

SELECTED TRASH HOT SPOT IDENTIFICATION FORM

City of Alameda

Site 4: Alameda Park Beach

Site Information

Waterbody: San Francisco Bay, Central

Site Location: Southern shoreline of Alameda, at the Alameda Park Beach by the Encinal Boat Ramp and jetty, approximately 250 yards

Jurisdiction: City of Alameda

Ownership: Public domain shoreline - high tide wrack line and high intertidal zone

Agency Contact: Jim Barse, Clean Water Program Specialist, Public Works Department, (510) 749-5840

Justification

To determine the finalized list of proposed Trash Hot Spots along the City of Alameda (City) shoreline, City personnel: (a) completed a desktop screening, including input from Public Works and Recreation & Park Department supervisors, and the EBRPD Crown Beach Supervisor; (b) performed a field screening of potential trash hot spots using a site “trash scoring” protocol adapted by ACCWP from the RWQCB-cited Urban Rapid Trash Assessment methodology; and, (c) considered the stated (MRP) purposes of the Trash Hot Spot selection and cleanup program to abate shoreline trash loading and to learn more about the sources and patterns of trash loading along the shoreline. The City’s set of proposed Hot Spots selections includes trash-impacted shorelines on several sides of the island of Alameda and will provide both widespread trash abatement and a good range of information on trash loading patterns. This Alameda Park Beach San Francisco Bay shoreline site had the highest “trash score” of potential sites along the southern shoreline of Alameda. Small pieces of persistent, buoyant litter such as plastics and Styrofoam are intermingled in the high-tide wrack line along the entire stretch of this site. Photographs of this trash-impacted shoreline at 50-foot intervals are attached.
