

Hi Dale,

In regard to the MRP Tentative Order, please omit bike paths from this requirement. The whole bay area needs more people riding bikes. For that to happen, safe routes need to be built. New routes are expensive, so we should not make them cost even more. These bike paths are narrow and have no toxic oils dripping on them.

I do not believe there will be any measurable run off issues if you keep them out of the MRP Tentative Order.
