULATIONS	NUMBER 6.7	PAGE OF 3 6
<p>VI. <u>RESPONSIBILITY</u></p> <p>6.1 The Transportation and Operations Director and the Deputy City Manager, or their designees, shall coordinate implementation of this Administrative Regulation.</p> <p>6.2 Training</p> <p>6.2.1 City employees involved with pesticide applications as a normal part of their job duties and pest management contractors hired by the City will be trained as required by State of California Department of Pesticide Regulations rules, the County Agricultural Commissioner, and/or the Structural Pest Control Board and the City’s NPDES permit.</p> <p>6.2.2 City Staff responsible for pest management on City property will provide annual training to all employees who apply pesticides as a normal part of their job duties on:</p> <ol style="list-style-type: none"> 1. Pesticide Safety, 2. The City’s IPM Administrative Regulation and 3. Appropriate Best Management Practices and Integrated Pest Management Technologies supported by the Alameda Countywide Clean Water Program <p>6.2.3 Pest Control Advisors and Applicators, pest management contractors, and other “contract for service providers” serving City-owned properties will be licensed by the State of California Department of Pesticide Regulations (DPR) as a Pest Control Advisor or licensed Qualified Applicator.</p> <p>6.3 Public Education and Outreach</p> <p>6.3.1 The Environmental Services Division’s Stormwater Program, in participation with the Alameda Countywide Clean Water Program, will continue with its existing program to encourage people who live, work, and/or attend school in Fremont to:</p> <ol style="list-style-type: none"> 1. Obtain information on IPM techniques to control pests and minimize pesticide use 2. Use IPM technologies for dealing with pest problems 3. Perform pesticide applications according to the manufacturer’s instructions as detailed on the product label, and in accordance with all applicable state and local laws and regulations set forth to protect the environment, the public, and the applicator; and properly dispose of unused pesticides and their containers. <p>6.3.2 City of Fremont property leaseholders will be informed of the City’s IPM Administrative Regulation and encouraged to use the most current IPM technologies and Best Management Practices.</p> <p>6.4 Program Evaluation</p> <p>6.4.1 The Environmental Services Division shall periodically evaluate the success of this Administrative Regulation implementation by providing a report to the Transportation and Operations Director and other divisions affected by the Administrative Regulation. This report shall relate progress in meeting the objectives of this Administrative Regulation, and note barriers encountered, recommendations for resolution, cost analysis, and a description of assistance needed to continuously improve staff’s ability to meet the Administrative Regulation objectives.</p> <p>6.5 Reporting Requirements</p> <p>The information outlined below is reported as a part of the City’s NPDES Stormwater Permit Annual Report compiled by the Environmental Services Division’s Stormwater Program. Each City department,</p>		

CITY OF FREMONT ADMINISTRATIVE REGULATIONS	NUMBER 6.7	PAGE OF 4 6
--	---------------	----------------

pest management contractor, and/or other appropriately licensed contractors employed by the City to provide city services that involve pesticide application on City-owned properties shall submit by **July 15th** to the Environmental Services Division Manager:

A. Annual Storage / Inventory Report - due July 15 of each fiscal year

City staff will report on inventory stored on city-owned properties.

Completed form should list:

1. Product name
2. Pesticide type (i.e. Pyrethoid, Carbamate, organophosphate, etc.)
3. Quantity on hand (as of June 30)
4. Pesticides that are no longer legal or appropriate for applications per Federal, State, County, or City requirements.

B. Annual Pesticide Use Summary Report - due July 15 of each fiscal year

Required by City staff and contractors.

Completed reports for each service site should list:

1. Manufacturer and product name
2. Pesticide type (i.e. Pyrethoid, Carbamate, organophosphate, etc.)
3. The total quantity of each pesticide used during the prior fiscal year (from July 1 to June 30) in order to provide an accounting of pesticide use at City-owned properties.

Annual Storage /Inventory Report and Annual Pesticide Use Summary Report Forms may be obtained by contacting the Environmental Services Division at 510-494-4570.

VII. PROCEDURE

7.1 Pesticide Prevention

- 7.1.1 The City of Fremont shall institute practices that reduce pesticides and result in the purchase of fewer pesticides whenever practicable and cost-effective, but without reducing safety or workplace quality.
- 7.1.2 The City of Fremont shall instruct all employees to implement Good Housekeeping Practices in their workstations, vehicles, break rooms, etc., to prevent the conditions that provide a food source and habitat which attract unwanted pests

7.2 Pest Control and Management

- 7.2.1 The City of Fremont, including all departments and staff herein, and contractors or individuals (QAL, QAC, SPCO) providing pest control services on City property (Applicators) shall follow the City's Integrated Pest Management Administrative Regulation and utilize generally accepted Best Management Practices (BMPs) to the maximum extent practicable for the control or management of pests in and around City buildings and facilities, parks and golf courses, urban landscape areas, rights-of-way, and other City properties.
- 7.2.2 Applicators will use the most current IPM technologies available to ensure the long-term prevention or suppression of pest problems and to minimize negative impacts on the environment, non-target organisms, and human health.
- 7.2.3 Applicators will consider the options or alternatives listed below in the following order, before recommending the use of or applying any pesticide on City property:

CITY OF FREMONT ADMINISTRATIVE REGULATIONS	NUMBER 6.7	PAGE OF 5 6
<ol style="list-style-type: none"> 1. No controls (e.g., tolerating the pest infestation, use of resistant plant varieties or allowing normal life cycle of weeds) 2. Physical or mechanical controls (e.g., hand labor, mowing, exclusion) 3. Cultural controls (e.g., mulching, disking, alternative vegetation), good housekeeping (e.g. cleaning desk area) 4. Biological controls (e.g., natural enemies or predators) 5. Reduced-risk chemical controls (e.g., soaps or oils) 6. Other chemical controls 		
<p>7.3 Pesticide Application</p>		
<p>7.3.1 Only City of Fremont employees or appropriate licensed contractors employed by the City who are authorized and trained in pesticide application (i.e., hold PCA, QAL, QAC, or Structural Branch Operator I, II, or III certifications/licenses or individuals working under the supervision of one of the aforementioned certificate/license holders) may apply pesticides to or within City property.</p>		
<p>7.3.2 City of Fremont employees are not to apply privately purchased pesticides. If there are no less-toxic products on hand, employees shall contact Building Maintenance to be given approved less-toxic pesticides (i.e. Orange Guard, insecticidal soap).</p>		
<p>7.3.3 When recommending pesticides for use or applying pesticides, Applicators will select and apply IPM methods that will have the least impact on water quality, human health and the environment, yet are still effective.</p>		
<p>7.3.4 Notification: Employees shall be notified prior to pesticide application, particularly when pesticide application occurs within a building.</p>		
<p>7.3.5 New contracts that are entered into with pest management contractors and other appropriately licensed contractors employed to provide services that involve pesticide application at City properties after June 1, 2006 will include requirements that the contractors follow the requirements of the City's IPM Administrative Regulation and implement the most current IPM technologies and Best Management Practices.</p>		
<p>7.4 Restricted Chemicals</p>		
<p>7.4.1 City of Fremont employees and/or contractors employed by the City who are trained to recommend or apply pesticides will <u>not</u> use or promote the use of:</p>		
<ol style="list-style-type: none"> 1. Acute Toxicity Category I chemicals as identified by the Environmental Protection Agency (EPA), 2. Organophosphate pesticides (e.g., those containing Diazinon and chlorpyrifos) 3. Copper-based pesticides unless: <ol style="list-style-type: none"> a. Their use is judicious, b. Other approaches and techniques have been considered, and; c. Adverse water-quality impacts are minimized to the maximum extent practicable. 		
<p>7.4.2 Applicators will always avoid applications of pesticides that directly contact water, unless the pesticide is registered under Federal and California law for aquatic use.</p>		
<p>7.4.3 Pesticides that are not approved for aquatic use will not be applied to areas immediately adjacent to water bodies where through drift, drainage, or erosion, there is a reasonable possibility of a pesticide being transported into surface water.</p>		
<p>7.4.4 Discharges of pollutants from the use of aquatic pesticides to the waters of the United States require</p>		

CITY OF FREMONT ADMINISTRATIVE REGULATIONS	NUMBER 6.7	PAGE OF 6 6
<p>coverage under a NPDES permit. Those City employees or appropriately licensed contractors employed by the City who apply pesticides directly to waters of the United States will obtain a NPDES permit from the California State Water Quality Resources Control Board Region 2, prior to making any pesticide applications.</p>		
<p>7.5 Best Management Practices (BMPs)</p>		
<p>7.5.1 This section includes BMPs and control measures to protect water quality during the use of pesticides, when it is determined through an IPM process that pesticides must be used.</p>		
<ol style="list-style-type: none"> 1. Follow all federal, state, and local laws and regulations governing the use, storage, and disposal of pesticides and training of pest control advisors and applicators. 2. Use the least toxic pesticides that will do the job, provided there is a choice. The agency will take into consideration the LD₅₀, overall risk to the applicator, and impact to the environment (chronic and acute effects). 3. Apply pesticides at the appropriate time to maximize their effectiveness and minimize the likelihood of discharging pesticides in stormwater runoff. Avoid application of pesticides if rain is expected (this does not apply to the use of pre-emergent herbicide applications when required by the label for optimal results.) 4. Employ techniques to minimize off-target application (i.e. spray drift) of pesticides, including consideration of alternative application techniques. For example, when spraying is required, increase drop size, lower application pressure, use surfactants and adjuvants, use wick application, etc. 5. Apply pesticides only when wind speeds are low. 6. Mix and apply only as much material as is necessary for treatment. Calibrate application equipment prior to and during use to ensure desired application rate. 7. Do not mix or load pesticides in application equipment adjacent to a storm drain inlet, culvert, or watercourse. 8. Irrigate slowly to prevent runoff, and do not over-water.

SCOPE OF SERVICES

Note for FY 2009/2010 NPDES
Annual Report:
Please refer to Section 3 for example
of contract language requiring IPM

1 GENERAL INFORMATION

1.1 General Scope of Work

This work shall include all supervisors, labor, materials, equipment, tools, supplies and services to maintain in a superior condition all landscape areas, irrigation and drainage systems and other related work at the City’s Fire Stations. All work shall be performed in a workmanlike manner, using quality equipment, and Bay-Friendly methods and materials.

1.2 Sites Included

FIRE STATION LOCATIONS (work to start 1st week of August, 2009)

Fire Station 1	4200 Mowry Avenue, Fremont CA 94538
Fire Station 2*	37645 2 nd Street, Fremont CA 94536 (current station) *37299 Niles Blvd, Fremont, CA 94536 (under construction)
Fire Station 3**	40700 Chapel Way Fremont CA 94538
Fire Station 4	1000 Pine Street, Fremont CA 94539
Fire Station 5	55 Hackamore Lane, Fremont Ca 94539
Fire Station 6*	4355 Central Avenue, Fremont CA 94536
Fire Station 7	43600 S. Grimmer Blvd. Fremont CA 94538
Fire Station 8*	35659 Fremont Blvd. Fremont CA 94536
Fire Station 9	39609 Stevenson Place, Fremont CA 94539
Fire Station 10	5001 Deep Creek Rd. Fremont CA 94555
Fire Station 11*	47200 Lakeview Blvd. Fremont CA 94538

* Fire Stations #2, #6, #8, and #11, all have on-site stormwater treatment measures which require special maintenance consideration. In the General Minimum Specifications, refer to Section 3.1, Stormwater Treatment Measures, for more information.

*** Stations #2 and #11 are in progress. Contractor has submitted monthly maintenance cost. Monthly maintenance will commence once work is complete and accepted.**

** Station #3 is currently undergoing renovations. Contractor will provide a monthly maintenance cost once renovations are complete and accepted.

2 GENERAL REQUIREMENTS

2.1 CONTRACTOR REQUIREMENTS

Provide verification of the following qualifications:

- a. Contractor must have a valid California **C-27** Landscaping Contractor’s license authorized by the State of California.

Subject: Fire Station Landscape Maintenance

**Bid#10-015
EXHIBIT 'A'**

- b. Contractor must possess a California Chemical Applicator’s License or Qualified Applicator’s Certificate (QAC) for the control of weeds, plant diseases and other pests, and must have at least one employee trained in the use of such methods assigned to the project.
- c. Contractor must have assigned to the project at least one employee who has successfully completed the ‘Pollution Prevention Training & Certification Program For Surface Cleaners’ issued by the Bay Area Storm Water Management Agencies Association (BASMAA) <http://www.basmaa.org/recognition/> All work shall conform to BASMAA standards. **Certification may be acquired through the website provided. Contractor will have up to six (6) months to attain certification.** BASMAA certification number: _____
- d. Contractor must have assigned to the project at least one employee who shall follow Bay –Friendly Landscaping practices.
- e. It is preferred that the Contractor have on staff at least one employee who is a Certified Irrigation Contractor (Irrigation Association).
- f. It is preferred that the Contractor have on staff at least one employee who is a Certified Arborist or Certified Tree Worker (International Society of Arboriculture).
- g. It is preferred that the Contractor have on staff at least one employee who has experience or training in Integrated Pest Management (IPM) techniques.

2.2 COMPLIANCE WITH LAWS, ORDINANCES AND POLICIES

- a. All services rendered shall be provided in accordance with all ordinances, resolutions, statutes, rules, laws and regulations of the City of Fremont, and any Federal, State , or local governmental agency having jurisdiction in effect at the time service is provided.
- b. Contractor must adhere to City’s Administrative Regulation 3.10: Environmental Purchasing Policy. A copy may be obtained at Fremont.gov (type in “AR 6.7” into search bar, then click on the first reference. **(Document attached)**)
- c. Contractor must adhere to City’s Administrative Regulation 6.7: Integrated Pest Management. A copy may be obtained at Fremont.gov (type in “AR 6.7” into search bar, then click on the first reference. **(Document Attached)**)

2.3 WORK REQUIREMENTS

- a. Work Schedule. The Contractor shall conduct all operations during the hours of 8:00 a.m. to 5:00 p.m. Monday through Friday, unless otherwise approved by the Urban Landscape Supervisor. The Contractor may not work on any Federal, State, or local holidays.
- b. A proposed schedule shall be prepared by the Contractor and presented to the Urban Landscape Supervisor for approval.
- c. The Urban Landscape Supervisor shall have the authority to suspend the work wholly or in part, for such period as she may deem necessary due to unsuitable weather. Payment shall be prorated accordingly.

Subject: Fire Station Landscape Maintenance

**Bid#10-015
EXHIBIT 'A'**

2.4 PROTECTION OF EXISTING PROPERTY

- a. Contractor must protect all existing plant material, site improvements, structures, facilities, utilities, stormwater treatment measures, and natural areas from damage, both above and below ground. Any damages shall be reported immediately to the Urban Landscape Supervisor. Any damages caused by the Contractor shall be corrected and/or paid for by the Contractor at no cost to City. This requirement is not to be construed as requiring the Contractor to replace plants or entire lawns due to conditions totally beyond his/her control when work is performed in accordance with approved practices.

2.5 SAFETY

- a. Any unsafe condition at the Fire Station sites shall be reported immediately to the Captain on duty at the station. If the unsafe condition warrants any further escalation, the company officer can call his/her supervisor, the Battalion Chief.
- b. The Contractor shall perform all necessary work, as detailed in these specifications, in such a manner as to not unnecessarily interfere with normal Fire Department operations. The Contractor shall not block any roadway or driveway at any time or park in such a way as to hinder normal traffic flow, or inhibit fire apparatus from clearly responding to incidents.
- c. The Contractor should park out of the way so that Fire personnel can clearly see both ways responding from quarters.

2.6 CHEMICAL APPLICATIONS

Note: Bay Friendly Landscaping emphasizes Integrated Pest Management (IPM) practices to control pests and diseases in the landscape.

- a. Contractor shall apply all chemicals in a safe manner and according to label instructions and City, County, State and federal requirements.
- b. All chemical applications shall be performed by a trained technician under the jurisdiction of the company licensed Pest Control Operator (required for this contract) as required by the State of California, registered in Alameda Co. and strictly adhere to all laws.
- c. The Contractor shall mix and apply chemicals to protect against accidental spills and drift to non-target areas, and to insure the safety of the applicator.
- d. Any spilled chemicals, as well as contaminated soil, water, and/or landscape materials must be removed from the site and disposed of in accordance with the Agency requirements. The Contractor shall maintain applicator's licenses and records of applications as required by the State.
- e. A Chemical Work Report shall be completed for each chemical application. The Contractor is responsible for submitting chemical use reports to the County Agriculture Department. Copies are to be sent to the Urban Landscape Supervisor as part of the Contractor's monthly report.

2.7 CONTRACTORS PERSONNEL AND SUPERVISION

Subject: Fire Station Landscape Maintenance

**Bid#10-015
EXHIBIT 'A'**

- a. Contractor shall provide a list of all employees assigned to the project.
- b. All Contractor's employees assigned to the project must be able to demonstrate they are United States citizens or have a legal right to work in the United
- c. The Contractor shall assign a qualified trained supervisor to oversee work performed at the work sites and to act as the Contractor's liaison to the Urban Landscape Supervisor
 - i. Supervisor must inspect the work as necessary and provide direction to the Contractor's workers and/or subcontractors.
 - ii. Supervisor shall speak, write, read and understand English and be capable of writing schedules, monthly reports noting any deficiency that may need correcting.
- d. All Contractor's personnel shall adhere to basic maintenance standards for working attire, including:
 - i. Uniform shirts/vests with Contractor's name or logo clearly visible at all times when working at all locations.
 - ii. Proper shoes and other Personal Protective Equipment (PPE) required by State Safety Regulations.
 - iii. Shirts/vests are to be maintained in a neat and presentable condition.
- e. All Contractor vehicles are to have a readable sign/logo with Contractor's name and (preferably) telephone number.
- f. Subcontracting: A portion of the work covered by these specifications may be subcontracted with prior approval of the Urban Landscape Supervisor. Subcontractors shall meet the same requirements as set forth for contractors.

2.8 SUPPLIES AND EQUIPMENT

- a. Use local products and suppliers: The Contractor shall use local products and suppliers (produced within 150 miles from the project site) to the extent possible.
- b. Use recycled and salvaged materials: The Contractor shall use salvaged and recycled-content products where possible. Materials for reuse may be found by contacting the CalMax website at www.ciwmb.ca.gov or at www.stopwaste.org.

2.9 REPORTING AND INSPECTING

All reports indicated below shall be submitted to the Urban Landscape Supervisor upon request, or if indicated, monthly:

- a. Unusual horticultural problems such as pests, disease and damages that are beyond the scope of the Contractor's responsibility.
- b. Stormwater Treatment Measures: Each stormwater treatment measure located on designated properties, indicated within each Maintenance Notification Document, shall require maintenance checklists to be completed monthly and sent to the Urban Landscape Supervisor. **(Document Attached)**
- c. The Contractor shall perform the work herein provided for to the satisfaction of the Maintenance Division and Environmental Services Division.

Subject: Fire Station Landscape Maintenance

**Bid#10-015
EXHIBIT 'A'**

- d. The Urban Landscape Supervisor shall require inspections from time to time to determine the Contractor's conformity with these specifications and the adequacy of the work being performed.
- e. The Contractor shall be available for consultation with the Urban Landscape Supervisor as needed

2.10 EXTRA WORK

- a. The Contractor shall immediately provide notice, to the Urban Landscape Supervisor, of any condition that cannot be fully resolved or repaired with approved landscaping practices and procedures outlined herein.
- b. New and unforeseen work will be classed as extra work when determined by the Urban Landscape Supervisor that such work is not covered by these specifications.
- c. Upon notification that extra work will be required, the Contractor shall submit an itemized, written cost proposal for such work to the Urban Landscape Supervisor.
- d. City shall retain the right to reject such cost proposals and perform the extra work with Agency staff or other contractors.
- e. Should the proposal be acceptable to City, the Contractor shall be advised in writing, and upon receipt of such notification, shall begin the work on the date agreed to between the Contractor and City.
- f. The Contractor shall do such extra work in accordance with the agreement for extra work and with the provisions of these specifications and shall furnish all labor, materials, and equipment.
- g. Payment for extra work performed shall be as agreed to by the Contractor and City and as bid. Compensation for materials will not exceed Contractor cost plus 10%. Contractor must provide invoice copies to be compensated for materials.

3 GENERAL MINIMUM SPECIFICATIONS:

SPECIFICATIONS FOR LANDSCAPE MAINTENANCE SERVICES

City is transitioning to using Bay Friendly Landscape maintenance practices. Landscapes shall be maintained using materials and methods that protect environmental quality and human health, conserve water and energy, minimize waste, and reuse and recycle materials to the extent possible. Contractor shall provide Bay Friendly Landscape Maintenance Services at City Fire Stations as outlined in these specifications herein and as described in more detail in the current Bay Friendly Landscaping Guidelines. These Guidelines may be downloaded at <http://stopwaste.org>.

DESCRIPTION OF WORK

3.1 STORMWATER TREATMENT MEASURES

Stormwater treatment measures are specialized landscape areas which may include turf, shrubs, trees and rocky areas. Stormwater treatment measures are designed to accept and treat stormwater. Due to their direct connection with the City storm drain system, these facilities and all of their components shall be maintained according to specific

Subject: Fire Station Landscape Maintenance

**Bid#10-015
EXHIBIT 'A'**

maintenance instructions detailed in the Maintenance Notification documents for facilities with said stormwater treatment measures. Maintenance Notification documents for the facilities in this contract are provided in Attachment 1.

3.2 TURF CARE

The Contractor shall maintain all turf areas by performing the following operations and other work incidental thereto at these locations:

- Fire Station #2 37299 Niles Blvd.
- Fire Station #3 40700 Chapel Way
- Fire Station #6 4355 Central Avenue
- Fire station #8 35659 Fremont Blvd.
- Fire Station #11 47200 Lakeview Blvd.

a. Mowing

- i. Frequency and Height: 1) Vegetated swales. Mow red fescue swales biannually to a height of 4-6 inches. 2) All other turf areas shall be mowed weekly, a minimum of 46 times per year. Turf shall be cut at a height of 1 ½ inches from November through February and to a height of 2 ½ inches from March through October.
- ii. Trash and debris shall be removed prior to mowing.
- iii. Mow turf when dry, at least one day after irrigation.
- iv. Mower type: Contractor shall work with Urban Landscape Supervisor to determine the most appropriate type of mower needed for the vegetated swales. Steep mounts will require a reel type mower. Mowers shall be kept in proper adjustment and balanced so that grass is cut at a uniform height. Keep area under the mower deck clean. Bruising or rough cutting of grass will not be permitted. Mower blades shall be kept sharp: sharpening is usually required once a week. Scalping of high places will not be permitted.
- vi. Mowing patterns shall be changed weekly or however often is necessary to avoid rutting.

b. Clippings

Except in vegetated swales, grass clippings shall remain on the turf after mowing. During the limited time of the year when the grass is too wet or too long, clippings shall be removed and disposed of in green waste container provided by the City of Fremont at each site.

c. Trimming

- i. All edges shall be trimmed after each cutting. This trimming shall include cutting all grass along walls, fences, foundations, shrubs, curbs, sidewalks, pathways, header boards, planters, tree trunks, poles, guy wires, or any other object within or immediately adjacent to the lawn areas.
- ii. The trimming shall be done by hand or, if necessary, by power edgers, preferably electric.

Subject: Fire Station Landscape Maintenance

**Bid#10-015
EXHIBIT 'A'**

- iii. In no case will soil sterilants or other types of weed killers be permitted without prior approval of the Urban Landscape Supervisor.
- iv. Care should be taken to avoid damage to tree trunks, shrubs, sprinklers, buildings and other structures. Damage shall be reported to the Urban Landscape Supervisor and repairs shall be made by the Contractor at his/her expense.
- d. Aeration
All turf grasses shall be aerated at least once each year in the spring, followed with a top dressing of compost. Aeration shall not occur in the summer months.
- e. Fertilizing
Feed turf, especially after aeration, by topdressing with finely screened compost: ¼ of an inch once per year. See section 3.5, Fertilizing, for more information.

3.3 TREES

- a. Pruning
 - i. Tree pruning shall be performed only by trained, experienced personnel.
 - ii. All tree pruning shall be in accordance with the Best Management Practices for Pruning (International Society of Arboriculture, 2002) and adhere to the most recent editions of the American National Standard for Tree Care Operations (Z;133.1) and Pruning (A300).
 - iii. Pruning shall be judicious; keep suckers removed, structure tree branching. Trees shall not be clipped into round or hedge like shapes.
 - iv. Reduce the end weight on heavy, horizontal branches.
 - v. Interior branches shall not be stripped out.
 - vi. No more than 20% of the live foliage shall be removed within the trees.
 - vii. Maintain at least 7 feet clearance between ground and lowest branches, or as directed around light fixtures or vehicle traffic parking lot.
- b. Fertilizing
Fertilizer applications shall be made on prescription basis only when soil and/or plant tissue analyses identify specific deficiencies.

3.4 GROUND COVER AND SHRUBS

- a. Ground Cover
 - i. Ground cover and shrubs shall be maintained to sustain an attractive , healthy, normal color for the species and uniform density with no bare spots. Ground cover shall be kept free of trash and debris.
 - ii. Ground cover and shrub areas shall be kept in a weed free condition as per the guidelines provided in Section 3.6, Weed Control.
 - iii. Ground cover shall be trimmed monthly along paths, walks, turf areas and around base of trees and shrubs. The edge of herbaceous ground cover may be maintained using turf edging equipment.
 - iv. When ground cover becomes excessively woody or develops thatch in excess of 4”, the Contractor shall prune severely to rejuvenate it. For most woody ground covers, prune to approximately 6-8” height. Herbaceous groundcovers may be

Subject: Fire Station Landscape Maintenance

**Bid#10-015
EXHIBIT 'A'**

mowed at an appropriate height, generally 4-6". This treatment shall only be applied in the late winter/early spring when re-growth will occur quickly.

- b. Shrubs
 - i. Shrubs shall be trimmed as needed or as directed
 - ii. Shrubs shall be pruned selectively only as necessary to enhance their natural shape. Where plant size must be controlled because of inadequate space for the plant, prune to reduce the size by cutting individual branches or stems to interior lateral branches at appropriate locations.
 - iii. Contractor shall maintain a minimum of 2" of coarse organic mulch at all times over bare soil areas that are not covered by ground cover. Mulch shall be applied so that it is below grade (curb, edging, etc.) by half an inch. Some additional grading preparation and grading of areas adjacent to sidewalks or edging, etc. may be required to keep the finish grade of the mulch at an appropriate level. Mulch materials shall be chipped or shredded plant debris wood chips from pruning operations. When available, utilize chipped plant prunings generated on site.

- c. Fertilizing

Fertilizer applications are to be made per need of plant and not on a regimented basis.

3.5 FERTILIZING

Bay friendly Landscaping relies on organic fertilizers and soil amendments from natural sources that release elements slowly, which shall be preferred.

- a. Avoid the use of synthetic quick-release fertilizers. Use compost, naturally-derived fertilizers, or as a last resort, slow-release synthetic fertilizers on an as-needed basis only.
- b. Contractor shall apply and manage fertilizers and amendments to prevent pollution of surface and groundwater and to avoid creating draft in the soil or toxicity to plants.
- c. Irrigation and fertilization programs shall be designed to avoid excessive plant growth that would require additional pruning or mowing to manage.
- c. Compost shall be a well decomposed, stable, weed-free organic matter source. The product shall be certified through the US Composting Council's (USCC) Seal of Testing Assurance (STA) Program. It shall be derived from agricultural and/or food waste and/or yard trimmings. The product shall contain no substances toxic to plants, will possess no objectionable odors and shall not resemble the feedstock (the original material from which it was derived).

3.6 WEED CONTROL

All fire station grounds shall receive a regular program for weed control that is based On an Integrated Pest Management (IPM) strategy as outlined in the City's Administrative Regulation 6.7. An IPM program shall be implemented to: 1) maintain healthy, attractive plants, maximize resistance to pests and out-compete weeds; 2) monitor for the presence of pests and to evaluate pest impact to plant health and

Subject: Fire Station Landscape Maintenance**Bid#10-015
EXHIBIT 'A'**

appearance and nuisance to the public; 3) provide control treatments that have minimal negative effects on all but the pest and that protect air and water quality. Contractor shall assume that pesticides are potentially hazardous to human and environmental health. Preference shall be given to reasonably available non pesticide alternatives when considering the use of pesticides on City property. Refer to section 2.6, Chemical Application, for more information.

- a. Monitor planting areas frequently to identify and eradicate weeds early in the growth stage prior to their setting seed.
- b. Cut or pull weeds using hand operated equipment where possible. If herbicide is necessary, use spot application.
- c. Least toxic herbicides may be employed by Contractor as a last resort. Examples include fatty acid potassium salts, acetic and citric acids, and low-toxic, low residual herbicides such as glyphosate, glufosinate-ammonium, and pelargoic acid.
- d. Restricted herbicides that may not be used because they have been identified as ground water contaminants include atrazine (Aatrex), simazine (Princep), bromacil (Hyvar, Krovar), prometon (Pramitol), bentazon (Basagran) and norflurazon (Solicam, Predict, Zorial).
- e. Restricted herbicides that may not be used because that have been identified as a compost contaminant include picloram and clopyralid.
- f. Any plants lost or destroyed as a result of spraying for weed control shall be replaced with the same varieties and spacing as originally planted at the Contractor's expense.
- g. All pest control formulation recommendations shall be made by an "Agricultural Pest Control Advisor" licensed by the State of California Department of Food and Agriculture. The information for the pesticide recommended by the Pest Control Advisor shall be mailed or hand delivered to the Urban Landscape Supervisor prior to application of pesticides on any City property.

3.7 PEST CONTROL

The selected Contractor shall employ integrated pest management (IPM) procedures to control pest populations, if necessary. IPM uses cultural, mechanical, physical, and biological control methods before using pesticides. Chemical controls are applied only when monitoring indicates that preventative and non-chemical methods are not keeping pests below acceptable low levels. When pesticides are required, the least toxic and least persistent pesticide that will provide adequate pest control will be used. More information may be found in the City's Administrative Regulation 6.7: Integrated Pest Management. Also refer to section 2.6, Chemical Applications.

- a. Contractor is responsible for monitoring the landscape to identify, assess pest problems and take action to control pests that affect health and appearance when pest populations or damage exceed established thresholds.
- b. Contractor shall select pest controls to provide adequate pest control without harming non-target organisms, or negatively affect air or water quality or public health. Contractor shall not apply restricted chemicals that may harm water resources.

Subject: Fire Station Landscape Maintenance

**Bid#10-015
EXHIBIT 'A'**

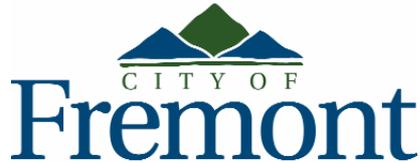

- c. Pesticides may not be applied on a prescheduled basis.

3.8 IRRIGATION SYSTEMS

- a. Contractor's routine maintenance responsibility for all irrigation systems shall begin at the discharge site of all electric remote valves.
- b. Contractor's representative shall be capable of programming irrigation systems installed in the City Fire Stations.
- c. All irrigation systems and equipment which are the Contractor's responsibility for routine maintenance shall be kept in proper operating condition at all times in order to insure proper watering in all planted areas. All sprinkler heads shall be kept clean, adjusted and in good working order to insure coverage.
- d. Any broken pipe, fittings, risers and heads shall be repaired or replaced as soon as possible so that the irrigation schedule can continue uninterrupted.
- e. The Contractor shall repair all main lines, valves, electrical wiring or appurtenances damaged as a result of his/her work.
- f. Irrigation frequency, timers, and volumes shall be adjusted based on the specific watering needs of plant material.

3.9 GENERAL MAINTENANCE AND CLEAN-UP

- a. Leaf, Litter, and Trimmings
 - i. Rakes are preferred for leaf litter removal over blowers. If blowers are used, electric is preferred.
 - ii. Leaf litter shall either be mulched and used on-site or deposited in the green waste recycling bin.
 - iii. Trimmings generated by pruning shall either be chipped and used as mulch on site, or deposited in the green waste recycling bin.
 - iv. Grass cuttings shall be removed from all walkways and paved areas on the same day as the cutting (not to be left in street). Brooms are preferable to blowers, but blowers may be used. Electric blowers re preferred over gas powered blowers.
- b. Solid Waste
 - i. All litter and debris shall be removed from the total limits of the fire station sites each week.
 - ii. Vegetation, recyclables and trash shall be sorted and disposed of appropriately.
- c. Maintain and adjust your equipment. Sharpen your blades often-at least once a week-and keep them clean and balanced.
- d. Contractor shall clean hard surfaces as needed to remove accumulation of sediment, dirt, or other materials that distracts from the visual impact of the area or creates a safety hazard. Cleaning methods must be consistent with the Bay Area Stormwater Management Agencies Association (BASMAA) criteria. (BASMAA criteria is listed in Section 2.1C
- e. Any settling, washouts or damage due to vehicles or equipment shall be filled, graded, replanted and repaired to original condition at the Contractor's expense.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

NOTICE OF INVITATION FOR BIDS

PUBLIC NOTICE IS HEREBY GIVEN THAT the City of Fremont hereby invites sealed bids for a Contract for the "Project" entitled: **Professional Pest Control Services.**

RECEIPT OF BIDS AND BID OPENING: Bids must be received at: Purchasing Services, 3300 Capitol Ave., Bldg B; Fremont, California 94537-5006, not later than the Bid Deadline of **2:00 p.m. Thursday, July 15, 2010** at which place and time the bids will be publicly opened and read aloud. The form of the bids shall be in accordance with the Instructions to Bidders.

PROJECT DESCRIPTION: The Project is more specifically defined in the Contract Documents, but generally includes the following: The following specifications describe the minimum requirement for Professional Pest Control Service.

INTENT: These specifications describe the minimum requirements for Pest Control Services requested. It is the City's intent to purchase this contractual service.

CONTRACT DOCUMENTS: Copies of the Contract Documents are available from Purchasing Services, 3300 Capitol Ave., Bldg B. Fremont, California 94537-5006. No partial sets will be issued. Call (510) 494-4620 to confirm availability of copies before coming to pick up documents. Bidders are encouraged to recycle Contract Documents which are no longer needed.

CONTRACT TIME: All of the work for this Contract shall be for a period of one year with option for two (2) additional one (1) year terms. After the date specified in the executed contract and in accordance with the terms identified on the Bid Form.

INQUIRIES ADDRESSED TO CITY PROJECT MANAGER: Any questions regarding this Project, should be submitted in writing to: Building Maintenance Supervisor, **Bill Shaffer, 42551 Osgood Rd, Fremont, CA 94539, (510) 979-5751, (510) 979-5708, bshaffer@fremont.gov**

Purchasing Manager

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

INSTRUCTIONS TO BIDDERS

1. OBTAINING COPIES OF CONTRACT DOCUMENTS

Bidders may obtain complete sets of the Contract Documents, at the location designated in the Invitation for Bids.

Each bidder shall use a complete set of Contract Documents in preparing its bid.

The Contract Documents are more particularly defined on the Supplemental Instructions to Bidders, and generally include: all Bidding Documents (including the Invitation For Bids, these Instructions to Bidders, Supplemental Instructions to Bidders, Addenda [if any], and Bid Forms), the Purchase Order (including the Standard Terms and Conditions), and the Specifications.

The City makes copies of the Contract Documents available, on the above terms, for the sole purpose of obtaining Bids for the Work and does not confer a license or grant permission for any other use of the Contract Documents.

2. INTERPRETATION OR CORRECTION OF CONTRACT DOCUMENTS

Bidder shall, before submitting its Bid, carefully study and compare the components of the Contract Documents, and the conditions under which the Work is to be performed.

Bidder shall review the Supplemental Instructions to Bidders to determine if there are any particular requirements for this Project which may impact the preparation of the Bid, including requirements (if any) for: Bid Security, Bonds, Insurance, and any other requirements.

In the event Bidder has any question as to the meaning of any part of the Contract Documents, or Bidder finds any error, omission, inconsistency, or ambiguity in the Contract Documents, Bidder shall make a written Request for Clarification prior to submitting its Bid. Requests for clarification or interpretation of the Contract Documents shall be addressed only to the Project Manager designated in the Invitation for Bids. It shall be the Bidder's responsibility to ensure that any such request is submitted to the City in a timely manner, in order to allow for the City to issue a written Addenda.

If necessary, the City shall make clarifications, interpretations, corrections, and changes to the Contract Documents by Addenda issued as provided in Section 4 of these Instructions to Bidders, below. Purported clarifications, interpretations, corrections, and changes to the Contract Documents made in any other manner shall not be binding on the City, and Bidders shall not rely upon them.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

3. PREFERENCE FOR MATERIALS

If the Contract Documents identify any particular material (including product, thing, equipment, or service), by patent, proprietary or brand name, or by name of manufacturer, followed by the phrase “no substitution,” the Contractor shall furnish the specified material for the Bid Amount and within the Contract Time.

If the Contract Documents identify any particular material without using the phrase “no substitution,” the reference to the particular material is used for the purpose of facilitating its description and shall be deemed to be followed by the words “or equal.” A listing of materials is not intended to be comprehensive, or in order of preference.

Unless a successful bidder (the Contractor) submits a request for substitution of “equal” materials concurrently with its bid, and the Contractor submits substantiating documentation to the satisfaction of the City’s Project Manager (no later than 10 working days after the Bid Deadline) which demonstrates that the proposed substitution material is “equal” to the material specified in the Contract Documents (equal in quality, utility, reliability, durability, or any other requirements identified in the Contract Documents), and unless the City’s Project Manager approves the substitution, the Contractor shall furnish the specified material for the Bid Amount and within the Contract Time. If the City’s Project Manager approves the substitution, the Contractor shall furnish the substitute material for the Bid Amount and within the Contract Time.

4. ADDENDA

Addenda will only be issued in writing. The City will make reasonable efforts to deliver (via facsimile or U.S. Mail) Addenda to all Bidders who are known by the City to have received a complete set of Contract Documents and who have provided a street address for receipt of Addenda.

Each Bidder shall be responsible for ascertaining, prior to submitting its Bid, that it has received all issued Addenda. City makes no guarantee that all Bidders will receive all the Addenda. Copies of Addenda will be made available for inspection at the office where Contract Documents are on file for inspection, as indicated on the Invitation for Bids.

Addenda withdrawing the Invitation for Bids or postponing the Bid Deadline may be issued anytime prior to the Bid Deadline. If any Addenda results in a material change (addition or deletion) to the Contract Documents, the Bid Deadline shall be extended by the City by not less than 72 hours.

Each Bidder shall acknowledge receipt of all Addenda on the Bid Form. Failure to acknowledge receipt of Addenda may render the bid non-responsive.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

5. FILLING IN BID FORMS BY BIDDERS

Bids shall be submitted on the Bid Forms included within the Bidding Documents. A complete bid package, with all Bid Forms, must be submitted, including:

The Bid Form.

Any other information or documents required by the Supplemental Instructions to Bidders.

All blanks on the Bid Forms shall be filled in by typewriter or printed legibly in ink.

Interlineations, alterations, and erasures must all be individually initialed by the Bidder.

Bidder shall acknowledge receipt of all Addenda on the Bid Form.

Bidder shall not modify or qualify the Bid Forms in any manner.

The Bid Forms shall be signed by a person or persons legally authorized to bind Bidder to the Contract. The individuals signing each document shall warrant that they are authorized to bind the legal entity of the Bidder.

6. SUBMISSION OF BIDS

All Bid Forms, including all documents required to be submitted with the Bid, shall be enclosed in a sealed opaque envelope. The envelope shall be clearly marked on its face with the Bidder's name and address, and the notation "SEALED BID ENCLOSED, CITY OF FREMONT" with an identification of the project name and number as identified on the Invitation for Bids.

Bids may be mailed or delivered by messenger. It is the Bidder's responsibility alone to ensure that the Bid is received at the place (and prior to the Bid Deadline) specified in the Invitation for Bids. Any Bid received after the exact time of the Bid Deadline shall be returned unopened. The exact time of the Bid Deadline shall be determined by the City Project Manager (or other City employee designated as responsible for the bid opening).

Oral, telephonic, facsimile, telegraphic, or electronically transmitted Bids are invalid and will not be accepted.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

7. WITHDRAWAL OF BIDS

After a Bid is received by the City, the Bid may be withdrawn only by a written request signed by the Bidder. In order to cause a withdrawal of the Bid the request must be received by the City at the place (and prior to the Bid Deadline) specified in the Invitation for Bids.

No oral request for withdrawal will be considered. No oral or written request for modification will be considered.

The withdrawal of a Bid shall not prejudice the right of the Bidder to submit a new Bid, provided the new Bid is submitted in accordance with these Bidding Requirements.

After the Bid Deadline, no bidder shall withdraw its bid for a period of at least sixty (60) calendar days following the Bid Deadline, subject to the exceptions stated in this section 7. The sixty (60) day review period may be extended upon the written request by the Project Manager, and written approval by the affected Bidders.

A Bidder shall be permitted to withdraw a Bid after the Bid Deadline only if the Bidder establishes, to the satisfaction of the Project Manager, all of the elements identified in Fremont Municipal Code section 2-9403, including the following:

- A clerical error was made by the Bidder in filling out the Bid; and the error was not due to error in judgment or to carelessness in determining the Project requirements.
- The clerical error caused the Bid to be materially different than the Bidder intended the Bid to be.
- The Bidder gave the City written notice within five calendar days after the Bid Deadline of the mistake, specifying in the notice in detail the nature of the mistake and how the mistake occurred.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

8. OPENING AND INITIAL REVIEW OF BIDS BY THE CITY

Bids which have been submitted in accordance with the requirements of the Bidding Documents, and which are received on or before the Bid Deadline will be opened publicly and the dollar amounts of each bid shall be read aloud.

The City shall have the right to reject all Bids.

The City shall have the right to reject any Bid not accompanied by Bid Security (if required by the Supplemental Instructions to Bidders) or any other item required by the Bidding Documents, or a Bid which is in any other way incomplete or irregular.

The City shall have the right to waive irregularities in a Bid, and to award the Contract to the Lowest Responsible Bidder (as determined by the City), only if the irregularities are non-material and inconsequential.

9. CITY'S DETERMINATION OF LOWEST RESPONSIBLE BIDDER

The term "Lowest Responsible Bidder" shall mean the "Lowest Monetary Bidder" whose Bid is "responsive," and who is "responsible" to provide the Goods required by the Contract Documents, as those terms are defined by State law and the City's Purchasing Code (Fremont Municipal Code title 2, chapter 9). This section 9 summarizes the procedure by which the City will determine the "Lowest Responsible Bidder" in accordance with State law.

The City shall determine the "Lowest Monetary Bidder" on the basis of the Bid Amount, in accordance with the calculation criteria set forth on the Bid.

After the "Lowest Monetary Bidder" has been determined, the Lowest Monetary Bidder's Bid will be evaluated by the Project Manager in order to determine whether or not that Bid is "responsive." The term "responsive" generally means that the Bid has been prepared and submitted in accordance with the requirements of the Bidding Documents.

If the Lowest Monetary Bidder's Bid is responsive, that Bidder's qualifications will be evaluated by the Project Manager to determine whether or not the Bidder is "responsible" to perform the Work required by the Contract Documents. The Project Manager shall review "responsibility" of Bidders in accordance with the criteria set forth in Instructions To Bidders section 10.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

If the Project Manager finds that the Lowest Monetary Bidder's Bid is not responsive, or that the Lowest Monetary Bidder is not responsible, then the Project Manager may review the responsiveness and responsibility of the next Low Monetary Bidder. This process may continue until the Project Manager finds the Lowest Monetary Bidder which is also responsive and responsible. In the event that one or more Low Monetary Bidders are found by the Project Manager to be non-responsive or non-responsible, those Bidders will be given notice and a reasonable opportunity to present additional relevant evidence to the Project Manager, within five working days after the Bidder receives the notice.

All findings by the Project Manager shall be reported as recommendations to the City's Authorized Representative. The City reserves the right to reject any or all Bids, and to waive any irregularity. If the City's Authorized Representative determines that it is in the City's best interest to award the Contract, notice shall be provided to the Lowest Responsible Bidder. No Bid shall be binding upon the City until after the Purchase Order is signed by the City.

The City may investigate the responsibility and qualifications of all Bidders to whom the award is contemplated for a period not to exceed sixty (60) days after the Bid Deadline. The sixty (60) day review period may be extended upon the written request by the Project Manager and written approval by the affected Bidders.

10. CITY'S DETERMINATION OF RESPONSIBILITY

The term "responsible" generally means that the Bidder is able to demonstrate that it possesses: (1) the capacity to provide the Goods required by the Contract Documents with respect to financial strength, resources available, and experience; and (2) the integrity and trustworthiness to complete performance of the Work in accordance with the Contract Documents. The City may consider the following factors, in relation to the Goods to be purchased for this Project, in determining whether or not a Bidder is "responsible": Demonstrated financial strength including, but not limited to, resources available.

11. OTHER PUBLIC AGENCIES.

Use of this Contract may be extended to other tax supported agencies that have not contracted for their own requirements and who may desire to participate in the contract. The contractor will be requested to service these agencies and will be given the opportunity to accept or reject the additional requirements. If the contractor elects to service them, orders will be placed directly by the agency and each agency will make payment directly to the contractor.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

12. PRICING

Prices are to remain firm for the first year of the contract. Scope of work will be adjusted as needed using contract pricing to determine payment. Price adjustments may be considered upon contract renewal.

13. LICENSE

Contractor must possess all necessary licenses, such as a Structural Pest Control License, and permits meeting the requirements of the State Department of Consumer Affairs for the type of service being provided. Said licenses and permits must remain current throughout the term of the contract. See also the Integrated Pest Management Program section on page 11 for certification requirements.

14. PAYMENT

Payments will be made monthly, following the previous month's service and upon receipt of correct invoices. Invoices must be itemized for each location. Services will be documented by having a City employee at the site of service sign the invoice. The invoice will at least include the location name, location address, type of service, type of chemical, trap, IPM method used, date, time, and name of the individual providing the service.

15. INVOICING AND PAYMENTS

City shall make payments to Contractor for all services performed by Contractor pursuant to this Contract. Contractor shall submit a invoice, in duplicate, for services rendered and City shall pay the invoiced fee within thirty (30) days after receipt and acceptance that invoice is correct.

Invoices shall be submitted to:

City of Fremont
Financial Services
Attention: Accounts Payable
P. O. Box 5006
Fremont, CA 94537

16. BID RESULTS

Bid results can be found on the city website: www.fremont.gov . Go to the pull down for departments, click on Purchasing and the web link is at the bottom of the page. Results are usually on the website within 48 hours.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

**GENERAL MINIMUM SPECIFICATION;
SPECIFICATIONS FOR PEST CONTROL SERVICES**

PROVIDE PEST CONTROL SERVICE at the City of Fremont buildings indicated on the attached list included in bid form.

Minimum service shall be once per month for each location, to provide for the control of:

- Pigeons *(as needed)*
- Rodents *(as needed)*
- Ants
- Spiders
- Fleas
- Roaches
- Termites *(as needed)*
- Others insects (such as bees)

(Required method of Integrated Pest Management as described on page 11)

Control of termites, rodents and pigeons shall be on an as needed basis and charged as per the bid (except for those locations identified on the bid sheet.)

Service shall also include unlimited call outs with no additional charge to the City. Bid price must include all labor, material, taxes and any other costs required to provide the service.

Contractor shall respond to call outs in the same business day as the call is received, if notified prior to 12:00 noon. For call outs after 12:00 noon, response will be the by the next business day.

All buildings except the Fire Stations are available for inspection from 8:00 a.m. to 5:00 p.m. Monday through Friday, except as noted. Appointments will be scheduled with the individual Fire Stations. Phone numbers to be supplied.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

SUPPLEMENTAL INSTRUCTIONS TO BIDDERS

Contract Documents

Identification of Contract Documents: The Contract Documents are hereby defined to include the following documents: all Bidding Documents (including the Invitation For Bids, Instructions to Bidders, Addenda [if any], and Bid Forms), the Purchase Order, Contract, List of Reference, Materials and Integrated Pest Management program (IPM).

List of Materials: List of materials are required submittal items and will be used as well as the price to evaluate the submitter's suitability to provide the City with the best overall service. *Non submittal will disqualify bidders.* The Integrated Pest Management program submittal shall be supplied by those bidders wishing to utilize this method. It will not be used to determine the award of this contract.

List of References: Provide a list of at least three (3) references of companies in the Bay Area with contracts, similar in scope to this project, which have been performed within the past three (3) years. References shall include the dates of work, scope of work, company name, address, telephone number and contact person of customers whom bidder.

Integrated Pest Management program (IPM): The City of Fremont is requiring an IPM approach to pest management. Provide a written description of your Integrated Pest Management program. Also include a description of your plan for implementing your IPM program, and a copy of your IPM certification, if no certification at time of award, the professional pest control contractor shall become IPM certified either by EcoWise or Quality Pro within one year of contract award.

The IPM contractor shall have an inspection sheet that enables them to map the building layout and possible points of entry for pests.

The contractor once awarded the bid shall be provided with single line drawings of the floor plans.

Once the source of the pest is found, an IPM approach shall be first used for eradication.

Outside sources such as ant colonies may require a minimal amount of chemicals. Often the chemical used is the least toxic available and is used as a last resort.

The IPM contractor will keep detailed records of chemicals used and when and where they were applied, including reduced toxicity chemicals normally used by IPM contractors. If no chemicals were used, a description of the process to eliminate pest problem will be given, these records shall be submitted monthly.

Subject: PROFESSIONAL PEST CONTROL SERVICES Bid #10-055

The contractor prior to a change of chemical usage shall submit a copy of the MSDS as well as any pertinent information regarding the proposed change to the contract manager.

IPM Standards

The following standards shall be applied as minimal requirements:

All on-site pest control contractor personnel shall be certified pesticide applicators.

Services shall be performed at least monthly, unless otherwise stated.

Bait formulations, traps, vacuuming, sanitation and exclusion techniques should be emphasized for insect control in a sound IPM policy and program.

Traps, sanitation and exclusion techniques should be emphasized for rodent control.

Exclusion techniques should be emphasized for pigeon control.

Pesticides should be used only if adequate IPM methods/controls cannot be achieved with alternative types of treatment.

Pesticide use should always consist of the least toxic material, most precise application technique, and minimum quantity of material necessary to achieve pest control.

The contractor shall provide labels and MSDS sheets for every chemical used on the premises to the contract manager.

Pesticides and any other materials used must be handled in strict accordance with Federal, State and Local Ordinances. The applications must be consistent with the Good Practice Statements of the National Pest Control Association.

Attachment 10a

STANDARD TERMS AND CONDITIONS FOR GENERAL SERVICES

1. **Purchase Order.** This Purchase Order ("PO") is issued by the City of Fremont ("City") to the Contractor, subject to the following Standard Terms and Conditions unless otherwise noted on the face of the PO. **This PO consists of the face of the PO, the Standard Terms and Conditions and any other documents referenced in or attached to this PO. Any of the following shall constitute Contractor's unqualified acceptance of this PO: Contractor's acknowledgment of this PO; commencement of performance; or acceptance of any payment. This PO is valid only as written. Contractor's different or additional terms and conditions are objected to and excluded from this PO unless accepted in writing by City.**
2. **Time for Performance.** Time is of the essence in the performance of this PO. Contractor shall perform the work ("Work") within the time specified herein, to the satisfaction of the City. If the Work cannot be performed at or within the specified time, Contractor shall promptly notify City of the earliest possible date for performance. If Contractor fails to perform the Work at or within the time specified, City may terminate all or any part of this PO.
3. **Payment.** City shall pay Contractor not more than the Contract Amount specified in this PO. The Contract Amount includes all costs including all labor, materials, equipment, tools, utilities, transportation, taxes and services. Invoices shall be remitted to the City of Fremont Accounts Payable Department, P.O. Box 5006, Fremont, CA 94537. City shall make payment to Contractor within 30 days of receipt of a correct, itemized invoice. Payment of invoices shall not constitute acceptance of the Work and invoices shall be subject to adjustment for defects in quality or failure to meet the requirements of this PO.
4. **Extra or Additional Work.** Contractor shall perform no extra or additional work or alter or deviate from the Work unless agreed in writing by the City. Extra or additional work to which City has not agreed in advance in writing will not be compensated.
5. **Warranty.** Contractor warrants that all Work shall be performed in a professional and workmanlike manner in accordance with generally accepted business practices and performance standards of the industry and the requirements of this PO. Contractor further warrants that all materials, goods and equipment used in the Work shall be new, fit for the particular purpose intended, and free from defects, liens and claims.. Unless otherwise specified in this PO, the warranties set forth in this section shall be in effect for a period of ninety days from the date of the City's acceptance of the Work as complete.
6. **Inspection.** City may inspect the Work. Contractor shall at City's option either refund the amount paid for the Work, or, at no cost to City, promptly repair, replace or correct any material or Work that is defective or not in compliance with the above warranties. Payment may be withheld until corrective action is completed and the Work is accepted.
7. **Damage.** If any damage (including death, personal injury or property damage) occurs in connection with the performance of the Work, Contractor shall immediately notify the City Risk Manager's office by telephone at 510-284-4050, and promptly submit to the City a written report in a form acceptable to the City. Contractor shall, at its sole expense, repair in kind, or as the City Manager or designee shall direct, any damage to public or private property. City may decline to approve and may withhold payment in whole or in part as may be necessary to protect City from loss because of defective work not remedied or other damage to the City. When the grounds described above are removed, payment shall be made.
8. **Change Orders.** City may amend or modify this PO at any time by issuance of a written change order. If any change causes an increase or decrease in the cost of or time required to perform the Work, Contractor shall notify City within ten (10) days of the receipt of the change order to obtain an equitable adjustment. If no response is received within ten (10) days, Contractor shall be deemed to have accepted the change without any price or schedule adjustment. Pending any adjustment, Contractor shall proceed in accordance with the change order.
9. **Risk of Loss.** Contractor assumes all risk of loss or damage to all Work in progress, materials and other items related to this PO until the same are accepted by City.
10. **Independent Contractor/Subcontractors.** Contractor and its employees, agents and subcontractors shall at all times be considered independent contractors and not an agent or employee of City. Contractor shall not subcontract any portion of the Work unless approved in advance by City.
11. **Business License.** The Contractor shall apply for and pay for a business license, in accordance with Fremont Municipal Code title V, chapter 1, section 5-1100, *et seq.*
12. **Record Keeping.** Contractor shall maintain records relating to performance and billing under this PO for a period of four years after final payment in accordance with generally accepted accounting principles and state law. During that period Contractor shall provide copies of its records upon request by the City.
13. **Compliance with Law.** Contractor shall comply with all applicable legal requirements including all federal, state, and local laws Contractor shall obtain and maintain all necessary permits and licenses for the performance of the Work.
14. **Indemnification.** Contractor shall indemnify, hold harmless, and defend the City (including its elected officials, officers, agents and employees) from and against any and all claims (including all litigation, demands, damages, liabilities, costs, and expenses, and including court costs and attorney's fees) resulting or arising from performance, or failure to perform, under this Agreement.
15. **Insurance.** When required by the City's Risk Manager, Contractor shall provide: (1) Satisfactory proof of general liability insurance, automobile liability, worker's compensation and any other required insurance; and (2) Required endorsements (including naming City as an additional insured)
16. **Termination.** The City Manager or designee may terminate all or any part of this PO without cause by giving fifteen (15) days' prior written notice to Contractor. If Contractor fails to perform any of its material obligations under this PO, in addition to all other remedies provided by law, the City Manager or designee may terminate this PO immediately upon written notice of termination. Upon receipt of any notice of termination, Contractor shall immediately discontinue performance. If the termination is for convenience, City shall pay Contractor for services satisfactorily performed up to the effective date of termination not to exceed the Contract Amount. If the termination is for cause, City may deduct from such payment the amount of actual damage, if any, sustained by City due to Contractor's failure to perform.
17. **Notices.** All notices shall be in writing and delivered to the addresses specified this PO. Communications shall be deemed to be effective upon actual receipt, or three working days following the deposit in the United States Mail of registered or certified mail.
18. **Miscellaneous.** The PO is not assignable without the prior written consent of the City. This PO sets forth the entire understanding of the parties and may be modified only through written agreement of both parties. If any provision of this PO is held to be invalid or unenforceable, the remaining provisions shall be valid and binding. Waiver of a breach or default under this PO shall not constitute a continuing waiver or a waiver of a subsequent breach of the same or any other provision. The interpretation, validity, and enforcement of this PO shall be governed by the laws of the State of California. Any suit, claim, or legal proceeding of any kind related to this PO shall be filed and heard in a court of competent jurisdiction in the County of Alameda. In the event any legal action is commenced with respect to this PO, the prevailing party is entitled to reasonable attorney's fees, costs, and expenses incurred.

Grand Total from Price Sheet			\$ _____	\$ _____

BID FORM

All bidders shall fill in the spaces below. Termite, rodent and pigeon eradication shall be performed on, an as required basis by the City. Pricing shall be Time and Material.

Termite Eradication

Termite eradication shall be performed on a time and material basis. The methods and chemicals, if any, shall be described in writing and supplied to the Contract Manager prior to the City permitting the eradication. The contractor shall obtain all required permits and inspections. The City will not pay for estimating termite eradications.

Labor rate: _____ Material cost: _____

Rodent Eradication

Rodent eradication consists of the elimination of and removal of the remains of mice, rats, ground squirrels and other rodents. **The Boathouse (Central Park Visitor Center) is the exception; this site shall be baited for rats on a monthly basis.** See the monthly price sheets below.

Labor rate: _____ Material cost: _____

Pigeon Eradication

Pigeon eradication consists of the elimination of and removal of the remains of pest pigeons, shall be on an as need basis.

Labor rate: _____ Material cost: _____

BID TO: Purchasing Services
City of Fremont
3300 Capitol Ave., Bldg B.
Fremont, California 94537-5006

BID FROM: _____
Insert Full Legal Name of Bidder (Firm Submitting Bid)

NOTE: The “Bidder” may be referred to herein as the “Bidder” or the “Contractor.”

1. **ADDENDA.** A failure by the Bidder to acknowledge Addenda (if any) in this section of the Bid Form may render the bid non-responsive. Bidder hereby acknowledges receipt of the following Addenda (identified by Addenda number and date issued):

_____	_____
_____	_____
_____	_____
_____	_____

2. **SCOPE OF BID.**

Firm Offer to Provide Goods. Bidder hereby offers to provide to the City the Goods (which may also referred to herein as “Materials” or “Equipment” or “Property”) described on the Bid Spreadsheet (section 5, below), in accordance with the requirements of the Contract Documents for the amounts quoted in this Bid. Bidder will not withdraw its Bid for at least one hundred and twenty (120) calendar days after the Bid Deadline, unless otherwise extended by the written agreement of the City and Bidder.

Submittal of Complete Bid. All portions of these Bid Forms (including the Bid, and any documents required by the Supplemental Instructions to Bidders [if any] must be properly completed, signed, and submitted with the Bid. Failure to do so may result in the Bid being deemed non-responsive by the City.

Submittal of Additional Documents. If Bidder is selected as the Lowest Responsible Bidder, Bidder shall, within ten working days after receipt of notice from the City, deliver to the City all submittals required (if any) by the Supplemental Instructions to Bidders.

3. **CONTRACT TIME.**

Time of the Essence. Time is of the essence in the performance of all obligations under this Contract, and all timing requirements shall be strictly adhered to unless otherwise modified by the City in accordance with the Contract. If awarded the Contract, Bidder agrees to provide the Service within the time specified in the Invitation For Bids and Contract Documents. The Contractor shall submit all requests for extensions of time to the City, in writing, with reasonable specificity, no later than ten (10) working days after the start of the condition which purportedly caused the delay, and not later than the date on which Goods are due.

Attachment 10a

4. BID AMOUNT.

Total Bid Amount. The Bidder shall identify the Total Bid Amount, which shall equal the total dollar amount to be paid by the City to the Bidder in return for the Bidder's performance of all Work in accordance with the Contract Documents (and payment of all Bidder's costs required therefore, whether or not specifically identified herein). The Total Bid Amount may also be referred to in the Contract Documents as the Contract Amount.

Taxes. Contractor shall pay all applicable state and local taxes. The City of Fremont is exempt from Federal Excise Tax (Registration Number 94830067K). A copy of the exemption certificate is available upon request.

Packaging and Transportation Costs. Contractor shall pay all packaging, boxing, crating, cartage, handling, insurance, transportation, loading, and unloading to the delivery points identified in the Contract Documents. Unless otherwise specifically identified, all shipments shall be F.O.B. to the Destination identified on the Purchase Order, inside delivery.

Unit Price Bids. For each bid item identified in the Bid Spreadsheet (section 5, below), the Bidder shall provide a bid item unit price and a bid amount extension (bid item unit price multiplied by unit quantities equals bid amount extension). In case of a math error or ambiguity, bid item unit prices shall prevail over the bid amount extensions, and bid amount extensions shall prevail over the Total Bid Amount.

Modification of Unit Quantities. Until the City's award of the contract for this Project, the City reserves the right to modify the unit quantities by providing prior written notice to the Bidder. Modifications to the unit quantities made in accordance with this section shall not exceed 25% per bid item. Bidder agrees to provide the bid items in the revised unit quantities for the unit price set forth in the Bid Spreadsheet (and the Total Bid Amount to be paid by the City to the Contractor shall be modified accordingly).

Pricing.

Bid price should remain firm throughout the terms of the agreement.

Alternate Bids. If the Bid form does not specifically identify alternate bid items, alternate bids proposed by the Bidder shall not be considered by the City. However, if the Bid form does specifically identify alternate bid items, the Bidder shall set forth an Alternate Item Amount for each Alternate Item. For the purpose of determining the "Lowest Monetary Bidder" for Alternate Bid Items, in accordance with the Instructions to Bidders, the City will follow: the "Formula Method" identified below.

Formula Method. If the City follows the Formula Method, the Project Manager shall announce the amount of revenue available for the Project prior to the bid opening. The Lowest Monetary Bidder shall be the bidder with the lowest Total Bid Amount; provided, however, if the City determines that there is insufficient revenue available to fund the Total Bid Amount, the City may remove Alternate Items in accordance with this subsection, and recalculate the Lowest Monetary Bidder, accordingly. To the extent that alternates are removed in accordance with this subsection, the City shall remove alternates one at a time beginning with the last alternate (as listed in section 5, below), recalculate the Lowest Monetary Bidder accordingly, and compare with the amount of revenue available to fund the Project.

Local Business Preference. Pursuant to Fremont Municipal Code section 2-9404(f), for the purpose of comparing bid amounts, the City shall deduct one percent from the Total Bid Amount of any local owned business (as defined in Fremont Municipal Code section 2-9101).

Attachment 10a

Reference: - Provide a list of at least three (3) references of other contracts, similar in scope to this project, which have been performed within the past three (3) years. References shall include the dates of work, scope of work, company name, address, telephone number and contact person of customers whom bidder authorizes the City to contact.

Cash Discounts. Must be indicated by filling in blanks on bottom section of Bid Sheet labeled "Cash Discounts". City's standard payment terms are net 30 days, as set forth on the Purchase Order. We will accept discount on payment terms, however they will not be a factor in determine the lowest monetary bidder.

Bid Sheet. Bidder hereby offers to provide to the City the Goods required by the Contract Documents (as defined in the Supplemental Instructions to Bidders), for the amounts quoted in this Bid, on Bid Sheet.

5. **REPRESENTATIONS OF BIDDER.**

By submitting this Bid, Bidder declares under penalty of perjury the following representations are true and correct:

Bidder has read and understands all requirements of the Contract Documents, and this Bid is made in accordance with those requirements. The Contract Documents are more particularly defined in the Supplemental Instructions to Bidders.

Any questions by the Bidder regarding the meaning of any part of the Contract Documents have been submitted, in writing, by the Bidder to the City, pursuant to section 2 of the Instructions to Bidders.

Bidder is familiar with all the conditions related to the proposed work, including the availability of labor, materials (including transportation, handling, delivery, and storage), equipment, and utilities (including water and electricity), and is familiar with local conditions (including weather, road access and truck routes) as related to requirements of the Contract Documents.

The Bid is based upon the materials, equipment, and systems required by the Bidding Documents.

The Contract Time, as specified in the Invitation For Bids, is reasonable for performing the Work and that Contractor is able to perform the Work within the Contract Time.

Bidder has the expertise and financial capacity to perform and complete all obligations required by the Contract Documents.

Bidder is aware of and, if awarded the Contract, will comply with applicable legal requirements, including all City Regulations (including payment of City business license tax) in its performance of the Work.

Pursuant to Government Code Section 4552, in submitting a Bid to the City, Bidder offers and agrees that, if the Bid is accepted, it will assign to the City all rights, title and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 U.S.C., Section 15) or under the Cartwright Act (Chapter 2 [commencing with Section 16700] of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, materials, or services by Bidder for the sale

Attachment 10a

to City pursuant to the Bid. Such assignment shall be made and become effective at the time City tenders final payment to Bidder.

Bidder acknowledges that, unless the bidder submits a request for substitution of “equal” materials in accordance with the requirements of the Contract, and unless the City approves the substitution, the Bidder / Contractor shall furnish and install the specified material for the Bid Amount.

IN WITNESS WHEREOF, the individuals signing this Bid represent and warrant that they have the right, power, legal capacity, and authority to sign this Bid on behalf of the Bidder, and have caused this Bid to be executed by setting hereto their names, titles, and signatures at _____ County, in the State of _____.

BIDDER:

UNIVERSAL WASTE RECYCLING IN THE TRI-CITY AREA (For Residents & Businesses)

It is illegal to place Universal Waste in the trash! U-wastes are products commonly used by the general public that, when disposed of, are regulated as hazardous wastes because they contain either corrosive chemicals or toxic heavy metals. Although U-wastes pose a lower risk than other hazardous wastes, they cannot be put in the trash since they can still harm people and the environment. U-wastes must be recycled at a facility that accepts them – This guide provides a list of local recycling vendors.

Disclaimer: The information in this guide should not be construed as a recommendation or endorsement by the City of Fremont or the Environmental Services Division. The listings represented are not intended to be a complete guide to all such services available. The City of Fremont is not liable for any omissions or errors in this list, nor can we guarantee the accuracy of the information regarding materials, services, or products.

Important: Call individual companies for more information about what they will accept, minimum amounts, fee schedules, and hours of operation.

BATTERIES, FLUORESCENT LAMPS & OTHER U-WASTE

UNIVERSAL WASTE RECYCLING IN THE TRI-CITY AREA (For Residents & Businesses)

ELECTRONICS

Note on cell phone and rechargeable battery recycling: As of July 1st, 2006, Retail businesses that sell rechargeable batteries and cell phones are required to take them back for recycling. Although by law businesses are supposed to offer this service, we encourage you to confirm with the individual business beforehand.
