Subject: Order No. R8-2016-0003

Joanne Schneider,

Per our telephone conversation on/or about April 22, 2016, regarding the agenda item on the Conditional Waiver of Waste Discharge Requirements for Discharges from Agriculture Operations, I am forwarding my comments for consideration at your request. As we discussed I proposed that the language of the order covering physical contaminants and Trash be expanded to include references to the requirements of Title 14 and the Trash Policy adopted by the State Water Resource Control Board.

I have attached my notes and suggested additional language in red (Ag Waiver Notes Docx), referencing various provisions of T-14 that may strengthen the language in the Waiver. In addition, I included the "Trash" definition found in the final documentation of the Amendment to the Water Quality Control Plan for the Ocean Waters of California to Control Trash and Part 1 Trash Provisions of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, and Estuaries of California. I have also attached a copy of Title 14 for your review and analysis.

As you review my notes, you may have additional matter to discuss or seek clarification as part of the public process. Please feel free to contact me for additional comments or suggested language changes to include as part of the public record.

Your careful consideration of my comments would be greatly appreciated.

Sincerely,

Paul Ryan
