Subject: wholesaler supply information

Ms. Frevert,

Attached please find the Imperial Irrigation District's water supply information regarding Colorado River supplies the District delivers to local urban water systems, as required in the May 2016 emergency drought regulations. This will also be posted on IID's website at <http://www.iid.com/water/municipal-industrial-and-commercial-customers/municipal-water-providers> and provided to the City Managers for our affected urban water suppliers (Brawley, Calexico, El Centro and Imperial) to support self-certification efforts should they choose to pursue that option. The Colorado River is a very different supply from those the SWRCB is likely most familiar with, and operates under very unique policies, regulations and conditions. I would be very happy to discuss these with you and/or your staff if further explanation would be helpful.

-Tina
