**AMENDED CLEAN WATER ACT SECTION 401 WATER QUALITY STANDARDS
CERTIFICATION FOR THE INTERSTATE-215 AND VAN BUREN BOULEVARD
REALIGNMENT PROJECT, SOUTHEASTERN MORENO VALLEY AREA, COUNTY
OF RIVERSIDE, CALIFORNIA (ACOE REFERENCE NO. NOT AVAILABLE)
(SARWQCB PROJECT NO. 332010-25)**

Dear Mr. Marcinek:

We received your January 21, 2011 request to revise the January 10, 2011, Clean Water Act Section 401 Water Quality Standards Certification (Certification) for the subject project. We have considered your request, and revised the Certification accordingly. Revisions are shown by striking out removed text, and underlining added text. Text that is neither stricken nor underlined remains unchanged. This amended Certification replaces the Certification issued for this project dated January 10, 2011.

On September 9, 2010, we received an application for Clean Water Act Section 401 Water Quality Standards Certification ("Certification") from the County of Riverside for the reconstruction of the existing "tight diamond" interchange at I-215 and Van Buren Boulevard, south of Moreno Valley in unincorporated Riverside County. This letter responds to your request for certification that the proposed project, described in your application and summarized below, will comply with State water quality standards outlined in the Water Quality Control Plan for the Santa Ana River Basin (1995) (Basin Plan) and subsequent Basin Plan amendments:

Project Description: Reconstruct the existing Van Buren Blvd. / I-215 interchange. Replace existing structures over I-215 and the adjacent BNSF railroad tracks with two separate bridges, similar to the existing configuration. Reconstruction of the existing "tight diamond" interchange with a modified interchange configuration. Reconstruction of Van Buren Boulevard to provide four through lanes through the interchange. East of the interchange, Van Buren Boulevard will be extended to the south, generally parallel to I-215 and

California Environmental Protection Agency

adjacent to the March Field Air Museum. Realignment of all entrance and exit ramps in northbound and southbound directions of I-215/Van Buren Boulevard interchange. The work will take place within Sections 14, 15, 22, 23, 26, 35, and 36 of Township 3 South, Range 4 West, of the U.S. Geological Survey *Steele Peak* quadrangle map (33.89° N/ 117.27° W).

Receiving water: Unnamed wetland and ephemeral channels, Perris Valley storm drain, San Jacinto River

Fill area: ~~0.16~~ 0.1646 acre of permanent impact to a wetland habitat, ~~0.64~~ 0.47 acre of temporary impact to a streambed habitat (~~4950~~ 1,278 linear feet), and ~~0.04~~ 0.21 acres of permanent impact to a streambed habitat (~~20~~ 1,039 linear feet).

Dredge/Fill volume: N/A

Federal permit: U.S. Army Corps of Engineers Nationwide Permit No. 14

You have proposed to mitigate water quality impacts as described in your Certification application. The proposed mitigation is summarized below:

Onsite Water Quality Standards Mitigation Proposed:

- Storm Water Pollution Prevention Plan (SWPPP)-directed BMPs associated with construction activities and Water Quality Management Plan (WQMP)-directed post-construction BMPs will be implemented.

Offsite Water Quality Standards Mitigation Proposed:

- The applicant will purchase 1.6 acres in credits (2:1 restoration/enhancement value) from either the Santa Ana Watershed Association (SAWA) or the County's in-lieu fee program for restoration and enhancement.

Should the proposed project impact state- or federally-listed endangered species or their habitat, implementation of measures identified in consultation with U.S. Fish and Wildlife Service and the California Department of Fish and Game will ensure those impacts are mitigated to an acceptable level. Appropriate BMPs will be implemented to

reduce construction-related impacts to Waters of the State according to the requirements of Order No. R8-2010-0033 (NPDES Permit No. CAS618033), commonly known as the Riverside County Municipal Storm Water Permit, and subsequent iterations thereof. Order No. R8-2010-0033 requires that you substantially comply with the requirements of State Water Resources Control Board's General Permit for Storm Water Discharges Associated with Construction Activity, including the preparation of a Storm Water Pollution Prevention Plan (SWPPP) illustrating BMPs associated with construction activities and a Water Quality Management Plan (WQMP), which illustrates post-construction BMPs, as well as reporting protocols.

The proposed project is subject to a Nationwide Permit from the U.S. Army Corps of Engineers in compliance with Section 404 of the Clean Water Act. Pursuant to the California Environmental Quality Act (CEQA), the County of Riverside adopted a Mitigated Negative Declaration for the project in July, 2009. Pursuant to California Code of Regulations, Title 14, Section 15096, subdivision (f), the Regional Board must consider the environmental effects of the project as shown in the associated negative declaration prior to reaching a decision on the project. The Regional Board has considered the County's Mitigated Negative Declaration in the issuance of this Certification and finds that changes or alterations have been required, or incorporated into the proposed project, which avoid or mitigate impacts to water quality to a less than significant level.

This 401 Certification is contingent upon the execution of the following conditions:

- 1) The applicant must comply with the requirements of the applicable Clean Water Act section 404 permit.
- 2) All materials generated from construction activities associated with this project shall be managed appropriately. This shall include identifying all potential pollution sources within the scope of work of this project, and incorporating all necessary pollution prevention BMPs as they relate to each potential pollution source identified.
- 3) The project proponent shall utilize Best Management Practices during project construction to minimize the controllable discharges of sediment and other wastes to drainage systems or other waters of the state and of the United States.

- 4) Substances resulting from project-related activities that could be harmful to aquatic life, including, but not limited to, petroleum lubricants and fuels, cured and uncured cements, epoxies, paints and other protective coating materials, portland cement concrete or asphalt concrete, and washings and cuttings thereof, shall not be discharged to soils or waters of the state. All waste concrete shall be removed.
- 5) Motorized equipment shall not be maintained or parked within or near any stream crossing, channel or lake margin in such a manner that petroleum products or other pollutants from the equipment may enter these areas under any flow conditions. Vehicles shall not be driven or equipment operated in waters of the state on-site, except as necessary to complete the proposed project. No equipment shall be operated in areas of flowing water.
- 6) Proposed mitigation shall be timely implemented. Materials documenting the purchase of necessary mitigation credits shall be provided to this office prior to discharge of fill to, or to the dredging or excavation of material from, waters of the state.

Under California Water Code, Section 1058, and Pursuant to 23 CCR §3860, the following shall be included as conditions of all water quality certification actions:

- (a) Every certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to Section §13330 of the Water Code and Article 6 (commencing with Section 3867) of this Chapter.
- (b) Certification is not intended and shall not be construed to apply to any activity involving a hydroelectric facility and requiring a FERC license or an amendment to a FERC license unless the pertinent certification application was filed pursuant to Subsection §3855(b) of this Chapter and that application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.
- (c) Certification is conditioned upon total payment of any fee required under this Chapter and owed by the applicant.

If the above stated conditions are changed, any of the criteria or conditions as previously described are not met, or new information becomes available that indicates a water quality problem, the Regional Board may require the applicant to submit a report of waste discharge and obtain Waste Discharge Requirements.

John Marcinek
County of Riverside

February 22, 2011

In the event of any violation or threatened violation of the conditions of this certification, the holder of any permit or license subject to this certification shall be subject to any remedies, penalties, process or sanctions as provided for under state law. For purposes of section 401(d) of the Clean Water Act, the applicability of any state law authorizing remedies, penalties, process or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this certification.

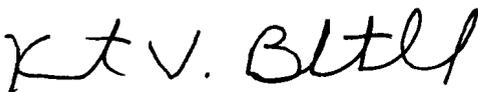

Violations of the conditions of this certification may subject the applicant to civil liability pursuant to Water Code section 13350 and/or 13385.

This letter constitutes a Water Quality Standards Certification issued pursuant to Clean Water Act Section 401. I hereby issue an order certifying that any discharge from the referenced project will comply with the applicable provisions of Sections 301 (Effluent Limitations), 302 (Water Quality Related Effluent Limitations), 303 (Water Quality Standards and Implementation Plans), 306 (National Standards of Performance), and 307 (Toxic and Pretreatment Effluent Standards) of the Clean Water Act, and with other applicable requirements of State law.

This discharge is also regulated under State Water Resources Control Board Order No. 2003-0017-DWQ (Order No. 2003-0017-DWQ), "General Waste Discharge Requirements for Dredge and Fill Discharges That Have Received Water Quality Certification" which requires compliance with all conditions of this Water Quality Standards Certification. Order No. 2003-0017-DWQ is available at:
www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2003/wqo/wqo_2003-0017.pdf

Should there be any questions, please contact Marc Brown at (951) 321-4584, or Mark Adelson at (951) 782-3234.

Sincerely,

Kurt V. Berchtold
