

**Table 4-5: Conditions that Require Monthly Monitoring of Toxicity Levels**

| Discharger Monitoring Frequency  | Shallow Water Dischargers | Deep Water Dischargers |
|----------------------------------|---------------------------|------------------------|
| <b>QUARTERLY</b>                 |                           |                        |
| Three-sample median <sup>a</sup> | >1 TU <sub>C</sub>        | >10 TU <sub>C</sub>    |
| Single-sample maximum            | >2 TU <sub>C</sub>        | >20 TU <sub>C</sub>    |
| <b>SEMI-ANNUALLY OR ANNUALLY</b> |                           |                        |
| Single-sample maximum            | >1TU <sub>C</sub>         | >10 TU <sub>C</sub>    |

<sup>a</sup>. Exceedance of the three-sample median is defined as follows: If one of the past two or fewer samples shows greater than the toxicity threshold listed above, then a chronic toxicity value greater than the threshold on the next sample represents an exceedance.
