REISSUANCE OF THE CLEAN WATER ACT SECTION 401
WATER QUALITY CERTIFICATION FOR THE SONOMA COUNTY AGRICULTURAL
PRESERVATION AND OPEN SPACE DISTRICT NORTH SLOPE SONOMA MOUNTAIN
RIDGE TRAIL PROJECT, SONOMA COUNTY, CALIFORNIA, (FILE NO. SB09003IN)

PROJECT: Sonoma County Agricultural Preservation and Open Space District
(SCAPOS) – North Slope Sonoma Mountain Ridge Trail Project (Project)

APPLICANT: Mr. Kim Batchelder
Sonoma County Agricultural Preservation and Open Space District
747 Mendocino Avenue, Suite 100
Santa Rosa, CA 95401

This Clean Water Act section 401 water quality certification (Certification) responds to your
request on behalf of SCAPOS (applicant) for a Certification of the subject Project. Your
application was received on April 12, 2012, and was determined to be complete on
May 14, 2012.

ACTION: □ Order for Standard Certification
☑ Order for Technically Conditioned Certification
□ Order for Denial of Certification
□ Order for Waiver of Waste Discharge Requirements

AUTHORIZATION:

This Certification authorizes the Project with additional conditions for water quality protection.
This Project was originally certified on October 13, 2009. On October 14, 2011 the State Water
Resources Control Board (State Water Board) issued an amendment to the Certification due to
minor Project changes. This Certification expired with the U.S. Army Corps of Engineers
(Corps) permit on November 9, 2011. On April 12, 2012, the State Water Board received an
application from SCAPOS, requesting Certification to complete the previously authorized
project activities that remained to be completed. The State Water Board issued a public notice
on June 15, 2012, regarding SCAPOS’s request for Certification. This Certification includes all
the Project modifications that have occurred since the first Certification issued on
October 13, 2009.
The Project involves the creation of a multi-use trail for low-impact recreational access. The proposed remaining activities include the redistribution of river rock for the creation of 10 armored ford crossings (wet crossings) and the replacement of an existing wooden vehicle bridge which spans the South Fork of Matanzas Creek, connecting to the Jacobs Ranch driveway. The bridge replacement activities involve the demolition of the existing concrete abutments up to an elevation approximately 10 feet from the bridge deck and replacement of the deck with a modified railroad flatcar with a wood deck.

The Project is located approximately 60 miles north of San Francisco in Sonoma County on the north slope of Sonoma Mountain. The trail extends from Jacobs Ranch located south of Sonoma Mountain Road in an easterly direction towards Jack London State Park. More details about the Project and Project impacts are described and shown in Attachments B, C, and D of this Certification.

**STANDARD CONDITIONS:**

1. This Certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to the Water Code, section 13330, and the California Code of Regulations (Cal. Code Regs.), title 23, section 3867 and following.

2. This Certification action is not intended and shall not be construed to apply to any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license or an amendment to a FERC license, unless the pertinent Certification application was filed pursuant to Cal. Code Regs., title 23, section 3855, subdivision (b), and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.

3. This Certification is conditioned upon total payment of any fee required under Cal. Code Regs., title 23, and owed by the applicant.

**ADMINISTRATIVE CONDITIONS:**

1. The State Water Board reserves the right to suspend, cancel, or modify and reissue this Certification, after providing notice to SCAPOSD and/or responsible contractor/subcontractor, if the State Water Board determines that the Project fails to comply with any of the terms or conditions of this Certification.

2. A copy of this Certification, the application, and supporting documentation must be available at the Project site during construction for review by site personnel and agencies. A copy of this Certification must also be provided to the contractor and all subcontractors who will work at the Project site. All personnel performing work on the proposed Project shall be familiar with the content of this Certification and its posted location on the Project site.

3. SCAPOSD shall grant State Water Board and Regional Water Quality Control Board (Regional Water Board) staff, or an authorized representative, upon presentation of credentials and other documents as may be required by law, permission to enter the Project site at reasonable times, to ensure compliance with the terms and conditions of this Certification and/or to determine the impacts the Project may have on waters of the state.
ADDITIONAL CONDITIONS:

1. Best Management Practices (BMPs)
   
   a. Appropriate BMPs shall be implemented throughout Project activities to help minimize sediment disturbance and suspension within surface waters as described in this Certification, and also in the Mitigated Negative Declaration (MND) (November 2007) for the SCAPOS Project. All BMP materials shall be onsite prior to construction activity and ready for use. BMPs shall be in full compliance with all specifications governing the proper design, installation, operation, and maintenance of such management practices.
   
   b. No work shall be conducted during the winter period (November 1-April 15), unless prior written approval has been obtained from the State Water Board 401 Program Manager.
   
   c. Substances resulting from Project-related activities that could be harmful to aquatic life, including but not limited to petroleum lubricants and fuels, cured and uncured cements, epoxies, paints and other protective coating materials, Portland cement concrete or asphalt concrete, and washings and cuttings thereof, shall not be discharged to waters of the state.
   
   d. Vehicles shall not be driven or equipment operated in waters of the state on the Project site, except as necessary to complete the proposed Project.
   
   e. Equipment shall not be maintained or parked within or near any stream crossing, channel, or water body margin in such a manner that petroleum products or other pollutants from the equipment may enter these areas under any flow conditions. Fueling, lubrication, maintenance, storage, and staging of vehicles and equipment shall be outside of waters of the state, and shall not result in a discharge or a threatened discharge to waters of the state.
   
   f. A daily log shall be maintained to note the presence and absence of waste releases from vehicles and equipment within or adjacent to waters of the State. Copies of the daily log shall be available on site. Daily visual inspections for waste releases of all vehicles and equipment parked or operating within or adjacent to waters of the State shall be conducted before the vehicles or equipment begin conducting work for the day. Spillage and leaks shall be reported in the daily log during any point that they occur during the day. Presence of any spillage from leaks shall be reported in the daily log and contaminated soils shall be immediately removed from the site and disposed of at an approved area or facility. State Water Board staff may request this information at any time. Any waste releases shall be reported to State Water Board and Regional Water Board staff within 24 hours with an explanation of how the problem was resolved.
   
   g. All work areas shall be effectively isolated from stream flows using suitable control measures before commencement of any in-water work. The diverted stream flow shall not be contaminated by construction activities. Structures for isolating the in-water work area and/or diverting the stream flow (e.g., coffer dam, geo-textile silt curtain) shall not be removed until all disturbed areas are cleaned and stabilized.
h. In the event of rain, the disturbed in-water work area shall be temporarily stabilized before stream flow exceeds the capacity of the diversion structure. The disturbed area shall be stabilized to avoid contact with the stream flow.

i. If re-vegetation of disturbed areas is required, viable seed of native species collected within the same watershed, or the greater watershed, shall be used.

j. When the Project is completed, any trash, excess material or other debris shall be removed from the work area and disposed of properly.

k. Stream diversion activities shall occur only between April 16st and October 31st.

l. Prior to dewatering and diversion activities, a biologist shall be on site to ensure no sensitive aquatic species are stranded in areas of dewatering and diversion.

m. Stream diversion structures shall be removed when diversion is no longer necessary. All diverted streams shall be returned to their original condition.

2. SCAPOSD shall implement the Applicant-Proposed Measures (APMs) and Mitigation Measures (MMs) described in the MND for the Project.

3. Any structure/culvert placed within a stream where fish (as defined in Fish and Game Code section 45) do or may occur, shall be designed, constructed and maintained such that it does not constitute a barrier to upstream or downstream movement of aquatic life, or cause an avoidance reaction by fish that impedes their upstream or downstream movement. This includes but is not limited to the supply of water at an appropriate depth, temperature, and velocity to facilitate upstream and downstream fish migration.

4. Bridges, culverts, dip crossings, or other structures shall be installed so that water flow is not impaired.

5. Cofferdams and water barrier construction shall be adequate to prevent seepage into or from the work area. Cofferdams or water barriers shall not be made of earth or other substances subject to erosion or that contain pollutants. When dewatering is necessary to create a temporary dry construction area, the water shall be pumped through a sediment settling device before it is returned to the water body. The enclosure and the supportive material shall be removed when the work is completed and removal shall proceed from downstream to upstream.

6. A copy of this Certification must be provided to the contractor and all subcontractors who will work at the work site, and must be in their possession at the work site. The Project proponent and all contractors and subcontractors shall be familiar with all conditions of this Certification.

MITIGATION CONDITIONS:

Total Project impacts are 0.009 acre (75 linear feet) of permanent impacts and 0.002 acres (10 linear feet) of temporary impacts of jurisdictional waters. All impacts to waters of the state requiring mitigation will be mitigated by re-vegetation of the streambanks adjacent to the vehicular bridge across the South Fork Matanzas Creek. SCAPOSD is responsible for
the implementation of the Mitigation Monitoring and Reporting Program (MMRP) as
described in the Comments and Responses For Mitigated Negative Declaration: North
Slope Sonoma Mountain Ridge Trail Project (February, 2008) – Section 5. A five year
monitoring plan will be implemented with an 85 percent survival rate of all proposed plant
species. Yearly reporting will be required for a minimum of five years. If vegetative cover
does not meet the survival rate performance standard, SCAPOSD shall consult with the
State Water Board regarding remedial actions. Remedial actions might include additional
planting of appropriate species. SCAPOSD will submit monitoring reports by November 1st
of each monitoring year to the 401 Program Managers of the State Water Resources
Control Board (State Water Board) and the appropriate Regional Water Board(s).

Reports shall be directed to: Program Manager, Certification and Wetlands Program, at the
following State and appropriate Regional Water Board office(s):

State Water Resources Control Board
Division of Water Quality
1001 "I" Street, 15th Floor
Sacramento, CA 95814

North Coast Regional Water Quality Control Board
5550 Skylane Boulevard, Suite A
Santa Rosa, CA 95403

San Francisco Bay Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

VIOLATIONS:

1. SCAPOSD or its contractor and subcontractors shall verbally report any non-compliance to
the 401 Program Manager of the appropriate Regional Water Board where the Project is
located within 24 hours from the time when SCAPOSD or its contractor and subcontractors
become aware of the circumstances.

2. SCAPOSD or its contractor and subcontractors shall report all violations of any terms or
conditions of this Certification in writing to the State Water Board and appropriate Regional
Water Board within seven (7) consecutive days from the time SCAPOSD becomes aware of
the violation. The written report shall contain:

   a. A description of the violation and its cause;

   b. The period of the violation event, including dates and times, and if the violation has not
been corrected, the anticipated time the violation is expected to continue; and;

   c. Steps taken or planned to reduce, eliminate, and prevent recurrence of the violation.

3. In the event of any violation or threatened violation of the conditions of this Certification, the
violation shall be subject to any remedies, penalties, processes, or sanctions as provided for
under State law. For purposes of the Clean Water Act (CWA) section 401(d), the
applicability of any State law authorizing remedies, penalties, processes, or sanctions for the
violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this Certification Order.

4. In response to a suspected violation of any condition of this Certification Order, the State Water Board may require the holder of any permit or license subject to this Certification to furnish, under penalty of perjury, any technical or monitoring reports the State Water Board deems appropriate, provided that the burden, including the cost of the reports, shall be in reasonable relationship to the need for the reports and the benefits to be obtained from the reports.

5. In response to any violation of the conditions of this Certification Order, the State Water Board may add to or modify the conditions of this Certification as appropriate to ensure compliance.

STATE WATER BOARD CONTACT PERSON:

If you have any questions, please contact State Water Board Environmental Scientist Catherine Woody at (916) 341-5785, via e-mail at CWoody@waterboards.ca.gov, or by mail at:

State Water Resources Control Board
401 Certification & Wetland Program
P.O. Box 100, Sacramento, CA 95812-2000 (by mail)
1001 I Street, 15th Floor, Sacramento, CA 95814 (by hand delivery)

You may also contact Bill Orme, Chief of the Water Quality Certification Unit, at (916) 341-5464 or via e-mail at borme@waterboards.ca.gov

CALIFORNIA ENVIRONMENTAL QUALITY ACT:

SCAPOS is the Lead Agency responsible for compliance with the California Environmental Quality Act (CEQA; Pub. Resources Code, § 21000 et seq.) The SCAPOS approved a MND for the project on November 15, 2007. In making its determinations and findings, the State Water Board must presume that the MND comports with the requirements of CEQA and is valid (Pub. Resources Code, § 21167.3, subd. (b).) As such, the State Water Board has reviewed and considered the environmental documents and all proposed mitigation measures.

The State Water Board makes the following findings:

The State Water Board reviewed and evaluated the significant and potentially significant impacts to water quality identified in the MND. The various APMs and MMs discussed in the MND were adopted to avoid and minimize Project impacts. The various MMs related to water quality include development of a Construction Stormwater Pollution Prevention Plan (SWPPP) with accidental spill control procedures, maintenance and training practices implementation of flood and erosion structure damage protection measures, implementation of compensatory mitigation for impacts to special status species, invasive species controls, and cessation of construction during heavy precipitation. The State Water Board finds that these mitigation measures for significant and potentially significant water quality impacts as identified in the MND, along with the measures proposed in the application for Certification and supplemental
application materials, the conditions in the Certification, and the compensatory mitigation described in this Certification and Attachment B – Project Information Sheet to be adequate to reduce water quality impacts to less than significant levels.

The State Water Board previously determined that the conditions requiring the amendment to the Project Certification on October 14, 2011 did not require a subsequent or supplemental CEQA document. The State Water Board has determined that none of the factors that would trigger the need for subsequent or supplemental environmental analysis of the Project under Public Resources Code section 21166 or Cal Code ofRegs, title 4, sections 15162 and 15163, exist as a result of this modification. The State Water Board concludes this re-issuance is not a change in the Project that (1) has the potential to create a new significant effect not previously analyzed, or that (2) will be undertaken under a substantial change in the circumstances requiring major revisions to previous CEQA document, or that (3) will be undertaken without consideration of any new information of substantial importance previously unknown at the time of the original MND.

WATER QUALITY CERTIFICATION:

I hereby reissue the Certification for Sonoma County Agricultural Preservation and Open Space District (FILE NO. SB09003IN) certifying that as long as all of the conditions listed in this Certification are met, any discharge from the referenced Project will comply with the applicable provisions of Clean Water Act sections 301 (Effluent Limitations), 302 (Water Quality Related Effluent Limitations), 303 (Water Quality Standards and Implementation Plans), 306 (National Standards of Performance), and 307 (Toxic and Pretreatment Effluent Standards). This discharge is also regulated pursuant to State Water Board Water Quality Order No. 2003-0017-DWQ which authorizes this Certification to serve as Waste Discharge Requirements pursuant to the Porter-Cologne Water Quality Control Act § 13000 et seq.

Except insofar as may be modified by any preceding conditions, all Certification actions are contingent on (a) the discharge being limited and all proposed mitigation being completed in strict compliance with the Project Information Sheet (Attachment B) and the tables in Attachment C, and (b) compliance with all applicable requirements of Statewide Water Quality Control Plans and Policies, the Regional Water Boards’ Water Quality Control Plans and the MND for the SCAPOSD Project.

Thomas Howard
Executive Director
