Subject: Dredge comments

Honorable Board,

I hope you will do what is most environmentally protective on our besieged coast. In particular, I am extremely concerned about a plan to dredge in the Morro Bay Estuary State Park Marina. This proposed dredge would be right next to (5-10 meters away!) from our State Marine reserve. This is a very dangerous situation. They haven't dredged in several decades and they want to make this a bigger marina for bigger boats. The place needs to be shut down except to kayaks. Please help me protect the SMR and Morro Bay Estuary by being as protective as the law demands (MLPA!! and CEQA).

Thanks

Joey Racano
