Subject: Wetland Area and Protection Policy

Dear Jeanine Townsend:

My husband and I support new state regulations to protect the California wetlands which are not connected to navigable waterways. These wetlands are very valuable as habitats for birds, fishes, reptiles, and amphibians. They also serve as a stopover for migrating birds, as well as food sources and recreational opportunities for humans.

Please do what you can to protect these wetlands. Over 90% of California wetlands are gone, and we must protect what remains.

Sincerely,

Mary Edith & Gerald Moore
