RICHARD A. GARBARINO, MAYOR
MARK ADDIEGO, VICE MAYOR
PRADEEP GUPTA, PH.D., COUNCILMEMBER
KARYL MATSUMOTO, COUNCILMEMBER
LIZA NORMANDY, COUNCILMEMBER

MIKE FUTRELL, CITY MANAGER

OFFICE OF THE SUPERINTENDENT OF
WATER QUALITY CONTROL
(650) 877-8555
FAX (650) 829-3855

September 11, 2015

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: City of South San Francisco
FY 2014/15 Annual Report

Dear Mr. Wolfe:

This letter and Annual Report with attachments is submitted by the City of South San Francisco pursuant to Permit Provision C.16.a of the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2009-0074, NPDES Permit No CAS612008 issued by the San Francisco Bay Regional Water Quality Control Board. The Annual Report provides documentation of compliance activities conducted during FY 2014/15 and related accomplishments.

Please contact me at 650-829-3840 regarding any questions or concerns.

Sincerely,

Andrew Wemmer
Environmental Compliance Supervisor

**CITY OF SOUTH SAN FRANCISCO
FY 2014/15 ANNUAL REPORT**

Certification Statement

"I certify, under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted, is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Signature of Duly Authorized Representative:

Andrew Wemmer
Environmental Compliance Supervisor

Background Information					
Permittee Name:	City of South San Francisco				
Population:	66,174				
NPDES Permit No.:	CAS612008				
Order Number:	R2-2009-0074R				
Reporting Time Period (month/year):	July 2014 through June 2015				
Name of the Responsible Authority:	Mike Futrell	Title:	City Manager		
Mailing Address:	400 Grand Avenue				
City:	South San Francisco	Zip Code:	94080	County:	San Mateo
Telephone Number:	(650) 877-8500	Fax Number:	(650) 839-6609		
E-mail Address:	Mike.Futrell@ssf.net				
Name of the Designated Stormwater Management Program Contact (if different from above):	Andrew Wemmer	Title:	Environmental Compliance Supervisor		
Department:	Public Works/WQCP				
Mailing Address:	195 Belle Air Road				
City:	South San Francisco	Zip Code:	94080	County:	San Mateo
Telephone Number:	(650) 829-3840	Fax Number:	(650) 829-3855		
E-mail Address:	Andrew.Wemmer@ssf.net				

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:
 The City of South San Francisco participated in the SMCWPPP Public Works Municipal Maintenance Subcommittee in FY 14-15. Refer to the C.2 Municipal Operations section of the SMCWPPP FY 14-15 Annual Report for a description of activities implemented at the countywide and/or regional level.

C.2.a. ► Street and Road Repair and Maintenance

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
Y	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
Y	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

NA	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
Y	Control of discharges from graffiti removal activities
Y	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
Y	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
Y	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.

Comments:
Bridges located in South San Francisco's service area are owned and operated by either San Mateo County or Caltrans.

C.2.d. ► Stormwater Pump Stations					
Does your municipality own stormwater pump stations:		<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
If your answer is No then skip to C.2.e.					
Complete the following table for dry weather DO monitoring and inspection data for pump stations ¹ (add more rows for additional pump stations). If a pump station is exempt from DO monitoring, explain why it is exempt. Do not leave any cells blank.					
Pump Station Name and Location	First inspection Dry Weather DO Data		Second inspection Dry Weather DO Data		
	Date	mg/L	Date	mg/L	
Airport North (#1)	8/5/14	3.7	5/14/15	3.17	
Airport South (#2)	8/5/14	3.4	5/14/15	3.21	
Shaw Road	8/5/14	4.4	5/14/15	3.06	
South Maple	8/5/14	3.6	5/14/15	3.61	
South Linden (Lindenville)	8/5/14	5.8	5/14/15	3.12	
San Mateo Avenue	8/5/14	5.1	5/14/15	3.37	
South Airport Blvd	8/5/14	4.1	5/14/15	3.21	
Produce Avenue	8/5/14	4.8	5/14/15	4.23	
South Canal – Closed – Not in Operation	N/A	N/A	N/A	N/A	
Granite Rock – Closed – Not in Operation	N/A	N/A	N/A	N/A	
Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:					
Summary:					
Attachments:					

¹ DO monitoring is exempted where all discharge from a pump station remains in a stormwater collection system or infiltrates into a dry creek immediately downstream.

Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	Date (2x/year required)	Presence of Trash (Cubic Yards)	Presence of Odor (Yes or No)	Presence of Color (Yes or No)	Presence of Turbidity (Yes or No)	Presence of Floating Hydrocarbons (Yes or No)
Airport Blvd Northbound – 54 Airport Blvd.	11/14/14	<0.184	No	No	No	No
Airport Blvd Southbound – 125 Airport Blvd.	11/14/14	<0.184	No	No	No	No
Shaw Road – 291 Shaw Road	11/14/14	0.184	Yes	No	No	Yes - Low
South Maple – Near 270 South Maple Avenue	11/14/14	<0.184	No	No	No	Yes - Low
South Linden Pump Station – Near 31 South Linden Avenue	11/14/14	1.3 – 1.84	Yes	No	No	Yes - Low
San Mateo Avenue Pump Station – Near 1481 San Mateo Avenue	11/14/14	0.368	No	No	No	No
South Airport Blvd Pump Station – 245 South Airport Blvd.	11/14/14	None	No	No	No	No
Produce Avenue Pump Station – Near 130 Produce Avenue	11/14/14	None	No	No	Yes	No
Airport Blvd Northbound – 54 Airport Blvd.	2/10/15	None	No	Yes	Yes	No
Airport Blvd Southbound – 125 Airport Blvd.	2/10/15	<0.184	No	No	No	Yes - Low
Shaw Road – 291 Shaw Road	2/10/15	None	No	No	No	No
South Maple – Near 270 South Maple Avenue	2/10/15	None	Yes	Yes	Yes	Yes - Low
South Linden Pump Station – Near 31 South Linden Avenue	2/10/15	1.47 – 1.84	Yes	No	No	Yes - Low
San Mateo Avenue Pump Station – Near 1481 San Mateo Avenue	2/10/15	<0.184	Yes	Yes	No	No
South Airport Blvd Pump Station – 245 South Airport Blvd.	2/10/15	None	No	Yes	No	No
Produce Avenue Pump Station – Near 130 Produce Avenue	2/10/15	None	Yes	Yes	No	No

C.2.e. ► Rural Public Works Construction and Maintenance			
Does your municipality own/maintain rural ² roads:		<input type="checkbox"/>	Yes
		<input checked="" type="checkbox"/>	No
If your answer is No then skip to C.2.f.			
Place a Y in the boxes next to activities where applicable where applicable BMPs were implemented. If not applicable, type NA in the box and provide an explanation in the comments section below. Place an N in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.			
<input type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas		
<input type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources		
<input type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts		
<input type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality		
<input type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion		
<input type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate		
<input type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings		
Comments including listing increased maintenance in priority areas:			

²Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation			
Place an X in the boxes below that apply to your corporations yard(s):			
<input type="checkbox"/>	We do not have a corporation yard		
<input type="checkbox"/>	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit		
<input checked="" type="checkbox"/>	We have a Stormwater Pollution Prevention Plan (SWPPP) for the Corporation Yard(s)		
Place an X in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type NA in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:			
<input checked="" type="checkbox"/>	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment		
<input checked="" type="checkbox"/>	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system		
<input checked="" type="checkbox"/>	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method		
<input checked="" type="checkbox"/>	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used		
<input checked="" type="checkbox"/>	Cover and/or berm outdoor storage areas containing waste pollutants		
Comments: All areas of the Corporation Yard utilized acceptable BMPs.			
If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:			
Corporation Yard Name	Inspection Date (1x/year required)	Inspection Findings/Results	Follow-up Actions
City of South San Francisco Corporation Yard	9/20/14	All areas of the Corporation Yard utilized acceptable BMPs.	No follow-up actions required.

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.b.v.(2)(a) ► Green Streets Status Report
 (All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary:

The City Of South San Francisco does not have a pilot green street project within its jurisdiction.

The C.3 New Development and Redevelopment section of the Countywide program's FY 14-15 Annual Report includes a description of activities conducted at the countywide or regional level.

C.3.b.v.(1) ► Regulated Projects Reporting

Fill in attached table C.3.b.v.(1) or attach your own table including the same information.
 See attached table C.3.b.v.(1).

C.3.e.v. ► Alternative or In-Lieu Compliance with Provision C.3.c.

(For FY 11-12 Annual Report and each Annual Report thereafter)
 Is your agency choosing to require 100% LID treatment onsite for all Regulated Projects and not allow alternative compliance under Provision C.3.e.?

	Yes	X	No
--	-----	---	----

Comments (optional):

C.3.e.vi ► Special Projects Reporting

1. Has your agency received, but not yet granted final discretionary approval of, a development permit application for a project that has been identified as a potential Special Project based on criteria listed in MRP Provision C.3.e.ii(2) for any of the three categories of Special Projects (Categories A, B or C)?	X	Yes		No
2. Has your agency granted final discretionary approval of a project identified as a Special Project in the March 15, 2015 report? If yes, include the project in both the C.3.b.v.(1)Table, and the C.3.e.vi. Table.	X	Yes		No
<p>If you answered "Yes" to either question,</p> <p>1) Complete Table C.3.e.vi .below.</p> <p>2) Attach narrative discussion of 100% LID Feasibility or Infeasibility for each project.</p> <p>See Attachment E for discussion on the two special projects reported.</p>				

C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

<p>(1) Fill in attached table C.3.h.iv.(1) or attach your own table including the same information.</p> <p>See Table C.3.h.iv (1) for a list of Operation and Maintenance Inspections of stormwater treatment measures conducted during FY 14-15 in the City of South San Francisco.</p>
<p>(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.</p>
<p>Summary:</p> <p>The City of South San Francisco performed 44 O & M device inspections in 2014/2015. Of the 44 inspections performed, 4 devices required maintenance. The devices that required maintenance this FY were vault-based systems. The vegetation-based systems were all in good working order. In FY 13/14, there were 2 treatment systems requiring maintenance, compared to 4 systems in FY in 14/15. Overall, the majority of treatment systems are kept in good working order.</p>

(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

Summary:
The City has developed a spreadsheet listing all facilities and the treatment systems associated with those facilities. At this time, the City of South San Francisco has approximately 85 treatment systems installed. The inspectors do occasionally locate additional treatment systems that are not on the spreadsheet when performing other stormwater inspections. These systems are added to the spreadsheet when they are located. Environmental Compliance Inspectors perform O&M inspections at a rate of 16-30 or more devices every year. The facility list is reviewed and updated as new systems are installed and additional systems are located.

There are no proposed changes or improvements to the O&M Program at this time.

(4) During the reporting year, did your agency:

• Inspect all newly installed stormwater treatment systems and HM controls within 45 days of installation?	X	Yes		No		Not applicable. No new facilities were installed.
• Inspect at least 20 percent of the total number of installed stormwater treatment systems or HM controls? ³	X	Yes		No		Not applicable. No treatment measures
• Inspect at least 20 percent of the total number of installed vault-based systems?	X	Yes		No		Not applicable. No vault systems.

If you answered "No" to any of the questions above, please explain:

³If there is only 1 treatment measure in the jurisdiction, the agency must inspect it every year.

C.3.i. ► Required Site Design Measures for Small Projects and Detached Single Family Home Projects

On an annual basis, discuss the implementation of the requirements of Provision C.3.i, including ordinance revisions, permit conditions, development of standard specifications and/or guidance materials, and staff training.

Summary:

BASMAA prepared standard specifications in four fact sheets regarding the site design measures listed in Provision C.3.i, as a resource for Permittees. We have modified local policies/procedures and forms/checklists to require all applicable projects approved after December 1, 2012 to implement at least one of the site design measures listed in Provision C.3.i.

We are using the following Program and BASMAA products for C.3.i implementation:

- **BASMAA's site design fact sheets**
- **The countywide program's checklist [SMCWPPP Stormwater Checklist for Small Projects]**
- **C.3.i guidance provided by the countywide program [SMCWPPP C.3. Technical Guidance manual/Appendix L]**

Comments:											

¹⁰Include cross streets

¹¹If a project is being constructed in phases, indicate the phase number and use a separate row entry for each phase. If not, enter "NA".

¹²Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.

¹³State the watershed(s) in which the Regulated Project is located. Downstream watershed(s) may be included, but this is optional.

¹⁴All impervious surfaces added to any area of the site that was previously existing pervious surface.

¹⁵All impervious surfaces added to any area of the site that was previously existing impervious surface.

¹⁶For redevelopment projects, state the pre-project impervious surface area.

¹⁷For redevelopment projects, state the post-project impervious surface area.

Permittee Name: _____

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period (private projects)

Project Name Project No.	Application Deemed Complete Date ¹⁸	Application Final Approval Date ¹⁹	Source Control Measures ²⁰	Site Design Measures ²¹	Treatment Systems Approved ²²	Type of Operation & Maintenance Responsibility Mechanism ²³	Hydraulic Sizing Criteria ²⁴	Alternative Compliance Measures ^{25/26}	Alternative Certification ²⁷	HM Controls ^{28/29}
Private Projects										
101 Oyster Point	9/25/12	2/26/14 Site work and LID plans approved 2/4/15	Storm drain stenciling Use of efficient landscape irrigation systems, drought tolerant plants and minimize use of pesticides & fertilizers Direct downspouts away from loading dock area Discharge fire sprinkler test water to sanitary sewer	Direct runoff from parking lot, sidewalk, walkway and roof into vegetated area Plant interceptor trees Use micro-detention including landscaped based detention Protection of sensitive areas and minimize changes	Bioretention area	O & M Agreement	C.3.d.i.2.c	N/A	N/A	N/A

¹⁸For private projects, state project application deemed complete date. If the project did not go through discretionary review, report the building permit issuance date.

¹⁹For private projects, state project application final discretionary approval date. If the project did not go through discretionary review, report the building permit issuance date.

²⁰List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

²¹List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

²²List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

²³List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

²⁴See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

²⁵For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

²⁶For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

²⁷Note whether a third party was used to certify the project design complies with Provision C.3.d.

²⁸If HM control is not required, state why not.

²⁹If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

³²List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

³³List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

³⁴List the legal mechanism(s) (e.g., maintenance plan for O&M by public entity, etc..) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

³⁵See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

³⁶For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

³⁷For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

³⁸Note whether a third party was used to certify the project design complies with Provision C.3.d.

³⁹If HM control is not required, state why not.

⁴⁰If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

Permittee Name: _____

C.3.h.iv. ► Table of Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table below or attach your own table including the same information.

Name of Facility/Site Inspected	Address of Facility/Site Inspected	Newly Installed? (YES/NO) ⁴¹	Party Responsible ⁴² For Maintenance	Date of Inspection	Type of Inspection ⁴³	Type of Treatment/HM Control(s) Inspected ⁴⁴	Inspection Findings or Results ⁴⁵	Enforcement Action Taken ⁴⁶	Comments/Follow-up
Westborough Square	2234 Westborough Blvd.	No	American National insurance	6/1/2015	45 Day	2-Vortex separators 6-Bioretenion areas	No problems found	none

C.3.e.vi.Special Projects Reporting Table												
Reporting Period –January1 – June 30, 2015												
Project Name & No.	Permittee	Address	Application Submittal Date ⁴⁷	Status ⁴⁸	Description ⁴⁹	Site Total Acreage	Density DU/Acre	Density FAR	Special Project Category ⁵⁰	LID Treatment Reduction Credit Available ⁵¹	List of LID Stormwater Treatment Systems ⁵²	List of Non-LID Stormwater Treatment Systems ⁵³
889 McLellan	City of South San Francisco	889 McLellan Rd.	Final approval by City Council in March 2011.	Project was put on hold due to economic conditions. City started conversation with Developer in December of 2013 when notified that the project was going forward. Submitted Building Permit application in January 2014. Project review comments were sent back to developer. Project is on hold as of 8/27/15	Mixed use: 5,200 sq. ft. retail. 20 condos on 2 stories above the retail space. Underground parking below retail.	0.40 Acres	50 DU/Acre	FAR-1.6-2.3 Dependent upon final build-out approval	Category C: Transit-Oriented Development; Non-auto related use Location: at least 50% of project is within 0.25 miles of a transit hub Density: FAR of 2.3:1 Parking: no surface parking	Category C: 80% allowable credit Location: 50% Density: 10% Parking: 20% 0.56	Site is currently designed for 100% LID treatment by bio-infiltration or flow-through planters Site is currently under review	None

⁴⁷ Date that a planning application for the Special Project was submitted.

⁴⁸ Indicate whether final discretionary approval is still pending or has been granted, and provide the date or version of the project plans upon which reporting is based.

⁴⁹ Type of project (commercial, mixed-use, residential), number of floors, number of units, type of parking, and other relevant information.

⁵⁰ For each applicable Special Project Category, list the specific criteria applied to determine applicability. For each non-applicable Special Project Category, indicate n/a.

⁵¹ For each applicable Special Project Category, state the maximum total LID Treatment Reduction Credit available. For Category C Special Projects also list the individual Location, Density, and Minimized Surface Parking Credits available.

⁵² List all LID stormwater treatment systems proposed. For each type, indicate the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area.

⁵³ List all non-LID stormwater treatment systems proposed. For each type of non-LID treatment system, indicate: (1) the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area, and (2) whether the treatment system either meets minimum design criteria published by a government agency or received certification issued by a government agency, and reference the applicable criteria or certification.

Project Name & No.	Permittee	Address	Application Submittal Date ⁵⁴	Status ⁵⁵	Description ⁵⁶	Site Total Acreage	Density DU/Acre	Density FAR	Special Project Category ⁵⁷	LID Treatment Reduction Credit Available ⁵⁸	List of LID Stormwater Treatment Systems ⁵⁹	List of Non-LID Stormwater Treatment Systems ⁶⁰
Miller Avenue Senior Housing	City of South San Francisco	Miller Ave.	6/30/15	City started conversation with Developer in June of 2015 when notified that the project was going forward with entitlements. Final discretionary approval not yet issued.	Mixed Use Facility office and parking garage on ground floor with 91 units of affordable senior housing above	0.56 Acres	Proposed minimum 2:1	FAR-2:1 Dependent upon final build-out approval	Category C: Transit-Oriented Development; Non-auto related use Location: At least 50% of project is within 0.50 miles of a transit hub Density: FAR of 2:1 Parking: No surface parking	Category C: 55% allowable credit Location: 25% Density: 10% Parking: 20%	Flow-through planter 73%	Media Filter 27% Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program

⁵⁴ Date that a planning application for the Special Project was submitted.

⁵⁵ Indicate whether final discretionary approval is still pending or has been granted, and provide the date or version of the project plans upon which reporting is based.

⁵⁶ Type of project (commercial, mixed-use, residential), number of floors, number of units, type of parking, and other relevant information.

⁵⁷ For each applicable Special Project Category, list the specific criteria applied to determine applicability. For each non-applicable Special Project Category, indicate n/a.

⁵⁸ For each applicable Special Project Category, state the maximum total LID Treatment Reduction Credit available. For Category C Special Projects also list the individual Location, Density, and Minimized Surface Parking Credits available.

⁵⁹ List all LID stormwater treatment systems proposed. For each type, indicate the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area.

⁶⁰ List all non-LID stormwater treatment systems proposed. For each type of non-LID treatment system, indicate: (1) the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area, and (2) whether the treatment system either meets minimum design criteria published by a government agency or received certification issued by a government agency, and reference the applicable criteria or certification.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

Program Highlights

Provide background information, highlights, trends, etc.

Each year, the business inspection plan (Attachment A) is reviewed to make sure that it continues to meet the needs of the industrial and commercial inspection program. The facilities list (Attachment B) is reviewed to determine the inspection frequencies and priorities for the coming fiscal year. The facility spreadsheet is updated as needed. A list of facilities to be inspected for the next fiscal year is generated between June and August (Attachment C). Inspectors work from this spreadsheet. Businesses are lined out as they are inspected. A master inspection spreadsheet is also updated after each inspection or at the end of each day. The findings of each inspection are summarized on the spreadsheet. More details are included on the inspection forms. Follow-up inspections are performed as needed. Environmental Compliance staff member Andrew Wemmer participated in the CII Subcommittee in FY 13-14. Inspectors go to trainings as they are offered on a countywide/ regional basis.

Refer to the C.4. Industrial and Commercial Site Controls section of the countywide Program’s FY 14-15 Annual Report for a description of activities of the countywide program and/or the BASMAA Municipal Operations Committee.

C.4.b.i. ► Business Inspection Plan

Do you have a Business Inspection Plan? See Attachment A Yes No

If No, explain:

C.4.b.iii.(1) ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

Please see Attachment B for a list of industrial and commercial facilities in the City of South San Francisco’s Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

C.4.b.iii.(2) ► Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

Please see Attachment C for a list of facilities scheduled for inspection during the current fiscal year 2015/2016.

C.4.c.iii.(1) ► Facility Inspections		
Fill out the following table or attach a summary of the following information. Indicate your violation reporting methodology below.		
<input checked="" type="checkbox"/>	Permittee reports multiple discrete violations on a site as one violation.	
<input type="checkbox"/>	Permittee reports the total number of discrete violations on each site.	
	Number	Percent
Number of businesses inspected	239	
Total number of inspections conducted	275	
Number of violations (excluding verbal warnings)	5	
Sites inspected in violation	5	2.09
Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	5	100
Comments: Comments: Sites inspected found in violation are reported as one violation per site, even if multiple discrete violations are documented. The number of inspections exceeds the number of businesses inspected because of follow-up inspections that were performed to verify that maintenance or enforcement actions have been completed or resolved. Any violation not resolved at the time of a follow-up inspection is considered to be part of the original violation, so is not counted separately. All violations were resolved within 10 days or otherwise deemed resolved in a longer but still timely manner. There were 38 verbal warnings, these are not considered violations. There were 5 Notices of Violation (NOVs), 3 of which also including Administrative Citations. These are considered violations.		

C.4.c.iii.(2) ► Frequency and Types/Categories of Violations Observed	
Fill out the following table or attach a summary of the following information.	
Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. active non-stormwater discharge or clear evidence of a recent discharge)	4
Potential discharge and other	1
Comments: Four of the violations consisted of wash waters that were discharged to the storm drain. One of the violations consisted of poor BMPs causing potential release of materials to the storm drain system/Colma Creek (grease waste). Discharge streams are counted as one discharge per inspection per site. "Actual discharges" are active, non-stormwater discharges or clear evidence of recent discharges. If the city encounters multiple violations on a site they are counted as one violation.	

C.4.c.iii.(2) ► Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP) ⁵⁵	Number of Enforcement Actions Taken	% of Enforcement Actions Taken ⁵⁶
Level 1	Verbal Warnings/Warning Letters/NOVs	43	93%
Level 2	Administrative Citation	3	7%
Level 3	Compliance Meeting/Cease & Desist Order/Notice to Abate/Stop Work Order	0	0%
Level 4	Criminal Penalties/Civil Injunctions	0	0%
Total		46	100%

C.4.c.iii.(3) ► Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category ⁵⁷	Number of Actual Discharge Violations	Number of Potential/Other Discharge Violations
Restaurants	2	1
Hotels	0	0
Auto Repair	1	0
All Others	1	0

C.4.c.iii.(4) ► Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

⁵⁵Agencies to list specific enforcement actions as defined in their ERPs.

⁵⁶Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

⁵⁷List your Program's standard business categories.

C.4.d.iii ► Staff Training Summary				
Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Workshop on the New General Industrial Storm Water Permit	3/17/15	New requirements in the Industrial General Storm Water permit that impact industrial facility operations. Resources/info for Inspectors for inspection of NOI facilities.	2	66%

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

Program Highlights
Provide background information, highlights, trends, etc.
<p>1) The City of South San Francisco has an ongoing program for reporting illicit discharges within the City. When the street crew observes an illicit discharge or a suspected illicit discharge in the course of performing regularly scheduled maintenance, they call on the Environmental Compliance Inspectors to investigate. Additionally, Inspectors participate in a quarterly creek walk along Colma Creek with County of San Mateo staff, enabling Inspectors to identify problem areas containing evidence of past discharges. Residents of South San Francisco also call the Street Department or the WQCP to report illicit discharges/potential discharges.</p> <p>The WQCP maintains a stormwater hotline for residents to report suspected illicit discharges. The hotline is publicized on the City’s website, and is printed on outreach materials such as brochures, reusable shopping bags, sponges, pencils, erasers and more. The Inspectors follow up on these reports as well.</p> <p>The City of South San Francisco performed a storm system screening on April 21 – April 23, 2015. The storm system screening covered 12 outfalls, consisting of Sonora and Ramona Streets, South Maple Stormwater Pump Station, S. Canal and S. Linden, W. Harris and Mitchell, 300 Utah, End of Haskins Way, Gull Drive, Produce Avenue Stormwater Pump Station, Lindenville Stormwater Pump Station, Shaw Road Stormwater Pump Station, South Airport Blvd Pump Station and the San Mateo Avenue Pump Station. The flows varied from none to steady. Trash was detected in seven out of twelve outfalls. Five outfalls had a low level of trash. Two of the outfalls had high levels of trash, captured in the partial trash capture devices at each of the outfalls. Odor was detected at two of the outfalls. Color was detected at one of the outfalls. Turbidity was observed at two outfalls. Hydrocarbon sheen was observed at four of the outfalls. There was no evidence of Illicit Discharge or Illegal Dumping at any of the outfalls.</p> <p>2) Environmental Compliance Supervisor Andrew Wemmer participated in the CII Subcommittee in FY 14-15.</p> <p>3) Refer to the C.5 Illicit Discharge Detection and Elimination section of the SMCWPPP FY 14-15 Annual Report for description of activities at the countywide or regional level.</p>

C.5.c.iii ► Complaint and Spill Response Phone Number and Spill Contact List		
List below or attach your complaint and spill response phone number and spill contact list.		
Contact	Description	Phone Number
Andrew Wemmer	Environmental Compliance Supervisor	(650) 829-3840
Rob Lecel	Senior Environmental Compliance Inspector	(650) 829-3882
Nelson Yuk	Environmental Compliance Inspector	(650) 829-3881
Water Quality Control Plant	During Normal Business Hours	(650) 877-8555
Stormwater Hotline	Monday-Friday 7:30AM-3:30PM	(650) 829-3848
Plant Operations	After hours and weekends	(650) 877-8556
South San Francisco Police Dept.	After hours and weekends	(650) 877-8900

C.5.d.iii ► Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description:

Inspectors regularly conduct surveillance. If they discover a mobile cleaner allowing wash water to flow to a storm drain in South San Francisco, the Inspector stops and requires any discharge to be curtailed and immediately cleaned up. Inspectors distribute and discuss required BMPs, and an NOV is generally issued. When a mobile cleaner inquires about required BMPs, we inform them of the minimum standards and direct them to the BASMAA Pollution Prevention Training Program for surface washers.

The City of South San Francisco created a brochure entitled “Wash Water Disposal Practices for Mobile Surface Cleaners” during 2009/2010. This brochure and/or the SMCWPPP brochure titled “Best Management Practices for Mobile Businesses” is given to mobile surface cleaners when issues arise in the field or when we are contacted by a mobile surface cleaner.

In order to share information on mobile business illicit discharges regionally, instances of noncompliance are entered into the recently developed Mobile Business Enforcement Information Table located on the members-only section of the SMCWPPP website.

The City contracts with Fleetwash to perform sidewalk cleaning along Grand Avenue in South San Francisco. Fleetwash is not a certified Mobile Cleaner. Fleetwash’s Standard Operating Procedure is:

- Evaluate site for recovery setup and pedestrian safety. Report any visible spills or leaks to on-site representative.
- Seal all storm drains and strip drains in the washing area.
- Set up a vacuum pod system with berms and suction mat. Eliminate the possibility of any discharges to any storm drains.
- Start vacuum system.
- Pre-treat stains with surface appropriate detergent.
- Start pressure washer. Power wash stains and surrounding area using hot water. Using the wand, sweep detergent, debris, and water toward recovery pods. Check vacuum operation and effectiveness, reposition pods if necessary.
- Collect all wash water from cleaning operation.
- Leave site litter free with no puddles of standing water.
- Complete work-order and include recovery gallons.
- Discharge water at a Fleetwash approved dumpsite.

If an Inspector observes Fleetwash allowing wash water to flow to a storm drain, the Inspector requires the discharge to be stopped and immediately cleaned up. Inspectors will provide and review the required BMPs and the Fleetwash SOP with the discharger, and generally issue an NOV.

Refer to the C.5 Illicit Discharge Detection and Elimination section of the SMCWPPP FY 14-15 Annual Report for a description of efforts by the Commercial, Industrial and Illicit Discharge (CI) Subcommittee and the BASMAA Municipal Operations Committee to address mobile businesses.

C.5.e.iii ► Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description:

The City of South San Francisco performs collection system screening on an annual basis. The City of South San Francisco performed a storm system screening on April 21 – 23, 2014. The storm system screening covered 12 outfalls, consisting of Sonora and Ramona Streets, South Maple Stormwater Pump Station, S. Canal and S. Linden, W. Harris and Mitchell, 300 Utah, End of Haskins Way, Gull Drive, Produce Avenue Stormwater Pump Station, Lindenville Stormwater Pump Station, Shaw Road Stormwater Pump Station, South Airport Blvd Pump Station and the San Mateo Avenue Pump Station. The flows varied from none to steady. Trash was detected in seven out of twelve outfalls. Five outfalls had a low level of trash. Two of the outfalls had high levels of trash, captured in the partial trash capture devices at each of the outfalls. Odor was detected at two of the outfalls. Color was detected at one of the outfalls. Turbidity was observed at two outfalls. Hydrocarbon sheen was observed at four of the outfalls. There was no evidence of Illicit Discharge or Illegal Dumping at any of the outfalls.

There are no changes planned to the screening program for 2015-2016.

Collection System Screening 4/21/15 to 4/23/15

Location	Flow	Depth of Flow (inches)	Trash Volume	Odor	Color	Turbidity	Hydrocarbon Sheen
Sonora & Ramona	Steady	2	ND	Absent	Absent	ND	ND
South Maple	None	0	Low	Absent	Absent	ND	Low
South Canal & Linden	Steady	3-4	ND	Absent	Absent	ND	ND
Harris & Mitchell	Trickle	Unknown	ND	Absent	Absent	ND	ND
End of Haskins	None	0	ND	Absent	Absent	ND	ND
300 Utah-partial trash capture device	None	Unknown	*High	Present	Unknown	Unknown	Low
Gull Drive	Trickle	Unknown	Low	Absent	Absent	ND	ND
Produce Ave Pump Station	Trickle	0	Low	Absent	Absent	ND	ND
South Airport Blvd Pump Station	None	0	ND	Absent	Absent	ND	ND
San Mateo Ave Pump Station	None	0	Low	Absent	Absent	ND	ND
Lindenville Pump Station	None	0	*High	Present	Present	Low	Low
Shaw Road Pump Station	None	0	Low	Absent	Absent	Low	Low

* Trash in capture device

C.5.f.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	29	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	23	79%
Discharges resolved in a timely manner (C.5.f.iii.(3))	29	100%

Comments:

Illicit discharges are discovered in the course of routine surveillance, in response to calls to the stormwater hotline and reports from the Public Works Department Street Crew. All tabulated discharges were reported on illicit discharge forms completed by WQCP staff. In some cases, a discharge may have reached the storm drain system, but was recovered by the street crew. Such discharges were not included in the number of discharges reaching storm drains and/or receiving water. If multiple types of discharges are observed at a location on the same report form they are counted as one discharge for the purpose of reporting in the tracking table above. However each type of discharge is counted separately in the chart below "Summary of Major Types of Discharges and Complaints". The City had 29 separate discharge complaints with 29 different types of pollutants in those complaints. 23 Notices of Violation (NOVs) and 6 Administrative Citations were issued in response to the Illicit Discharges reported above.

All reported discharges were resolved in a timely manner.

If the City receives a complaint on either the hotline or through other channels, inspectors will go out into the field and verify the claim of a discharge. All reported discharges were substantiated in the field. 79% of the discharges reached the storm drain. For the remaining 21% of the discharges there was no clear evidence that the discharge reached the storm drain.

C.5.f.iii.(4) ► Summary of major types of discharges and complaints

Provide a narrative or attach a table and/or graph.

Types of Pollutants Discharged				
Various Wash waters			19	66%
Sewage			2	7%
Construction Materials			1	3%
Vehicle Fluids			1	3%
Food Wastes			2	7%
Paint			0	0%
Sediment and/or Silt			0	0%
Industrial Wastes			0	0%
Litter and/or Debris			0	0%
Other			4	14%
Total			29	100%

Comments: The City had 29 separate discharge complaints with 29 different types of pollutants. In some cases when the inspector arrived at the source of the discharge, they found multiple types of pollutants being discharged at the same site at the time of inspection.

Section 6 – Provision C.6 Construction Site Controls

C.6.e.iii.1.a, b, c ▶ Site/Inspection Totals		
Number of High Priority Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (include only High Priority Site and sites disturbing 1 acre or more) (C.6.e.iii.1.c)
2	5	27
<p>Comments: Comments: A total of 27 construction site inspections were conducted at total of 7 sites within these categories during Fiscal Year 2014-2015. One of the sites counted as High Priority site was a demolition project deemed high priority due to non-stormwater discharges and/or proximity to Colma Creek. Of the sites that were greater than 1 acre, three sites were new projects while the other two sites were projects from the previous year.</p>		

C.6.e.iii.1.d ▶ Construction Activities Storm Water Violations		
BMP Category	Number of Violations⁵⁸ excluding Verbal Warnings	% of Total Violations⁵⁹
Erosion Control	0	0%
Run-on and Run-off Control	0	0%
Sediment Control	0	0%
Active Treatment Systems	0	0%
Good Site Management	0	0%
Non Stormwater Management	0	0%
Total⁶⁰	0	NA

⁵⁸Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category. For example, if during one inspection at a site, there are 2 erosion control violations, only 1 violation would be counted for this table.

⁵⁹Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

⁶⁰The total number of violations may count more than one violation per inspection, since some inspections may result in violations in more than one category. For example, during one inspection of a site, there may have been both an erosion control violation and a sediment control violation. For this reason, the total number of violations in this table may not match the total number of enforcement actions reported in Table C6.e.iii.1.e.

C.6.e.iii.1.e ► Construction Related Storm Water Enforcement Actions

The City of South San Francisco’s Construction Related Enforcement Actions consisted of 3 verbal notices in FY 2014-2015. Verbal notices were given to sites for maintenance or housekeeping issues viewed during the inspection.

	Enforcement Action (as listed in ERP) ⁶¹	Number Enforcement Actions Issued	% Enforcement Actions Issued ⁶²
Level 1 ⁶³	Verbal Warning/Notice of Violation	3	100%
Level 2	Administrative Citation	0	0%
Level 3	Compliance Meeting/Stop Work Order/Cease & Desist Order/Notice to Abate a Public Nuisance	0	0%
Level 4	Criminal Penalties/Civil Injunctions	0	0%
Total		3	100%

C.6.e.iii.1.f, g ► Illicit Discharges

The City of South San Francisco observed 1 potential/inferred illicit discharge at a construction site in FY 2014-2015.

	Number
Number of illicit discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.f)	1
Number of sites with discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.g)	1

⁶¹ Agencies should list the specific enforcement actions as defined in their ERPs.

⁶² Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

⁶³ For example, Enforcement Level 1 may be Verbal Warning.

C.6.e.iii.1.h, i ► Violation Correction Times		
	Number	Percent
Violations (excluding verbal warnings) fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	0	% ⁶⁴
Violations (excluding verbal warnings) not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	% ⁶⁵
Total number of violations (excluding verbal warnings) for the reporting year⁶⁶	0	100%
Comments: The City of South San Francisco did not observe any violations (aside from Verbal Warnings) at construction sites during FY 14-15.		

C.6.e.iii.(2) ► Evaluation of Inspection Data
Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).
Description: Overall there were no major problems with the construction sites in 2014/2015. The most common issues for 2014/2015 were for sediment control (track out and potential runoff) and general site maintenance. There were more regulated projects in progress in 2013/2014 than in 2014/2015 and hence fewer inspections were conducted. Based on information through the City’s Planning Committee and Building Department, it is expected that rates of new development and redevelopment will increase in the coming years as the economy continues to recover. The City will attempt to maintain a high level of scrutiny as the number of sites increases.

⁶⁴Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

⁶⁵Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

⁶⁶The total number of violations reported in the table of Violation Correction Times equals the number of initial enforcement actions. I.e., This assumes one violation is issued for several problems during an inspection at a site. The total number of violations in the table of Violation Correction Times may not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.6.e.iii.(2) ► Evaluation of Inspection Program Effectiveness

Describe what appear to be your program’s strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

The City of South San Francisco’s program is strong, with frequent inspections performed at each construction site especially during the wet weather season. Inspectors inspect each construction site before the beginning of the wet weather season, prior to qualifying rain events and several times during an extended or severe storm. They follow up at each site after the storm to determine if any repairs are necessary. Most sites are very quick to respond and repair or replace their BMPs. Occasionally there are sites that require numerous inspections to illicit a response and repair their site BMPs. Inspectors try to work with these sites to bring them back into compliance. While it may occasionally take more than 10 business days, this leeway is only given when discharge from the site is not observed. Inspectors participate in erosion control training at least once every 2 years. Inspection and enforcement data is tabulated in a construction tracking spreadsheet, which underwent minor revision in 2013-2014. The program used inspection forms that were updated in February 2011.

Refer to the C.6 Construction Site Control section of countywide program’s FY 14-15 Annual Report (if applicable) for a description of activities at the countywide or regional level.

C.6.f ► Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Stormwater Requirements for Construction Sites (CALBIG)	10/8/14	Review of SW requirements for construction sites, documenting/tracking inspections, enforcement actions and compliance strategies.	1	14%

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.ii.1 ► Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary:

In June 2015, the City of South San Francisco contracted with NCM to advertise an anti-Cigarette Butt Littering message to residents in the service area at the Tanforan Movie Theatre in San Bruno, CA. The audio/video advertisement is 15 seconds long and plays on each screen prior to the coming attractions. The video advertisement has also been posted on the City’s website at <http://www.ssf.net/2119/Outreach-Activities>. The advertisement began playing on June 26, 2015 and will play in the theatre until 6/23/16.

Advertising is also done as a countywide/regional program.

The following separate report developed by BASMAA summarizes the activities of the Regional Youth Litter Campaign:

- BASMAA Be the Street Campaign Report

C.7.b.iii.1 ► Pre-Campaign Survey

(For the Annual Report following the pre-campaign survey) Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information:

Information on the pre-campaign survey for the BASMAA Regional Youth Litter Campaign was provided in the FY 11-12 Annual Report.

Place an X in the appropriate box below:

<input type="checkbox"/>	Survey report attached
<input checked="" type="checkbox"/>	Reference to regional submittal:

C.7.b.iii.2 ► Post-Campaign Survey

(For the Annual Report following the post-campaign survey) Discuss the campaigns and the measureable changes in awareness and behavior achieved. Provide an update of outreach strategies based on the survey results. If survey was done regionally, refer to a regional submittal that contains the following information:
Information on the post-campaign survey for the BASMAA Regional Youth Litter Campaign was provided in the BASMAA FY 13-14 Annual Report.

Place an **X** in the appropriate box below:

<input type="checkbox"/>	Survey report attached
<input checked="" type="checkbox"/>	Reference to regional submittal:

C.7.c ► Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary:
The Environmental Compliance staff participated in the show “El Mundo Latino” airing on Peninsula Television on 3/7/14. Pollution Prevention and Stormwater issues were discussed with the host. Information and opportunities were provided to San Mateo County residents to assist them in protecting the environment. Since the initial taping, the episode has continued to air several additional times including FY 14-15. The show can be viewed through television and streaming via the Internet, as well as on the www.flowstobay.org website.

The City of South San Francisco began posting local and San Mateo Countywide Pollution Prevention information on social media via the City’s Facebook and Twitter accounts in FY 14-15. These outreach postings included information on the County’s Rain Barrel program (6/16/15), Car Wash Discount program (6/16/15), the City’s involvement with the San Mateo County Fair’s Pollution Prevention Booth (6/9/15) and information on safe Electronic Waste disposal (6/18/15).

The following separate report developed by BASMAA summarizes media relations efforts conducted during FY 14-15:

- **BASMAA Media Relations Final Report FY 14-15**

This report and any other media relations efforts conducted countywide is included within the C.7 Public Information and Outreach section of the Countywide Program’s FY 14-15 Annual Report.

C.7.d ► Stormwater Point of Contact

Summary of any changes made during FY 14-15:

The City of South San Francisco added an additional after hours contact phone number on the countywide website at www.flowstobay.org. No other changes were made by the City of South San Francisco in regards to the stormwater points of contact.

Refer to countywide Program’s C.7 Public Information and Outreach section of Program’s FY 14-15 Annual Report for efforts conducted by the countywide program to publicize stormwater points of contact.

C.7.e ► Public Outreach Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed. Use the following table for reporting and evaluating public outreach events

Event Details	Description (messages, audience)	Evaluation of Effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional.	Identify type of event (e.g., school fair, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscene presentation, pesticides, stormwater awareness)	Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as: <ul style="list-style-type: none"> • Estimated overall attendance at the event. • Number of people that visited the booth, comparison with previous years • Number of brochures and giveaways distributed • Results of any spot surveys conducted
City of SSF Farmers’ Market (Local event) Orange Park South San Francisco, CA 7/19/14, 8/16/14, 9/13/14, 10/25/14 and 5/23/15	Public Outreach Event (Farmers’ Market) Audience: Local residents, homeowners, children Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing)	On these 5 dates, Environmental Compliance Staff members staffed a Pollution Prevention Outreach Booth, interacting with an estimated 525 local residents regarding the City’s Pollution Prevention efforts. This is an increase in the number of interactions from the previous Fiscal Year. As in previous years, the events were successful in that a broad spectrum of local residents and

		<p>business owners attend the market and staff is able to interact with them.</p> <p>Approximately 525 Reusable Shopping Bags, 83 various brochures, 95 Reusable Cups and 385 other items bearing the City's Stormwater Pollution Prevention message were distributed.</p>
<p>FY 14-15 Coordination of California Coastal Clean-up Day in San Mateo County September 20, 2014 Local event in South San Francisco</p>	<p>Coastal clean-up event – Colma Creek hot spot clean-up. Pollution prevention/anti-littering outreach materials and information to general public and volunteers.</p>	<p>Over 25 volunteers in South San Francisco participated in cleaning up 2400+ feet along Colma Creek and collected approximately 500 gallons of trash and debris. This number was slightly down from the 560 gallons of trash picked up in FY 2013-2014.</p>
<p>FY 14-15 Coordination of California Coastal Clean-up Day in San Mateo County September 20, 2014 – Countywide event</p>	<p>Coastal clean-up event Stormwater pollution prevention outreach information was provided at the cleanup site to general public and volunteers. City of SSF staff participated in cleanup event and logistics with San Mateo County personnel. Advertised event through City displays and outreach tables.</p>	<p>See the C.7 Public Information and Outreach section of SMCWPPP's FY 14-15 Annual Report for more details on the county-wide data from this event.</p> <ul style="list-style-type: none"> ➤ Over 25 volunteers in South San Francisco participated in cleaning up 2400+ feet along Colma Creek and collected 500 gallons of trash and debris.
<p>San Mateo County Fair – Pollution Prevention Outreach Booth Countywide Event San Mateo, CA 6/9/15</p>	<p>2 City of SSF volunteers staffed the San Mateo Countywide Pollution Prevention table at the Fair. Outreach items and information was distributed to the general public.</p>	<p>See the C.7 Public Information and Outreach section of SMCWPPP's FY 14-15 Annual Report for more details on the county-wide data from this event.</p>
<p>City of SSF National Night Out Local South San Francisco Event 8/5/14</p>	<p>Public education on Stormwater Pollution Prevention was provided to local residents at the 2014 National Night Out Event in South San Francisco.</p> <p>Information was provided on topics including reducing stormwater pollution, household hazardous waste and pharmaceutical disposal.</p>	<p>Approximately 150 local residents visited the outreach booth, staffed by the City's Environmental Compliance Program.</p> <p>Approximately 100 Reusable Shopping Bags, 55 items bearing the City's Stormwater Pollution Prevention message and various pamphlets were distributed.</p> <p>The event was deemed described as successful by the Environmental Compliance staff member who attended, based on the number of</p>

		residents we were able to communicate with and their feedback.
<p>Pollution Prevention Week (Local Event) South San Francisco Public Library 9/16/14</p>	<p>Tabling event at City Library. Audience: Local residents and schoolchildren. Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing)</p>	<p>Environmental Compliance Staff members interacted with approximately 50 local residents and schoolchildren school students. Stormwater Pollution Prevention information and items were provided. Approximately 70 Reusable Shopping Bags, 145 items bearing the City's Stormwater Pollution Prevention message and 25 various pamphlets were distributed. As in previous years, this event is a success, as we are able to interact with a broad spectrum of the City's residents and employees – including high school and elementary school children students using the public library after school.</p>
<p>Amgen Earth Day Fair (Local Event) 1150 Veterans Blvd, SSF, CA 94080 4/9/15</p>	<p>Local Corporate Fair Audience: Local businesses, residents and employees of Amgen. Message: Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing).</p>	<p>The Environmental Compliance Program staffed a booth at the Amgen Earth Day Fair, which included various organizations and companies interested in presenting Pollution Prevention-themed ideas and information. Approximately 50 people visited the South San Francisco Environmental Compliance table. Approximately 50 Reusable Shopping Bags and 90 additional items bearing the City's Stormwater Pollution Prevention message were distributed. As in 2013, this event was deemed successful, as we were able to interact with several different members of the community as well as a portion of Amgen's 500 employees working in our service area.</p>

C.7.f. ► Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary:

The WQCP Staff supports the Community Preservation Task Force (CPTF). This group provides volunteers for Colma Creek clean-ups beyond the annual clean-up in September. Staff attends the CPTF meetings regularly and participates with volunteers during their scheduled Colma Creek clean-ups.

A summary of efforts conducted by SMCWPPP to work with Watershed Stewardship Groups on a countywide level is included within the Public Information and Outreach section of the SMCWPPP FY 14-15 Annual Report.

C.7.g. ► Citizen Involvement Events

List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.

Event Details	Description	Evaluation of effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional	Describe activity (e.g., creek clean-up, storm drain marking etc.)	Provide general staff feedback on the event. Provide other evaluation details such as: <ul style="list-style-type: none"> • Number of participants. Any change in participation from previous years. • Distance of creek or water body cleaned • Quantity of trash/recyclables collected (weight or volume). • Number of inlets marked. • Data trends
FY 14-15 Coordination of California Coastal Clean-up Day in San Mateo County September 20, 2014	Coastal clean-up event – Colma Creek hot spot clean-up. Pollution prevention/anti-littering outreach materials and information to	Over 25 volunteers in South San Francisco participated in cleaning up 2400+ feet along Colma Creek and collected approximately

Local event in South San Francisco	general public.	500 gallons of trash and debris. This number was slightly down from the 560 gallons of trash picked-up retrieved in FY 2013-2014.
FY 14-15 Coordination of California Coastal Clean-up Day in San Mateo County September 20, 2014 – Countywide event	Coastal clean-up event Stormwater pollution prevention outreach information was provided at the cleanup site to general public and volunteers. City of SSF staff participated in cleanup event and logistics with San Mateo County personnel. Advertised the event through City displays and outreach tables.	See the C.7 Public Information and Outreach section of SMCWPPP's FY 14-15 Annual Report for more details on the county-wide data from this event. ➤ Over 25 volunteers in South San Francisco participated in cleaning up 2400+ feet along Colma Creek and collected 500 gallons of trash and debris.
Colma Creek Cleanup coordinated with San Mateo County Environmental Health Local Event near SSF WQCP 8/21/14	Creek Clean-up event Coordinated with SMCEH	Approximately 20 volunteers removed trash and debris from an approximate 1200-foot section of Colma Creek near the SSF WQCP. Approximately 300 gallons of trash, as well as several tires and wood debris were removed from the area.
Colma Creek Cleanup Local Event Colma Creek in SSF near Bay Trail 1/31/15	Creek Clean-up event Coordinated with local community group	Approximately 25 Volunteers removed trash and debris from both sides of an approximate 1200-foot stretch of Colma Creek near the WQCP and pedestrian bridge. Approximately 160 gallons trash was removed.
Colma Creek Cleanup Local Event Colma Creek in SSF, CA near Bay Trail 3/28/15	Creek Clean-up event Coordinated with local community group	Approximately 25 Volunteers removed trash and debris from both sides of an approximate 1200-foot stretch of Colma Creek near the WQCP and pedestrian bridge. Approximately 400 gallons trash was removed.
Earth Day Colma Creek Cleanup Local Event Colma Creek in SSF, CA near Bay Trail 4/25/15	Creek Clean-up event Coordinated with local community group	Approximately 15 Volunteers removed trash and debris from both sides of an approximate 1200-foot stretch of Colma Creek near the WQCP and pedestrian bridge. Approximately 325 gallons trash was removed.

National Rivers Day Colma Creek Cleanup Local Event Colma Creek at Utah Ave Bridge, SSF, CA 5/16/15	Creek Clean-up event Coordinated with City employees and Community Preservation Task Force (CPTF)	Approximately 8 Volunteers removed trash and debris from both sides of an approximate 1200-foot stretch of Colma Creek near the Utah Avenue bridge. Approximately 208 gallons trash was removed.
--	---	---

C.7.h. ► School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment.
 Use the following table for reporting school-age children outreach efforts.
 Refer to the C.7 Section of the countywide program’s FY 14-15 Annual Report for a description of School-age Children Outreach efforts conducted at the countywide level.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Provide the following information: Name Grade or level (elementary/ middle/ high)	Brief description, messages, methods of outreach used	Provide number or participants	Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.

Section 8 - Provision C.8 Water Quality Monitoring

C.8 ► Water Quality Monitoring

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

Summary

During FY 14-15, we contributed through the countywide Program to the BASMAA Regional Monitoring Coalition (RMC). In addition, we contributed financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and were represented at RMP committees and work groups. Monitoring efforts and results are documented in a separate report submitted March 15 of each year, as required in Provision C.8. For additional information on monitoring activities conducted by the Program, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 14-15 Annual Report and the Integrated Monitoring Report.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.b ► Implement IPM Policy or Ordinance						
Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphates, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.						
Trends in Quantities and Types of Pesticides Used⁶⁷						
Pesticide Category and Specific Pesticide Used	Amount ⁶⁸					
	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14	FY 14-15
Organophosphates	None	None	None	None	None	None
Product or Pesticide Type A	None	None	None	None	None	None
Product or Pesticide Type B	None	None	None	None	None	None
Pyrethroids	None	None	None	None	None	None
Product or Pesticide Type X	None	None	None	None	None	None
Product or Pesticide Type Y	None	None	None	None	None	None
Carbaryl	None	None	None	None	None	None
Fipronil	None	None	None	None	None	None

C.9.c ► Train Municipal Employees	
Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	24
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	24
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

⁶⁷Includes all municipal structural and landscape pesticide usage by employees and contractors.

⁶⁸Weight or volume of the product or preferably its active ingredient, using same units for the product each year. The active ingredients in any pesticide are listed on the label. The list of active ingredients that need to be reported in the pyrethroids class includes: allethrin, bifenthrin, beta-cyfluthrin, bioallethrin, cyfluthrin, cypermethrin, cyphenothrin, deltamethrin, esfenvalerate, etofenprox, fenpropathrin, gamma-cyhalothrin, imiprothrin, lambda-cyhalothrin, metofluthrin, permethrin, phenothrin, prallethrin, resmethrin, sumithrin (d-phenothrin), tau-fluvalinate, tefluthrin, tetramethrin, tralomethrin, cis-permethrin, and zeta-cypermethrin.

C.9.d ▶ Require Contractors to Implement IPM				
Did your municipality contract with any pesticide service provider in the reporting year?			<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
If yes, attach one of the following:				
<input checked="" type="checkbox"/>	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR			
<input checked="" type="checkbox"/>	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR			
<input type="checkbox"/>	Equivalent documentation.			
If Not attached , explain: The City of South San Francisco verifies IPM contractor performance by hiring professionals that certify they are properly trained and use IPM. Frank & Grossman Landscape Contractors, Inc. (signed City of SSF Written Order/contract specifications attached) Gary Cooper, General Operations Manager 1400 Egbert Avenue San Francisco, CA 94124 415 822 1900 Terminix International (Green Pro Certified) 32980 Alvarado-Niles #826 Union City, CA 94587 510 489 8689 Green Pro Certification (attached) is different from Quality Pro Green (Regional Board cited Quality Pro Green certification). The Green Pro Certification ensures technicians are trained and 'only make traditional pesticide applications after discussing the options with you and getting your consent'. The City of South San Francisco has contract specifications that require adherence to IPM. See attached SOPs, Certification and Contracts: Attachment D.				

C.9.e ▶ Track and Participate in Relevant Regulatory Processes	
Summarize participation efforts, information submitted, and how regulatory actions were affected OR reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.	
Summary: During FY 14-15, we participated in regulatory processes related to pesticides through contributions to the countywide Program, BASMAA and CASQA. For additional information, please see the Regional Report submitted by BASMAA on behalf of all MRP Permittees.	

C.9.f ▶ Interface with County Agricultural Commissioners			
Did your municipal staff observe any improper pesticide usage or evidence of improper usage (e.g., pesticides in storm drain systems, along street curbs, or in receiving waters) during this fiscal year?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>
No			
If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.			

C.9.h.ii ▶ Public Outreach: Point of Purchase
Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); OR reference a report of a regional effort for public outreach in which your agency participates.
Summary: See the C.9 Pesticides Toxicity Control section of Program’s FY 14-15 Annual Report for information on point of purchase public outreach conducted countywide and regionally.

C.9.h.vi ▶ Public Outreach: Pest Control Operators
Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); OR reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.
Summary: See the C.9 Pesticides Toxicity Control section of Program’s FY 14-15 Annual Report for a summary of our participation in and contributions towards countywide and regional public outreach to pest control operators and landscapers to reduce pesticide use.

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.iii ► Minimum Full Trash Capture

Provide the following:

- 1) Total number and types of full capture devices (publicly and privately-owned) installed to-date;
- 2) Total land area (acres) and land areas within each trash generation category (i.e., very high, high, moderate and low) treated by full capture devices (or other types of devices for non-population based Permittees); and, compare with the total required in the permit.
- 3) A narrative summary of maintenance activities implemented for each device, group of devices, or device type, including descriptions of typical maintenance frequencies and issues associated with maintaining these devices. Describe, in particular, any devices that have trash or debris overflowed, bypassed or are not functioning properly in any other manner. Describe corrective actions.

Type of Device	# of Devices	Acres Treated in FY 14-15 by Trash Generation Category				
		Low	Moderate	High	Very High	Total
Connector Pipe Screens/Filters	76	326	125	8	0	459
Low Impact Development (LID) Facilities	1	0	0	10	0	10
Drains to Sanitary Sewer	-	4	0	0	0	4
Total for all Types	77	330	125	18	0	473
Required by Permit						58

Maintenance Summary (Describe, in particular, any devices that have trash or debris overflowed, bypassed or are not functioning properly in any other manner. Describe corrective actions).

These Full Trash Capture devices are inspected/maintained on an average frequency of three times per year - before, during and after storm events. The main issue with the devices is that they plug up during storms causing flooding, therefore constant maintenance is required. Upon installation of the devices, the City had expected to only clean/maintain the devices before and after each storm. However, based on this flooding concern, it has been found that the devices require cleaning/maintenance during storms as well. Another issue with the devices is that the contractor is unavailable to help troubleshoot, as they have gone out of business. Maintenance records are on the Computerized Maintenance Management System (CMMS) located on the City server - CityWorks (maintenance records and reports) and are therefore easily accessed for audit purposes. The areas of treatment for each trash capture device are included in the City of South San Francisco's Long-term Trash Load Reduction Plan submitted on February 1, 2014.

In FY 14-15, the City also participated in the initial development of a Model Trash Full Capture Device Operation and Maintenance (O&M) Verification Program initiated by SMCWPPP. The model program is intended to provide Permittees with a template for documenting O&M procedures, including inspection and maintenance frequencies. Over the course of the next year, the City plans to further document the city-specific O&M verification program by tailoring the Model Program developed by SMCWPPP to incorporate city-specific characteristics/processes. Additional details on the City's O&M verification program will be included in our FY15-16 Annual Report.

C.10.b.iii ► Trash Hot Spot Assessment

Provide the volume of material removed during each MRP-required Trash Hot Spot cleanup during each fiscal year, and the dominant types of trash (e.g., glass, plastics, ~~paper~~ and paper) removed and their sources in FY 2014-15 to the extent possible. Also, provide additional information on creek cleanups conducted beyond those required that are used to demonstrate trash load reductions in C.10.d- Part C.

Trash Hot Spot	FY 14-15 Cleanup Date(s)	Volume of Trash Removed (cubic yards)					Dominant Type(s) of Trash in FY 2014-15	Trash Sources in FY 2014-15 (where possible)
		FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15		
SSF01	5/15/2015	3.0	1.0	12.7	2.8	1.3	Convenience/Fast Food items, Cigarette butts, Bottles (plastic or glass), Other plastic products, Styrofoam	Trash accumulation, Litter, Illegal dumping, Outfall
SSF02	5/15/2015	2.9	1.5				Convenience/Fast Food items, Cigarette butts, Bottles (plastic or glass), Other plastic products, Styrofoam	Trash accumulation, Litter, Illegal dumping, Outfall

Note: SSF01 and SSF02 data were combined in FY 2012-13, FY 2013-14, and FY 2014-2015.

Additional Receiving Water Cleanups – If claimed as load reductions described in C.10.d – part C, describe the number and frequency of receiving water cleanups conducted in addition to those reported above. Include locations, cleanup dates, and the total volume of trash removed. Describe the overall plan, if any, associated with these additional cleanups if meant to change the trash condition of certain reaches of creeks or shorelines.

The City of SSF performed the following additional Receiving Water Cleanups in FY 2014-2015:

DATE	LOCATION	VOLUME TRASH REMOVED
1/31/15	Colma Creek in SSF near Bay Trail/WQCP	160 gallons
3/28/15	Colma Creek in SSF near Bay Trail/WQCP	400 gallons
4/25/15	Colma Creek in SSF near Bay Trail/WQCP	325 gallons
5/16/15	Colma Creek in SSF at Utah Avenue	208 gallons
TOTALS		1093 gallons (5.4 cubic yards)

C.10.c ► Long-Term Trash Load Reduction Plan	
Provide descriptions of significant revisions made to your Long-term Trash Load Reduction Plan submitted to the Water Board in February 2014. Describe significant changes made to primary or secondary trash management areas (TMA), trash generation maps, control measures, or time schedules identified in your plan.	
Description of Significant Revision	Associated TMA
SSF Scavenger had scheduled a trash audit for 2014 that would entail ensuring businesses are receiving the proper level of service and assessing any container issues and housekeeping issues that may be contributing to litter reaching the environment and storm drain system. Due to various circumstances, the SSF Scavenger Company advised this that this audit has been postponed and will now occur in FY 2015-2016. This information is also noted/updated under TMA 1 in Section C.10.d PART B of this report.	1
The City of SSF had originally planned to install a new stormwater pump station in FY 14-15 at South Airport Blvd and Mitchell Avenue to replace an existing pumping system. The new station was scheduled to include a full trash capture device. Although this pump station was retro-fitted in FY 2014-2015, the planned trash capture device was not installed at that time, pending further study and receipt of the City's Storm Drain Master Plan, which should be finalized during FY 2015-2016.	5

C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
<p>Single-use Plastic Bag Ordinance or Policy</p>	<p>The City adopted an Ordinance on April 22, 2013 banning the distribution of single-use plastic carryout bags. The Ordinance went into effect 30 days later http://qcode.us/codes/southsanfrancisco/ (Title 8 chapter 8.64 Reusable Bags). The focus of the Ordinance was to minimize pedestrian and wind-blown litter consisting of single-use plastic bags. The San Mateo County Environmental Health Division has been authorized and directed to enforce this Ordinance.</p>	<p>On behalf of all SMCWPPP Permittees, the County of San Mateo conducted assessments evaluating the effectiveness of the single use plastic bag ban in municipalities within San Mateo County. Assessments conducted by the County included audits of businesses and surveys of customer bag usage at many businesses in San Mateo County. Additionally, the number of complaints by customers was also tracked by the County. The results of assessments conducted by these cities are gauged assumed to be representative of all SMCWPPP Permittees, given the consistency between the scope, implementation, and enforcement of the ordinances among the municipalities.</p> <p>The City of South San Francisco developed its % trash reduced estimate using the following assumptions norms:</p> <ol style="list-style-type: none"> 1.) Single use plastic bags comprise 8% of the trash discharged from stormwater conveyances, based on the Regional Trash Generation Study conducted by BASMAA; 2) 95% of single use plastic bags distributed in the City of South San Francisco are affected by the implementation of the ordinance, based on the County of San Mateo's Environmental Impact Report; and 	<p>Results of assessments conducted by the County of San Mateo on behalf of all municipalities in San Mateo County indicate that the City of South San Francisco's ordinance is effective in reducing the number of single use plastic bags in stormwater discharges. This preliminary conclusion is based on the very small number of complaints received from customers about businesses in San Mateo County that are continuing to use single use plastic bags after ordinances were adopted. Typically, Assuming single use bags are 8% of the trash observed in stormwater discharges, the City of South San Francisco concludes that there has been a 7% (i.e., 8% x 86% effectiveness in reducing bags) reduction in trash in stormwater discharges as a result of the City of South San Francisco's ordinance.</p>	<p>7%</p>

C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
		<p>3) Of the bags affected by the ordinance, there are now 90% less bags being distributed, based on customer complaints received by the County of San Mateo's Department of Environmental Health Services. This is conservative estimate given that in FY 13-14 Environmental Services only received complaints about 4, of the over 1900 businesses in San Mateo County that are affected by the single-use plastic bag ordinances.</p>		
<p>Expanded Polystyrene Food Service Ware Ordinance or Policy</p>	<p>The City adopted the polystyrene food ware packaging ban on October 8, 2008, which prohibits food vendors from distributing food to customers in polystyrene packaging. The focus of the ban was to minimize pedestrian and wind-blown litter consisting of polystyrene food service ware. City Code Enforcement Staff enforces the ban within the city. http://qcode.us/codes/southsanfrancisco/ (Title 8 chapter 8.60 Green Food Packaging).</p>	<p>Although the City of South San Francisco has adopted and implemented an ordinance prohibiting the distribution of EPS food ware by food vendors, evaluations of the effectiveness of the ordinance have not yet been conducted. For the purpose of estimating trash reductions in stormwater discharges associated with the ordinance, the results of assessments conducted by the cities of Los Altos and Palo Alto were used to represent denote the reduction of trash associated with the City of South San Francisco's ordinance. Assessments conducted by the cities of Los Altos and Palo Alto were used to represent to gauge the reduction of trash associated with the City of South San Francisco's ordinance. Assessments conducted by these cities were conducted prior to and following the effective date of their ordinances, and include audits of businesses and/or assessments of EPS food ware observed on streets, storm drains and local creeks. The results</p>	<p>Results of assessments that are representative of the City of South San Francisco, but were conducted by the cities of Los Altos and Palo Alto, indicate that South San Francisco's ordinance is effective in reducing EPS food ware in stormwater discharges. This conclusion is based on the following assessment valuation result - an average of 95% of businesses affected by the ordinance are no longer distributing EPS food ware post-ordinance. Based on these results, the estimated average reduction of EPS food ware in stormwater discharges is 90%.</p>	<p>5%</p>

C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)				
Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.				
Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
		<p>of assessments conducted by these cities are assumed expected to be representative of the effectiveness of the City of South San Francisco's ordinance because the implementation (including enforcement) of the City of South San Francisco's ordinance is similar to the City of Los Altos' and Palo Alto's. The City of south San Francisco developed its % trash reduced estimate using the following assumptions:</p> <p>1.) EPS food ware comprises 6% of the trash discharged from stormwater conveyances, based on the Regional Trash Generation Study 2) 80% of EPS food ware distributed by food vendors or sold via stores in the City of South San Francisco is affected by the implementation of the ordinance; and 3) There is now 95% less EPS food ware being distributed, sold and/or observed in the environment, based on assessments conducted by the City of Palo Alto and City of Los Altos.</p>	<p>AssumingSupposing EPS food ware is 6% of the trash observed in stormwater discharges, the City of South San Francisco concludes that there has been a 5% (i.e., 6% x 90%) reduction in trash in stormwater discharges as a result of the ordinance.</p>	
Public Education and Outreach Program	The City staff handed out approximately 747 re-useable bags as well as many other items bearing anti-littering messages at 5 SSF Farmers' Markets, 1 local City event, 1 Pollution Prevention Week event and 1 Earth Day event in Fiscal Year 2014-2015.	BASMAA conducted post-campaign surveys in FY 13-14 to assess the effectiveness and impacts of their youth litter campaign "Be the Street". The methods used by BASMAA are described in Appendix 16 of the Program's Annual Report.	Reductions (i.e., trends) in the levels of trash in stormwater discharges that occur as a result of the implementation of Public Education and Outreach campaigns and programs are very difficult to measure.	1%

C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
	<p>These outreach events focused on minimizing all types of trash from entering the storm drain system</p> <p>On behalf of the City of South San Francisco, SMCWPPP and BASMAA also implemented public education and outreach actions at the countywide and regional scales that were targeted at reducing the impacts of trash on local water bodies. For descriptions of these activities, please see Section 7 of the Program’s Annual Report.</p>		<p>Both the inherent spatial and temporal variability in trash generation and the timeframes by which behavior change occurs as a result of education and outreach largely governs our ability to link this control measure to water quality outcomes. That said, changing littering behaviors is paramount to the long-term success of trash management programs. As described in Section 7 of the Program’s Annual Report, the City of South San Francisco has spent significant resources on local, county-wide, and public education and outreach programs that are slowly reducing the generation of trash at its source.</p>	

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)

Complete the following trash control measure implementation and assessment summary for each primary trash management area (TMA) identified in your Long-term Plan. Include the following information:

- Identify the total jurisdictional area and the % of that area that generated very high (VH), high (H), moderate (M), or low (L) levels of trash in 2009, as depicted on trash generation maps;
- Identify the dominant trash source(s) and dominant type(s) of trash addressed or to-be addressed in the TMA;
- Provide the area currently treated by full capture devices, the quantity and type of devices installed to-date, and the % and acres of jurisdictional area in very high (VH), high (H), moderate (M), and low (L) generation categories that are currently treated by full capture devices in the TMA;
- Summarize control measures other than full capture devices implemented to-date, distinguishing between implementation that began pre- and post-MRP effective date. If not implemented in the entire TMA, describe generation category targeted and % of TMA addressed;
- Provide the acres of jurisdictional area in very high (VH), high (H), moderate (M), and low (L) generation categories in areas associated with actions other than full capture devices in the TMA;
- Describe the methods used to evaluate the effectiveness of control measures other than full capture devices, and any assessment results to-date. If the method was not implemented in the entire TMA, describe generation category targeted and % of TMA addressed.
- Provide the acres in VH, H, M or L generation categories after accounting for reduction associated with control measures other than full capture devices;
- Provide the acres in VH, H, M or L generation categories after accounting for reductions associated with ALL control measures (i.e., full capture and other actions) implemented to-date in the TMA
- Provide an estimate of the % of trash reduced in the TMA as a result of ALL control measures implemented to-date in the TMA. using the following formula:

$$\% \text{ Reduction} = 100 [(12A_{VH(2009)} + 4A_{H(2009)} + A_{M(2009)}) - (12A_{VH} + 4A_H + A_M)] / (12A_{VH2009} + 4A_{H2009} + A_{M2009})$$

where:

- $A_{VH(2009)}$ = total amount of the 2009 very high trash generation category in jurisdictional area
- $A_{H(2009)}$ = total amount of the 2009 high trash generation category in jurisdictional area
- $A_{M(2009)}$ = total amount of the 2009 moderate trash generation category in jurisdictional area
- A_{VH} = total amount of very high trash generation category in jurisdictional area in the reporting year
- A_H = total amount of high trash generation category in jurisdictional area in the reporting year
- A_M = total amount of moderate trash generation category in jurisdictional area in the reporting year
- 12 = Very High to Moderate weighing ratio
- 4 = High to Moderate weighing ratio
- 100 = fraction to percentage conversion factor

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)								
TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		Area (Acres) in Each Trash Generation Category			
					VH	H	M	L
1	345	Pedestrians, vehicles, illegal dumping and inadequate container management	Single-use carryout plastic bags, plastic and paper food packaging, cigarette butts	Baseline Generation Areas (2009)	0	118	216	11
Full Capture Devices	Area Treated by Full Trash Capture Devices (Acres)	Quantity and Type of Full Trash Capture Devices		Area Treated by Full Capture Devices	0	0	19	0
	19	This TMA has: 2 Connector Pipe Screens/Filters.						
Actions other than Full Capture Devices	Summary Description of Other Actions Implemented in the TMA Since MRP Adoption			Area Not Treated by Full Capture Devices	0	118	197	11
	<p>On-land Cleanups: TMA 1 has the most on-land cleanup efforts of any heavily trash-impacted part of the City. There are 42 public litter containers on the sidewalks on Grand Avenue, and 6 containers on Hazelwood Drive that are serviced three times per week by South San Francisco Scavengers on Monday, Wednesday, and Friday. City employees service all other containers, 15 containers on Linden and those on Grand Avenue and Hazelwood Avenue on Tuesday and Thursday. On 4/18/15 and 11/8/14, the City's Community Preservation Task Force (CPTF) hosted on-land cleanups with community volunteers. Approximately 330 gallons of trash and debris were removed.</p> <p>Container Management: South SF Scavenger agreed in January of 2014, to do an audit of the MFD properties in the area described below in 2014. Due to various circumstances, this audit has been postponed and will now occur during FY 2015-2016. Subsequent audits are possible depending on the results of this initial one. The audit will cover the following items:</p> <ol style="list-style-type: none"> 1. Refuse and recycling service levels/volumes at the properties to ensure that they are paying for the right level of service and do not have regularly overflowing bins and/or carts on and in between collection service days. 2. The type of service (FEL, REL, carts) and the condition of any service equipment (trucks, bins and carts) to see if improvements can be made to reduce the amount of litter generated during the servicing of the accounts on and in between collection service days. So, for example, if lids are missing or containers are broken, those will be repaired or replaced with another style of service that will generate less litter. If a different type of truck is available to service the accounts and that different type of truck will generate less litter during collection, then that different type of service will be considered for the account. 			Area after Accounting for Other Actions (based on assessment results)	0	118	197	11

	Assessment Methods for Control Measures Other than Full Capture Devices					
	To assess environmental outcomes associated with control measures other than full capture devices, visual on-land trash assessments were conducted using a standard on-land visual assessment protocol developed by BASMAA member agencies. For each TMA assessed, sites were selected using a probabilistic sample draw that allows for extrapolation within the applicable TMA. Sites that have been assessed more than once in this fiscal year have had their assessment results averaged. In fiscal years 2013-2014 and 2014-15, the City of South San Francisco conducted 65 visual assessments at 35 sites to assess the level of trash observed on-land in priority TMAs. Through this effort, approximately 38,400 linear feet of streets and sidewalks were assessed.					
	Summary of Assessment Results

Through this effort, approximately 32,900 linear feet of streets and sidewalks were assessed.							

Summary of Assessment Results					
A total of 6 assessments were performed at 4 sites in this TMA using the on-land visual assessment protocol. Approximately 3,700 linear feet (17%) of streets and sidewalks were assessed in this TMA. Only areas with M, H, or VH generation rates were assessed. For those areas assessed, 55% were L, 45% were M, 0% were H, and 0% were VH.

	5	This TMA has: 4 Connector Pipe Screens/Filters.						
Actions other than Full Capture Devices	Summary Description of Other Actions Implemented in the TMA Since MRP Adoption			Area Not Treated by Full Capture Devices	0	0	193	1
	No additional control measures have been implemented at this time.							
	Assessment Methods for Control Measures Other than Full Capture Devices			Area after Accounting for Other Actions (based on assessment results)	0	0	193	1
	To assess environmental outcomes associated with control measures other than full capture devices, visual on-land trash assessments were conducted using a standard on-land visual assessment protocol developed by BASMAA member agencies. For each TMA assessed, sites were selected using a probabilistic sample draw that allows for extrapolation within the applicable TMA. Sites that have been assessed more than once in this fiscal year have had their assessment results averaged. In fiscal years 2013-2014 and 2014-15, the City of South San Francisco conducted 57 visual assessments at 30 sites to assess the level of trash observed on-land in priority TMAs. Through this effort, approximately 32,900 linear feet of streets and sidewalks were assessed.

C.10.d ► PART C – Estimated Overall Trash Load Reduction

For Population-based Permittees, provide an estimate of the overall trash reduction percentage achieved to-date within the jurisdictional area of your municipality that generates problematic trash levels (i.e., Very High, High or Moderate trash generation). Base the estimate on the information presented in C.10.d – Parts A and B and receiving water cleanups not reported in C.10.b.iii.

Discussion of Trash Reduction Estimate (including Receiving Water Cleanups):

The trash load reduction estimates presented in this section provide the best available estimate of trash reduction from the City’s municipal separate stormwater sewer system (MS4). These estimates were developed consistent with the trash reduction framework developed in collaboration with Water Board staff in 2013-14, and the Pilot SMCWPPP Trash Assessment Strategy submitted to the Water Board in February 2014. All estimates are based on available information collected by the City and are subject to revision by the City based on additional information on the effectiveness of trash controls, the magnitude and extent of trash control measure implementation, and/or the levels of trash discharged from the City’s MS4.

Trash reduction estimates were based on initial data collection efforts that began in FY 13-14 and continued through FY 14-15. Reductions associated with jurisdictional-wide trash control measures, trash full capture devices, other TMA-specific control measures, and trash cleanup events in local creeks and shorelines are included. Reductions associated with jurisdictional-wide actions are based on a combination of data collection and observations applicable to the Town. Reductions associated with trash full capture devices assume that trash generated in areas treated by effectively maintained devices reduce trash to a level of “no adverse impacts” to local water bodies. For control measures other than full capture devices, all reduction estimates are based on empirical observations of current trash levels (i.e., on-land visual assessments) and associated reductions in applicable trash management areas. Reductions associated with creek and shoreline cleanups are based on the amount of trash removed via these cleanups in FY 14-15, in comparison to baseline trash generation in the City. In FY 14-15 a total of 1,093 gallons of trash were removed during cleanups above and beyond those required by the MRP. For creek and shoreline cleanups, the load reduction accounting formula included in the MRP 2.0 Tentative Order was modified and used. The modified formula used in the calculation includes a 3:1 offset, as opposed to the 10:1 offset proposed in the Tentative Order. Additionally, no maximum credit was incorporated into the formula used to report the percent reduction associated with “additional creek and shoreline cleanups” reported below.

Estimated % Trash Reduction due to Jurisdictional-wide Actions (as Reported in C.10.d – Part A)	13%
Estimated % Trash Reduction in All TMAs due to Trash Full Capture Devices (as Reported in C.10.d. – Part B)	5%
Estimated % Trash Reduction in all TMAs due to Control Measures Other than Trash Full Capture Devices in All TMAs) (as Reported in C.10.d. – Part B)	25%
SubTotal Subtotal for Above Actions	43%
Estimated % Trash Reduction due to Receiving Water Cleanups (All TMAs)	1%
Total Estimated % Trash Reduction FY 14-15	44%

Section 11 - Provision C.11 Mercury Controls

C.11.a.i ► Mercury Recycling Efforts

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

Please refer to SMCWPPP's FY 2014/15 Annual Report for details regarding countywide efforts to promote and facilitate collection and recycling of mercury containing devices and equipment at the consumer level through San Mateo County Health Department's Household Hazardous Waste (HHW) Program and Very Small Quantity Generator Business Collection (VSQG) Program.

Describe any other mercury-containing device and equipment collection and recycling efforts conducted by your municipality during FY 14-15. Efforts may include the following:

- 1) No Facilitation/Organization of HHW drop-off events were conducted by South San Francisco.
- 2) Collection of:
 - a. Mercury-containing devices and equipment were collected at the Corp Yard from September 15 – October 31, 2014.
 - b. The City of South San Francisco has no role in the collection of mercury-containing devices and equipment at the consumer level; ~~either~~, either through the City or contractors or other entities.

There was no other Promotion or Collection of Mercury Containing Devices in South San Francisco. The City of South San Francisco does properly store and recycle used fluorescent lamps that are used throughout the City's buildings (see total below).

C.11.a.ii ► Mercury Collection

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

South San Francisco collects and recycles fluorescent light bulbs. During FY 14/15 approximately 32.69 grams of mercury was collected and removed from the environment in fluorescent bulbs and mercury thermometers.

Please refer to the FY 14-15 SMCWPPP Annual Report for an estimate of the mass of mercury collected through the San Mateo County Health Department's Household Hazardous Waste (HHW) Program and Very Small Quantity Generator Business Collection (VSQG) Program.

Mercury Containing Device/Equipment	Total Amount of Devices Collected	Estimated Mass of Mercury Collected
Fluorescent Lamps ⁶⁹ (linear feet)	2650	7.692 grams
CFLs ⁷⁰ (each)	0	N/A
Thermostats ⁷¹ (each)	0	N/A
Thermostats (lbs)	0	N/A
Thermometers (each)	50	25 grams
Switches (lbs)	0	N/A
Total Mass of Mercury Collected During FY 2014-2015:		32.69 grams

⁶⁹Only linear fluorescent lamps should be included

⁷⁰Only compact fluorescent lamps should be included

⁷¹Thermostats can be reported by quantity or by pounds. Whichever unit is used, please avoid double-counting.

- C.11.b ▶ Monitor Methylmercury**
- C.11.c ▶ Pilot Projects to Investigate and Abate Mercury Sources in Drainages**
- C.11.d ▶ Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.11.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.11.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs**

- C.11.h ▶ Fate and Transport Study of Mercury In Urban Runoff**
- C.11.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region**
- C.11.j ▶ Develop Allocation Sharing Scheme with Caltrans**

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of countywide Program and regional accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of Program's FY 14-15 Annual Report, Integrated Monitoring Report.

Section 12 - Provision C.12 PCBs Controls

C.12.a.ii,iii ▶ Ongoing Training

(For FY 10-11 Annual Report and Each Annual Report Thereafter) List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description:

The City of South San Francisco has incorporated visual assessment for PCBs and PCB-containing equipment into existing industrial inspections. To date no PCBs or PCB containing devices have been observed.

See the FY 12-13 Program Annual Report for a description of training provided countywide and/or regionally.

- C.12.b ▶ Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities**
- C.12.c ▶ Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations**
- C.12.d ▶ Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices**
- C.12.e ▶ Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit**
- C.12.f ▶ Diversion of Dry Weather and First Flush Flows to POTWs**
- C.12.g ▶ Monitor Stormwater PCB Pollutant Loads and Loads Reduced**
- C.12.h ▶ Fate and Transport Study of PCBs In Urban Runoff**
- C.12.i ▶ Development of a Risk Reduction Program Implemented Throughout the Region**

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of countywide Program and regional accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 14-15 Annual Report, Integrated Monitoring Report.

Section 13 - Provision C.13 Copper Controls

C.13.a.iii.(2) ▶ Training, Permitting and Enforcement Activities

(FY 11-12 Annual Report and each Annual Report thereafter) Provide summaries of activities implemented to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post-construction including. :

- Development of BMPs on how to manage the water during and post construction
- Requiring the use of appropriate BMPs when issuing building permits
- Educating installers and operators on appropriate BMPs
- Enforcement actions taken against noncompliance

The City of South San Francisco revised their Municipal Code to include a prohibition of discharge from copper architectural features. The revision was approved by City Council in January 2013. The specific language incorporated into the Municipal Code was included in section C.13.a.iii.(2) of the FY 12-13 Annual Stormwater Report.

Development of BMPs: The Countywide Program collaborated with BASMAA to develop BMPs to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post construction. These BMPs are distributed as needed.

Permitting Procedures to Require the BMPs: The Countywide Program updated its Stormwater Requirements Checklist to include the architectural copper BMPs in the list of source control measures that may apply to projects. The City of South San Francisco does not allow the discharge of wastewater from architectural copper to the storm drains.

Educate Installers and Operators: The Countywide Program, in collaboration with the Santa Clara Valley Urban Runoff Pollution Prevention Program, prepared an educational flyer on the BMPs. South San Francisco staff was trained on the BMPs by attending the construction site inspection training on April 23, 2013. Staff will use the revised Stormwater Requirements Checklist which includes source control for architectural copper features. Staff has made copper outreach materials available at the building department and will include them if relevant in materials distributed with plan check comments.

Enforcement Actions against Noncompliance: Staff will use the revised Stormwater Requirements Checklist which includes source control for architectural copper features. Staff will continue to make copper outreach materials available at the building department and will include them if relevant in materials distributed with plan check comments. There has been no enforcement action taken for noncompliance in this area. If noncompliance is observed or reported, the inspectors will investigate and proceed with enforcement action, if necessary, as stated in the City's Enforcement Response Plan.

C.13.d.iii ► Industrial Sources Copper Reduction Results

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary

The City of South San Francisco has one plating facility that is inspected twice a year. No stormwater issues have occurred at this site.

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

Note: There are no reporting requirements in the FY 14-15 Annual Report for Section C.14.

Section 15 -Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water

Is your agency a water purveyor?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If No , skip to C.15.b.vi.(2):				
If Yes , Complete the attached reporting tables or attach your own table with the same information. Provide any clarifying comments below.				
Comments:				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

<p>Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:</p> <ul style="list-style-type: none"> • Promote conservation programs • Promote outreach for less toxic pest control and landscape management • Promote use of drought tolerant and native vegetation • Promote outreach messages to encourage appropriate watering/irrigation practices • Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.
<p>Summary: The City of South San Francisco participates in the Countywide Program’s public outreach efforts and the Parks and Maintenance Committee. Additionally, New Development plan review comments for the City include the following:</p> <p style="padding-left: 40px;">Landscaping shall meet the following conditions related to reduction of pesticide use on the project site:</p> <ul style="list-style-type: none"> c. Where feasible, landscaping shall be designed and operated to treat stormwater runoff by incorporating elements that collect, detain and infiltrate runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolonged exposure to water shall be specified. d. Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.

- e. Existing native trees, shrubs and ground cover shall be retained and incorporated into the landscape plan to the maximum extent practicable.
- f. Proper maintenance of landscaping, with minimal pesticide use, shall be the responsibility of the property owner.
- g. Integrated pest management (IPM) principles and techniques shall be encouraged as part of the landscaping design to the maximum extent practicable. Examples of IPM principles and techniques include:
 - i. Select plants that are well adapted to soil conditions at the site.
 - ii. Select plants that are well adapted to sun and shade conditions at the site. In making these selections, consider future conditions when plants reach maturity, as well as seasonal changes.
 - iii. Provide irrigation appropriate to the water requirements of the selected plants.
 - iv. Select pest-resistant and disease-resistant plants.
 - v. Plant a diversity of species to prevent a potential pest infestation from affecting the entire landscaping plan.
 - vi. Use “insectary” plants in the landscaping to attract and keep beneficial insects.

The Inspectors will notify business owners if ongoing, large volume landscape irrigation runoff is observed and require the curtailment of the runoff.

Additionally, the City uses the revised New Development Checklist that includes landscaping site design measures and source control.

Refer to the C.3 New Development and Redevelopment, C.7. Public Information and Outreach and C.9. Pesticide Toxicity Control sections of the SMCWPPP FY 14-15 Annual Report.

C.15.b.iii.(1) ► Planned Discharges of the Potable Water System										
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity ⁷² (NTU)	Implemented BMPs & Corrective Actions
N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

⁷²Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

C.15.b.iii.(2) ► Unplanned Discharges of the Potable Water System ⁷³														
Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Discharge Duration (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L) ⁷⁴	pH (standard units) ⁵²	Discharge Turbidity (Visual) ⁵²	Implemented BMPs & Corrective Actions	Time of discharge discovery	Regulatory Agency Notification Time ⁷⁵	Inspector arrival time	Responding crew arrival time
N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

⁷³This table contains all of the unplanned discharges that occurred in this FY.

⁷⁴Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges, report all of the data collected.

⁷⁵. Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State Office of Emergency Services is required after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.

Attachment A
Business Inspection Plan

INDUSTRIAL AND COMMERCIAL BUSINESS INSPECTION PLAN CITY OF SOUTH SAN FRANCISCO, CA

Date Originally Prepared: June 30, 2010

Date Last Reviewed: August 7, 2015

BACKGROUND

This industrial and commercial business inspection plan (Inspection Plan) serves as the city's prioritized inspection work plan that the city will implement to comply with the municipal regional stormwater permit's (MRP) Provision C.4.b requirements. This MRP provision requires that an Inspection Plan be developed. The Inspection Plan's attached Prioritized Inspection List of Businesses (Inspection List) must be submitted with the 2010 Annual Report, and an annually updated Inspection List must be submitted with subsequent annual reports.

Municipal staff used the following steps to create this Inspection Plan and comply with the MRP. Steps 1 and 2 address MRP requirements for the Inspection Plan and Step 3 addresses compliance with MRP requirements for creating an Inspection List that is included as an attachment to the Inspection Plan.

Steps

1. Identify a method of establishing priorities for inspections and the frequency of inspections for each category of priority.
2. Describe the method that will be used to identify newly opened businesses that may need inspection.
3. Develop an Inspection List that includes:
 - a. A list of all of the industrial and commercial businesses located within the municipality's jurisdiction that require inspection;
 - b. A determination of the priority for inspection of each business on the Inspection List using the identified method of establishing inspection priorities;
 - c. Identification of businesses on the Inspection List that are scheduled for inspection during the current fiscal year; and
 - d. An annual update or revision of the Inspection List starting in 2011.

Each of these steps was followed to develop this Inspection Plan as described in the following sections.

STEP 1: IDENTIFY A METHOD OF ESTABLISHING PRIORITIES FOR INSPECTIONS AND FREQUENCY OF INSPECTIONS

What the MRP Requires

The MRP requires that each of the businesses to be inspected be assigned a priority for inspection based on "the potential for water quality impact using criteria such as pollutant sources on site, pollutants of concern, proximity to a waterbody, violation history of the facility, and other relevant factors" (Provision C.4.b.ii.(3)). In addition, the MRP requires that appropriate inspection frequencies be established based on the priority for inspection, "potential for contributing pollution to stormwater runoff" and be "commensurate with the threat to water quality" (Provision C.4.b.ii.(5)).

Further, the MRP requires: “A description of the process for prioritizing inspections and frequency of inspections” (Provision C.4.b.i.(2)).

Description of Prioritization Process and Assignment of Inspection Frequencies to Different Priorities

➔ Businesses meeting the following criteria generally have been assigned as having a high priority for inspection:

1. Businesses that are subject to the State General NPDES Permit for Stormwater Discharges Associated with Industrial Activity.
2. Businesses that have a history of using inadequate best management practices.
3. Businesses that have had a non-stormwater discharge disallowed by the MRP during the previous fiscal year.
4. Food service facilities and vehicle mechanical repair that are due for re-inspection and/or re-permitting with wastewater permits.

All other businesses have generally been assigned as having a low priority for inspection.

1. High priority for inspection means that the business will typically be inspected annually. Low priority for inspection means that the business will be inspected less frequently than annually, such as every other year or every third year. Businesses that have a non-stormwater discharge during any fiscal year will be moved to the high priority category and then inspected during the next fiscal year.
2. Food service facilities on the low priority inspection will be inspected upon renewal of their wastewater discharge permit.
3. Auto facilities on the low priority will be inspected at least twice per permit cycle.

STEP 2: DESCRIBE METHOD THAT WILL BE USED TO IDENTIFY NEW BUSINESSES

What the MRP Requires

The MRP requires that the Inspection Plan have a “mechanism to include newly opened businesses that warrant inspection ...” (Provision C.4.b.i.(2)).

Description of Method for Identifying New Businesses

The City of South San Francisco will identify new businesses that warrant inspection through the business license sign off process. New businesses require a sign off from the Environmental Compliance department. At that time, should the business warrant inspection, it will be inspected before the business license is signed off. The business will be added to the inspection spreadsheet and prioritized at the time of addition. If the business is deemed to not have an impact on the stormwater system it will be omitted from the list.

STEP 3: DEVELOP AN INSPECTION LIST

This step includes the following four substeps associated with the development and maintenance of the Inspection List:

- a. Develop a list of all of the industrial and commercial businesses that require inspection;
- b. Determine the priority for inspection of each business on the Inspection List;
- c. Identify businesses on the Inspection List that are scheduled for inspection during the current fiscal year; and

- d. Prepare an annual update or revision of the Inspection List starting in 2011.

What the MRP Requires

Develop a List of All Businesses Requiring Inspection

The MRP requires that the Inspection Plan be used to maintain an Inspection List of industrial and commercial businesses “that could reasonably be considered to cause or contribute to pollution of stormwater runoff” (Provision C.4.b.ii).

In particular, the MRP lists the following types of businesses as needing to be inspected if they “have a reasonable likelihood to be sources of pollutants to stormwater and non-stormwater discharges:” (Provision C.4.b.ii(2))

- 1) Industrial facilities¹, as defined in 40 CFR 122.26(b)(14), including those subject to the State General NPDES Permit for Stormwater Discharges Associated with Industrial Activity;
- 2) Vehicle salvage yards;
- 3) Metal and other recycled material collection facilities, waste transfer facilities;
- 4) Vehicle mechanical repair, maintenance, fueling, or cleaning;
- 5) Building trades central facilities or yards, corporation yards, nurseries, and greenhouses;
- 6) Building material retailers and storage;
- 7) Plastic manufacturers; and
- 8) Other facilities designated by the City or Water Board as having a reasonable potential to contribute to pollution of stormwater runoff. The Water Board staff places a priority on inspecting retail food facilities, and these businesses should be included in the Inspection List if they “have a reasonable likelihood to be sources of pollutants to stormwater and non-stormwater discharges.”

In addition, the MRP lists the following functional aspects of businesses that may produce pollutants when exposed to stormwater as part of the criteria for developing the Inspection List:

- 1) Outdoor process and manufacturing areas;
- 2) Outdoor material storage areas;
- 3) Outdoor waste storage and disposal areas;
- 4) Outdoor vehicle and equipment storage and maintenance areas;
- 5) Outdoor wash areas;
- 6) Outdoor drainage from indoor areas;
- 7) Rooftop equipment; and
- 8) Other sources determined by the city or Water Board to have a reasonable potential to contribute to pollution of stormwater runoff.

Establish Inspection Priority for Businesses on the Inspection List

The MRP requires that businesses that have a reasonable potential to pollute stormwater runoff be prioritized using factors listed in the MRP (Provision C.4.b.ii.(3)).

Identify Businesses Scheduled for Inspection During the Current Fiscal Year

The MRP requires that the annual report include “the list of facilities scheduled for inspection during the current fiscal year” (Provision C.4.b.iii.(2)).

Annual Updates

¹ The MRP appears to use the terms “facilities” and “businesses” interchangeably. This template generally uses the term business since that is used in the title of Provision C.4.b., and it is the term most inspectors use.

The MRP requires that the Inspection List be annually updated and maintained (Provision C.4.b.ii). The annual updates should include new businesses; any needed modifications to inspection priorities based on recent inspections, illicit discharge notifications, or other relevant factors; and removal of businesses that are no longer operating. In addition, updates or revisions to the Inspection List need to be included in annual reports starting in 2011 (Provision C.4.b.iii.(1)).

Substep 3a: Develop Inspection List

See Attachment C of annual report.

Substep 3b: Determine Priority for Businesses

Businesses meeting the following criteria generally have been assigned as having a high priority for inspection:

1. Businesses that are subject to the State General NPDES Permit for Stormwater Discharges Associated with Industrial Activity.
2. Businesses that have a history of using inadequate best management practices.
3. Businesses that have had a non-stormwater discharge disallowed by the MRP (illicit discharge) during the previous fiscal year.
4. Food service facilities and vehicle mechanical repair that are due for re-inspection and/or re-permitting with wastewater permits.

Substep 3c: Identify Businesses Scheduled for Inspection in the Current Fiscal Year

See Attachment C of annual report.

Substep 3d: Annual Update

The latest update to the potential facility list was completed on August 7, 2015.

Attachment B

RE: Written Order to Implement an Integrated Pest Management ("IPM") Plan

Dear Mr. Cooper:

The purpose of this letter is to provide Frank + Grossman Landscape Contractors, Inc. ("Contractor") with a written order to implement an Integrated Pest Management ("IPM") Plan for landscaping services within the City of South San Francisco ("City").

Pursuant to Section 12 of the Exhibit A Standard of Services Contents Landscape Maintenance Agreement between the City and Contractor, the City hereby requires Contractor to adopt and comply with an IPM Plan consistent with the IPM-based hierarchical decision making process (established by Provision C.9.d, of Water Board Permit No. R2-2009-0074, Municipal Regional Stormwater NPDES Permit) and the City-approved IPM Policy (attached hereto).

Please acknowledge your acceptance of this written order by signing and returning three copies of this letter to my attention at your earliest convenience.

Best regards,

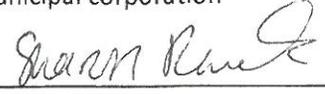

Sharon Ranals

Director of Parks and Recreation

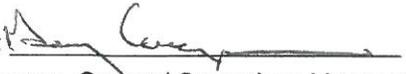

Attachments: Exhibit A Standard of Services Contents Landscape Maintenance, Section 12
City of South San Francisco Integrated Pest Management Policy

The terms of the Letter Agreement are accepted and agreed to as of the date of this letter.

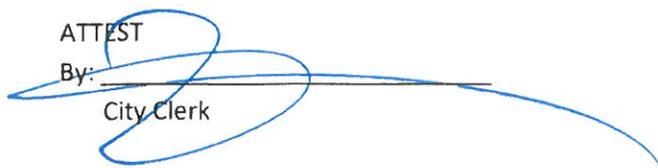

City of South San Francisco,
A municipal corporation

By: 

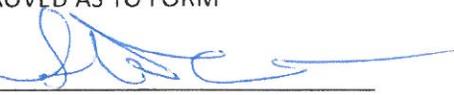

Frank + Grossman Landscape Contractors, Inc.
a California corporation

By: 
Gary Cooper, General Operations Manager

ATTEST

By: 
City Clerk

APPROVED AS TO FORM

By: 
City Attorney

- (2) Weeds (grass and broadleaf) growing in the ground cover areas may be sprayed with selective herbicides; however, the dead vegetation must be removed by hand. Weed removal by string trimmer is not allowed.
- (3) Hypericum ground cover shall be mowed to ground level once a year, during the month of February. The bed areas should be raked clean and the debris exported.
- (4) Debris (trash, bottles, etc.) removal from the ground cover areas must be performed as designated for each area's minimum frequency for litter removal. It is the contractor's responsibility to review the sites and allocate sufficient manpower to accomplish this task.
- (5) Ground cover diseases and insect infestations must be identified by the contractor; reported to the Parks Manager, and controlled in a timely manner. Reapplications of control methods may be required. Losses associated with the contractor's negligence in either identifying and/ or controlling a disease or pest shall be the contractor's responsibility to replace or repair.

12. Integrated Pest Management Program

The Contractor shall act as or coordinate with a licensed specialist to identify any Pest management problems that may arise in the street and parkway landscapes.

The Contractor shall be familiar with various integrated pest management (IPM) programs. The Contractor is required to develop and adopt an IPM plan that complies with an IPM plan consistent with the IPM-based hierarchical decision making process (established by Provision C.9.d, of Water Board Permit No. R2-2009-0074, Municipal Regional Stormwater NPDES Permit) and the City-approved IPM Policy to effectively eradicate any diseases or pests which develop during the duration of this contract. The development and execution of the IPM program shall be the responsibility of the Contractor and will not be considered extra work.

The Parks Manager will request to see any or all labels, licenses, certificates, categories, permits or recommendations before chemicals are applied. An IPM plan developed by the Contractor may have to be approved by the Parks Manager and the County Agricultural Commissioner before implementation. A MSDS must be submitted for each chemical to be used prior to any application program.

(A) IPM techniques could include:

1. Biological controls
2. Physical or mechanical controls
3. Cultural controls
4. Reduced risk chemical controls

- (B) Prior to application, the Contractor shall provide a copy of any spray report showing details of areas, times, chemicals, MSDS, and rates of application as provided by a licensed pest control advisor. A copy shall be provided with billing at the end of the month as well.
- (C) The Contractor shall provide the County Agricultural Commissioner's office (as required by law) a monthly record of all pesticides used in the street and parkway landscape facilities. A copy of the same report shall be included with the Contractor's monthly billing to the City. Column "F" of the standard monthly report to the Commissioner shall indicate that a chemical has been used on a South San Francisco facility. Indicate also the types of weeds treated using common names.

13. Prosecution and Progress
 Progress of the Work and Time for Completion – The Contractor shall begin work on October 1, 2014.

14. Damage of Loss on Contractor's Supplies or Employer's Property

The City does not assume liability from fire, theft, accident or any other cause resulting in damage or loss of contractor's supplies; materials or equipment, or of personal property or belongings of his employees.

15. Property Damage

(A) Any private property of City property damaged or altered in any way during the performance of the work under this contract shall be reported promptly to the owner's representative, and shall be rectified in an approved manner back to its former conditions, prior to damage, to the contractor's expense.

(B) Any damage or unusual dumping noted, or seen, by the contractor, that has occurred by any means other than during the performance of the contractor's work, whether by vandalism or any other means, shall be promptly reported to the owner's representative. Particularly, all hazardous conditions such as holes in sidewalks shall be reported.

16. Definition of Terms

(A) City – The City of South San Francisco, State of California, acting through the City Council, or other duly authorized agents.

(B) Director – The duly appointed Director of Parks and Recreation of the City of South San Francisco, acting directly or through properly authorized agents limited by the particular duties entrusted to them.

(C) Inspector – The Parks Manager or his/her appointed representative, of the City of South San Francisco, limited by the particular duties entrusted to him or them.

San Mateo Countywide Water Pollution Prevention Program Model Integrated Pest Management (IPM) Policy for the City of South San Francisco

GOAL

The *City of South San Francisco* seeks to protect the health and safety of its employees and the general public, the environment and water quality, as well as to provide sustainable solutions for pest control through the reduced use of pesticides on property including buildings owned or managed by the City by applying Integrated Pesticide Management principles and techniques. The municipal regional stormwater permit requires that the *City of South San Francisco* minimize reliance on pesticides that threaten water quality.

REQUIRED USE OF INTEGRATED PEST MANAGEMENT

Employees implementing pest management controls will use Integrated Pest Management (IPM) techniques that emphasize non-pesticide alternatives. Pesticides will only be used after careful consideration of non-chemical alternatives and then the least toxic chemicals that are effective shall be used. Pest control contractors hired by the City are required to implement IPM to control pests. This will be achieved by hiring only IPM-certified pest control contractors or by including contract specifications requiring contractors to implement IPM methods.

The City will establish written standard operating procedures for pesticide use to ensure implementation of this IPM policy and to require municipal employees and pest control contractors to comply with the standard operating procedures.

The *City of South San Francisco* will track employee and contractor pesticide use and prepare an annual report summarizing pesticide use and evaluating pest control activities performed consistent with the municipal regional stormwater permit's requirements.

The *City of South San Francisco* will review its purchasing procedures, contracts or service agreements with pest control contractors and employee training practices to determine what changes, if any, need to be made to support the implementation of this IPM Policy.

The *City of South San Francisco* will perform educational outreach and/or support Countywide or regional efforts to educate residential and commercial pesticide users on a) goals and techniques of IPM, and b) pesticide related water quality issues consistent with the municipal regional stormwater permit's requirements.

The IPM-based hierarchical decision making process that will be used to control pests will include the following:

1. Based on field observations evaluate locations and sites where pest problems commonly occur to determine pest population, size, occurrence, and natural enemy population, if

- present. Identify conditions that contribute to the development of pest populations, and decisions and practices that could be employed to manage pest populations
2. Design, construct, and maintain landscapes and buildings to reduce and eliminate pest habitats;
 3. Modify management practices including watering, mulching, waste management, and food storage to discourage the development of pest population;
 4. Modify pest ecosystems to reduce food, water sources, and harborage;
 5. Prioritize the use of physical controls such as mowing weeds, using traps, and installing barriers;
 6. Use biological controls to introduce or enhance a pests' natural enemies;
 7. When pest populations reach treatment thresholds (based on how much biological, aesthetic, economic or other damage is tolerable) non-pesticide management activities will be evaluated before considering the use of pesticides;
 8. When pesticides are necessary, select reduced risk pesticides and use the minimum amounts needed to be effective;
 9. Apply pesticides at the most effective treatment time, based on pest biology, monitoring, and other variables, such as weather, seasonal changes in wildlife use, and local conditions; and
 10. Whenever possible, use pesticide application methods, such as containerized baits, that minimize opportunities for mobilization of the pesticide in stormwater runoff.

Departments performing pest management activities will identify an IPM coordinator who is responsible for assisting staff with implementation of this IPM policy.

BACKGROUND

Pesticides are defined as: any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest. Pests can be insects, rodents and other animals, unwanted plants (weeds), bacteria or fungi. The term pesticide applies to herbicides, fungicides, insecticides, rodenticides, molluscicides and other substances used to control pests.

Integrated Pest Management (IPM) is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and nontarget organisms, and the environment.

IPM techniques could include biological controls (e.g., ladybugs and other natural enemies or predators); physical or mechanical controls (e.g., hand labor or mowing, caulking entry points to buildings); cultural controls (e.g., mulching, alternative plant type selection, and enhanced cleaning and containment of food sources in buildings); and reduced risk chemical controls (e.g., soaps or oils).

City of South San Francisco owned or managed property/facility includes but is not limited to parks and open space, golf courses, roadsides, landscaped medians, flood control channels and other outdoor areas, as well as municipal buildings and structures.

**San Mateo Countywide Water Pollution Prevention Program
Model Integrated Pest Management (IPM) Policy
for the City of South San Francisco**

GOAL

The *City of South San Francisco* seeks to protect the health and safety of its employees and the general public, the environment and water quality, as well as to provide sustainable solutions for pest control through the reduced use of pesticides on property including buildings owned or managed by the City by applying Integrated Pesticide Management principles and techniques. The municipal regional stormwater permit requires that the *City of South San Francisco* minimize reliance on pesticides that threaten water quality.

REQUIRED USE OF INTEGRATED PEST MANAGEMENT

Employees implementing pest management controls will use Integrated Pest Management (IPM) techniques that emphasize non-pesticide alternatives. Pesticides will only be used after careful consideration of non-chemical alternatives and then the least toxic chemicals that are effective shall be used. Pest control contractors hired by the City are required to implement IPM to control pests. This will be achieved by hiring only IPM-certified pest control contractors or by including contract specifications requiring contractors to implement IPM methods.

The City will establish written standard operating procedures for pesticide use to ensure implementation of this IPM policy and to require municipal employees and pest control contractors to comply with the standard operating procedures.

The *City of South San Francisco* will track employee and contractor pesticide use and prepare an annual report summarizing pesticide use and evaluating pest control activities performed consistent with the municipal regional stormwater permit's requirements.

The *City of South San Francisco* will review its purchasing procedures, contracts or service agreements with pest control contractors and employee training practices to determine what changes, if any, need to be made to support the implementation of this IPM Policy.

The *City of South San Francisco* will perform educational outreach and/or support Countywide or regional efforts to educate residential and commercial pesticide users on a) goals and techniques of IPM, and b) pesticide related water quality issues consistent with the municipal regional stormwater permit's requirements.

The IPM-based hierarchical decision making process that will be used to control pests will include the following:

1. Based on field observations evaluate locations and sites where pest problems commonly occur to determine pest population, size, occurrence, and natural enemy population, if

- present. Identify conditions that contribute to the development of pest populations, and decisions and practices that could be employed to manage pest populations
2. Design, construct, and maintain landscapes and buildings to reduce and eliminate pest habitats;
 3. Modify management practices including watering, mulching, waste management, and food storage to discourage the development of pest population;
 4. Modify pest ecosystems to reduce food, water sources, and harborage;
 5. Prioritize the use of physical controls such as mowing weeds, using traps, and installing barriers;
 6. Use biological controls to introduce or enhance a pests' natural enemies;
 7. When pest populations reach treatment thresholds (based on how much biological, aesthetic, economic or other damage is tolerable) non-pesticide management activities will be evaluated before considering the use of pesticides;
 8. When pesticides are necessary, select reduced risk pesticides and use the minimum amounts needed to be effective;
 9. Apply pesticides at the most effective treatment time, based on pest biology, monitoring, and other variables, such as weather, seasonal changes in wildlife use, and local conditions; and
 10. Whenever possible, use pesticide application methods, such as containerized baits, that minimize opportunities for mobilization of the pesticide in stormwater runoff.

Departments performing pest management activities will identify an IPM coordinator who is responsible for assisting staff with implementation of this IPM policy.

BACKGROUND

Pesticides are defined as: any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest. Pests can be insects, rodents and other animals, unwanted plants (weeds), bacteria or fungi. The term pesticide applies to herbicides, fungicides, insecticides, rodenticides, molluscicides and other substances used to control pests.

Integrated Pest Management (IPM) is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and nontarget organisms, and the environment.

IPM techniques could include biological controls (e.g., ladybugs and other natural enemies or predators); physical or mechanical controls (e.g., hand labor or mowing, caulking entry points to buildings); cultural controls (e.g., mulching, alternative plant type selection, and enhanced cleaning and containment of food sources in buildings); and reduced risk chemical controls (e.g., soaps or oils).

City of South San Francisco owned or managed property/facility includes but is not limited to parks and open space, golf courses, roadsides, landscaped medians, flood control channels and other outdoor areas, as well as municipal buildings and structures.

City of South San Francisco
Standard Operating Procedures for Pesticide Use and Implementation
of the Municipality's Integrated pest Management Policy

Purpose: To minimize the use and reliance on pesticides that threaten water quality by implementing the City's policy for integrated pest management (IPM) by all municipal employees and contractor's hired to manage pests on municipal property.

Responsible Parties: All City personnel that as part of their municipal job duties are authorized to plan, manage, and control pests including pesticide applications and all City personnel that administer municipal contracts for applying pesticide on municipal property.

Contracts & Contractors: Contracts shall include a requirement that the contractor shall adhere to the City's IPM policy. This will be accomplished by using the following procedures:

1. Include a copy of the municipality's IPM policy in the contractor solicitation documents e.g., Request for Proposal or Request for Quote, and make it clear that the pest control services being solicited must comply with IPM policy.
2. Include a copy of the municipality's IPM policy in the contract's specification.
3. Meet with the contractor to review the City's IPM policy.

Municipal Employee's: Municipal employees who are authorized to manage pests are required to implement the City's IPM policy. This will be accomplished by using the following procedures:

1. Use cultural practices and pest prevention measures to minimize the occurrence of pest problems.
2. Set a threshold of tolerance for pests.
3. Use biological and physical controls that are environmentally appropriate and economically feasible to control pests.
4. Use chemical control as a last resort, and then the least toxic product will be used. Where feasible for structural pest control, insecticides will be applied as containerized baits.
5. Avoid the use of pesticides that threaten water quality especially in formulations and situations that pose a risk of contaminating stormwater runoff.
6. Train employees on IPM techniques, pesticides-related stormwater pollution prevention methods, the municipality's IPM policy, and these standard operating procedures.
7. As part of the municipality's annual report for the municipal regional stormwater permit, report on the IPM policy's implementation by showing trends in the quantities and types of pesticides used and suggest reasons for any increases in uses of pesticides that threaten water quality.

GREENPRO
Eco-Effective Pest Control

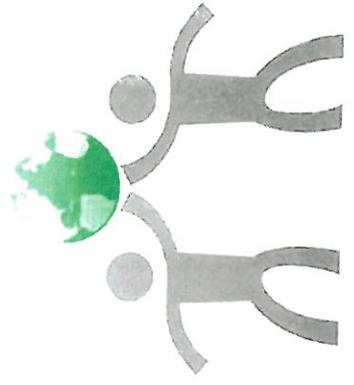

Presenting this certificate of excellence to

The Terminix International Co.

in acknowledgment of your continuing efforts toward professional excellence and environmental awareness in the pest management industry. You have met the GreenPro testing requirements for eco-effective pest control.

SERVICES AGREEMENT

This Services Agreement (this "Agreement") is made and entered into between the City of South San Francisco, a municipal corporation ("City") and Western Exterminator, ("Contractor") effective as of June 15, 2012 (the "Effective Date"). City and Contractor are hereinafter collectively referred to as (the "Parties"). In consideration of their mutual covenants, the Parties hereby agree as follows:

1. Scope of Work. Contractor shall provide the following services and/or materials ("the Work"): **on as needed basis to perform pest control service on city buildings; such as cockroaches, rats, mice, ants, rodents and others.** The Work shall commence on **June 18, 2012 to June 30, 2013.** and work shall be completed to the satisfaction of the City. In the event of a conflict or inconsistency between the text of the main body of this Agreement and Exhibit A, the text of the main body of this Agreement shall prevail.

2. Payment. City shall pay Contractor an amount not to exceed: **Ten thousand dollars (\$10,000)** for the full and satisfactory completion of the Work in accordance with the terms and conditions of this Agreement. The method of payment for the Work shall be set forth as follows: **on as needed basis to perform pest control service on City Buildings.** The amount stated above is the entire compensation payable to Contractor for the Work performed hereunder, including all labor, materials, tools and equipment furnished by Contractor.

3. Independent Contractor. It is understood and agreed that this Agreement is not a contract of employment and does not create an employer-employee relationship between the City and Contractor. At all times Contractor shall be an independent contractor and Contractor is not authorized to bind the City to any contracts or other obligations without the express written consent of the City.

4. Indemnification. To the fullest extent permitted by law, Contractor shall indemnify, defend (with counsel acceptable to the City), and hold harmless the City and its elected and appointed officers, officials, employees, agents, contractors and consultants (collectively, the "City Indemnitees") from and against any and all liability, loss, damage, claims, expenses and costs (including, without limitation, attorneys' fees and costs of litigation) (collectively, "Liability") of every nature arising out of or in connection with Contractor's performance of the Work or Contractor's failure to comply with this Agreement, except such Liability caused by the gross negligence or willful misconduct of the City Indemnitees.

5. Insurance. Prior to beginning the Work and continuing throughout the term of this Agreement, Contractor (and any subcontractors) shall, at Contractor's (or subcontractor's) sole cost and expense, furnish the City with certificates of insurance evidencing that Contractor has obtained and maintains insurance in the following amounts:

A. Workers' Compensation that satisfies the minimum statutory limits.

B. Commercial General Liability and Property Damage Insurance in an amount not less than ONE MILLION DOLLARS (\$1,000,000) combined single limit per occurrence, TWO MILLION DOLLARS (\$2,000,000) annual aggregate, for bodily injury, property damage, products, completed operations and contractual liability coverage. The policy shall also include coverage for liability arising out of the use and operation of any City-owned or City-furnished equipment used or operated by the Contractor, its personnel, agents or subcontractors.

C. Comprehensive automobile insurance in an amount not less than ONE MILLION DOLLARS (\$1,000,000) per occurrence for bodily injury and property damage including coverage for owned and non-owned vehicles.

All insurance policies shall be written on an occurrence basis and shall name the City Indemnitees as additional insureds. The certificates shall contain a statement of obligation on the part of the carrier to notify City of any material change, cancellation, termination or non-renewal of the coverage at least thirty (30) days in advance of the effective date of any such material change, cancellation, termination or non-renewal. The City's Risk Manager may waive or modify any of the insurance requirements of this section.

6. Compliance with all Applicable Laws; Nondiscrimination. Contractor shall comply with all applicable local, state and federal laws, regulations and ordinances in the performance of this Agreement. Contractor shall not discriminate in the provision of service or in the employment of persons engaged in the performance of this Agreement on account of race, color, national origin, ancestry, religion, gender, marital status, sexual orientation, age, physical or mental disability in violation of any applicable local, state or federal laws or regulations.

7. Integrated Pest Management. Attached to this Agreement as **Exhibit B**, and incorporated herein, is the City's current adopted Integrated Pest Management ("IPM") Policy. Contractor hereby acknowledges receipt of the City's IPM Policy. Further, Contractor shall comply with the City's IPM Policy when performing Work under this Agreement.

8. Termination. City may terminate or suspend this Agreement at any time and without cause upon written notification to Contractor. Upon receipt of notice of termination or suspension, Contractor shall immediately stop all work in progress under this Agreement. The City's right of termination shall be in addition to all other remedies available under law to the City.

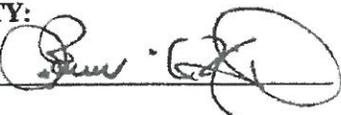

9. Severability. If any term or portion of this Agreement is held to be invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions of this Agreement shall continue in full force and effect.

10. Entire Agreement. This Agreement represents the entire and integrated agreement between the Parties. This Agreement may be modified or amended only by a subsequent written agreement signed by both Parties.

11. Non-Liability of Officials, Employees and Agents. No officer, official, employee or agent of City shall be personally liable to Contractor in the event of any default or breach by City or for any amount which may become due to Contractor pursuant to this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the date written above.

RE: Written Order to Implement an Integrated Pest Management ("IPM") Plan

Dear Mr. Cooper:

The purpose of this letter is to provide Frank + Grossman Landscape Contractors, Inc. ("Contractor") with a written order to implement an Integrated Pest Management ("IPM") Plan for landscaping services within the City of South San Francisco ("City").

Pursuant to Section 12 of the Exhibit A Standard of Services Contents Landscape Maintenance Agreement between the City and Contractor, the City hereby requires Contractor to adopt and comply with an IPM Plan consistent with the IPM-based hierarchical decision making process (established by Provision C.9.d, of Water Board Permit No. R2-2009-0074, Municipal Regional Stormwater NPDES Permit) and the City-approved IPM Policy (attached hereto).

Please acknowledge your acceptance of this written order by signing and returning three copies of this letter to my attention at your earliest convenience.

Best regards,

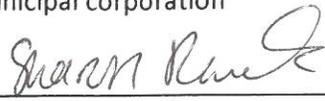

Sharon Ranals

Director of Parks and Recreation

Attachments: Exhibit A Standard of Services Contents Landscape Maintenance, Section 12
City of South San Francisco Integrated Pest Management Policy

The terms of the Letter Agreement are accepted and agreed to as of the date of this letter.

City Clerk

APPROVED AS TO FORM

By: 
City Attorney

- (2) Weeds (grass and broadleaf) growing in the ground cover areas may be sprayed with selective herbicides; however, the dead vegetation must be removed by hand. Weed removal by string trimmer is not allowed.
- (3) Hypericum ground cover shall be mowed to ground level once a year, during the month of February. The bed areas should be raked clean and the debris exported.
- (4) Debris (trash, bottles, etc.) removal from the ground cover areas must be performed as designated for each area's minimum frequency for litter removal. It is the contractor's responsibility to review the sites and allocate sufficient manpower to accomplish this task.
- (5) Ground cover diseases and insect infestations must be identified by the contractor; reported to the Parks Manager, and controlled in a timely manner. Reapplications of control methods may be required. Losses associated with the contractor's negligence in either identifying and/ or controlling a disease or pest shall be the contractor's responsibility to replace or repair.

12. Integrated Pest Management Program

The Contractor shall act as or coordinate with a licensed specialist to identify any Pest management problems that may arise in the street and parkway landscapes.

The Contractor shall be familiar with various integrated pest management (IPM) programs. The Contractor is required to develop and adopt an IPM plan that complies with an IPM plan consistent with the IPM-based hierarchical decision making process (established by Provision C.9.d, of Water Board Permit No. R2-2009-0074, Municipal Regional Stormwater NPDES Permit) and the City-approved IPM Policy to effectively eradicate any diseases or pests which develop during the duration of this contract. The development and execution of the IPM program shall be the responsibility of the Contractor and will not be considered extra work.

The Parks Manager will request to see any or all labels, licenses, certificates, categories, permits or recommendations before chemicals are applied. An IPM plan developed by the Contractor may have to be approved by the Parks Manager and the County Agricultural Commissioner before implementation. A MSDS must be submitted for each chemical to be used prior to any application program.

(A) IPM techniques could include:

1. Biological controls
2. Physical or mechanical controls
3. Cultural controls
4. Reduced risk chemical controls

- (B) Prior to application, the Contractor shall provide a copy of any spray report showing details of areas, times, chemicals, MSDS, and rates of application as provided by a licensed pest control advisor. A copy shall be provided with billing at the end of the month as well.
- (C) The Contractor shall provide the County Agricultural Commissioner's office (as required by law) a monthly record of all pesticides used in the street and parkway landscape facilities. A copy of the same report shall be included with the Contractor's monthly billing to the City. Column "F" of the standard monthly report to the Commissioner shall indicate that a chemical has been used on a South San Francisco facility. Indicate also the types of weeds treated using common names.

13. Prosecution and Progress

Progress of the Work and Time for Completion – The Contractor shall begin work on October 1, 2014.

14. Damage of Loss on Contractor's Supplies or Employer's Property

The City does not assume liability from fire, theft, accident or any other cause resulting in damage or loss of contractor's supplies; materials or equipment, or of personal property or belongings of his employees.

15. Property Damage

- (A) Any private property of City property damaged or altered in any way during the performance of the work under this contract shall be reported promptly to the owner's representative, and shall be rectified in an approved manner back to its former conditions, prior to damage, to the contractor's expense.
- (B) Any damage or unusual dumping noted, or seen, by the contractor, that has occurred by any means other than during the performance of the contractor's work, whether by vandalism or any other means, shall be promptly reported to the owner's representative. Particularly, all hazardous conditions such as holes in sidewalks shall be reported.

16. Definition of Terms

- (A) City – The City of South San Francisco, State of California, acting through the City Council, or other duly authorized agents.
- (B) Director – The duly appointed Director of Parks and Recreation of the City of South San Francisco, acting directly or through properly authorized agents limited by the particular duties entrusted to them.
- (C) Inspector – The Parks Manager or his/her appointed representative, of the City of South San Francisco, limited by the particular duties entrusted to him or them.

**San Mateo Countywide Water Pollution Prevention Program
Model Integrated Pest Management (IPM) Policy
for the City of South San Francisco**

GOAL

The *City of South San Francisco* seeks to protect the health and safety of its employees and the general public, the environment and water quality, as well as to provide sustainable solutions for pest control through the reduced use of pesticides on property including buildings owned or managed by the City by applying Integrated Pesticide Management principles and techniques. The municipal regional stormwater permit requires that the *City of South San Francisco* minimize reliance on pesticides that threaten water quality.

REQUIRED USE OF INTEGRATED PEST MANAGEMENT

Employees implementing pest management controls will use Integrated Pest Management (IPM) techniques that emphasize non-pesticide alternatives. Pesticides will only be used after careful consideration of non-chemical alternatives and then the least toxic chemicals that are effective shall be used. Pest control contractors hired by the City are required to implement IPM to control pests. This will be achieved by hiring only IPM-certified pest control contractors or by including contract specifications requiring contractors to implement IPM methods.

The City will establish written standard operating procedures for pesticide use to ensure implementation of this IPM policy and to require municipal employees and pest control contractors to comply with the standard operating procedures.

The *City of South San Francisco* will track employee and contractor pesticide use and prepare an annual report summarizing pesticide use and evaluating pest control activities performed consistent with the municipal regional stormwater permit's requirements.

The *City of South San Francisco* will review its purchasing procedures, contracts or service agreements with pest control contractors and employee training practices to determine what changes, if any, need to be made to support the implementation of this IPM Policy.

The *City of South San Francisco* will perform educational outreach and/or support Countywide or regional efforts to educate residential and commercial pesticide users on a) goals and techniques of IPM, and b) pesticide related water quality issues consistent with the municipal regional stormwater permit's requirements.

The IPM-based hierarchical decision making process that will be used to control pests will include the following:

1. Based on field observations evaluate locations and sites where pest problems commonly occur to determine pest population, size, occurrence, and natural enemy population, if

Narrative Discussion of LID Feasibility or Infeasibility

LID Discussion of Infeasibility

889 Mission Rd. Mixed Use Project

Description:

The 889 McLellan Rd. project was given discretionary approval in March of 2011 when it was approved by the South San Francisco City Council. After final approval the project was placed on hold due to economic conditions. The project was dormant until December 2013, when the project developer contacted the Cities Environmental Compliance Program about submittal of building plans. At this time the discussion of Stormwater LID for this project started and has continued since they submitted building plans to the City.

889 McLellan Rd. may be using the special project credits depending upon the availability to use multiple small area of landscaping for flow through planters and bioretention. This is a potential project and using special project credits may not be necessary for Stormwater treatment. Currently the project is in the building plan submittal phase. It will be held here until all Stormwater regulations meet current standard and are approved by the Control Authority. Currently the Environmental Compliance Program is working with the project Planners, Developers and Engineers to see that the regulations are met. As of now the project looks like it will be able to capture and treat its entire run off and treat it through bioretention and flow through planters. The FAR is still to be determined depending upon the site features.

1. Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use.

The Countywide Program's infiltration/harvesting and use feasibility screening worksheet and rainwater harvesting and use worksheet was completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and reuse. This project is adjacent to the Bay Area Rapid Transit (BART) South San Francisco Station and consequently the BART tube is underground just west of the site. These conditions will not allow for infiltration as it may have a potential to cause problems with the BART tube. There is not enough for demand rainwater harvesting/reuse for this project, giving it the infeasible status.

2. Feasibility/Infeasibility of Onsite LID Treatment.

The project site was reviewed with regard to the feasibility/infeasibility of onsite LID treatment. The results of this review showed that it is infeasible to treat the entire C.3.d amount of runoff with harvesting/use or Bio infiltration LID treatment measures. This project will be using LID Biotreatment measures via flow-through planters and bioretention areas. The findings of this review are presented below.

a. On-site Drainage Conditions.

The site drainage is gravity from the roof and courtyard area, including the site slope from the roof is steep, the direction of flow is in all directions, and the site was divided

into drainage management areas that drain into a total of 11 separate stormwater treatment measures areas.

889 Mission Rd. Mixed Use Project continued

b. Self-treating and Self-Retaining Areas and LID Treatment Measures.

The area has 11 different LID Biotreatment areas that either: flow through planters or bioretention.

c. Maximizing Flow to LID Features and Facilities.

Drainage to LID treatment is via gravity to bioretention and flow through planters that double as landscape features around the perimeter of the site.

d. Constraints to Providing On-site LID.

Tentatively the design will allow Full LID treatment onsite or on an easement on the south side of the project. The areas not covered by buildings are a drive isle to the underground parking area or are landscaping.

- i. Impervious paved areas: There are no pervious paved areas.
- ii. Landscaped areas: All landscaped areas on site are tentatively used for LID treatment.

Feasibility/Infeasibility of Off-Site LID Treatment:

The project does not need off-site treatment.

Current Status:

This project has been sent back to the developer on December 15, 2014 and is on hold and has will be until plans are resubmitted to the building department.

Miller Avenue Senior Housing

Description:

The Miller Ave senior housing project is a 91 unit mixed use development with office space on the first floor and 91 affordable housing units above it. It is a total of 5 stories. The project was deemed complete by the planning department on June 30th, 2015. The project is going to the planning commission in August of 2015 for entitlements. The proposed project will cover the entire site. The project is proposing a mix of LID and non-LID measures. The non-LID measures will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program

Currently the Environmental Compliance Program is working with the project Planners, Developers and Engineers to see that the regulations are met. It is still too early to tell to what extent non-LID measures will be used.

1. Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use

The Countywide Program's infiltration/harvesting and use feasibility screening worksheet was completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and use.

2. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 100% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

- a. **On-site Drainage Conditions.** The building occupies the entire site, so the site is divided into drainage management areas based on the roof areas that are tributary to each rainwater leader. A majority of the roof drains to flow-through planters located on podium, with the remaining roof and podium draining to a non-LID media filter in the garage.
- b. **Self-treating and Self-Retaining Areas and LID Treatment Measures.** There are regular planters (self-treating) and flow-through planters (LID features) located in the podium courtyard.
- c. **Maximizing Flow to LID Features and Facilities.** The routing of drainage has been optimized to route as much as possible to flow-through planters located on podium. There is approximately 700 square feet of flow-through planters on podium that receive 18,000 square feet of roof runoff. The remaining roof and the impervious pavement on podium is discharged to a non-LID facility.
- d. **Constraints to Providing On-site LID.** The drainage management areas that are proposed to drain to tree-box type high flow rate biofilters and/or vault-based high flow rate media filters include no areas that are not covered by buildings. The entire site is covered by buildings. The media filter will be located above-ground in the garage and

the discharge from the media filter box will discharge to the face of curb on Miller Avenue, since there is no storm drain system fronting the project.

Miller Avenue Senior Housing Continued.

3. **Feasibility/Infeasibility of Off-Site LID Treatment.** The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.
 - i. The project proponent does not own or otherwise control land within the same watershed of the project that can accommodate in perpetuity off-site bioretention facilities adequately sized to treat the runoff volume of the primary project.
 - ii. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

- present. Identify conditions that contribute to the development of pest populations, and decisions and practices that could be employed to manage pest populations
2. Design, construct, and maintain landscapes and buildings to reduce and eliminate pest habitats;
 3. Modify management practices including watering, mulching, waste management, and food storage to discourage the development of pest population;
 4. Modify pest ecosystems to reduce food, water sources, and harborage;
 5. Prioritize the use of physical controls such as mowing weeds, using traps, and installing barriers;
 6. Use biological controls to introduce or enhance a pests' natural enemies;
 7. When pest populations reach treatment thresholds (based on how much biological, aesthetic, economic or other damage is tolerable) non-pesticide management activities will be evaluated before considering the use of pesticides;
 8. When pesticides are necessary, select reduced risk pesticides and use the minimum amounts needed to be effective;
 9. Apply pesticides at the most effective treatment time, based on pest biology, monitoring, and other variables, such as weather, seasonal changes in wildlife use, and local conditions; and
 10. Whenever possible, use pesticide application methods, such as containerized baits, that minimize opportunities for mobilization of the pesticide in stormwater runoff.

Departments performing pest management activities will identify an IPM coordinator who is responsible for assisting staff with implementation of this IPM policy.

BACKGROUND

Pesticides are defined as: any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest. Pests can be insects, rodents and other animals, unwanted plants (weeds), bacteria or fungi. The term pesticide applies to herbicides, fungicides, insecticides, rodenticides, molluscicides and other substances used to control pests.

Integrated Pest Management (IPM) is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and nontarget organisms, and the environment.

IPM techniques could include biological controls (e.g., ladybugs and other natural enemies or predators); physical or mechanical controls (e.g., hand labor or mowing, caulking entry points to buildings); cultural controls (e.g., mulching, alternative plant type selection, and enhanced cleaning and containment of food sources in buildings); and reduced risk chemical controls (e.g., soaps or oils).

City of South San Francisco owned or managed property/facility includes but is not limited to parks and open space, golf courses, roadsides, landscaped medians, flood control channels and other outdoor areas, as well as municipal buildings and structures.
